4. They emphasised building on the existing bilateral cooperation programme in innovation and reduction of greenhouse gas emission, research on clean development and climate change and also on promotion of energy security and sustainable energy supply. The leaders noted with satisfaction the intensification of the dialogue at various levels between the two strategic partners as well as between India and individual EU Member States. The leaders welcomed the formation of a Delegation for Relations with India in the European Parliament. They agreed that the creation of an Indian parliamentary caucus for relations with the EU would encourage interaction between Parliamentarians from the two sides. The leaders also underlined the need to keep increasing people-to-people contacts between India and EU Member States for businesspeople, professionals and members of official delegations, as well as researchers, scientists, students, academics and civil society representatives.
5. India and the EU reaffirmed their commitment to the rules-based multilateral trading system and to a deeper level of bilateral trade relations. The successful and timely outcome of the Doha

Development Agenda (DDA) multilateral trade negotiations remains the foremost trade policy priority of the two sides. Both sides are determined to work closely together to ensure the successful conclusion of the DDA negotiations through a comprehensive, balanced and ambitious outcome in all areas of negotiation. Both sides agreed that development mandate of the Doha Ministerial Declaration must be honoured and reflected in the modalities being negotiated as also in the final outcome. A successful conclusion of the negotiations must yield an outcome that enhances market opening and contributes to development.

6. The leaders noted that bilateral trade and investment between India and the EU has been growing steadily and reflects the strengthening of bilateral economic ties. The sides also took note of the further work of the High Level Trade Group since the last Summit when it was decided to work towards concluding a Broad-Based Trade and Investment Agreement. India and the EU welcomed the progress achieved in the first few rounds of negotiations on the India-EU Trade and Investment Agreement and reaffirmed commitment to further intensify negotiations.
7. Both sides welcomed the India-EU Business Summit coinciding with the political dialogue. Leaders welcomed the second meeting of the EU-India CEO Round Table, which provided for useful and constructive interactions among key Business leaders from both sides. The Indian Side welcomed the proposal for creation of a European Business and Technology Centre in India, with the objective to promote private and public partnerships in specific sectors such as energy, environment, clean development and climate change.
8. The leaders reiterated their commitment to promote international peace and security. In this context the leaders highly valued the India-EU Security Dialogue, which had its second meeting in Berlin in May 2007, for exchanging views on security issues, including disarmament and non-proliferation, as well as bilateral issues of mutual concern.
9. Emphasising the paramount need for effective multilateralism and their commitment to a rules-based international order, the leaders reaffirmed their commitment to intensify cooperation at the United Nations and in multilateral fora to address issues of global concern, including in the areas of human rights, development and the environment. The Summit underlined the importance of a strong,

effective and efficient United Nations Organisation and the leaders also recognised the need for a comprehensive UN reform. The Summit agreed to work jointly towards strengthening the role of the UN Human Rights Council and the Peace-building Commission, and stressed the need to maintain momentum in the efforts to adapt the United Nations to the needs of today's world. In this same context the leaders stressed the need for more efficient environmental activities in the UN system. They also agreed to continue to explore the possibility of a more coherent institutional framework, building on existing institutions.

10. Both sides remain committed to reinforcing cooperation within the UN Human Rights Council and enhancing their dialogue on human rights, both in a bilateral and multilateral context. Both the EU and India are committed to respecting, protecting and promoting human rights and fundamental freedoms, as well as promoting good governance. The Summit leaders also stressed the importance of eliminating impunity for the perpetrators of genocide, war crimes and crimes against humanity.
11. India and the EU reaffirm their shared interest in working together as partners for disarmament and for countering the proliferation of WMD and their delivery systems. They regard proliferation of WMD and their delivery systems, particularly the risk of their falling into the hands of terrorists and other non-State actors, as a significant contemporary challenge. In this regard they emphasise the importance of full compliance by all States with their non-proliferation and disarmament obligations including through national implementation of effective export control measures as detailed in UNSC Resolution 1540. India and the EU are ready to contribute as partners to global efforts to address the proliferation of WMD and their means of delivery while preserving and promoting cooperation in peaceful uses of technology through forward looking approaches among countries committed to disarmament and non-proliferation.
12. The leaders emphasised the urgent need for the international community to promote a comprehensive peace plan for the Middle East / West Asia, with the objective of reaching comprehensive, just and durable peace and stability in the region. They reaffirmed their support for a negotiated settlement of the Israeli-Palestinian conflict based on existing agreements, including relevant UNSC Resolutions,

the Roadmap, and the Arab League Resolution (Beirut 2002). The leaders discussed the situation in Lebanon and supported the full implementation of UNSC Resolution 1701 and the reinforced UNIFIL. They supported the Lebanese Government's measures to preserve peace and stability, and to put down extremism. Leaders expressed their support for the recent international meeting, which they hope will contribute towards a comprehensive solution to the Arab Israeli conflict.

13. The leaders recognised the important efforts of both sides to support the sustainable development of Africa and to promote the integration of Africa into the world economy on fair terms for the peoples involved. Together, India and the EU recognise the importance of their participation in peacekeeping operations in Africa, including those in the Democratic Republic of Congo, Ethiopia and Eritrea. They also recognise the importance of enhancing their cooperation to support peace and security in Africa, to prevent conflict and to assist countries emerging from conflict.
14. The leaders discussed the evolving situation in Myanmar and agreed that the process of national reconciliation and political reform should be inclusive, broad-based and taken forward expeditiously. They expressed support for the ongoing good offices of the UN Secretary General's Special Envoy to Myanmar to resolve issues peacefully through dialogue and noted the efforts of the UN Special Rapporteur on the situation of human rights in Myanmar. The leaders affirmed the need for an inclusive dialogue, including with Daw Aung San Suu Kyi and the Myanmar ethnic groups, to bring about genuine reconciliation and progress towards democracy.
15. India and the EU expressed the hope that Pakistan will soon return to stability and democracy.
16. India and the EU expressed their strong support for a sovereign, democratic and pluralistic Afghanistan. They reaffirmed their sustained commitment to assist the Afghan Government in the stabilisation and rebuilding of Afghanistan, working within the framework of the Afghanistan Compact. They welcomed Afghanistan joining SAARC as its eighth member at the 14th Summit held in Delhi in April 2007, and the holding of the second Regional Economic Cooperation Conference (RECC) in New Delhi in November 2006. They noted that although much has been achieved in recent years, formidable challenges still lie ahead. In this regard, they expressed

concern over the security situation in Afghanistan due to the growth in terrorism and drug related activities, and the danger these developments pose. They condemned continued attacks on aid workers, and the kidnapping and killing of innocents by illegal armed groups, including the Taliban and Al Qaeda. They reiterated, in this context, that a coherent and united international commitment remains of paramount importance, and agreed to continue cooperating and coordinating their efforts to impart greater strength to this process.

17. The leaders expressed deep disappointment at the postponement of elections in Nepal. Repeated postponement of the elections erodes the credibility and affects the process of democratic transformation and legitimisation in Nepal. Early elections and a mandate from the people are essential for the peace process to stay on track. The leaders urged the Government and the political parties to honour the agreements and commitments already made to enable the people of Nepal to choose at the earliest their own future and the manner of their governance through a free and fair process, open to all without intimidation.
18. There is no military solution to the conflict in Sri Lanka. A negotiated, political settlement, acceptable to all communities within the framework of a united Sri Lanka, is the goal that all international efforts should encourage. A credible devolution package would be a major contribution to this end. The leaders urged the parties to ensure respect for human rights and international humanitarian law, and to guarantee access for humanitarian aid to the population.
19. India and the EU expressed their support for the reform process in Bangladesh, including preparations for general parliamentary elections in 2008. Both sides are mobilising significant efforts to help the country overcome recent natural disasters.
20. India welcomed the EU's participation as an observer in the 14th SAARC Summit, held in New Delhi on 1-4 April 2007. The Summit was the first where observers were allowed into SAARC. Both sides expressed hope that this would further enhance co-operation between SAARC and the EU.
21. The EU welcomed India's participation at the ASEM meeting and reiterated its endorsement of the incorporation of India in the fold of the ASEM process of dialogue and cooperation linking EU and Asia.

India noted the EU's interest to engage in the East Asia Summit process and its intention to join the Treaty of Amity and Cooperation (TAC).

22. India and the EU stand united in facing the scourge of terrorism, which constitutes one of the most serious threats to international peace and security. India and the EU condemned terrorism in all its forms and manifestations, committed by whomever, wherever and for whatever purpose. Efforts to counter terrorism can only be successful with a sustained and comprehensive approach. It should be pursued in full respect of international law, in particular human rights law, refugee law and international humanitarian law. India and the EU, therefore, attach great importance to counter-terrorism cooperation in the framework of the United Nations, and share a commitment to universal ratification and full implementation of all UN counter-terrorism conventions and related protocols. The two sides expressed their commitment to work towards implementation of the UN Counter-Terrorism Strategy, including by supporting the work of the counter terrorism implementation task force. The EU and India continue to work actively towards a swift finalisation of a Comprehensive Convention on International Terrorism at the UN. Both sides are committed to continuing their cooperation on counter-terrorism and look forward to holding the next regular India-EU consultations soon. Strengthening cooperation to combat terrorism continues to be one of the priority areas for the EU-India Strategic Partnership.
23. Both India and the EU attach high priority to tackling climate change and promoting energy security as a key to stable and sustainable development. Energy is an important area of ongoing and future policy dialogue and practical cooperation between India and the EU. The two sides noted the valuable contribution of the India-EU Energy Panel, which had its third meeting in June 2007 in Brussels. They agreed to expand the scope of the working group on Coal with alternate meetings adopting different emphasis on mining oriented and conversion technologies, including enhanced generation efficiency, carbon capture and control respectively. It was also decided to have Indian participation in the international Biofuels forum. The two sides agreed to work towards a new flagship project on R&D in solar energy. In addition, leaders agreed to enhance cooperation on energy efficiency on an international level. They also

recognised the importance of improving efficiency, in particular through the adoption of collaborative approaches in energy-intensive sectors.

24. The two sides expressed their satisfaction on the entry into force of the ITER agreement on 24 October 2007 and on the first official meeting of the ITER Council on 27-28 November 2007. The EU and India have agreed to start the discussions towards the establishment of a bilateral agreement between EURATOM and India in the field of fusion energy research to complement the ITER Agreement.
25. The leaders reaffirmed that urgent action is required by all countries to address climate change, the urgency of which was confirmed by the latest findings of the Intergovernmental Panel on Climate Change (IPCC). India and the EU are committed to the stabilisation of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system. Such a level should be achieved within a time frame sufficient to allow ecosystems to adapt naturally to climate change, to ensure that food production is not threatened and to enable economic development to proceed in a sustainable manner. They believe that, in order to achieve this, global action is needed by all parties, according to their common but differentiated responsibilities and respective capabilities, with developed countries taking the lead. The EU and India agreed to work together bilaterally to accelerate their countries' transitions towards a low carbon economy, **e. g in the context of the EU-India Joint Initiative on Clean Development and Climate Change. They agreed the importance to sustainable development of synergies between energy security, sustainable energy supply, improved air quality, innovation and action to tackle climate change. They agreed on the importance of private sector engagement and investment in tackling climate change,**
26. The two sides reiterated their commitment to the United Nations Framework Convention on Climate Change and the Kyoto Protocol. They are committed to moving forward in the UN forum and called on all parties to actively and constructively participate in the UN Climate Change Conference (UNFCCC) in Bali in December 2007. They also agreed that an integrated approach to climate change and energy is crucial, and particularly stressed the need to exploit the synergies between the promotion of energy security, improved

air quality and reduction of greenhouse gas emissions to ensure consistency between meeting the ultimate objectives of the UNFCCC and energy policy and economic growth and development goals. They emphasised the importance of a post-2012 agreement for GHG reduction commitments by developed countries in facilitating significant cost reductions of clean technologies and their transfer, deployment and dissemination, as well strengthening the global carbon market and intensifying cooperation on the adaptation to the increasing adverse impacts of climate change.

27. Recalling the importance of bilateral co-operation on global environmental challenges, including halting biodiversity loss and protection of forests, leaders agreed to step up co-operation in the run-up to the 2008 Conference of the Parties to the Convention on Biological Diversity. They will also strengthen co-operation in other areas such as the environmentally sound management of waste, including in the preparation of the 9th Conference of the Basel Convention on hazardous waste. The EU-India Environment Forum has been a useful mechanism for the sharing of expertise among business, academia and civil society and both sides look forward to the 2008 Environment Forum on chemicals as well as working together in multilateral fora related to chemicals and cooperation between various relevant conventions.
28. The leaders agreed to develop a joint work programme covering the key areas of energy, environment, research and climate change, to promote ongoing and future co-operation in these areas of growing importance to both sides.
29. India and the EU welcomed the steps taken by the European Investment Bank in India to establish loan-based project funding under its new Asia lending mandate, and in particular with reference to the financing instrument supporting projects in the fields of energy sustainability and climate change mitigation. They encouraged closer cooperation between the EIB and its relevant counterparts in India to work towards establishing financing for specific investment projects.
30. In recognition of the critical role of science and technology in striving towards their respective knowledge-based economies, leaders expressed their satisfaction with the outcome of the India-EU Ministerial Science Conference from February 7-8, 2007. Its significant recommendations were for establishment of joint nodes for networking

innovation systems, efforts towards creation of joint infrastructure for advanced research and funding systems for symmetric programmes for promotion of S&T collaboration. Within the framework of the India-EU S&T Cooperation Agreement renewed today, leaders would welcome strengthened partnership initiatives such as joint projects with co-investment of resources in selected fields of mutual priority. The two sides agreed to explore bilateral cooperation on space policies and programmes including global satellite navigation.

31. Given the healthy growth and potential in two-way trade, tourism, research and student exchanges, and business between the EU and India, the leaders recognised the importance of strengthening transportation links in order to further promote and facilitate exchanges. The leaders recalled the India-EU Aviation Summit that took place in New Delhi on 23-24 November 2006, which demonstrated the growing importance of India-EU civil aviation links and the excellent collaboration between Indian and EU aviation authorities and industries in civil aviation related sectors. The leaders looked forward to the finalisation of a mutually beneficial 'Horizontal Agreement' between the EU and India with a sense of urgency, as well as an agreement on the priorities for a new technical cooperation programme.
32. The leaders took note of the state of negotiations for a maritime transport agreement between India and the EU and expressed support to the continuation of the negotiation process with a view to conclusion of a mutually beneficial agreement at the earliest.
33. Leaders welcomed the strengthening of the EU-India dialogue and cooperation on employment and social policy on the basis of the Memorandum of Understanding signed in November 2006, including a first tripartite visit from India to the EU and the second EU-India seminar on employment and social policy held on 17-18 September 2007 in Lisbon, which provided a high-level policy forum for tripartite discussion on major challenges and further cooperation on social security and social protection. They highlighted the importance of the involvement of social partners in this dialogue.
34. The leaders reaffirmed their commitment to deepen bilateral economic cooperation and took note of policy dialogues in areas of mutual interest. They noted with satisfaction the study visit carried out by experts from the European Commission and the European Medicines Agency (EMA), which has contributed to a better

understanding of the Ayurveda system in order to advance the ongoing regulatory dialogue on the pharmaceutical sector.

35. The leaders expressed satisfaction at the establishment of a regular macro-economic dialogue within the broad context of EU-India economic cooperation, the first meeting of which was held in New Delhi on 12 July 2007. The leaders noted that the dialogue, would provide a forum in which both parties could discuss economic developments and policy challenges in their respective economies as well as developments in the regional and the world economy at large, and learn from each other's experience with economic reform. Both sides reiterated their commitment to the continuation of their financial services regulatory dialogue. Recognising the benefits of closer cooperation in fostering the protection and promotion of intellectual property rights, the leaders reaffirmed their commitment to develop an active dialogue in this field, including cooperation on capacity building activities, human resource development and public awareness programmes.
36. The leaders expressed their support to further enhancement of cooperation in the field of culture including through stepped up activities of organisations such as the Indian Council for Cultural Relations (ICCR) and the Indian cluster of the European Union National Institutes of Culture (EUNIC). Both sides stressed the importance of academic cooperation and in this context valued highly the exchanges under the Erasmus Mundus programme. Both sides expressed deep commitment to the preservation and fostering of cultural diversity and welcomed the ratification of the UNESCO Convention on the Protection and Promotion of the Diversity of Cultural Expressions. The sides also stressed the importance of dialogue among cultures and civilisations in the new millennium. In this context, the sides reaffirmed the importance of cooperation in the field of cultural heritage, as well as programmes to promote exchanges in the arts.
37. The leaders noted the valuable contribution to bilateral relations made by the India-EU Civil Society Round Table which met most recently in Delhi in September 2007. They noted the value of enhanced participation by civil society in this forum.

## **150. Joint Statement on India-European Union Joint Action Plan: Implementation Report.**

**New Delhi, November 30, 2007.**

1. The sixth India-EU Summit held in New Delhi (7 September 2005) endorsed a comprehensive Joint Action Plan (JAP) setting out a road map for India-EU interactions in diverse sectors. The seventh India-EU Summit held in Helsinki in October 2006 issued the first report on the progress of the implementation of the JAP. Given that the activities undertaken in the framework of the JAP constitute an important contribution to the Strategic Partnership, both sides take satisfaction in reporting the following achievements:

### **Strengthening dialogue and consultation mechanisms**

2. Since the seventh India-EU Summit, the two sides have sustained high-level interactions and have taken forward strides in strengthening their dialogue.
3. The President of India visited Strasbourg on 25-26 April 2007 at the invitation of the President of the European Parliament. During the visit he addressed the European Parliament (EP) and met with the President of the European Parliament. In his address on the 'Dynamics of Unity of Nations' President Kalam projected the many similarities shared by India and the European Union as multi-cultural, multi-linguistic and multi-religious entities. During the visit the President also addressed the International Space University at Strasbourg on 'Creative Leadership for Future Challenges of Space'.
4. During the reporting period there have been two Senior Officials meetings and a meeting of the Joint Commission to review the progress made on the JAP. Meetings under other consultation mechanisms have also taken place, viz the India-EU Energy Panel and its Joint Working Groups, Security Dialogue, sectoral Working Groups on Pharmaceuticals and Biotechnology; Agriculture and Marine Products; Food Processing; Technical Barriers to Trade and Sanitary and Phytosanitary Issues.

### **Political dialogue and co-operation**

5. The EU was associated with SAARC as an Observer State and attended the 14th SAARC Summit held in New Delhi on 1-4 April

2007 in order to share experiences regarding ongoing integration processes.

6. In the field of effective multilateralism, India and the EU cooperated closely. Both sides encouraged the establishment of the United Nations Human Rights Council, of which presently India and seven EU Member States are currently members. Both sides also encouraged the United Nations Peace-building Commission, which has India and seven EU Member States as well as the European Community among the members of its organisational committee. Both sides have held various consultations in New York and Geneva to discuss topics of common interest. Both sides reiterated their resolve to continue working together in multilateral fora to further common interests. Both sides also agreed to intensify dialogue on peacekeeping, peace-building and post-conflict assistance, three areas where their respective contributions are crucial to UN activities.
7. India's External Affairs Minister, H.E. Mr Pranab Mukherjee, participated for the first time in the ASEM Foreign Ministers' Meeting in Hamburg, Germany in May 2007. The EU welcomed India's participation in the ASEM meeting and reiterated its endorsement of the incorporation of India in the fold of the ASEM process of dialogue and co-operation linking the EU and Asia. The EU-India ministerial Troika meeting on 31 May 2007 in Berlin was an opportunity to take stock of recent progress in the implementation of the Strategic Partnership and to discuss how to further intensify it.
8. The second meeting of the India-EU Security Dialogue was held in Berlin on 2 May 2007. The two sides had fruitful discussions on global and regional security issues, disarmament and non-proliferation.
9. The India-EU human rights dialogue, with the participation of EU Ambassadors, was held in New Delhi on 12 December 2006. An India-EU experts seminar on minorities was also held in New Delhi on 16 March 2007.
10. Both sides continue to share concern at the scourge of terror that has affected both India and the countries of the EU. The issue was discussed between the two sides at various levels. The sixth India-EU consultations on terrorism took place in Brussels in December 2005. Both sides decided to have the next meeting in 2008.

### **Bringing together people and cultures**

11. The India-EU Civil Society Round Table continues to be a useful forum for involving civil society stakeholders in the Strategic Partnership. The eleventh meeting of Round table was held in September 2007 in New Delhi. The members discussed issues of social development, trade and investment, and renewable energy. The India-EU Civil Society Internet Forum was launched on 1 May 2007, by Mr Anand Sharma, India's Minister of State for External Affairs.
12. The India-EU Joint Working Group on Consular Affairs held its meeting in New Delhi on 8 December 2006 to discuss consular and visa services.
13. Both sides welcome the intensification of India-EU parliamentary exchanges. The European Parliament created a new Delegation for Relations with India in March 2007. Ms Neena Gill is Chairperson of the Delegation.
14. There has been a substantial increase in the number of scholarships awarded under the Erasmus Mundus India Window during the last year. A European Higher Education Fair was organized in Delhi on 24-26 November 2006 as well as the Asia Link Symposium on 24 November 2006, also in Delhi, on academic exchanges and mobility. The two sides firmly intend to cooperate further in this field.
15. Cultural initiatives have been organized by both sides. The Presidency of the European Union organized the European Union Film Festival 2007 in various cities in India i.e. New Delhi (27 April – 04 May), Pune (04 – 11 May), Calicut / Kozhikode (14 – 18 May) and Kolkata (19 – 24 May).

### **Economic policy dialogue and co-operation**

16. All the Joint Working Groups (JWG) conceptualized under JAP have been established. The first meeting of the India-EU JWG on Agriculture and Marine Products was held in New Delhi in February 2007. The second meeting of the JWG on Sanitary and Phytosanitary Standards/Technical Barriers to Trade (SPS/TBT) was held in Brussels in October 2007. The meeting was useful in providing a better understanding of various regulatory issues. The first meeting of the JWG on Food Processing was held in November 2006.

17. The first EU-India Ministerial Science Conference took place in New Delhi in February 2007. The meeting had a strong representation from EU Member States, from Science & Technology (S&T) Departments, and from leading scientists from both India and the EU. This was the first time that EU Member States and the EC met in a science ministerial conference outside the EU. The meeting allowed for an active discussion on key co-operation priorities, and on the potential benefits of a Coordinated Joint Call for proposals with co-investment of resources, including funds for sponsoring India-EU research projects and means to deepen EU-India S&T collaboration under the India-EU S&T Co-operation Agreement and the seventh Framework Programme. An open interactive session was held with a large number of Indian students as well as a meeting with leading CEOs from various sectors. The outcome was the 'New Delhi Communiqué', which outlined the future of India-EU co-operation in Research and Development. In particular, leaders welcomed the expected renewal this year of the successful India-EU Science and Technology Agreement of 2002.
18. The fourth Meeting of the EU-India Science and Technology Steering Committee took place on 8 November 2007 in New Delhi. At the meeting a road map was established for S&T co-operation from 2008 onwards, which will include Strategic Workshops in India on New and Renewable Energy, and the transfer of European experience and best practices on innovation through networks and centres. The EU and India are now expected to launch their first-ever 'Coordinated Joint Call for Proposals', which will be on computational material science.
19. The first India-EU Macroeconomic Dialogue took place in New Delhi on 12 July 2007. The two sides discussed their macroeconomic situations and policies. They also agreed to hold the second EU-India Macroeconomic Dialogue in 2008 in Brussels. Following the successful first meeting of the Financial Services dialogue meeting in June 2006, both sides look forward to the second meeting to be held in New Delhi in 2008.
20. The second India-EU Environment Forum on 'Waste Management - A Cradle to Grave Approach' was convened in Delhi on 7 December 2006. The Action Plan Support Facility Financing Agreement was signed with Government of India on 2 March 2007 and the

environment component of this programme is currently being put in place. The EC-India Joint Working Group on Environment met on 9-10 July 2007 in Brussels. The meeting discussed a wide range of issues and identified areas for further co-operation.

21. Clean Development and Climate Change: An International conference on 'Adaptation to Climate Variability and Change', jointly organised by the European Commission, the Indian Ministry of the Environment and Forests, and other multilateral and bilateral agencies, was held in New Delhi in December 2006. The India-EU Climate Change Research workshop took place in February 2007 in New Delhi. The India-EC JWG on Environment held in July 2007 in Brussels had useful discussions on climate change.
22. Energy is an important area of ongoing and future policy dialogue and practical co-operation between India and the EU. The two sides noted the valuable contribution of the India-EU Energy Panel and its working groups, which had its third meeting on 20 June 2007 in Brussels. All four working groups met in the first half of 2007 before the meeting of Energy Panel. It was agreed to expand the scope of work of the working group on Coal with alternate meetings adopting different emphasis on mining oriented and conversion technologies respectively. The two sides stand ready to identify a new flagship project on R&D in solar energy. It was also decided to commence four EU-funded studies under the various JWGS in 2008, with a fifth study carried to be out by India. India is also a participant in the International Biofuels Forum, which met twice so far: in July 2007 in Brussels and in October 2007 in New Delhi.
23. The fifth annual India-EU Joint Working Group on Information and Communication Technologies (ICT) was held in September 2007 in New Delhi. The dialogue provided an opportunity to discuss policy, regulatory and research matters and define a concrete list of actions to enhance further our co-operation. On research,
22. Indian organisations were involved in 14 joint projects launched under the Information Society Technology (IST) programme in the sixth Framework Programme. To this end two workshops were also held in India in September 2007.
24. The first India-EU Aviation Summit was held successfully on 22-24 November 2006 in New Delhi. The Aviation Summit demonstrated

the growing importance of EU-India relations in civil aviation and the excellent collaboration between EU and Indian aviation authorities and industries. A Joint Declaration was signed at the Civil Aviation Summit setting out a roadmap for future co-operation including the finalisation of the horizontal aviation agreement on a priority basis and the agreement on future technical co-operation in early 2007. On 22-23 October 2007, Civil Aviation Minister Mr Praful Patel and the European Commission's Vice-President Barrot met in Brussels to discuss civil aviation co-operation. Four rounds of discussions have taken place on the Civil Aviation Horizontal Agreement. Under the European Commission's new Indicative Programme of co-operation with India, a new programme on civil aviation co-operation is proposed which will build on the successful results of the previous 1999-2006 'India-EU Civil Aviation Co-operation Project'.

25. Two rounds of negotiations on the India-EU Maritime Agreement were successfully held in February 2007 in New Delhi and in July 2007 in Brussels. The negotiations have resulted in better understanding of the respective positions and progress towards a mutually beneficial conclusion of the negotiation process. Both parties look forward to the next round of negotiations which are expected to take place in New Delhi by early 2008.
26. Bilateral contacts were established between the European Commission, the European Space Agency, and the Indian Space Research Organisation during the International Astronautical Congress in Hyderabad on 24-28 September 2007. The discussions constituted the first dialogue and exchange of ideas on possible future co-operation priorities, and both sides expressed a willingness to undertake concrete joint co-operation activities.
27. The European Commission and representatives of the European Agency for the Evaluation of Medicinal Products (EMA) carried out a visit to India in January 2007 to study the *Ayurveda* system of medicine and specific *Ayurveda* centers, to gain a better understanding of key regulatory aspects as well as other relevant aspects. The JWG on Pharmaceuticals and Biotechnology held its second meeting in India in May 2007 at which the report of the study visit was presented.
28. A meeting of JWG on Agriculture and Marine products took place in

New Delhi in February 2007 and discussed a wide range of issues of mutual interest. Agriculture Commissioner Fischer Boel, accompanied by a delegation of top EU business executives from the agri-food sector, undertook a promotional visit to India in March 2007 with the aim of fostering and increasing business opportunities between India and EU. The focus of the visit was the 'International Aahar Food Fair' in New Delhi which the Commissioner jointly inaugurated with the Minister of Food Processing Industries.

29. The second Joint Customs Co-ordination Committee Meeting, held in December 2006 in Chennai, had useful discussions in the context of the Joint Customs Co-operation Agreement. Both sides are committed to continue to implement co-operation in the customs area and customs-related IPR components of the Trade and Investment Development Programme.
30. The first India-EU seminar on employment and social policy on 'Skills Development, Training and Employment' took place in November 2006 in New Delhi. During his visit to India for the seminar, EC Employment Commissioner Dr Spidla signed a Memorandum of Understanding between the EC and the Indian Ministry of Labour. The second India-EU seminar on employment and social policy on 'Social security and social protection - key tools for sustainable and responsible growth and development', and a related Senior Officials Meeting, took place in September 2007 in Lisbon. A first high-level tripartite delegation from India visited Lisbon, Brussels and the UK's East Midlands area in September 2007.
31. The India-EU Business Summit held in Helsinki on 12 October 2006, formally established the India-EU CEO Round Table, constituting a forum for high-level CEOs from India and the EU to provide policy recommendations to leaders for the strengthening of the business partnership. In particular, both partners remain committed to continue intensive consultations with industry and business organisations. Investment Facilitation Desks have been set up under the India-EU Trade and Investment Development Programme with a view to facilitate the provision of information to European investors in India. The Commission also proposes to establish a European Business and Technology Centre in India which shall act as a vector for promoting industrial and research partnerships and co-operation between the EU and India in key sectors.

32. The European Commission has adopted the Country Strategy Paper 2007-2013 for India, with an indicative total amount of Euro 470 million, which outlines the priorities and provides the financial framework for the funding of co-operation activities in India. In this context, an amount of Euro 260 million has been set aside for the first Multi-annual Indicative Programme 2007–2010. This covers programmes in the health sector, elementary education and implementation of the Joint Action Plan.

### **Developing Trade and Investment**

33. The EU and India have conducted an active dialogue both at the political and technical level in order to re-launch the process of Doha with a view to successfully concluding the multilateral negotiating round, which would bring significant benefits to the global economy in terms of boosting trade and investment.
34. Based on the recommendations of the High Level Trade Group to the seventh India-EU Summit in October 2006 in Helsinki, negotiations for a broad based trade and investment agreement were opened in Brussels on 28-29 June 2007. A second round of negotiations took place in New Delhi during the first week of October 2007. The negotiations have been conducted in a constructive fashion and negotiators have been able to report good progress. The third round of negotiations is scheduled to take place in Brussels on 6-12 December, 2007.
35. The EU and India also continued their dialogue on bilateral trade issues in other forums, such as the EU-India SPS/TBT Working Group which met for the second time in Brussels in October 2007. The next meeting is foreseen to take place in spring in Delhi.

## G-8 AND OUTREACH SUMMIT

### 151. Media briefing by Foreign Secretary Shivshankar Menon on Prime Minister's visit to Germany for the G-8 Meeting.

**New Delhi, June 5, 2007.**

**Official Spokesperson:** Good afternoon, ladies and gentlemen. We have requested Foreign Secretary to be here to brief you on Prime Minister's visit to G-8 beginning tomorrow. After FS has made his initial remarks, if you have any questions please let us know.

**Foreign Secretary:** As you know, Prime Minister will be leaving Delhi tomorrow to go to Germany for the G-8 meeting with the Outreach countries. This is the third year in a row that India has been invited to the G-8 Summit of Heads of State and Government along with Brazil, China, South Africa, Mexico to participate in a special meeting.

Prime Minister will be leaving tomorrow. Day after tomorrow, on the 7th (June), he will be in Berlin where he will be meeting with some of the leaders who will be present there, for instance, with the President of China, with the UN Secretary General, with the President of Nigeria, and with the President of Mexico. In the evening there will be a meeting of the Heads of State and Government of the five developing countries - Brazil, China, India, Mexico and South Africa - in Berlin itself. We will brief you immediately after that evening on that series of meetings in Berlin.

On the 8th (June), Prime Minister will go to Heiligendamm which is where the G-8 Summit is for a meeting of the G-8 Heads with the five Outreach members in the morning. They will have a working session on the morning of the 8th lasting two hours which will cover basically issues relating to the global economy, subjects like climate change, foreign direct investment, promotion and protection of intellectual property rights, energy, and development. It is a fairly full agenda. As in the past it will be an informal discussion between the Heads on these topics.

Thereafter, the leaders will move to lunch where they will also be joined by some of the African Heads of State and Government who are also doing a separate outreach with the G-8. Over the working lunch they will probably be discussing the Doha Round and progress towards the Millennium Development Goals, in other words trade issues and development issues as a whole.

While in Heiligendamm, Prime Minister will also be having meetings with G-8 Heads of State and Government. Given the nature of the situation, most of these will all be in the form of pull-asides rather than formal bilateral meetings or calls because they will be squeezed into the official programme. He will return to Berlin late that evening and return to India the following morning.

From our point of view the significance of the meeting is, of course, that it is an occasion to review at a very high-level the nature of the world economy, of some of major issues that we as an international society face together. I think the fact of India's participation is proof of our interest and willingness to participate in the evolution of global solutions to global problems. This year's Summit, you would have noticed already, will probably be dominated by the theme of climate change which is an issue which affects us all. In India especially, I think we are particularly sensitive to this. This is an issue which we regard, not just climate change but environment as a whole, I think we were among the first to raise this as a real issue - Prime Minister Indira Gandhi did when we had the first World Environment Conference in Copenhagen. It is an issue that matters to us tremendously. In some ways it is even harder for an economy which is still a developing economy to adapt to the effects of climate change and to mitigate the effects on the lives of its own citizens.

We are looking forward to the bilateral meetings as well where there is a fairly detailed agenda, a full agenda to cover in the two days. We will brief you at the end of each day and if possible even before that. I think on the 7th, we will probably try and brief you before the evening meeting of the O-5, and then brief you after that so that we can tell you about the bilaterals in the course of the day in time for you to report back, and may be at the end of the day. 8th (June) might be a bit difficult until we get back to Berlin which is when we will do an India-specific briefing for you. I would be happy to answer any questions which you might have.

**Question:** Is there a meeting scheduled with President Bush?

**Foreign Secretary:** As I said, on the 8th in Heiligendamm what we expect is pull-asides with various G-8 leaders, that is what we are scheduling right now with the various leaders including President Bush.

**Question:** I wanted to ask you about two things specifically. You just mentioned that it is very hard for developing countries to adapt technologies in the climate change context. Do you think there are tensions for India on that count? Do you think there is some kind of pressure on India to yield more than what is fair?

**Foreign Secretary:** I think from our point of view the best form of adaptation is development. If you look at the kind of contributions that we have already made, I think it is quite sizeable. Many of the steps that we actually take as part of our normal development process or for other reasons also actually help to mitigate the effects of climate change. For instance, we decided that Delhi will have CNG buses. We might do it for public health reasons; we might do it for other reasons, but it also helps to reduce greenhouse gas emissions. So, there is a large series of things that we do as part of our own development. You look at the energy efficiency in the Indian economy. Since 1970s, steadily it has gone up - up meaning the amount of energy that you use per dollar GNP has steadily shrunk. Today we are at levels of energy efficiency which are about the same as Germany. Now, it would not always stay this way. This may be because services is a relatively large part of our economy. But the fact is that that is something that we did for our own reasons - to use whatever energy we have efficiently for our own growth. But it also has climate change advantages. So, there are a set of steps, both adaptation and mitigation, which we do. I think what is important is that the burden of incremental costs of doing additional steps, that must be shared fairly. The principle for that is well-known. It is agreed in the UN Framework Convention on Climate Change where it says, 'common and differentiated responsibilities according to respective capabilities'.

So, as long as that is the principle that is followed - and it is an agreed international principle - and as long as we work on that basis, I do not think it would be unfair in any way. The fact is, historical responsibility even in terms of present emission levels, it is quite clear who is responsible for this. But we are all affected by the results of it. We will be very happy once our per capita emission levels reach the same as the industrialized countries to do our share too.

**Question:** With Chinese President, what are the issues which you expect that may come up?

**Foreign Secretary:** I think we will do the bilateral relationship, we will do all the issues that are on the table, we will see how far we have got in following up on the various decisions that were taken during his visit last November, and look forward to the future. But I would rather brief you on that after the conversation.

**Question:** I have two questions. One is that Angela Merkel had called PM on Saturday. What did she tell him? Now that President Bush has come out with an alternative proposal, what is India's reaction?

**Foreign Secretary:** Chancellor Merkel had called Prime Minister about the G-8 meeting with the outreach countries and they had a very good conversation on the agenda of the Summit, how they expect to see it, play out, and what they hope for from the Summit. It is on that basis really that I am saying that climate change will be one of the major themes of the Summit. I think they have also discussed development and how important it was, which is why there will be a whole separate segment on the Millennium Development Goals and development as such. On the US proposals, I think you would have noticed in the last few weeks there have been several proposals. President Bush has made some proposals on climate change. Prime Minister Abe and the Chinese have also issued a paper on climate change from their point of view.

Frankly, I think we are now at the stage in the international society of all putting forward our ideas and then trying to see what works for all of us. I do not think we have quite harmonized everybody's ideas yet clearly. You can see that in the various proposals that are on the table. There are elements in what President Bush has said which we are very comfortable with. The emphasis on technology, on energy security, on the need for transfer of clean energy technologies, these are elements that we think are very important, if the world as a whole and if developing countries are to be enabled to deal with the consequences of climate change. But frankly, process issues I think have not been solved yet. From our point of view, the main forum in which the international community takes decisions is really in the UNFCCC context. That is where we have an agreed international legal framework under which the Kyoto Protocol was done. That is where we think we should be taking our joint decisions. But that is a process issue. I think the first on the substance itself there are several ideas on the table, some of which we like and some of which we might not like as much. But this is something that we have to talk through. Over the next few months I think you will see a whole series of meetings where different countries try and harmonize their views and see how to carry this forward.

**Question:** Is there any contradiction in India's statement? On the one hand President Bush's proposal is outside the UN. So, are you agreeing to going for a meeting outside the UN?

**Foreign Secretary:** I think we are ready to talk wherever. I do not think we are so worried about the process. What I am trying to say is that we will judge all these various processes, opportunities and so on, on the substance of what is agreed and what we all agreed to do. That is the important part.

We are quite happy to talk to people wherever, anywhere in the world, about our ideas because we have our own ideas too.

**Question:** Has the meeting between Prime Minister and President Bush been scheduled?

**Foreign Secretary:** As I said, the meetings in Heiligendamm of G-8 leaders will all be in the nature of pull-asides because we have to fit them into a fairly crowded schedule. So, they will step aside and spend a few minutes, ten-fifteen minutes. We will be doing that with all the leaders in the G-8 that he is meeting. There would not be a formal meeting at a table with delegations and that sort of the thing because of the nature of the situation.

**Question:** India is the fifth largest polluter in the world...

**Foreign Secretary:** Not true. We account for four per cent of global GHG missions and that is nothing. Anyway, go ahead.

**Question:** In light of various countries giving proposals and initiatives like the Chinese and the Japanese and the Americans, do you have any new ideas at this meeting?

**Foreign secretary:** You will see several new ideas and new approaches on our part as part of our own national development effort which means as we go through the Eleventh Plan finalisation process, I think you will see that in each of these sectors, whether it is energy, whether it is mass transport, whether it is housing, these are all sectors which have climate impacts as well. So, what we would like to do is to build this into our plans. What we can do maybe is over the next three or four days as we go through this process, through the Summit, I think we will brief you on the kind of ideas that we have for global approach towards climate change and what sort of things we think are essential.

**Question:** Can you tell me if you expect to discuss the nuclear issue with the United States and what progress you both have made?

**Foreign Secretary:** I do not think we expect to discuss the nuclear issue because this is not a bilateral negotiating forum. I think we have other forums where we do that. I am sure it will be mentioned in the conversation because it is a very important part in the relationship. So, when they talk about the relationship it will be mentioned. This is not a place where we expect to negotiate bilateral issues.

**152. Statement by Prime Minister Dr. Manmohan Singh before his departure for Germany to attend the G-8 and Outreach Countries Summit.**

**New Delhi, June 6, 2007.**

I am visiting Germany to attend the Summit Meeting of G8 and Outreach Countries (Brazil, China, India, Mexico and South Africa) being organised at Heiligendamm by the German G8 Presidency on June 8.

At the summit, I will have the opportunity to present India's viewpoint on the global issues that have been identified by the G8 for special focus including climate protection, energy efficiency, and the conclusion of the Doha round of talks. Our viewpoint, and the viewpoint of much of the developing world on these issues, is that while addressing them due care must be taken not to allow growth and development prospects in the developing world to be undermined or constrained.

At the summit, I will speak on issues related to climate change. I will emphasize the need not to lose sight of the fundamental and universally accepted principle of common but differentiated responsibility and respective capabilities between the developed and developing worlds. It is also a fact that more and not less development is the best way for developing countries to address themselves to the issue of preserving the environment and protecting the climate.

Prior to the meeting with leaders of the G8, the President of Mexico will host a meeting of leaders of the Outreach countries in Berlin on June 7, where we will discuss our positions on global issues that are of special relevance to the developing world.

On the sidelines of both these Summit Meetings, I will also have the opportunity to hold bilateral meetings with some of the leaders present, including Chancellor Merkel of Germany who is our host, other leaders of the G-8, and the leaders of China, Mexico, Nigeria as also the Secretary General of the United Nations.

I look forward to my visit to Germany, and I would like to thank Chancellor Merkel for her gracious invitation for India to join in an exchange of views with the G8 countries.

### **153. Joint Press Release issued after the meeting of O-5 leaders in Berlin.**

**Berlin, June 7, 2007.**

The Heads of State and/or Government of Brazil, China, India, Mexico and South Africa held a meeting this afternoon in Berlin, Germany, at the invitation of Mexican President Felipe Calderon. The purpose of the meeting was to share perspectives and find convergences about the topics that they will discuss tomorrow in Heiligendamm during the outreach sessions of the G8 summit, as well as to exchange views on various significant international issues. The five countries also participated in the G8 Summits in Gleneagles (2005) and St Petersburg (2006).

President Luiz Inacio Lula da Silva of Brazil, President Hu Jintao of China, Prime Minister Manmohan Singh of India, President Felipe Calderon of Mexico and President Thabo Mbeki of South Africa reaffirmed their shared conviction that developing countries must participate more actively in the consolidation of strategies and initiatives that effectively address the challenges of a globalising and increasingly interdependent world. They agreed that their five countries, based on their undeniable political and economic strength, can make a decisive contribution to increase the participation of developing countries in this process.

Regarding the matters that will be discussed in Heiligendamm with the G8 countries, the leaders were pleased to note opportunities for joint collaboration in the fields of cross border investment, research and innovation, climate change, energy and development. The consensus view was that all of these challenges must be addressed from a multilateral, regional and bilateral perspective, taking into consideration the interests and capacities of the different States.

During their talks, the leaders also stated their ideas about certain topics of particular relevance to developing countries, such as global governance, international trade, bio-fuels, migration and South-South cooperation.

At the Berlin meeting, the Leaders shared views about the future of their participation in the Outreach Dialogue, and about the convenience of ensuring coordination and follow-up to the discussions among their five countries. They agree on having consultations on a regular basis on issues of common interest and to coordinate their positions. To this end they instructed their Foreign Ministers to meet on the margins of the next UN General Assembly.

The Heads of State and/or Government expressed their thanks to Chancellor Merkel for the invitation to participate at the G8 Heiligendamm Summit.

The leaders of the five countries have met before on the margins of the Gleneagles Summit at the invitation of President Mbeki of South Africa and the St. Petersburg Summit at the invitation of President Lula of Brazil<sup>1</sup>.

- 
1. At a meeting of the five - Brazil, China, India, Mexico and South Africa - Brazilian President Luis Inacio Lula da Silva took the lead in proposing that the group consider getting together again at a forum other than that of the G8 so that its own meetings were no longer incidental to the meetings and agenda of the eight most industrialised countries. Media quoted Indian officials familiar with the deliberations on June 7 to say that the proposal was welcomed by the other leaders. China's President Hu Jintao noted that the five countries together accounted for 42 per cent of the world's population and Dr. Singh quoted an old statement of Jawaharlal Nehru that developing countries were partners and not petitioners before the chanceries of the world. Though an actual decision on what shape future interaction at the summit level should take has been deferred, the five agreed to instruct their Foreign Ministers to meet this fall on the sidelines of the U.N. General Assembly to "coordinate their positions" on issues of common interest. The idea is not to stop engaging with the G8 but to explore the full range of issues that the G5 can work on itself. The observers noted that the disarray noticeable in the G-8 ranks at Heiligendamm on issues ranging from climate change to arms control, prompted the latest initiative by the five countries - known by the acronym BICSAM. It was felt that the G8's failure underscored the fact that the international system was truly in a state of flux and that no single grouping of countries - even if they were the most powerful ones in economic terms - could presume to have a solution to the world's problems. While the BICSAM countries all contend with distinct economic and strategic circumstances and sometimes differ from each other on a number of issues, each has realised the importance of pulling together on a number of global problems. On climate change, the five spoke with one voice before the G8. The plan however, is to explore the possibility of other common positions on issues ranging from migration, the Doha 'development' round of the trade negotiations, and the reform of global institutions such as the U.N., the World Bank and the International Monetary Fund to better reflect the realities of today's world.

## **154. Joint Position Paper of Brazil, China, India, Mexico and South Africa participating in the G8 Heiligendamm Summit.**

**Berlin, June 8, 2007.**

In the last decade, the world has experienced significant, although uneven, economic growth and a decisive contribution by developing countries. Globalization has played an important role as a dynamic force for growth. However, its impact has left us with a world beset by acute economic and social inequalities. The marginalization of a large number of developing countries, especially in Africa, calls for intensified international co-operative efforts, international policy coherence and co-ordination, and faithful implementation of the outcomes of major Summits, especially the Millennium Development Goals (MDGs).

2. Development is a right, central to people's progress and critical to the eradication of poverty, fostering peace, stability and security of all nations. The MDGs constitute an internationally agreed benchmark according to which we will measure our efforts to advance sustainable development and eradicate poverty. We are committed to working with our partners to advance the development agenda and the eradication of poverty. We believe that eradication of poverty in the world is not only an issue of importance to developing countries, but also a matter of our collective global interest.
3. We are meeting with the G8 to consider and assess critical matters of global importance at a time when there is optimism regarding the performance of the world economy. We are, therefore, concerned to ensure that the benefits of global growth are equitably distributed to make a meaningful impact on poverty eradication. In this context, in addition to the topics to be examined at the G8 Summit in Heiligendamm, we wish to call attention to matters of global governance, trade, migration, climate change and South-South co-operation, which constitute critical interventions in our efforts to eradicate poverty.
4. Achieving tangible progress on these matters hinges on the provision of adequate financial resources, effective policies and measures and enhanced international cooperation. Experience of the last two

decades with development policies has demonstrated that there can be no "one-size-fits-all" approach to development and that, strategies work effectively when tailored to the national circumstances.

5. We recognize that a supportive and an enabling global policy environment, based on principles of equality, mutual respect, equity and justice, constitute a positive framework for international co-operation.

### **Global Governance**

6. We reiterate the need to make the structures of global governance more democratic, representative and legitimate by increasing the participation of developing countries in the decision-making bodies of multilateral institutions. This is in line with discussions held at the UN World Summit in 2005. Priority should be given to the reform of the United Nations and its Security Council to make them more responsive to the needs and interests of developing countries, as well as to enhance international peace and security. Reform of the international financial architecture, especially enhancing the voice and participation of developing countries in the Bretton Woods Institutions, is also necessary.
7. Strengthening democratic governance implies a permanent endeavor to combat corruption in all its forms and in all countries, developed and developing ones alike. It also requires that efforts to improve the quality of public sector management are coupled with measures to stimulate greater corporate responsibility, transparency and accountability. Partnership between public and private sectors in social areas might be especially fruitful to promote new and innovative ways to promote social inclusion to tackle poverty.
8. Terrorism cannot be justified on any ground. The efforts of the international community to fight terrorism should be strengthened and conducted in accordance with international law, in particular human rights law, refugee law and international humanitarian law, and should avoid double standards. We stress the importance to take urgent action to prevent and combat terrorism in all its forms and manifestations and to implement the Global Strategy of the United Nations against Terrorism. In this context, States should consider becoming parties without delay to the existing international conventions and protocols against terrorism, and implementing them,

and to make every effort to reach an agreement on and conclude the Comprehensive Convention on International Terrorism. Measures should be taken to pursue and reinforce development agendas and social inclusion to reduce youth unemployment and marginalisation so that they may not be exploited. We reaffirm our commitment to ensure the timely and full realisation of MDGs, to eradicate poverty and promote sustained economic growth, sustainable development and global prosperity for all.

9. Security and development are interlinked and mutually reinforcing. Poverty and underdevelopment greatly increase the risk of instability and violence. Similarly, conflicts and war undoubtedly set back development.
10. We stress the need to build a truly global partnership for development as set out in the 8th Millennium Development Goal, the Monterrey Consensus and the Johannesburg Plan of Implementation. These efforts should address the eradication of poverty and hunger as a top priority. In this respect, it is extremely important that countries maintain the ownership of their development strategies and that they are not abandoned on the grounds of institutional weakness.

### **International Trade**

11. Global trade plays a relevant role in fostering economic development and fighting poverty. Nevertheless, international trade continues to face important barriers and distortions particularly in the agricultural sector, which affect the overall efforts of developing countries to enhance the well-being of their societies.
12. We consider necessary that the major trade partners reaffirm their commitments to achieve the necessary agreements, so as to conclude the negotiations of the Doha Development Agenda. The successful conclusion of this process with an outcome that meets the objectives embodied in the Doha mandate (the Doha Ministerial Declaration complemented by the July 2004 Framework and the Hong Kong Ministerial Declaration) will bring developing countries, and particularly to the least developed ones, newer and better benefits from globalization that will contribute to consolidate their economic development and to create the necessary domestic conditions that will help in the profound battle against hunger and poverty.

13. Brazil, China, India, Mexico and South Africa as members of the WTO Group of 20, share the belief that the cornerstone of the current negotiations is the agricultural sector, which is of utmost relevance for the well-being of our most vulnerable population. In particular, agreement has to be reached to eliminate trade distortions, especially those derived from the limited access to the developed countries markets as well as from the substantial and effective reductions in trade-distorting domestic support and other forms of internal support instrumented by the developed countries. Meaningful and operable special and differential treatment, which includes development instruments of Special Products and the Special Safeguard Mechanism are vital to address the concerns of developing countries with subsistence and low-income farmers. We are confident that any progress towards achieving these aforementioned goals will have a positive impact on the overall process of the Doha Round, in particular in the NAMA and services negotiations.
14. We underline that a more open world economy takes into account the promotion of financial flows, notably foreign direct investment, in a way that contributes to the sustainability of development, the transfer of avant-garde technology and the creation of decent employment, all of which are tools for the definitive fight against poverty.
15. We consider that it is time for the governments of the relevant developed members of the WTO to express their political will to push forward the negotiations.

### **International Migration**

16. We acknowledge international migration as an important aspect of globalization today, which demands objective, comprehensive, balanced and multidimensional approaches.
17. We emphasize the need of a new holistic and long-term framework for international migration based on a deep and wide understanding of the phenomenon, its causes and consequences, and its relationship with development, human rights, and security.
18. A new culture on migration demands increased and effective cooperation between sending, transit and receiving States and abided by the following criteria: -

- a) Migrants, as human beings, should be at the center of any migratory programme or policy, including respect of their human rights, regardless of their migratory status and should be recognized as active contributors to development, as well as to the economic, cultural and social spheres in countries of origin and destination;
- b) Policies and initiatives on migration should promote holistic and long-term approaches that take into account the causes and consequences of the phenomenon, as well as the full respect of the human rights of migrants;
- c) In today's age of globalization, the importance of international labor mobility needs to be recognized on the same level as movement of goods and services. Negotiations under Mode 4 of GATS need to be speeded up. Labor markets, however, should not be the sole reference point in determining the kind and scope of migratory programmes or policies;
- d) Mutual benefit and mutual responsibility are fundamental to reach balanced responses.
- e) More and better coordination and cooperation between sending, transit and receiving States would lead to win-win situation for all;
- f) We need to promote positive elements of migration, especially to enhance its development benefits, while addressing the whole spectrum of challenges related to it, particularly those of irregular migration and its causes;
- g) Promotion of enabling conditions for the participation of migrants (Diaspora) in the development of their home countries;
- h) Strengthening responses to the particular needs of migrant women, through integration of a gender perspective in migration management policies and strategies;
- i) Combating trafficking and smuggling of migrants, including the falsification of documents, without criminalizing migrants based solely on their migratory status;
- j) Eliminating all forms of violence, racial discrimination,

xenophobia and other forms of intolerance, inhuman and degrading treatment against migrants and their families, through the promotion of culture and education that values diversity; and

- k)** Promoting collaborative programmes in partnership with multilateral organizations between and within the sending, transit and receiving countries for capacity building, training and for establishing best practices in reinforcing the benefits of international migration and development.
19. We urge G8 countries to incorporate the above mentioned principles in the discussions that take place in different international and regional fora in order to find durable and comprehensive solutions that emphasize the positive aspects and minimize the negative elements of this global phenomenon, particularly in the upcoming Global Forum on Migration and Development, which will be held in Brussels in July 2007. The countries should commit on making the Forum work as an instrument for reaching political consensus on matters regarding international migration.

### **Climate Change**

20. Climate change is a global challenge with strong economic, environmental and social dimensions. It impacts all countries, but is particularly severe for developing countries, given their vulnerabilities, inadequate means and limited capacities to adapt to its effects. The recent reports of the IPCC have reaffirmed the need for urgent action. We believe that at this critical juncture we all should do more in accordance with our common but differentiated responsibilities and respective capabilities. We also believe that immediate and real effect must be given to commitments on international cooperation in fighting climate change, especially in the areas of adaptation, technology transfer, capacity building and the development of the carbon market. This cooperation should be framed by the need to address unsustainable patterns of production and consumption.
21. Climate change is a global phenomenon that requires an international response under the United Nations Framework Convention on Climate Change. Any new cooperative effort to tackle climate change should not undermine the UNFCCC and its Kyoto Protocol, but rather

complement these instruments. GHG mitigation in developed countries is key to address climate change given their responsibilities in causing it. Developed countries must take the lead by making further truly significant commitments at an early date for GHG reductions in the period beyond 2012. Early and significant commitments would give a long term and strong signal to the private sector, including in its involvement in climate related investments, and spur the carbon market. The Clean Development Mechanism's contribution to sustainable development and transfer of clean technologies to developing countries would also be enhanced significantly.

22. In order for developing countries to contribute to the efforts to address climate change, access to adequate technology is a key enabling condition. We need an agreement on transfer of technologies at affordable costs for accelerated mitigation efforts in developing countries, inter alia through increased use of renewable energy, including biofuels, and enhanced energy efficiency. Rewards for innovators needs to be balanced with common good for humankind. We also consider it necessary and important to enhance developing countries' capacities to deploy mitigation and adaptation technologies.
23. Many needed technologies based on resource endowments of developing countries (e.g. biomass, biofuels, clean coal) do not yet exist, or are too expensive. Collaborative R&D between developing and developed country R&D institutions can address this gap. Financing can be through a Venture Capital Fund, located in a multilateral financial institution, with the resulting IPRs being held by the Fund, and deployed at concessional cost in developing countries. Additionally, there could be collaborative R&D projects with sharing of IPRs by the partner R&D institutions.
24. Resources required for adaptation are of magnitude order as those for GHG mitigation. For this we should mobilize resources from the entire carbon market, as is being done on a small scale from the 2% levy on the CDM proceeds. These resources are separate from the provision of new and additional resources to tackle the challenges of adapting to the adverse effects of climate change. Diversion of ODA resources from economic growth and poverty alleviation in developing countries for adaptation is not the answer as development is a prerequisite for achieving effective adaptation.

## South-South Cooperation

25. We reaffirm the role of South-South cooperation in the overall context of multilateralism, as a continuing process vital to confront the challenges faced by the South, in particular its role as an important tool crucial for fostering and strengthening the economic independence of developing countries and achieving development as one of the means of ensuring the equitable global economic order.
26. We welcome the continued efforts by developing countries in furthering South-South cooperation and its new dynamics as manifested by recent meetings and initiatives such as South America-Arab Summit, China-Africa Summit, the Puebla-Panama Plan, India-Brazil-South Africa (IBSA) Dialogue Forum, the New Africa-Asia Strategic Partnership (NAASP) and the Third Round of Negotiations of the Global System of Preferences among Developing Countries (GSTP).
27. We in order to expand both the strength and the scope of South-South cooperation, undertake the resolve to:
  - i) Enhance policy coordination and high-level dialogue. The common challenges shared by the developing countries are wide-ranging, inter alia, MDGs and international development cooperation, financing for development, market access in the global trading system, an enhanced voice and participation of developing countries in international financial institutions, fighting environmental degradation and infectious diseases. We need to work together to press for a favorable external environment and adequate policy space for development. In the field of South-South cooperation, we have both traditional mechanisms such as the G77 and new forms such as the dialogue among our five developing countries, all of which are playing a positive role in promoting South-South cooperation. We support all such arrangements;
  - ii) Enrich concrete cooperation in all fields. The growing strength of developing countries has created a wealth of opportunities for concrete South-South cooperation in such fields as trade, investment, S&T, infrastructure, health and education, etc. Efforts should be made to explore all forms of cooperation in all fields based on the principles of effectiveness, ownership, equality, complementarity and mutual-benefit; and

- iii) Implement and follow up on the outcomes of major conferences on South-South cooperation such as the Second South Summit held in Doha. We call for a stable and regular dialogue mechanism and necessary financial resources in this regard to make the South-South cooperation more meaningful and effective.
28. We call for financial and institutional support from the international community for South-South cooperation including in the form of triangular cooperation.
29. We reiterate that South-South cooperation is complementary to and not a substitute for North-South cooperation. We welcome the convocation of the G8 Heiligendamm outreach session, which we hope will help further strengthen North-South cooperation.

**155. Joint Statement by the German G8-Presidency and the Heads of State and/or Government of Brazil, China, India, Mexico and South Africa on the occasion of the G8 Summit in Heiligendamm.**

**Berlin, June 8, 2007.**

Today's purposeful discussions between the G8 and Brazil, China, India, Mexico and South Africa mark an important step towards an equal and enduring partnership for building the framework conditions of a globalized and competitive world economy. In a globalizing world, we have to look beyond national and regional boundaries and work together.

Towards this endeavour, we commit to cooperate in the following fields:

**- Promoting Cross Border Investment to our Mutual Benefit:**

We recognize that cross-border direct investment is a major factor shaping the world's economy. Such inflows can make a major positive contribution to economic growth and sustainable development. We share a common interest in promoting investment and to safeguard and further develop a sound global investment environment. To this end, we shall work together to promote more favourable conditions in our countries for investment, both domestic and foreign, with the aim of fostering economic growth and

sustainable development. This may also include the encouragement of responsible business conduct.

**- Promoting Research and Innovation:**

Strategies to encourage and support research and innovation are key elements for future sustainable development of our economies. In this context, we underline the importance of integrating the promotion and protection of innovation in our national policies and legislation. We encourage a positive exchange of views on international experiences related to the crucial role and economic value of intellectual property rights (IPR) protection and implementation of agreed international IPR protection standards. In this exchange we also need to consider the protection of IPRs in conjunction with common good of human kind for the purposes of protecting the environment and supporting public health. In this regard, we recall the Doha Declaration on the TRIPs Agreement and public health. We affirm our commitment for further cooperation in capacity building, human resource development and public awareness programmes in the field of intellectual property.

**Fighting Climate Change:**

We face serious challenges in tackling climate change and achieving sustainable development globally. We reaffirm our commitment to the United Nations Framework Convention on Climate Change (UNFCCC) and to its objective through both mitigation and adaptation in accordance with our common but differentiated responsibilities and respective capabilities. On this basis and taking into account the scientific knowledge as represented in the recent IPCC reports, we remain committed to contribute our fair share to tackle climate change in order to stabilize green house gas concentrations at a level that would prevent dangerous anthropogenic interference with the climate system. To this end we need a flexible, fair and effective global framework and concerted international action. We underline the crucial role of economic incentives, in particular by carbon markets, for the necessary investments in climate friendly technologies at large scale. The adaptation to climate change will be a major challenge for all countries, in particular for developing countries , and means for adaptation need to be included in a future agreement along with enhanced technology cooperation and financing. We call on all parties to actively and constructively participate in the negotiations on a comprehensive agreement at the UNFCCC Conference in Indonesia in December 2007.

**Energy:**

We recognise the need for closer, more practical and result-oriented regional and international cooperation in the energy sector, especially in ensuring secure and affordable supplies of energy as well as in improving energy efficiency and the access to advanced and affordable energy technologies. We confirm our commitment to promote energy efficiency, through cost-effective solutions, to advance the effective use of fossil fuels, such as the clean coal technology, and to increase the use of cleaner and renewable energy sources, such as biofuels and biomass, as an important step towards secure, stable and competitive energy supplies for achieving sustainable development.

**Development, particularly in Africa:**

We reiterate our commitment to the Millennium Development Goals (MDGs), the eradication of poverty and sustainable global development. In view of our responsibility regarding the challenges of development we shall strengthen cooperation and coordination between us to achieve these goals.

We commit to embark on a high-level dialogue on specific challenges as proposed by the G8 (Heiligendamm Process) as a follow up to continue our discussion in a more structured manner for a period of two years until the G8 Summit in 2009 where we will review the progress made on the following issues: Promoting cross border investment to our mutual benefit, Promoting Research and Innovation, Development, particularly Africa, and Sharing Knowledge for improving Energy Efficiency.

## INDIA-BRAZIL-SOUTH AFRICA (IBSA)

### 156. Briefing by Official Spokesperson on Fourth IBSA Ministerial Level Trilateral Commission Meeting.

**New Delhi, July 16, 2007.**

**Official Spokesperson:** Good afternoon and welcome..... Essentially, I wanted to give you a heads up on the 4th IBSA Ministerial Level Trilateral Commission Meeting which is being held tomorrow. The Indian delegation will be led by External Affairs Ministry Shri Pranab Mukherjee. His counterparts are - from Brazil Mr. Celso Amorim, the Foreign Minister; and from South Africa Ms Nkosazana Dlamini-Zuma, the Foreign Minister. The IBSA Focal Points have already met on 13th of July, and for that the Indian delegation was led by Shri Nalin Suri, Secretary (West). The last such Trilateral Commission meeting was held in Rio de Janeiro in Brazil in March, 2006.

You are all familiar with IBSA. To recap, IBSA is a unique forum for cooperation amongst three countries that have large democracies and are active on the global scale. They have multi-cultural societies and represent three different regions of the developing world. In essence, they also have a preeminent status in their respective regions. They constitute together 1.3 billion people, and a combine economy of 1.26 trillion US dollars. Intra-IBSA trade target of 10 billion dollars we expect to achieve this year itself.

In terms of the areas of cooperation, thirteen areas have been identified for sectoral cooperation. These are: transport, health, education, defence, information society, science and technology, trade and investment, tourism, culture, agriculture, energy, social issues and public administration.

Tomorrow we will brief you after the meeting. There will be a Joint Press Conference held by the three Ministers just before lunch. We expect that the Foreign Ministers would review the progress that IBSA has made since the first landmark IBSA Summit in Brazil in September 2006, and would also provide a direction for its future functioning, in particular to prepare for the second IBSA Summit which is expected to be held in South Africa later this year. I have more details but I think we will get much more tomorrow.

**Question:** This is on the IBSA meeting. Both Brazil and South Africa are members of Nuclear Supplier Group. EAM had bilateral meetings with his Brazilian and South African counterparts today. Did they give an assurance that they will support India at the NSG meeting?

**Official Spokesperson:** The fact is that I do not have a read-out from the meetings. I am not even sure that both have already taken place. I think they are supposed to be this evening. It is a fair question. But I think you should address it tomorrow to the Joint Press Conference. Yes, they are both members of the NSG. I think it is a fair question that you can raise tomorrow. Let the meetings take place.

**157. Joint Press Conference by Foreign Ministers of India, Brazil and South Africa following the 4th IBSA Trilateral Commission Meeting.**

**New Delhi, July 17, 2007.**

**Shri Pranab Mukherjee (External Affairs Minister):** Your Excellency Mr. Celso Amorim, Minister of External Relations of Brazil; Your Excellency Dr Nkosazana Dlamini-Zuma, Minister of Foreign Affairs of South Africa; Distinguished delegates; Ladies and Gentleman:

We have just concluded our very fruitful and productive deliberations of the 4th IBSA Trilateral Commission meeting.

As you know, IBSA is a unique forum that brings together three large democracies from three different continents facing common challenges. It was just three years ago that the First IBSA Trilateral Commission meeting was held here in Delhi in 2004. In this period, we have identified several areas of cooperation and have been working towards enhancing cooperation in areas such as S&T, education, agriculture, energy, culture, health, social issues, public administration and revenue administration. Several IBSA Working Groups have recently held their meetings. Today we have agreed on a forward looking and substantive agenda of cooperation in the IBSA framework in sectors which are of particular interest to our three countries. We also had a valuable exchange of views on regional and international issues.

I am happy to mention that the trade target of US \$ 10 billion amongst our three countries by 2007 is expected to be achieved. It will be our endeavour to further increase trade and investment flows amongst us.

India has a strategic partnership with both Brazil and South Africa. We value these partnerships and are determined to add significant content to

them in the years to come. We are looking at new areas of cooperation and also strengthening existing areas of cooperation keeping in view each other's needs and strengths.

As IBSA evolves, I am confident, it will acquire new dimensions. It will be our endeavour to see that IBSA moves to a yet higher level of cooperation, beneficial to our three countries. This will make IBSA an outstanding example of South-South Cooperation.

I am happy to announce that the Second IBSA Summit will be held in South Africa later this year. I would like to thank His Excellency Mr. Amorim and Her Excellency Dr. Zuma for attending the 4th IBSA Trilateral Commission meeting.

Thank you.

**Mr. Celso Amorim (Minister of External Relations of Brazil:** Thank you very much Minister Mukherjee. I am very glad to be here with my good friend Nkosazana Zuma, Minister of Foreign Relations of South Africa. I do not think I have much to add to what Minister Mukherjee has said. Actually I was writing down the words and the words that I was writing down were exactly the ones that he pronounced.

It is a unique forum of three large multicultural democracies. If I am repeating them it is because it is really unique that this forum is acquiring its own personality, in a way its own identity. It is an evolving process, but it is a process that is going rather fast I would say that the cooperation that we have already achieved is reflected in the communiqué which has a hundred points. It in itself is quite an adventure to be able to agree on a hundred points for any three countries in the world.

The important areas that involve our own cooperation are, as mentioned, connectivity, health, science and technology, culture, and bio-fuels and also our views on global issues that go from Security Council reform to the World Trade Organisation. I think these are indeed very important points.

I would also mention the fact that we are now becoming more conscious of developing people-to-people relationship. I think this will be reflected in probably some meetings of parliamentarians, civil society and also going into other areas - like Minister Zuma suggested - like sports for instance. I think there are also some other points that we would like to develop further. I think these would certainly include defence among others and defence technology which is of great interest.

When you look at IBSA and when you look at the three countries, their intrinsic characteristics were already signaled here. But when you look also at the geographic position of each country, you see that there is a natural strategic alliance between the three of them. I would on my part say - just to complement, and this is not in the document - that we have a challenge probably of being able to bring our mutual trade to something around 15 billion dollars by 2007. Brazil and India have already agreed that we will have to have 10 billion dollars of trade by 2010. So, it will be more than natural that we have 15 billion dollars trade and probably even more in the trilateral trade among our countries. A lot will depend, as was said, on connectivity, air connections and maritime transport.

Two final points if I may. First is the importance of MERCOSUR-SACU- (Trilateral) India Free Trade Agreement. That we should work on, and continue to work on. Of course, it depends on other countries. They are all sovereign countries. We cannot decide for them. We cannot inspire. Certainly there is very good reception for that in MERCOSUR. If we are able to create this economic space between India, SACU and MERCOSUR, we will probably be creating the largest economic space in the developing world. I think this will again be a big contribution for a multi-polar world which is the world that we want to see.

I think IBSA should also be seen as an element that creates synergy for other forms of South-South cooperation. I think this is very important. We do not look at ourselves as an exclusive group. Of course, we want to reinforce our identity because we do believe that if IBSA progresses, that will be a good example for other forms of South-South cooperation. I am sure that once some of the projects that we have in common are consolidated, they can be opened to other countries. Indeed, I think one important aspect of IBSA has already been to cooperate with poorer countries. I think it is a fact that although we are still developing countries, to a large extent still poor countries, but as we have been saying, President Lula has always said, that being poor does not mean that you cannot show solidarity. So, we have been trying to show solidarity to countries that are needier than we are.

I will once again thank for the opportunity to be in India. This is my third visit to India in three months. I do not know when will be the fourth. Maybe we will have some other meeting of some other forum in the month of August or September. In any case, I am very happy and I am looking very much forward to the meeting in South Africa. President Lula, President Mbeki and Prime Minister Singh will be together there.

Thank you very much.

**Ms. Nkosazana Dlamini-Zuma (Minister of Foreign Affairs of South Africa):** Thank you very much to my two colleagues. They have covered most of the issues that need to be covered except that to emphasize that IBSA indeed is a unique form of cooperation in the way that it is experimental, it is a pilot, and it has not been done before. It is formed of three countries across three continents, countries that whose shores are washed by two big oceans. It is a very important and unique cooperation. Indeed, in the coming years we have to see to it that it develops into a model of South-South cooperation that can be copied, its experience can be used, by others. It is something very important and unique.

For it to succeed, we have to be able to move people and goods across the three continents, across the three countries. Therefore, I would like to emphasize the question of connectivity, both in terms of telecommunication and also in terms of transport, both maritime and air. It is something that we have to work on to make sure that we can reach each others' capitals and each others' countries quickly and in the most direct way.

I think we should look more at trade and having joint ventures. We need to look at what would need to be done to make sure that we do have successful joint ventures. The three of our countries are the countries that are known for mega-diversity. We have to see the advantage that we can get out of that in terms of tourism, in terms of making sure that we also participate and cooperate in issues that have to do with sustainable development.

Brazil hosted the Second Sustainable Development Conference in Rio. We did it in Johannesburg. Maybe one day India will host another one. But in any case we are really mega-diversity countries and we must also cooperate in preserving that mega-diversity. In the international fora we are already cooperating. I think we can do more in contributing to the evolution of many areas that is taking place in the world - in reforms ... (inaudible) ... in trade talks. I think we should keep together wherever we find ourselves. There should not be a forum where we are apart. Wherever we are, we must keep together and work together. What makes us unique is also that we do have very convergent views on many issues that the world is grappling with. So, that makes it easy for us to keep together.

Lastly, just to emphasize, people-to-people relations are very important. Parliamentarians, tourism, of course, business is an anchor of this

relationship. But we come and go and people always remain. If there is a strong bond amongst our people, this ensures sustainability.

Thank you.

**Question (Mr. Ramesh Bhan, UNI):** During the bilateral meetings with the two Foreign Ministers, did you talk about civilian nuclear cooperation, energy cooperation? Was there any discussion on Indo-US Nuclear Agreement, on whether there will be support from these two countries in the NSG?

**Shri Pranab Mukherjee:** Already we have some expanding relationship on the energy sector between India and Brazil. Also especially in the hydrocarbons area of energy, you are aware that ONGC has allocated 30 per cent of the shares on Krishna-Kaveri Basin. ONGC Videsh Nigam Limited has already received three offshore blocks in Brazil and also we are bidding for more. Energy is an area where we are working on. Apart from that, we have received cooperation from South Africa in advancing our case in the NSG for nuclear energy. Energy is one of the important priority areas identified on which the working group has made recommendations. We have referred it to the Ministerial Communiqué. I am quite confident that this is one of the subjects which will be discussed at the Summit level. Thank you.

**Question (Mr. Ranjeet Kumar, *Navbharat Times*):** During G-8 Summit in Germany, President Lula proposed setting up of a separate forum for five Outreach countries. Since three of those outreach countries are present here, I would like to know the views of all the three in this regard. What is the progress in setting up that forum?

**Shri Pranab Mukherjee:** Who is this question addressed to?

**Question (Mr. Ranjeet Kumar, *Nav Bharat Times*):** I would like to know the views of all the three since you are all members of that Outreach group.

**Shri Pranab Mukherjee:** I will leave it to Mr. Amorim to respond.

**Mr. Celso Amorim:** I think the forum in practice is already constituted because it has been already...(inaudible)... a tradition because it is only three times. But it has been the tradition already that the five countries meet before the meet with the G-8. What became clear now is that it is necessary maybe to have even further coordination. This is even more necessary when we think that one of the agreements that we came to in

the last meeting, in Heiligendamm was the structured dialogue. We have not yet as far as I know - maybe the senior officials have already - have fixed a date. But this will have to take place so that the G-5 come there with coordinated positions for this structured dialogue. That will help them to have more meaningful results in the G-8 plus 5. Honestly, in my opinion, the G-8 plus 5 has some time to become G-13 or something of the sort. As long as we do not have that, we have to have a good coordinating position. Again, here I think the fact that we have IBSA there is already a synergy because we are discussing many of the subjects among ourselves. So, it facilitates the further dialogue that we have with other countries.

**Shri Pranab Mukherjee:** I agree with my colleague but I would just like to add to it. I do hope that before the future Summits it will be possible for us to have more coordinated presentations from these five countries. As my colleague Mr. Amorim has pointed out, many of these issues we are discussing among ourselves. We are evolving identical positions, common positions, on many of these issues. So, it would not be difficult to bring about an agreed common position before the next Summit.

**Ms. Nkosazana Dlamini-Zuma:** I think we all agree that we have to coordinate. I think the Foreign Minister of Mexico actually was trying to do this already. I know last year the Foreign Ministers of the five met on the margins of the UN of the G-8. I think it is very important because we are interacting with the G-8. We are five developing countries, but we cannot bring five different views. We have to synchronise our views on all the issues. But, of course, what President Lula has coined, if I understood it well, was that why do we only have to meet just because we are meeting the G-8. We can also meet, not just because we are meeting in the G-8. So, I think the point was taken and I am sure that coordination will be done.

**Question (Mr. Manish Chand, IANS):** Does IBSA have a common position on reform of the Security Council? This question is directed to the South African Foreign Minister. Is there any hope of reconciliation between the G-4 and African Union's position on expansion of the Security Council?

**Ms. Nkosazana Dlamini-Zuma:** I think the big countries have the same approach to the reform of the Security Council - to be more representative, to be more democratic. We also agree that it has to be expanded and the expansion should be both in permanent and non-permanent categories. If we look at the African position, the major difference is around the

question of the veto. The rest is more or less the same. Africa's view is that the veto must be abolished. If it is not abolished, all permanent members must stay it. But this is Africa's position. The G-4 has its position. I think once there is a negotiating forum at the UN, each group will put its position forward and negotiations will start. Then negotiations by definition about giving and taking and eventually coming to a common position will happen. I do not see the G-4 position as the position that will eventually have to be the position that all of us take. Nor do I see the African position as the position that must be the outcome after negotiations. The outcome will be somewhere in between.

**Question (Mr. Srinjoy Chowdhury, *Times Now*):** Question for EAM. Sir, both South Africa and Brazil are members of the NSG and the NSG will come into play once the nuke deal is through. Talks are going on just now. Did you discuss the deal with these two very important countries of the NSG? Secondly, are you optimistic about the current talks in Washington DC?

**Shri Pranab Mukherjee:** Of course, we are having cooperation from Brazil and South Africa in the NSG and we are discussing. But as you know, unless 123 agreement is finalized, NSG cannot formulate its position, as it will have to be India-specific. So, one will have to follow the other. But as I mentioned earlier, energy is an area where we are cooperating, particularly in the area of non-conventional energy where Brazil is having a leading role. President Lula has emphasized on bio-diesel also, not only on bio-fuels like ethanol in which they have developed their expertise by mixing 20 to 25 per cent of ethanol in their hydrocarbons. Even bio-diesel is being emphasized. These are the areas which IBSA is emphasizing on.

## **158. New Delhi Ministerial Communiqué 2007 of India-Brazil-South Africa (IBSA) Dialogue Forum.**

**New Delhi, July 17, 2007.**

1. The Minister of External Affairs of India, H.E. Mr. Pranab Mukherjee, the Minister of External Relations of Brazil, H.E. Mr. Celso Amorim, and the Minister of Foreign Affairs of South Africa, H.E. Dr. Nkosazana Dlamini-Zuma, met in New Delhi on 17 July 2007 for the Fourth Meeting of the Trilateral Commission of the IBSA Dialogue Forum.
2. The Ministers reaffirmed the IBSA Dialogue as an important mechanism for political consultations and coordination on important regional and global developments. The Ministers reconfirmed their determination to play a constructive role in international affairs and to maintain friendly relations with all countries. The Ministers called for enhancing socio-economic cooperation in various sectors among India, Brazil and South Africa, inter alia, by implementation of decisions taken earlier.

## **GLOBAL ISSUES**

### **GLOBAL GOVERNANCE**

3. The Ministers stressed the need to make the structures of global governance more democratic, representative and legitimate by increasing the participation of developing countries in the decision-making bodies of multilateral institutions.
4. The Ministers reiterated their continued support for the reform of the United Nations to make it more democratic and responsive to the priorities of its Member States, particularly those of developing countries that constitute the vast majority of its membership.
5. The Ministers emphasized that the Security Council must, in its composition, represent contemporary realities and not those of the year 1945. Keeping in view that the decisions of the Security Council should serve the interests of the larger United Nations Membership, the Ministers emphasized the need for the urgent reform of the Security Council that would include its expansion in both categories of membership, permanent and non-permanent, in order to render it more democratic, legitimate, representative and responsive.

6. Towards this end, the representation of developing countries from Africa, Asia and Latin America, as permanent members of the Security Council, is essential. The Ministers reaffirmed their commitment to continue to jointly pursue a decision on the Security Council expansion. In this regard, they noted the ongoing efforts at the United Nations. This commitment will be pursued on an urgent basis, with a view to achieving concrete results by the end of the 61st UN General Assembly.
7. The Ministers welcomed the operationalisation of the Peace Building Commission in June 2006 and the Peace Building Fund in October 2006. The Ministers noted with satisfaction the Peace Building Commission's efforts to provide medium and long-term peace consolidation advice to countries emerging from conflict situations, as well as funding from the Peace Building Fund for peace consolidation projects. With the cases of Sierra Leone and Burundi being examined by the Peace Building Commission in their country - specific configurations, the Peace Building Commission has produced satisfactory results. However, in the year ahead, the Ministers noted the need for the Peace Building Commission to work towards more practical and concrete outcomes from its efforts to promote peace consolidation. In this context, as members of the current Organizational Committee of the Peace Building Commission, the Ministers reaffirmed their commitment to promote further concrete outcomes from the Peace Building Commission in the year ahead.
8. The Ministers also expressed satisfaction on the first year of the functioning of the Human Rights Council, created as part of the UN reform process in 2006, and expressed their commitment to ensuring that it fulfils the expectations of the international community. Following the establishment of the Peace Building Commission and the Human Rights Council, the UN reform process must now concentrate on reform of the Security Council.
9. The Ministers recommitted their respective delegations to the UN and its specialised agencies, as well as other multilateral bodies, to remain in close contact with each other and to consult on all issues of significance.
10. The Ministers stressed the necessity of reforming the International Financial Architecture, specially by enhancing the voice and participation of developing countries in the Bretton Woods institutions

and expressed concern at the slow rate of progress that has been achieved so far.

## **MILLENNIUM DEVELOPMENT GOALS**

11. The Ministers stressed that achievement of the Millennium Development Goals (MDGs) as part of global efforts to eradicate poverty and hunger, required international support. The Ministers noted with concern that commitments undertaken by developed countries for increase in Official Development Assistance (ODA) have not been fulfilled. The Ministers further stressed the need by developed countries to liberalize trade and eliminate subsidies on products of interest to developing countries. The Ministers also reiterated the importance of capacity building and equity and transparency in international economic relations for developing countries to achieve the MDGs, especially sub-Saharan Africa. The Ministers underscored their agreement to work together to eradicate poverty and promote sustained economic growth, sustainable development and global prosperity for all.

## **INTERNATIONAL TRADE**

### **Proposed MERCOSUR-India-SACU Trilateral Free Trade Area**

12. With reference to paragraph 45<sup>1</sup> of the First IBSA Summit Meeting Joint Declaration (Brasilia, 13 September 2006), the Ministers reaffirmed their commitment to implementing the determination of the Heads of State and Government concerning the expeditious

---

1. The reference is to para 16 of the Brasilia Communique of September 13, 2006 (Please see text in Document No. 53 page 377 of "India's Foreign Relations - 2006 - Documents: edited by Avtar Singh Bhasin). In an interview with the Hindu on July 16, the Brazilian Foreign Minister Celso Amorim repeated the proposal and added for this purpose the South African Customs Union (SACU) and hoped that the next Summit of the IBSA take it up for consideration. He said that the larger grouping would be in a better position to face the North in a creative competition. Describing IBSA as a creative attempt to energise South-South cooperation, Mr. Amorim acknowledged that the three countries had only so far "scratched the surface" in terms of mutual cooperation and blamed the "closed bureaucratic and entrepreneurial practices" for the slow pace, especially when it came to the formation of joint ventures. He said it was no longer possible for the rich countries to negotiate among themselves and present a "readymade solution" to the developing countries. To a question about the possibility of bilateral nuclear cooperation between Brazil and India including the fuel cycle once the Nuclear Suppliers Group alters its guidelines, Mr. Amorim said he did not foresee any problem so long as there was an effective safeguards agreement.

establishment of the Working Group to focus on the modalities for the envisaged India-MERCOSUR-SACU Trilateral Free Trade Agreement (T-FTA). In this regard, India, South Africa and Brazil support the establishment of the Working Group no later than early September 2007. As members of SACU and MERCOSUR, respectively, South Africa will work with its partners in SACU, and Brazil will work with MERCOSUR's pro-tempore President with a view to setting a date and place for the first meeting of the Working Group.

13. The Ministers noted that while global trade plays an important role in fostering economic development and fighting poverty, it continues to face important barriers and distortions particularly in the agricultural sector, which affect the overall efforts of developing countries to enhance the well-being of their societies.
14. The Ministers urged the WTO members to reaffirm their commitments to achieve the necessary agreements, so as to conclude the negotiations of the Doha Development Agenda. The Ministers expressed the view that Brazil, India and South Africa as members of the WTO Group of 20, share the belief that the cornerstone of the current negotiations is the agricultural sector, which is of utmost relevance for the well-being of our most vulnerable populations. In particular, agreement has to be reached to eliminate trade distortions, especially those limiting access to the developed countries' markets, including domestic support and other forms of internal support instrumented by the developed countries. Meaningful and operable special and differential treatment, which includes development instruments of Special Products and the Special Safeguard Mechanism are vital to address the concerns of developing countries with subsistence and low-income farmers. The Ministers emphasized that any progress towards achieving these aforementioned goals will have a positive impact on the overall process of the Doha Round, in particular in the NAMA and services negotiations.
15. The Ministers noted that an effective Aid for Trade programme will enhance growth prospects and reduce poverty in developing countries. As this requires substantial, additional, targeted resources for trade-related programmes and projects, the Ministers urged developed countries to leverage their aid for infrastructural development so that developing countries, particularly LDCs, could benefit from the present level of market access available to them.

16. The Ministers underlined that a more open world economy takes into account the promotion of financial flows, notably foreign direct investment, in a way that contributes to the sustainability of development, the transfer of avant-garde technology and the creation of decent employment, all of which are tools for the definitive fight against poverty.

## **CLIMATE CHANGE**

17. The Ministers noted that climate change is a global challenge with strong economic, environmental and social dimensions. It impacts all countries, but is particularly severe for developing countries, given their vulnerabilities, inadequate means and limited capacities to adapt to its effects. The recent reports of the IPCC have reaffirmed the need for urgent action. The Ministers reaffirmed that at this critical juncture all countries should do more in accordance with their common but differentiated responsibilities and respective capabilities. The Ministers also urged that immediate and real effect must be given to commitments on international cooperation in fighting climate change, especially in the areas of adaptation, technology transfer, capacity building and the development of the carbon market. This cooperation should be framed by the need to address unsustainable patterns of production and consumption.
18. The Ministers underlined that climate change is a global phenomenon that requires an international response under the United Nations Framework Convention on Climate Change. Any new cooperative effort to tackle climate change should not undermine the UNFCCC and its Kyoto Protocol, but rather complement these instruments. GHG mitigation in developed countries is key to address climate change given their responsibilities in causing it. Developed countries must take the lead by making further truly significant commitments at an early date for GHG reductions in the period beyond 2012. Early and significant commitments would give a long-term and strong signal to the private sector, including in its involvement in climate related investments, and spur the carbon market. The Clean Development Mechanism's contribution to sustainable development and transfer of clean technologies to developing countries would also be enhanced significantly.
19. The Ministers agreed that in the energy sector lies a strategic opportunity for the IBSA partners to engage in a pioneer and fruitful

dialogue among developing countries with a view to strengthen coordination regarding cross-cutting issues such as poverty eradication, climate change, energy security and South-South cooperation.

20. The Ministers expressed their satisfaction with the successful launching of the International Biofuels Forum which took place on 2 March 2007 in New York and reaffirmed the importance of the efforts being made in the context of the initiative to promote the establishment of an international market for biofuels.
21. The Ministers welcomed the forthcoming realization of the Biofuels International Conference to be held in Brazil, in July 2008, to discuss how to enhance international cooperation to promote the production and use of biofuels in the global level. The Ministers mentioned the contribution of biofuels as a cost-effective and immediate measure to address climate change accessible to developing countries.
22. The Ministers stressed that in order for developing countries to contribute to the efforts to address climate change, access to adequate technology is a key enabling condition. The Ministers expressed that there was need for an agreement on transfer of technologies at affordable costs for accelerated mitigation efforts in developing countries, inter alia through increased use of renewable energy, including biofuels, and enhanced energy efficiency. Rewards for innovators need to be balanced with common good for humankind. It is also necessary and important to enhance developing countries' capacities to deploy mitigation and adaptation technologies.
23. The Ministers also expressed their commitment to the trilateral work in biofuels and urged the Trilateral Task Team on Biofuels to deepen the discussions aimed at expanding the cooperation of the partners in this field, undertaking joint research on development, production of biofuels and engine redesign so as to enlarge their applications and reduce cost of deployment.
24. The Ministers noted that many needed technologies based on resource endowments of developing countries (e.g. biomass, biofuels, clean coal) do not yet exist, or are too expensive. Collaborative R&D between developing and developed country R&D institutions can address this gap. Financing can be through a venture capital fund, located in multilateral financial institutions, with the

resulting IPRs being held by the fund, and deployed at concessional cost in developing countries. Additionally, there could be collaborative R&D projects with sharing of IPRs by the partner R&D institutions.

25. The Ministers also noted that resources required for adaptation are of the same order of magnitude as those for GHG mitigation. For this, resources from the entire carbon market, as is being done on a small scale from the 2% levy on the CDM proceeds should be mobilized. These resources are separate from the provision of new and additional resources to tackle the challenges of adapting to the adverse effects of climate change. The Ministers underlined that diversion of ODA resources from economic growth and poverty alleviation in developing countries for adaptation is not the answer as development is a prerequisite for achieving effective adaptation.

## **INTELLECTUAL PROPERTY**

26. The Ministers underscored the importance and welcomed the continued discussions on the establishment of a "Development Agenda for WIPO". The Ministers also emphasized the need for early conclusion of the discussions and incorporation of development dimensions in the work programs of WIPO.
27. The Ministers also reaffirmed the need to reach a solution to the problem arising out of granting of intellectual property rights on biological resources and/or associated traditional knowledge, without due compliance with relevant provisions of the Convention on Biological Diversity. In this regard, the Ministers highlighted with great appreciation the presentation in the WTO of the proposal co-sponsored, among others, by the three IBSA countries to amend the TRIPS Agreement by introducing a mandatory requirement for the disclosure of origin of biological resources and/or associated traditional knowledge used in inventions for which applications for intellectual property rights are filed. The Ministers also reaffirmed their support for the principle of prior informed consent and equitable benefit sharing.
28. In the context of continued increase in the grant of patents on bio-resources and traditional knowledge and also registration of trade marks, the Ministers resolved to further co-operate and intensify their efforts in resolution of these issues.

29. The Ministers reaffirmed the understanding enshrined in the Doha Declaration that the TRIPS Agreement does not and should not prevent Members from taking measures to protect public health and that accordingly each member has the right to grant compulsory licences and the freedom to determine the grounds upon which such licences are granted.

## **BIODIVERSITY ISSUES**

30. The Ministers noted with appreciation the decisions of the Eighth Conference of the Parties (CoP-8) to the Convention on Biological Diversity (CBD) held in Curitiba, Brazil, in March 2006, to complete negotiations of the International Regime (IR) on Access and Benefit Sharing (ABS) by 2010, and to hold two negotiation meetings of the ABS Working Group prior to CoP-9 to be held in May 2008.
31. India, Brazil and South Africa, as founding members of the Group of Like Minded Megadiverse Countries (LMMCs), agreed to strengthen cooperation and coordination in fostering activities related to South-South cooperation, with emphasis on multilateral negotiations, in particular for ensuring timely, and successful conclusion of the IR on ABS.

## **SOUTH-SOUTH COOPERATION**

32. The Ministers reaffirmed the role of South-South cooperation as a continuing process vital to confront the challenges faced by the South, in particular its role as an important tool crucial for fostering and strengthening the economic independence of developing countries and achieving development as one of the means of ensuring the equitable global economic order.
33. The Ministers recognized that South-South cooperation has created a stronger collective voice for the countries of the South in the international arena. South-South cooperation has become an integral part of the relations among the developing countries and an important means of promoting the exchange of ideas, experience, knowledge, technical advances, skills and expertise across a broad range of sectors.
34. In order to expand both the strength and the scope of South-South cooperation, the Ministers resolved to enhance their policy

coordination and high-level dialogue on the common challenges faced by developing countries, such as MDGs and international development cooperation, financing for development, market access in the global trading system, fighting environmental degradation and infectious diseases. The Ministers further agreed to enhance South-South cooperation in wide ranging fields, inter alia, trade and investment, S&T, infrastructure, health and education.

35. The Ministers urged the international community to provide financial and institutional support for South-South cooperation. The Ministers reaffirmed that South-South cooperation is complementary to and not a substitute for North-South cooperation.

## **SUSTAINABLE DEVELOPMENT**

36. The Ministers reaffirmed their shared commitment on eradication of poverty through sustainable development. The Ministers highlighted the importance of implementing the principles adopted in the Rio Declaration and the Johannesburg Plan of Implementation of the World Summit on Sustainable Development, particularly the principle of common but differentiated responsibilities. The Ministers underlined that binding targets for developing countries were inappropriate. Instead, the focus should be on compliance of targets accepted by developed countries.
37. The Ministers stressed that capacity building is a key component for ensuring sustainable development globally. The Ministers highlighted the importance of new and additional financial resources and effective transfer of environment-friendly technologies at affordable prices to developing countries for achieving this goal. In this context, the Ministers noted with concern the failure of the donor countries to meet their commitments of Official Development Assistance targets to developing countries, and urged them to fulfill their commitments.
38. The Ministers reaffirmed the importance of conservation, protection and sustainable use of genetic resources. They highlighted the need to adopt an international regime to protect and safeguard the equitable sharing of benefits arising from the use of genetic resources and traditional knowledge. In this context, the Ministers urged the international community to make all efforts to conclude the negotiation process for such an international regime, within the framework of the Convention on Biological Diversity, by 2010.

39. The Ministers noted the decision of the 11th Session of the Commission on Sustainable Development regarding the multi-year framework and the fact that the 2008-09 cycle will deal with the thematic areas of agriculture, rural development, land, draught and desertification.
40. The Ministers noted the increasingly important work of the International Seabed Authority as well as the increasing commercial interests in deep seabed mining and reaffirmed their commitment to the universalization of the United Nations Convention on the Law of the Sea (UNCLOS) and the Agreement relating to the implementation of Part XI of the UNCLOS. The Ministers also reaffirmed that all activities affecting the area should be conducted for the benefit of mankind as a whole on the basis of relevant principles governing the Area and marine scientific research.
41. The Ministers noted the discussions on marine genetic resources in areas beyond national jurisdiction that took place during the meeting of the United Nations Open-Ended Informal Consultative Process at the United Nations from 25-29 June 2007 and reiterated that the conservation, exploration and exploitation of marine genetic resources in areas beyond national jurisdiction should occur within the framework of the UNCLOS.
42. The Ministers reiterated their countries' commitment to achieve sustainable development, and stressed the importance of international cooperation in this regard.

## **HUMAN RIGHTS**

43. The Ministers noted that India, Brazil and South Africa as members of the Human Rights Council, share a common vision regarding the promotion and protection of human rights through dialogue and cooperation. Guided by this vision, the three countries actively participated in the institution-building phase of this newly-formed human rights body with a view to making the Council a strong, effective and efficient body capable of promoting and protecting human rights and fundamental freedoms for all and introducing a new work culture of cooperation and mutual understanding in the functioning of the international human rights machinery. The Ministers remain committed to continue actively participating in a coordinated manner in the work of the international human rights machinery to

pursue the objective of securing effective enjoyment of human rights by all, including vulnerable groups and the implementation of the right to development.

## **PEACE AND SECURITY**

### **TERRORISM**

44. The Ministers reaffirmed that terrorism constitutes one of the most serious threats to international peace and security. They strongly condemned terrorism in all its forms and manifestations, committed by whomever, wherever and for whatever purpose. They stressed that there can be no justification, whatsoever, for any acts of terrorism. They emphasized the need for concerted and coordinated action by the international community to realize the objectives of eradicating terrorism in all its forms and manifestations.
45. The Ministers reaffirmed their commitment to the full implementation of the measures to combat terrorism outlined in the UN Global Counter-Terrorism Strategy and the relevant UN Security Council and General Assembly Resolutions. They recalled that the Outcome Document of 2005 World Summit had called upon the member states to conclude a Comprehensive Convention on International Terrorism during the 60th Session of the General Assembly, and stressed the importance of finalizing early the Comprehensive Convention on International Terrorism and called upon all states to cooperate in resolving the outstanding issues with the objectives of an expeditious conclusion of negotiations and adoption of this Convention.
46. The Ministers emphasized that international cooperation in combating terrorism should be conducted in conformity with the principles of the UN Charter, international law and relevant international conventions.

## **DISARMAMENT AND NON-PROLIFERATION**

47. The Ministers reiterated their commitment to the goal of complete elimination of nuclear weapons and expressed concern over the lack of progress in realization of that goal. The Ministers emphasized that nuclear disarmament and nuclear non-proliferation are mutually reinforcing processes requiring continuous irreversible progress on both fronts, and reaffirmed, in this regard, that the objective of non-

proliferation would be best served by systematic and progressive elimination of nuclear weapons in a comprehensive, universal, non-discriminatory and verifiable manner. The Ministers recalled that similar approaches have led to the establishment of internationally legally binding instruments that have banned chemical and biological weapons and are contributing towards the total elimination of such weapons and reaffirmed their commitment to make efforts in the relevant multilateral forums for a universal instrument to ban nuclear weapons and to achieve their complete elimination. The Ministers emphasized the necessity to start negotiations on a phased programme for the complete elimination of nuclear weapons with a specified framework of time to eliminate nuclear weapons, to prohibit their development, production, acquisition, testing, stockpiling, transfer, use or threat of use, and to provide for their destruction.

48. In this context, the Ministers also expressed concern over the inability of the Conference on Disarmament (CD), the world's single multilateral disarmament negotiating forum, to engage in substantive work. The Ministers noted that several proposals have been made in the CD with regard to a programme of work and reiterated their commitment to work constructively to reach to a consensus taking into account the concerns of all the Member States. In this context, reiterating that the Five Ambassadors' proposal as revised in 2003 still remained a viable basis for reaching a consensus, the Ministers took note of the collective efforts made in 2007 by the six Presidents of the Conference and encouraged them to continue with their intensive consultations with a view to reaching an agreement on a programme of work to commence substantive work of the Conference.
49. The Ministers discussed the threat posed by terrorists and other non-state actors acquiring nuclear weapons or their related materials and technologies. They reaffirmed their commitment to contribute to multilateral efforts to counter such threats and promote co-operation in this regard and welcomed in this regard the adoption of the International Convention for the Suppression of Acts of Nuclear Terrorism. The Ministers expressed their conviction that the best way to prevent non-state actors or terrorists from acquiring nuclear weapons is the total elimination of such weapons.
50. The Ministers expressed their commitment to the universalization of the Convention for the Prohibition of Chemical Weapons and

Biological Weapons Convention (BWC), as well as to the goal of ensuring their balanced, transparent and effective implementation.

51. The Ministers recalled the importance of cooperative and effective international action against the illicit trade in small arms, light weapons and ammunition. The Ministers underscored the priority to full implementation of the United Nations Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects (UNPoA).

## **DISASTER MANAGEMENT**

52. The Ministers expressed concern over the human suffering and economic impact caused by the natural disasters throughout the world. The Ministers emphasized the need for national efforts to be supplemented by enhanced international and regional cooperation in the sphere of disaster risk reduction, mitigation and management. In this context, the ministers welcomed the establishment of the UN Central Emergency Response Fund (CERF) in 2005 which has contributed in strengthening the United Nation's capacity to respond to natural disasters in a predictable and timely manner. The Ministers also welcomed the convening of the first session of the Global Platform for Disaster Risk Reduction in Geneva from June 5-7, 2007, which brought together a wide range of actors associated with different aspects of disaster risk reduction and contributed in raising awareness on this important issue. The Ministers agreed to explore the possibilities of enhanced cooperation among the three countries through exchange of experiences and expertise in the area of disaster reduction, mitigation and management.

## **PEACEFUL USES OF NUCLEAR ENERGY**

53. The Ministers took note with satisfaction of the positive continuing cooperation among their countries at the IAEA and other fora, with a view to ensuring the unimpeded growth and development of peaceful uses of atomic energy, through the supply of technology, equipment and material, under appropriate safeguards, and reaffirmed their will to intensify such cooperation.
54. The Ministers reiterated the importance of ensuring that any multilateral decisions related to the nuclear fuel cycle do not

undermine the inalienable right of States to pursue nuclear energy for peaceful purposes in conformity with their international legal obligations.

55. The Ministers emphasized the need to ensure the supply of safe, sustainable and non-polluting sources of energy to meet the rising global demand for energy, particularly in developing countries. In this context, the Ministers agreed that nuclear energy could play an important role. The Ministers agreed to explore approaches to cooperation in the peaceful uses of nuclear energy under appropriate IAEA safeguards. The Ministers further agreed that international civilian nuclear cooperation, under appropriate IAEA safeguards, amongst countries committed to nuclear disarmament and non-proliferation objectives could be enhanced through acceptable forward-looking approaches, consistent with their respective national and international obligations.

## **REGIONAL COOPERATION**

### **THE NEW PARTNERSHIP FOR AFRICA'S DEVELOPMENT (NEPAD)**

56. The Ministers recognized the new trends in socio-economic development in Africa and its growing relationship through the Africa Union and with its partners such as India and Brazil. The Ministers also recognized the efforts made by the African Union to harmonise the regional economic communities and the closer harmonization with the NEPAD Programme of the African Union. The Ministers committed themselves to share their development experience among one another in support of these broader objectives of the African Union and look for creating support to regional integration and the development of regional projects keeping in view their own experience. The Ministers agreed to consider partnership with the Pan-African Infrastructure Development Programme's projects.

### **UNION OF SOUTH AMERICAN NATIONS**

57. The Ministers welcomed the establishment of the Union of South American Nations, recognizing it as a major achievement in the process of strengthening the political coordination and economic, commercial and infrastructural integration among South American countries.

## **REGIONAL ISSUES: THE MIDDLE EAST PEACE PROCESS**

58. The complementarities of the Arab Peace Initiative and the Quartet Roadmap, which essentially focus on the revival of dialogue for a peacefully, negotiated solution, on the unfinished issues of the Arab-Israeli conflict on the Palestine, Syrian and Lebanese tracks, including the Final Status Issues, through active dialogue by the parties directly concerned, need to be addressed. The Ministers reaffirmed support for the objective of establishing a sovereign, independent, viable and united State of Palestine, within recognized and well-defined borders, living side by side at peace with the State of Israel, through peaceful negotiations. The Ministers supported addressing all remaining tracks, i.e. the Syrian and the Lebanese tracks, for comprehensive peace and stability in the region.

### **IRAN**

59. The Ministers reaffirmed the inalienable right of all States to the peaceful application of nuclear energy, consistent with their international legal obligations. The Ministers called for a diplomatic resolution of the Iranian nuclear issue within the context of the International Atomic Energy Agency (IAEA).

### **IRAQ**

60. The Ministers emphasized the need for the return of peace and stability in Iraq which are essential for its development and prosperity. A peaceful, united and stable Iraq requires a democratic and inclusive polity. The UN together with the International Community has an important role to play in this regard. The launch of an International Compact on Iraq and discussions held in March and May 2007 with the participation of Iraq's neighbors, UN, G8, and P5 countries are noteworthy developments. The Ministers reiterated support to Iraq for its efforts at reconstruction and development.

### **AFGHANISTAN**

61. The Ministers expressed their strong support for a sovereign, democratic and prosperous Afghanistan and reaffirmed their commitment for the development and reconstruction of Afghanistan. The Ministers expressed concern over the deteriorating security situation in Afghanistan and the consequential risk of undermining the

gains made in the recent past. The Ministers agreed that the resurgence of the Taliban, the growth in cross border terrorism and its links with international terrorism, underlined the magnitude of challenge the people of Afghanistan and the international community faced. The Ministers reiterated that a coherent and a united international effort both in its development and security aspects remained of paramount importance. The Ministers commended the Government of Afghanistan led by President Karzai for its efforts to strengthen and consolidate the democratic process and constitutional institutions of Afghanistan. The Ministers agreed that advancing regional cooperation was crucial to Afghanistan's future and in that context hailed the emergence of Afghanistan as SAARC's eighth member.

## **LEBANON**

62. The Ministers expressed their concern for the continued political tension in Lebanon and urged Lebanese political groups to commit themselves to resolve their differences by dialogue and good faith negotiations, preserving the plural character of the Lebanese society, the sovereignty of the country and the democratic nature of its institutions. The Ministers supported the Arab Peace Initiative of 2002-2007 as an important basis to achieve peace and stability in the region as a whole and in Lebanon in particular. The Ministers welcomed the recent efforts by the League of Arab States as important steps to create a suitable environment to re-launch internal political dialogue. The Ministers expressed their full support to the Lebanese government as the only legitimate defender of public order in Lebanon, in accordance with UN Security Council Resolution 1559 and 1701. The Lebanese track should be resolved through peaceful negotiations, for comprehensive regional peace and stability.

## **SUDAN**

63. The Ministers urged and supported the Government of Sudan, and all parties directly concerned in addressing the internal political and humanitarian situation, in the province of Darfur in an expeditious manner, to alleviate civilian suffering and strengthen necessary political and development structures. The Ministers called on all parties to cooperate in the peace process to finalize the internal Darfur Dialogue, under the auspices of the African Union (AU) and the UN.
64. The Ministers noted the development relating to the UN-AU hybrid

operation in Darfur, in accordance to the Addis Ababa Agreement, signed between UN, AU and the Sudanese government on 12 June 2007 on the deployment of hybrid forces, which may contribute to the stabilization of the situation in Darfur and in its political, humanitarian and security dimensions. The Ministers considered that any further measures to be taken in connection to the situation in Darfur should not adversely affect the civilian population, and aggravate the situation on the ground.

### **IBSA SECTORAL COOPERATION**

65. The Ministers reviewed the work of the sectoral working groups and adopted their reports.
66. The Ministers stressed the need for the Working Groups to meet regularly, while drawing up their Plans of Action with time-bound deliverables.
67. The Ministers discussed ways and means of enhancing the visibility of IBSA and taking it to the peoples of the three countries. This could be done in various ways and the focal points were instructed to prepare proposals for this purpose, including appropriate participation by civil society.

### **REVENUE ADMINISTRATION**

68. The Ministers decided to formalise the establishment of an additional sectoral working group on Revenue Administration. The Ministers noted the signing of the Bilateral Mutual Administrative Assistance Agreements on Customs matters between India and Brazil and the conclusion of the negotiations on the Bilateral Mutual Administrative Assistance Agreements on Customs matters between India & South Africa, and South Africa & Brazil. The Ministers noted that the meeting of the Heads of Revenue Administration would be held in Brazil prior to the Second IBSA Summit.

### **EDUCATION**

69. The Ministers welcomed the holding of an Academic Workshop and Working Group in Durban, South Africa, during 29 June-1 July 2007 wherein five areas of cooperation were identified, viz. Engineering, Computer Science and Mathematics; Biotechnology, Agriculture and Livestock; Sustainable Development; Social Transformation and

Empowerment; and Higher Education Studies. The Ministers noted that the IBSA Programme on Higher Education would be signed at the Second IBSA Summit.

70. The Ministers noted with satisfaction that the heads of the Diplomatic Academies of three countries would meet in Brazil in September 2007.

## **AGRICULTURE**

71. The Ministers noted that the Joint Working Group on Agriculture has agreed on developing joint projects and decided to have six sub-groups, viz., (a) Animal Health and Animal Production, (b) Bio-fuels in the context of agriculture, (c) SPS issues, (d) Agro-processing and Agro-business including Food Park, (e) Research and Capacity Building, and (f) Policy issues including Poverty Alleviation. Each IBSA country will lead in two sub-groups. The Ministers urged early identification of joint projects.
72. The Ministers stressed that the modalities of communication through video-conferencing and Internet etc. may be adopted and used frequently.

## **TRADE & INVESTMENT**

73. The Ministers also welcomed the Seminar on Technical Regulations and Standards, organized by the Confederation of Indian Industry (CII) in New Delhi on 12 July 2007 which was a concrete step to implement the Action Plan on Technical Regulations, Standards and Conformity Assessment Procedures signed during the First IBSA Summit.
74. The Ministers welcomed the South African proposal of organizing a Business Meeting during the Second IBSA Summit.
75. The Ministers welcomed the proposal for participation by their business and industry in one another's principal trade fairs/industry expositions. They instructed the Working Group on Trade and Investment to devise equitable modalities for such participation, including identification of the fairs/expositions.

## **ENERGY**

76. The Ministers reiterated that energy is a strategic area for common action. They noted that various areas for future cooperation are: bio-

fuels, synthetic/alternate fuels, grid-interactive power, renewable resources like wind power and solar energy, remote areas electrification, energy efficiency and conservation. The Ministers stressed the need to identify specific activities envisaged under the MoU on establishing a Trilateral Task Team on Bio-fuels and report progress at the Second IBSA Summit. The Ministers welcomed South Africa's proposal to organise the Coal to Liquid (CTL) and/or Gas to Liquid (GTL) Seminar on the margins of the Second IBSA Summit. They also welcomed the commitment to finalise and sign the MoU on Wind Energy Resource at the Second IBSA Summit.

## **TRANSPORT**

77. The Ministers reiterated the need to develop the Transport Action Plan with clear deliverables and time frames for accelerating implementation of the transport cooperation to be announced at the Second IBSA Summit.
78. The Ministers urged the early nomination of a representative from each IBSA country for the Maritime Liaison Committee in implementation of the Trilateral Agreement on Maritime Transport and other Related Matters signed during the First IBSA Summit. The Ministers welcomed the identification of eight broad areas of cooperation under this sector, including training, inland water transport, maritime regulatory functions, shipbuilding and repair capacity development, among others. The Ministers noted the need for cooperation on transport matters among IBSA countries in the WTO negotiation process.
79. The Ministers noted that improved air connectivity is crucial for promotion of trade and tourism among the three countries. While noting that the trilateral MoU was signed on 26 July 2005, which allows the designated airlines of the three countries to code-share with each other either as operating or marketing carrier, the Ministers urged expeditious action in this regard.

## **CULTURE**

80. The Ministers welcomed the initiatives undertaken by the Working Group on Culture, which is an important sector, to enhance people-to-people contact.
81. The Ministers appreciated the offer of Brazil to host the First IBSA

Music and Dance Festival in Salvador (Bahia) in October 2007 with the participation of troupes from India and South Africa. The Ministers also noted with appreciation the offer of India to invite participation by crafts persons from Brazil and South Africa in the SurajKund Crafts Fair in early February 2008.

82. The Ministers welcomed the commitment to enhance cooperation by concluding a trilateral Memorandum of Understanding to be proposed by South Africa, to identify projects including the timeframes, monitoring and their evaluation for signing during the Second IBSA Summit
83. With a view to enhance cultural contacts among the three countries the Ministers agreed that an IBSA Cultural Event be held at every IBSA Summit.

## **HEALTH**

84. The Ministers urged the need for the Health Ministers to meet as soon as possible to approve the Plan of Action developed during the last meeting of the Working Group in Brazil in February 2006.
85. The Ministers welcomed the development of a Trilateral MoU in the field of Health and Medicine, to be signed during the Second IBSA Summit, which would be in implementation of the commitment by the Heads of State and Government for collaboration for research and development of AIDS, Malaria and Tuberculosis diagnostic tools, drugs and vaccines during the First IBSA Summit.

## **SCIENCE AND TECHNOLOGY**

86. The Ministers underscored the importance of Science & Technology cooperation and expressed satisfaction with the progress achieved. They noted that concrete joint research projects in agreed areas of common interest would be undertaken. They further stressed the need for enhancing research and development collaboration. The Ministers noted the move towards creation of a seed fund of US\$ 1 million in each country for collaborative activities. They also noted inclusion of a new area of Antarctic Research in Science and Technology sector.

## **SOCIAL ISSUES**

87. The Ministers welcomed the preparation of an integrated IBSA Social Development Strategy which will build on the best practices of the

three countries for serving as a blue print for South-South Cooperation. The Ministers noted that a Seminar in this regard will be held in South Africa in October 2007. They welcomed the commitment of the Working Group to work on a trilateral Memorandum of Understanding on Social Development, which may be signed during the forthcoming IBSA Summit.

## **PUBLIC ADMINISTRATION**

88. The Ministers noted that satisfactory progress has been made in the sector and that an MoU on cooperation in the field of Public Administration and Governance has been finalized for signing during the Second IBSA Summit.

## **INFORMATION SOCIETY**

89. The Ministers agreed that Information Society is one of the dynamic areas. The Ministers noted the successful launch of IBSA website ([www.ibsa-trilateral.org](http://www.ibsa-trilateral.org)) during the First IBSA Summit in September 2006 in Brazil and urged to upgrade the website to make it more user-friendly, in particular, for the working groups under IBSA. They also noted that the discussion documents on six identified areas have been exchanged. They urged that additional ways may be worked out for taking forward the sector by formulating working models and approaches to be translated into tangible projects and that the Working Group should meet before the next IBSA Summit.
90. The Ministers noted that Brazil will host the Second Internet Governance Forum (IGF), in Rio de Janeiro, from 12-15 November 2007, and expressed their willingness to engage in a constructive trilateral dialogue with a view of contributing to the IGF preparatory process.

## **TOURISM**

91. The Ministers noted with appreciation the offer of India to host a Workshop with participation of 30 tour operators each from Brazil and South Africa.

## **DEFENCE**

92. The Ministers agreed that there was significant potential in the sector and that the three countries should work together to enhance cooperation.

## **INTELLECTUAL PROPERTY RIGHTS**

93. The Ministers agreed for establishing an informal trilateral consultative mechanism for the exchange of information on IPR issues as agreed during the First IBSA Summit.

## **IBSA FUND FACILITY FOR ALLEVIATION OF POVERTY AND HUNGER**

94. The Ministers took note of the functioning of the IBSA Fund Facility for Alleviation of Poverty and Hunger and decided that its functioning and modalities should be comprehensively reviewed and a report submitted within two months for consideration during the Second IBSA Summit. The review will include identification of criteria for selection of projects.
95. In this context, the Ministers also noted the proposals received for assistance from the Fund in respect of capacity building in Timor Leste and the fight against HIV/AIDS in Burundi. They instructed the focal points to examine the detailed proposals for these projects and make concrete recommendations. They agreed in principle that a team from the three countries may visit Burundi for a preliminary investigation.
96. The Ministers also noted with satisfaction that the IBSA Fund Facility had been conferred the South-South Partnership Award at the 2006 UN Day event held in New York on 19 December 2006.

## **NEW AREAS OF COOPERATION**

97. The Ministers took note of the proposal to set up two new Working Groups dealing respectively with Climate Change and Environment, and Human Settlement Development. They recognised the importance of these sectors and called upon the focal points to consult and revert with concrete recommendations.

## **SECOND IBSA SUMMIT**

98. India and Brazil welcomed the offer of South Africa to host the Second IBSA Summit in October 2007.
99. The Ministers agreed that the Fifth Trilateral Commission Meeting would be hosted by South Africa on mutually convenient dates in 2008.

100. The Ministers of South Africa and Brazil expressed their deep gratitude to the Minister of External Affairs of India for convening the Fourth Meeting of the IBSA Trilateral Commission in New Delhi.

New Delhi  
July 17, 2007

**159. Address by Minister of State Anand Sharma at the inaugural session of Conference of Editors from IBSA countries.**

**New Delhi, September 3, 2007.**

Shri Nalin Suri, Secretary in the Ministry of External Affairs; Shri Navtej Sarna; Dr. Nagesh Kumar, Head of the Research and Information Systems for Developing Countries; the High Commissioner of South Africa, Francis Molo; Chargé d'Affaires of Brazil, Mr. Fonseca; Distinguished Editors from Brazil, South Africa and India; Ladies and Gentlemen:

I am very happy to be with you this morning and to have this opportunity to share some of my thoughts on a movement which has attracted global attention now. What started as a Dialogue Forum between three countries, or three continents, has today become a strategic partnership. It is only six weeks from now that the leaders of our three countries - India, Brazil and South Africa - will meet in the second IBSA Summit in South Africa to take forward the process and also the cooperation and engagement in multi-sectoral and critical areas between our three countries.

There is much that we share, despite the long distance involved when it comes to commuting. That is, of course, one of the issues that IBSA is addressing to improve, the connectivity, to ensure there is movement of people. That is what our Prime Minister had said in the last IBSA Summit in Brasilia that we should convert this also into a peoples' movement. That would only be possible when we ensure easier movement among our people.

India, Brazil and South Africa represent three vibrant democracies, and emerging economic powers of three continents which have shared interests and also shared global concerns. All our three countries are multi-cultural

societies, multi-religious, and pluralistic. Therefore, as democracies, the leaders of our countries do understand the problems that confront the civil society as well as the aspirations of our people. The IBSA has made an impact in addressing some of the issues in our trilateral context and also in the global context. I have no doubt that given the nature of sectors that we have identified for cooperation ranging from health to agriculture, energy, science and technology, and also research in developing medicines to fight pandemics like HIV AIDS, tuberculosis and malaria. All our three countries have advanced research. Pooling together of our knowledge, our resources and also linking the research institutions will be able to make a major contribution to humanity.

This cooperation is not confined only to the sectors and issues which I briefly referred to, but also we are looking at the larger global picture in the context of globalization, its impact, and IBSA to play a meaningful role, if not a decisive role, in the new global order which must ensure equity and justice, which must also ensure that the countries of the south, the developing countries, have their share of the global resources, the global technologies, and also a voice in decision-making processes in the multi-national forums including the United Nations. We saw our leaders and our countries coming together in the WTO, in the crucial talks in the Doha Development Process.

India, Brazil and South Africa firmly stood together and we do acknowledge, when President Lula came here he made it abundantly clear, that come what may Brazil will be with South Africa and India on this issue when it comes to market access, when it comes to agricultural subsidies in particular and also the kind of distortions that have taken place, whether tariff and non-tariff related issues in WTO and also of the export support which is given by developed countries in their agricultural sector.

When I traveled to some of the developed countries, I found my interlocutors a bit disturbed and confused as to why we are making such a high pitch opposition and we are assertive in our approach and not yielding. I remember telling one of them - I will avoid taking the name - that you must understand that our countries have emerged from long decades, if not centuries, of exploitation and subjugation. Our people suffered from denial and deprivation. We are now assuring our people that we will protect their rights. When it comes to agriculture, four-fifths of the agricultural workforce in the world comes from the developing countries. In my country, and for that matter even in South Africa, the land holding of the majority of people

would remain small. Therefore, this issue was crucial to us and we hope that our working together and our unity will ensure that the countries of the South remain united in getting a regime which is fair, which is equitable.

You all are Editors writing and commenting on issues which would include the third world issues and also the global issues. Media does make a tremendous impact in every society. Irrespective of the name of the newspaper or TV channel, they do have their reach. Some of them have cross-border or international reach. Thereby, they influence the public opinion and also to some extent policy formulation in sensitizing public opinion which will ensure that the political leadership too gets connected to those matters.

I was informed by Navtej Sarna about the sessions which you will be having touching upon all these issues of globalization, economic order and new technologies in the media. Media surely has changed in the last few decades since 1977 - if I am right, the McBride Commission was appointed by UNESCO - media has come a long way even in the developing countries. But many of the issues which were raised have not been addressed, especially when it pertains to the developing countries. If you look at the global news or the media picture, surely the developed countries have a dominant presence. It is their viewpoint which influences public opinion world wide, I will not say in our respective countries but surely there are sections in every society globally who get hooked on only to the analysis and the news and the assessment which is coming from dominant channels of the electronic media.

I do not find adequate analysis and correct reporting on some of the social issues which concern our societies. Though there is focus when it comes to Africa, on what is happening in Africa with regard to this development, issues related to poverty and hunger will be focused on similar developmental issues in other third world countries. But our own voice and own analysis has not made that strong a global impact as it should have. Therefore, perhaps a time has arrived for us to put our minds together on how to ensure strengthening the media within the IBSA trilateral movement so that we can make our own contribution to the global media scene.

I referred just now to the issue of hunger and poverty which gets inadequate coverage and even country-wise reporting. But while discussing the Millennium Development Goals - which we would be discussing again in the forthcoming IBSA Summit - we are sincere in what we are saying. But to my mind, the real issue is of pressing for transfer of resources and transfer of technology without which it would be very difficult to realize the Millennium Development Goals. If we look at the last few G8 Summits and what was

said a few years ago, and if we compare it to the recent Summit, not much fulfillment is there, because the resources are not being transferred. So, we do not want to be in a position as the countries of the South and as we say in our case, emerging powers, emerging economies, which we are, to have patronizing attitude as far as issues of our development are concerned, that you can take it forward to other related issues including now the global energy crisis and the climatic change.

Therefore, it is important that as we move forward we ensure that within IBSA, our economic cooperation, our partnership has a demonstrating effect so that the others in the world take note how these three vibrant democracies of Asia, Africa and Latin America can make their own contribution in resolving global problems; and also to ensure that our process of development and economic growth is sustainable and inclusive, it reaches out to those who have been left out in the past. We are trying to do that in India. I know South Africa and Brazil are equally conscious to ensure inclusive growth, especially for the people living in the rural areas, people who are part of the agricultural work force, or unorganized labour. As our economies grow, we will have resources to ensure that there is adequate allocation for social sector especially health, education and also rural infrastructure which is very important for our countries.

The trade and economic cooperation has been discussed earlier by looking at the figures. We have done reasonably well from what was expected. It is not enough. The potential is enormous. The IBSA trade is somewhere near 10 billion and we should be committing ourselves to double it within the next five years, if not more, given the sheer momentum of the development that is taking place in our three societies.

Energy is another area where we are determined to work together. Brazil is a leader as far as energy is concerned, both the conventional sources of energy and also the use of ethanol. South Africa has its strength in synthetic fuels and also in the liquefaction and gasification of coal. India is also paying much attention to the renewables, the wind, the solar energy and also the bio fuels. It is important that we show to the world that while developing our respective economies we were doing that in harmony with nature. It is a tall order. It is important for countries like ours to have access to environmental friendly and cleaner sources of energy, whether it is the renewables which we are focusing upon, the bio fuels, but also the civilian nuclear energy. We do hope that in the coming years, in the energy sector also IBSA movement will make its impact globally.

I have said enough about the issues which are there before us. I have no doubt that with the coming together of some of the finest minds of our three countries in various sectors - especially in advance research in agriculture, in science and technology, in generic medicine - we will be able to fulfil the aspirations of our people and also the expectations of our leaders who have come together to lead this movement in the first decade of the 21st century.

All our countries had emerged in the last century as free nations, as democracies where we could make our own decisions, our own choices. The time has come for India, Brazil and South Africa, to provide leadership as emerging powers. I have no doubt that this century does belong to us. I also wish each one of you fruitful deliberations and others will be joining you. Discussions will help us, as Navtej Sarna said that we will not be interfering but surely your suggestions, your valuable recommendations will enrich and strengthen the IBSA movement.

Thank you.

**160. Speech by External Affairs Minister Pranab Mukherjee  
at the IBSA Editors Conference.**

**New Delhi, September 5, 2007.**

Chairman of RIS, Dr. Arjun Sengupta, Secretary Nalin Surie, Distinguished Editors from Brazil, South Africa and India, Ladies and Gentlemen,

It is a matter of great satisfaction to be present at this Concluding Session of the Conference of IBSA Editors. I am glad that an idea that I recall was mooted even as finishing touches were being put to the Joint Communiqué of the IBSA Foreign Ministers during our meeting in July this year, has been brought to fruition so soon. The fact that we can get together so quickly to share our commonalities and discuss the challenges that we face underlines our natural affinity and the tremendous potential of the IBSA forum. I congratulate also the RIS and its Director General, Dr. Nagesh Kumar for the excellent support they have provided to the Ministry in the organization of this meeting.

Let me congratulate all the participants at this Conference for the thought-provoking ideas they have presented and the avenues for concerted action

that they have identified. Of course, in discussing some of the issues that you have, dissent and debate are natural companions, but they only add to the richness of the deliberations. I have heard with interest and appreciation the able summing-up of the deliberations of this Conference. You have covered an impressive range of issues of current interest and significance to each of our three societies in the short space of one and-a-half days, and I think this exercise has greatly benefited all of us.

The media in India has been historically free, and dynamic. During the years of our freedom struggle, our national leaders had fought for and won the right to express their views and to openly debate in print the issues of the day. Indeed, many of our freedom fighters were themselves journalists, editors or proprietors of newspapers. Newspapers like *Young India* and *The Harijan* published by Gandhiji, or the *Al-Hilal* and the *Al Balagh* published by Maulana Azad as well as the *National Herald* edited by Pandit Nehru, played an important role in mobilizing the masses and in raising the awareness of current issues amongst our people. Those hard-won freedoms were enshrined as fundamental rights in the Constitution of free India. Today, the media, both print and electronic, are indispensable partners in the process of democratic debate in our country. With the fast growing number of television news channels and the increase in the number of newspapers published in several languages, the media scene in India presents a picture of buoyancy and exuberance. In Brazil and South Africa, the media have led equally important campaigns for the economic empowerment and self-realisation of the people. Thus, it is fitting and appropriate that issues of relevance to our societies be discussed by the representatives of such an important institution of our three countries.

Today, the global challenges facing our rapidly-developing and modernizing societies are huge; so too are the global opportunities. Poverty, economic and social inequalities, inequities at a global level or threats such as terrorism to our multi-ethnic, multi-religious societies are some of the major challenges. South-South cooperation, exemplified in the IBSA forum, can provide valuable answers to these challenges.

We have made steady progress in our endeavour at trilateral cooperation in IBSA. In the last three years since the first IBSA Trilateral Commission meeting was held in New Delhi in 2004, we have identified several important areas of cooperation, such as energy, education, agriculture, health, science and technology, public administration and revenue administration. Several IBSA working groups have met. We have set a trade target of US\$ 10

billion amongst our three countries by 2007 which we are likely to meet. We are looking to develop further people-to-people relations - perhaps through meetings of parliamentarians, members of civil society, through cultural and educational exchanges and through tourism. Indeed, meetings such as this one are intended to show the way forward. We are now also looking forward to the IBSA Summit in October. There are many important themes that await deliberation at the highest levels - themes such as inter-connectivity, mega-diversity and energy security, which can further reinforce our trilateral cooperation and expand the horizons for the development of our rapidly-expanding economies.

I am confident that the findings and analyses of this Conference will be extremely useful for us and enrich the discussions at the Summit Meeting. I want to thank our distinguished guests from Brazil and South Africa for responding so readily and at relatively short notice to our invitation for this visit. I do hope that they have also found some time to see something of India beyond this Conference hall. Let me wish all of you a pleasant time for the rest of your sojourn in our country.

Thank you.

### **161. Joint Press Statement on the IBSA (India-Brazil-South Africa Dialogue Forum) Ministerial Meeting on the Margins of the 62nd Session of the UNGA.**

**New York, September 26, 2007.**

The Minister of Foreign Relations of Brazil, H.E. Mr. Celso Amorim; H.E. Mr. Pranab Mukherjee, the Minister of External Affairs of India; and H.E. Dr. Nkosazana Dlamini-Zuma, the Minister of Foreign Affairs of South Africa, met in New York on 26 September 2007, on the margins of the 62nd Session of the United Nations General Assembly. They exchanged views on a number of issues on the international agenda, topics relating to the IBSA Dialogue Forum and the IBSA Fund for Alleviation of Poverty and Hunger.

The Ministers reaffirmed their determination to strengthen IBSA's political segment by enhancing coordination among their delegations in international fora. They stressed the urgent need to reform the United Nations, in particular the Security Council, and emphasized in this regard their co-

sponsorship of draft resolution A/61/L.69, aimed at the immediate launching of elements-based, result-oriented inter-governmental negotiations for the expansion of the Security Council.

Stressing that improved connectivity is essential to the development of IBSA trade and economic relations, the Ministers emphasized the importance of an early implementation of the Trilateral MOU of July 2005. While reiterating that health and defense are promising areas of cooperation, the Ministers encouraged the concerned Ministers to meet early so that untapped potential in these areas could be utilized. The Ministers reaffirmed their commitment to address the issue of availability and sustainable, economical and clean energy supplies.

The Ministers expressed satisfaction that the IBSA Fund for Poverty and Hunger Alleviation won the 2006 South-South Alliance Award for its projects in Haiti and Guinea Bissau. They also reviewed recent developments in the IBSA initiative, including the formation of two new Working Groups in the areas of Environment and Climate Change and Human Settlement Development. On trade issues, the Ministers welcomed the upcoming meeting on October 6th of the group responsible for considering the modalities for the envisaged Trilateral Free-Trade Agreement among Mercosur, the Southern African Customs Union (SACU) and India. The Ministers also stressed taking several additional measures, including greater participation in each other's trade fairs, trilateral investments and a study of complementarities.

The preparations for the 2nd IBSA Summit (Johannesburg and Tshwane, South Africa, 17 October 2007), were also discussed.

## **162. Media Briefing by Secretary (West) in the Ministry of External Affairs Nalin Surie on Prime Minister's visit to South Africa for the IBSA Summit.**

**New Delhi, October 9, 2007.**

\* \* \* \*

After his visit to Nigeria<sup>1</sup>, Prime Minister will travel to Johannesburg and Pretoria to attend the 2nd Summit of the IBSA Forum, scheduled to be held on 17 October 2007. The First IBSA Summit was held in Brasilia in September 2006. It is our expectation that the Second Summit will represent a fresh milestone in the progressive development of IBSA.

IBSA is a unique Forum which brings together India, Brazil and South Africa, three large democracies from three different continents, facing common challenges. All three countries are developing nations, plural, multi-cultural, multi-ethnic, multi-lingual and multi-religious. Cooperation among IBSA countries serves three basic purposes. It provides a strong framework for trilateral cooperation in key sectoral areas amongst countries which share many commonalities. Secondly, it provides an important instrumentality for cooperation on regional and international issues of common concern such as climate change, reform of the United Nations, WTO negotiations, cooperation in civil nuclear energy, terrorism, etc. Thirdly, it enables the process of South-South Cooperation to strengthen and deepen.

PM would arrive in Johannesburg on the evening of 16 October. He is expected to attend a cultural event that evening along with the Presidents of South Africa and Brazil. India is sending a 6-member Kuchipudi troupe led by Swati Somnath for participating in that event.

Prior to the Summit, a series of important activities would be held. These include an Academic Seminar, a Business Seminar, a Women's Forum and a Parliamentary Forum. The Indian complement at the Business Seminar would be composed of representatives from FICCI, CII and ASSOCHAM. Approximately 75 members are expected to attend. Trade, investment and other forms of economic cooperation are expected to provide an underpinning for IBSA.

The Parliamentary and Women's Forums are being held for the first time.

---

1. For briefing on Nigeria please see Document No. 466.

For the former, India would be represented by Hon'ble MPs S/Shri Sandeep Dikshit, Jitin Prasada, Harin Pathak and Alok Kumar Mehta. For the Women's Forum, the preparatory meeting was held in Delhi last week and the Indian delegation will be led by Secretary, Ministry of Women & Child Development, and include representatives from NGOs such as Guild of Service, Women's Power Connect and a representative of Amul.

The meetings of the various fora will serve to enlarge the spectrum of interaction amongst IBSA partner countries which have agreed to progressively widen participation to expand the cooperative basis of IBSA and enhance its visibility in the member countries.

The main Summit would be held on 17 October. The Heads of State/Government, in addition to their own discussions on trilateral cooperation and regional & international issues, will also hear reports from the different seminars/forums. A Joint Declaration would issue at the end of the Summit. Several MOUs are also expected to be signed in areas such as human resources, culture, social development, health and medicines, public administration, higher education and on customs & tax administration and cooperation.

Following the Summit meeting, Prime Minister will hold bilateral meetings with his host, President Thabo Mbeki of South Africa, and with President Lula of Brazil. You will recall that Prime Minister had also met with Presidents Lula and Mbeki in Berlin last June on the sidelines of the G-8 Summit. Prior to that, President Lula had paid a state visit to India.

**Question:** Since both Brazil and South Africa are members of the NSG, will the issue of 123 Agreement be formally raised in the IBSA Summit?

**Secretary (West):** I cannot tell you what Prime Minister will or will not raise. That is his discretion. But, as you know, both Brazil and South Africa are very supportive of India's quest for civil nuclear energy.

**Question:** We wanted to have some Embraers from Brazil. What is the status of that?

**Secretary (West):** I believe Paramount Airways has ordered a very large number of Embraer aircraft from Brazil. I do not really know the exact status of supplies but they have ordered a very large number of aircraft.

**Question:** IBSA ...(inaudible)...

**Secretary (West):** You will remember that when the Trilateral Commission

meeting took place in Delhi of IBSA earlier this year, the target was 15 billion dollars by 2010. I expect that the Summit will reconfirm that target.

**Question:** What is the current level?

**Secretary (West):** We are hoping that at the end of this year we will achieve the target of close to 10 billion dollars. But it is a bit early to say yet. It depends on a couple of big contracts between us.

**Question:** Who are the Ministers who will be accompanying the Prime Minister? Can you give us an idea of the Delegation?

**Secretary (West):** Mr. Anand Sharma (Minister of State for External Affairs) will accompany the Prime Minister plus one more Minister of State.

**Question:** What about the MPs you spoke about?

**Secretary (West):** They will attend the Parliamentary Forum.

**Question:** Are they not accompanying the Prime Minister?

**Secretary (West):** They will be there a day before. They are only going for IBSA. After the Forums are over, they will participate in the open sessions of the Summit.

**Question:** Commerce Minister is not going to be there, is he?

**Secretary (West):** No, he is not going to be there as of now. These things keep changing.

### **163. Remarks by Prime Minister Dr. Manmohan Singh at the Opening Plenary Session of IBSA.**

**Pretoria, October 17, 2007.**

Excellency President Thabo Mbeki

Excellency President Lula,

Participants in the Parliamentary, Academic,

Business & Women's Forums,

Ladies and Gentlemen,

I am delighted to be in South Africa for the Second Summit meeting of IBSA. I express our deep appreciation to the government and people of South Africa for hosting this Summit.

I am happy that fruitful discussions have taken place at the Academic Seminar, the Business Seminar and the newly instituted Women's and Parliamentarians' Forums.

When I had the privilege of meeting the Foreign Ministers of IBSA last July, I said to them that it is important to consolidate our gains. We should focus our time and resources to ensure productive outcomes in agreed priority areas of trilateral cooperation.

Out of the several Working Groups that we have set up, only those on ICT and Trade and Investment have met thrice. We can agree today that by the time of the next Summit all the Groups should complete one cycle of meetings in each of our countries. At the next Summit, we would then be in a position to take stock of the areas we should concentrate on and where cooperation is proving useful.

I am particularly pleased that discussions have begun on the India-SACU-Mercosur FTA. This is a bold initiative to give an impetus to our trading ties and we will work sincerely to bring it to fruition.

With regard to global issues we are increasingly consulting each other on the margins of major international meetings. We should encourage this so that we can have common IBSA positions on important international issues.

Last year we had agreed that assisting other developing countries should be one of the thrust areas of IBSA cooperation. I propose that we work on

one big flagship IBSA project using the Fund for Poverty and Hunger, which will convey our commitment in this area.

All developing countries face the challenge of balancing the need for more rapid growth with the need to address the problem of social inequality. Each of our countries has attempted innovative solutions to bring about inclusive growth. I am happy that we will discuss the issue of social development later on, including how to share experiences.

The lack of adequate connectivity continues to hamper our cooperation. We should reflect on how to encourage air and maritime links, which may not be commercially viable to begin with.

I look forward to having substantive and productive discussions today on strengthening the IBSA process. If the IBSA movement is to catch the imagination of our people we should move from a declaratory phase to one of time bound action.

We all recognise the immense potential of IBSA. With the necessary political will and an outcome-based approach, I have no doubt that we will be able to realise this potential.

Thank you.

## **164. Closing remarks by Prime Minister Dr. Manmohan Singh at the 2nd IBSA Summit.**

**Pretoria, October 17, 2007.**

Excellency President Mbeki

Participants in the Parliamentary, Academic,

Business & Women's Forums,

Ladies and Gentlemen,

I am happy to say that our deliberations today were most fruitful. We have discussed ways of pooling our strengths and limited resources to maximum benefit. This gives me confidence that the IBSA process is moving into a phase where our trilateral collaboration will show concrete results.

IBSA is a unique model of trans-national cooperation. Our three countries come from three different continents but share similar world views and aspirations. If we can make a success of our model of cooperation based on collective self-reliance, it will serve as an example for all developing countries.

We have today found a renewed convergence of interests on major international issues of contemporary importance. We need to forge the closest cooperation possible, so that we can together ensure a more equitable international political and economic order. The world is already looking upon the IBSA framework as a significant step forward in the emergence of a global partnership for development.

We had a constructive discussion on the Doha Round of trade talks. This has emerged as an important issue facing the international community, in which each of our countries has an important stake. We committed ourselves to working towards securing a balanced and successful outcome of the talks.

The IBSA process has enabled parliamentarians, civil society, academia, mass media, women and other segments of society to engage with each other. We greatly value their contribution in reinforcing the efforts of the three governments. Over a period of time, IBSA should emerge as a peoples' movement.

The high level involvement of business and industry in IBSA is particularly encouraging. Governments can only do so much. We should leverage public-private partnerships to fill funding gaps and increase efficiency in key sectors of our cooperation.

The agreements and the Declaration that we will be signing will provide a new impulse to our cooperation. They reflect our emerging priorities. The implementation of the decisions we have taken should be carefully monitored, and a regular system of feedback should be put in place.

I am confident that under the Chairmanship of South Africa, our joint efforts in the framework of IBSA will acquire even greater resilience and dynamism.

I am most grateful to President Mbeki for the warm and generous hospitality we have received during our stay in this beautiful country.

Thank you and see you all in New Delhi in 2008.

### **165. Intervention by the Prime Minister Dr. Manmohan Singh at the " Social Development Strategy for IBSA".**

**Pretoria, October 17, 2007.**

The importance of social development was recognized by us as far back as in the Brasilia Declaration of 2003. Subsequently, we had constituted a Working Group on Social Development. We had also decided that the IBSA Fund for Alleviation of Poverty and Hunger will work in close cooperation with this Working Group.

In addition, other Working Groups have been established on subjects like education, health, culture, human settlement, environment and skills development. Most recently, we have also set up a Women's Forum.

South Africa recently hosted a seminar of practitioners to exchange experiences on our respective social development strategies.

Social development has both national and international dimensions. An effective Social Development strategy has to ensure synergy between these two dimensions. It is a happy coincidence that it was South Africa that hosted the World Summit on Social Development in 2002.

We thus have a rich menu of political declarations and initiatives.

The question is what we - as India, Brazil and South Africa - can bring to the table based on our own real life experiences. We are pluralistic democracies, developing economies and aspire for rapid economic growth.

I am aware of President Lula's Bolsa Familia programme and President Mbeki's programme for Accelerated Skill Development.

India's current 11th Five Year Plan has been formulated on the basis of a political mandate for inclusive growth. Based on this vision of an equitable and prosperous world, we have in the last few years, put in place programmes which can accelerate the processes of development in an equitable, fair and all-encompassing manner.

Based on our common experiences, I would like to suggest that a Social Development Strategy could emerge from the IBSA process having some of the following eight elements:

**Rapid Economic Growth:** It is only within the framework of a rapidly expanding economy can we generate the necessary resources for investing in social development. We have to have faith in the creativity and enterprise of our people and create favourable conditions for these to have full play.

**Inclusivity:** Economic growth cannot happen in isolation. Unless all sections of society derive benefits from such growth and develop a stake in the growth process, we will be courting social and political instability. Disparities of any type - regional, gender, inter-community, inter-group - harm the growth process in the long run. However, addressing this aspect is easier said than done. All of us have diverse experiences which we need to share and learn from.

**Human Resource Development:** While growth processes may be favourable, it is essential that people are empowered and enabled to become active participants in these processes. The key to this is education and skill development. Adequate resources need to be committed to education and skill development at all levels.

**Focus on equitable infrastructure:** Often, the infrastructure needs of the poor are neglected. But they are important facilitators of growth. There must be adequate investment in rural infrastructure and connectivity, clean drinking water, sanitation facilities, health care and social welfare.

**Short term distress mitigation:** While most social development investments pay off in the medium term, the problems of unemployment and threatened livelihoods need to be addressed in the short term. Focused employment generation programmes linked to food security initiatives can provide immediate relief and succour.

Grassroots Institution Building: There is a need to ensure participatory democracy and effective governance at local levels. These institutions facilitate ownership of governance processes and social and economic mobility. Civil society action must be encouraged.

Environmentally sound strategies: Any growth strategy should be designed to minimize its adverse environmental effects. The world cannot sustain highly consumptive societies on the pattern of some of the developed economies. We need to search for more sustainable alternatives for the good of all.

Integration into the Knowledge Economy: As the world advances into the knowledge era, education, skills and access to knowledge become key drivers of development. We need conscious efforts to ensure that all sections are in a position to participate in this transition - which takes us back to the need for human development.

I would like to see IBSA mechanisms taking concrete steps to translate some of these principles into action through collaborative effort. We could consider some joint initiatives on some of these elements as well.

## **166. Remarks by Prime Minister at the interaction with the IBSA Business Council Meeting.**

**Pretoria, October 17, 2007.**

Your Excellency President Mbeki,

Your Excellency President Lula,

Distinguished captains of business and industry,

Ladies and Gentlemen,

I am particularly happy that the Business Forum has become an integral part of the IBSA process. A strong trade and economic partnership is essential for the success of IBSA.

India, Brazil and South Africa are amongst the most dynamic developing economies of the world. We have obvious complementarities and strengths that we ought to share and build upon.

We have set ourselves a modest target of 15 billion dollars by 2010 for trade among our three countries. My suggestion to our business leaders would be to aim to achieve this by 2009 and then go on to double that by 2012. Business must be pro-active.

We in government assure you that we will endeavour to create the necessary environment for closer intra-IBSA trade and investment. We also hope that the Business Forum will work actively to create awareness of the opportunities that our three large markets provide.

Each of us has strengths in Science & Technology. I would urge the business leaders present to look at innovative approaches to exploit these strengths including through joint R&D projects, particularly in sectors such as manufacturing, pharmaceuticals and ICT.

Energy security is a major challenge confronting us. We should use synergies in this area to our common benefit. Brazil has comparative strengths in ethanol and bio-fuels; South Africa in Coal to Liquid and Gas to Liquid technologies. India has strengths in wind and solar energy. We need to look at how trilateral ventures in these areas can be made viable business models.

Business also has a social responsibility. Within IBSA, we are in the process of elaborating a common Social Development strategy. We would welcome inputs from the business community to shape an effective public-private partnership in this area.

Let me conclude by emphasizing how important it is for our business and industry to come together if we are to realise our objective of integrating our economies.

Thank you.

## **167. TSHWANE Declaration issued at the end of the IBSA Summit.**

### **Tshwane, October 17, 2007**

1. The Prime Minister of India, H.E. Dr Manmohan Singh, the President of Brazil, H.E. Mr. Luiz Inacio Lula da Silva, and the President of South Africa, H.E. Mr. Thabo Mbeki (thereafter referred as the leaders) met in Tshwane, South Africa, on 17 October 2007, for the 2nd Summit of the India-Brazil-South Africa (IBSA) Dialogue Forum.
2. The leaders recognised that since its inception in 2003, the IBSA Dialogue Forum provided a strong framework for trilateral cooperation in several key sectoral areas amongst IBSA partners. They noted that IBSA also provides them an important instrument for cooperation on regional and international issues and promoting the interests of the developing countries, thus contributing to the strengthening and deepening of South-South cooperation.
3. The leaders adopted the outcome of the 4th Ministerial Commission held in New Delhi on 17 July 2007.
4. The leaders recommitted themselves to vigorously pursue the deepening of South-South cooperation for sustainable development. They reaffirmed their shared commitment to the eradication of poverty through sustained and inclusive economic growth. They highlighted the importance of implementing the principles adopted in the Rio Declaration, Agenda 21 and the Johannesburg Plan of Implementation of the World Summit on Sustainable Development, particularly the principle of common but differentiated responsibilities and emphasized that capacity and institution building is a key to global sustainable development.
5. The leaders acknowledged with appreciation the continued participation by academia and business leaders. The leaders are satisfied that the participation by civil society contributed to the enhancing the visibility of IBSA. They also applauded the commitment by the peoples of the three countries to participate at the Music and Dance Festival in Brazil later in October 2007.
6. The leaders welcomed and applauded the coming together of parliamentarians from India, Brazil and South Africa and the fruitful

talks they had as an important contribution to people to people relations and strengthening of the IBSA Dialogue.

7. The leaders welcomed and fully supported the launch of the Women's Forum which strengthens participation of women in IBSA and recognised the fundamental contribution of women in the social, cultural and economic development of India, Brazil and South Africa. They reaffirmed their commitment to the promotion of gender equality and women's rights.
8. The leaders reiterated the importance of strengthening the global governance system as it forms a critical ingredient for promoting peace, security and sustainable socio-economic development. They reaffirmed their abiding commitment and faith in multilateralism, with the United Nations playing the pre-eminent role. They reiterated that the international system cannot be reordered meaningfully without a comprehensive reform of the United Nations. The leaders emphasized that the reform of the Security Council is central to this process to ensure that the UN system reflects contemporary realities. They expressed their full support for a genuine reform and expansion of the Security Council, in permanent and non permanent categories of membership, with greater representation for developing countries in both. They reiterated that inter-governmental negotiations on the issue of Security Council reform must commence forthwith. They agreed to further strengthen cooperation amongst their countries and with other member states interested in a genuine reform of the Security Council. They also reaffirmed the need for concerted efforts by member states towards revitalisation of the General Assembly.
9. The leaders emphasised their commitment to the goal of the complete elimination of nuclear weapons and expressed concern over the lack of progress in the realisation of this goal. They emphasised that nuclear disarmament and nuclear non-proliferation are mutually reinforcing processes requiring continuous, irreversible progress on both fronts, and reaffirmed, in this regard, that the objective of non-proliferation would be best served by the systematic and progressive elimination of nuclear weapons in a comprehensive, universal, non-discriminatory and verifiable manner. They further emphasized the necessity to start negotiations on a phased programme for the complete elimination of nuclear weapons with a specified framework of time to eliminate nuclear weapons, to prohibit their development,

production, acquisition, testing, stockpiling, transfer, use or threat of use, and to provide for their destruction.

10. The leaders strongly emphasized the need for ensuring the supply of safe, sustainable and non-polluting sources of energy to meet the rising global demand for energy, particularly in developing countries. In this context, they agreed to explore approaches to cooperation in the peaceful uses of nuclear energy under appropriate International Atomic Energy Association (IAEA) safeguards. They further agreed that international civilian nuclear cooperation, under appropriate IAEA safeguards, amongst countries committed to nuclear disarmament and non-proliferation objectives, could be enhanced through acceptable forward-looking approaches, consistent with their respective national and international obligations. They also reiterated the importance of ensuring that any multilateral decisions related to the nuclear fuel cycle do not undermine the inalienable right of States to pursue nuclear energy for peaceful purposes in conformity with their international legal obligations.
11. The leaders called for the international community to work together on Climate Change under the United Nations Framework Convention on Climate Change in accordance with the principle of common but differentiated responsibilities and respective capabilities. They urged all developed countries to take more ambitious and quantifiable GHG emission reduction targets in the post 2012 period under the Kyoto Protocol. Moreover they stressed the imperative of addressing unsustainable patterns of production and consumption. This would also spur the Carbon market and significantly enhance the Clean Development Mechanism's contribution to sustainable development, financial flows and transfer of clean technologies to developing countries. They urged that significant progress is needed in Bali in December 2007.
12. The leaders stressed the disproportionately high impact of Climate Change on developing countries with their greater vulnerability, inadequate means and limited capacities to adapt to its effects. They emphasised the importance for adequate, new and additional financing for the adaptation efforts of developing countries without diverting resources for development. There should be no foreclosure of opportunities for developing countries to secure the technological and financial resources required for adaptation through development.

13. The leaders urged an agreement on innovative modalities for the development, transfer and commercialization of technologies, including clean coal technologies, at affordable costs to developing countries noting that rewards for innovators need to be balanced with common good for humankind. They also urged the international community to work in a collaborative manner for the development and deployment of renewables, biofuels and biomass, and advanced clean technologies. In this connection they welcomed the work done by the International Forum on Biofuels and underlined the importance of the International Conference on Biofuels, to be held in 2008.
14. The leaders reaffirmed their commitment to the promotion and protection of human rights for all. They expressed their commitment towards developing the institutional framework of the Human Rights Council, including the Universal Periodic Review Mechanism, based on effective international cooperation. They reaffirmed their determination to work towards the operationalisation of the right to development.
15. The leaders reaffirmed that terrorism constitutes one of the most serious threats to international peace and security. They strongly condemned terrorism in all its forms and manifestations, committed by whomever, wherever and for whatever purpose. They stressed that there can be no justification, whatsoever, for any acts of terrorism. They emphasized the need for concerted and cooperative action by the international community to realize the objectives of eradicating terrorism in all its forms and manifestations. In this regard, they called for the early adoption of a Comprehensive Convention against International Terrorism. They emphasized that international cooperation in combating terrorism should be conducted in conformity with the principles of the UN Charter, relevant UN Resolutions and International Conventions, and Human Rights.
16. The leaders noted the progress being made on the African continent towards the achievement of peace, security, stability and development. They reaffirmed their determination to support these efforts while noting the inextricable link between peace and security on the one hand, and development on the other. They commended the efforts of the African Union and noted the ongoing work to strengthen its structures.
17. The leaders reiterated their firm belief in the New Partnership for

Africa's Development (NEPAD) a key framework for socio-economic development in Africa. They acknowledged that the Pan-African Infrastructure Development Fund will, as it evolves, help accelerate Africa's growth and development to meet the objectives as set out in the NEPAD. In this regard, the IBSA partners agreed to associate with the development of the fund in accordance with their respective rules and regulations.

18. The leaders called upon all parties in the Sudan to recommit themselves to the implementation of the Comprehensive Peace Agreement (CPA) to its spirit and letter, as it is the viable option to the resolution of the conflict in the Sudan. They urged all parties involved in the conflict in Darfur to participate in the forthcoming Darfur peace talks in Libya. In the same vein they expressed their concern at the increasing violence in Darfur, and in this respect, call on all the parties in Darfur to exercise restraint. They call upon the international community to provide financial and material support for the deployment of the UN-AU Hybrid Force and the alleviation of the humanitarian situation in Darfur.
19. The leaders reflected on the situation in Zimbabwe and took note of the positive progress of the Southern African Development Community (SADC) initiative to promote a negotiated political solution in Zimbabwe between the Government of Zimbabwe and the opposition party, under the facilitation of President Thabo Mbeki. They reiterated the need for the international community to continue its support for the people of Zimbabwe in order to overcome the challenges they are facing.
20. The leaders reaffirmed their long-term commitment for a democratic, prosperous and stable Afghanistan. They reiterated that a coherent and united international effort, in its military, political and developmental aspects, to assist the Government of Afghanistan remained vital. They underlined their centrality of the regional aspect in the reconstruction and development process. They strongly condemned the continued terrorist attacks by the Taliban on aid-workers, civilians, Afghan and international forces. They agreed that the international community needed to act resolutely and with determination, in coordination with the Government of Afghanistan, in facing the challenge of the resurgence of the Taliban and Al Qaeda.
21. The leaders reflected upon the Middle East Peace Process, and looked forward to progress towards goals of the Arab and all other major

ongoing peace initiatives, including elements of the Roadmap, by means of intensified and meaningful dialogue among Israel, Palestine and other countries resulting in the establishment of an independent, sovereign, viable and united state of Palestine, living side by side at peace with Israel, within recognized and well-defined borders.

22. The leaders, in recognition of the many commonalities in the three countries in the socio-economic areas, welcomed the preparation of an integrated IBSA Social Development Strategy which will build on the best practices of the three countries for serving as a blue print for South-South Cooperation.
23. The leaders noted that WTO Doha Round of trade negotiations is entering a critical stage. These negotiations are now in a genuine multilateral process, with draft modalities texts for agriculture and industrial goods that provide a good basis for negotiations. They reaffirmed their commitment to carry out negotiations towards an outcome that is fair and acceptable to all.
24. The leaders reiterated the importance of the development dimension of the Round and welcomed the strengthened engagement, solidarity, and cooperation among developing countries in that process.
25. The leaders underlined that agriculture remains the key to the conclusion of the Round. To truly deliver on the development benefits of the Round, they called for the removal of long-standing distortions and restrictions in international agricultural trade, such as subsidies and trade barriers that affect the agricultural exports of and domestic production in developing countries. They also asserted that developed countries must agree to substantial and effective cuts in the latter's trade distorting support, with new disciplines that prevent box shifting and commit to real and new trade flows in agriculture. They underscored that meaningful and operable special and differential treatment, which includes development instruments of Special Products and the Special Safeguard Mechanism are vital to address the concerns of developing countries with subsistence and low-income farmers.
26. The leaders emphasized that any progress towards achieving the above goals is a development imperative and should not be linked with meeting the disproportionate demands by developed countries in the NAMA and services negotiations.

27. The leaders asserted that developing countries have been constructive and willing to negotiate in all areas. They urged others to act with the same disposition.
28. The leaders recalled their commitment to making a contribution to market opening in the Doha Round in agriculture, NAMA, and services that will create new trade flows. They also committed to ensure that the process of the negotiations is not held hostage to - who goes first? They reaffirmed their conviction that all members must move together to arrive at a balanced and fair outcome of the negotiations.
29. The leaders stated that through constant dialogue, reciprocal flexibility, non-dogmatic approach and good faith efforts, full modalities in the agriculture and industrial goods negotiations could be achieved before the year-end, together with equivalent results in other areas. They reaffirmed their commitment to achieving such a positive outcome within this framework.
30. The leaders underscored the importance of incorporating the development dimension in international discussions concerning intellectual property. They reaffirmed that intellectual property is not an end in itself, but one of the instruments to encourage innovation for technological, industrial and economic and social development. They also recalled that it is fundamental to preserve policy spaces necessary for ensuring access to knowledge, promoting public goals in the fields of health and culture, and a sustainable environment. In this context, they welcomed the adoption of 45 recommendations of concrete actions regarding the Development Agenda by this year's WIPO General Assembly, as well as the establishment of the WIPO Permanent Committee on Development and Intellectual Property.
31. The leaders reaffirmed the need to reach a solution for the problem raised by the granting of intellectual property rights on biological resources and/or associated traditional knowledge, without due compliance with relevant provisions of the Convention on Biological Diversity, such as the granting of erroneous patents or the registration of undue trademarks. In this regard, they recalled the presentation in the WTO of the proposal co-sponsored, among others, by the three IBSA countries to amend the TRIPS Agreement by introducing a mandatory requirement for the disclosure of origin, prior informed consent, and also fair and equitable benefit sharing of biological resources and/or associated traditional knowledge used in inventions for which applications for intellectual property rights are filed.

32. The leaders welcomed the ongoing discussion in the Inter-Governmental Working Group (IGWG) on Intellectual Property and Public Health of the World Health Organization. They stated the important role of WHO in the discussion of the impacts of intellectual property protection on public health and on the access to medicines.
33. The leaders agreed to work towards a trilateral initiative on cooperation in the field of Intellectual Property Rights (IPR) concerning capacity building activities, human resource development and public awareness programmes.
34. The leaders reaffirmed their commitment to the envisaged India-MERCOSUR-SACU Trilateral Free Trade Agreement (T-FTA), and welcomed the initial meeting amongst the representatives of SACU, MERCOSUR and India on a possible T-FTA during the exploratory discussions held in Pretoria on the 6th October 2007. They also noted with satisfaction that all sides agreed to continue discussions on the trilateral trade arrangement. They urged the need for sustained efforts to realize early an India-MERCOSUR-SACU FTA. In this regard, the leaders supported the proposal to hold a Trilateral Ministerial meeting in 2008. They also welcomed the significant progress made in MERCOSUR-SACU negotiations in Pretoria, on the 8-9 October 2007, as well as the launching of the SACU-India negotiations in the meeting held in Pretoria on 5 - 6 October 2007. MERCOSUR-SACU, MERCOSUR-India and India-SACU negotiations laid the basis for achieving the goal of a T-FTA.
35. The leaders expressed the importance of regular interaction among businesspersons of the three countries, with Government authorities playing a facilitating role in the process, for sharply enhancing the momentum of trade and investment with a view to fully utilising the large and growing opportunities in their markets. For the continued expansion of trade, investment and economic ties, the leaders encouraged the implementation of further initiatives amongst IBSA countries on standards, customs procedures, intellectual property rights, small and medium enterprise development, business-to-business linkages and participation in trade exhibitions.
36. The leaders underlined the need to provide a greater voice for and participation by developing countries in the Bretton Woods Institutions and expressed concern at the slow rate of progress that has been achieved so far. They acknowledged the role of the G20 as a key

forum on global economic development and governance, and looked forward to its contribution to accelerating governance reforms in the Bretton Woods Institutions.

37. The leaders expressed their concern that many developing countries are still far from achieving the Millennium Development Goals (MDGs). They expressed their determination to mobilize support in this regard, with the specific objective to intensify common efforts towards achieving the MDGs and other internationally agreed development goals embodied in the Monterrey Consensus. They particularly stressed the need to address the problem of developing countries debt, increase the Official Development Assistance (ODA) flows and reduce the inequalities in the international trading system. They committed to close cooperation amongst IBSA partner countries while preparing for the 'Financing for Development' Review Conference that will take place in Doha, Qatar, in the second half of 2008. In this regard, they emphasized the importance of enhancing international efforts to develop innovative financial mechanisms to fight poverty and hunger.
38. The leaders reiterated the importance and uniqueness of the IBSA Fund Facility for South-South Cooperation for the benefit of other developing countries. They noted with satisfaction the South-South Partnership Award received by the Fund from the UN. They also agreed for a more effective mechanism for the utilization of the Fund.
39. The leaders underscored the importance of vibrant sectoral cooperation for providing a firm foundation of the IBSA Forum.
40. The leaders stressed the need for improved air and maritime connectivity among IBSA countries for expanding trade, investment and tourism. In this regard, they encouraged the concerned authorities to work towards achieving this important goal on a priority basis. They expressed the hope that by the time of the Third Summit in India, effective and innovative solutions would have been put in place to mitigate this problem.
41. The leaders called for the establishment of joint projects and collaboration for the increased usage of alternative sources of energy such as biofuels, synthetic fuels, wind and solar energy to help achieve the objective of energy security which can bring significant reduction in GHG emissions.

42. The leaders expressed the need to promote and enhance cooperation among the IBSA partners in the ICT infrastructure development, including for the Soccer World Cup being hosted by South Africa and the Commonwealth Games by India in 2010,
43. The leaders welcomed the progress made in the sector of Education with the identification of areas of cooperation. In pursuance of this, they encouraged holding of workshops and seminars, exchange of information, and joint projects. They also welcomed avenues of cooperation among the diplomatic institutes of IBSA countries.
44. The leaders also called for an early implementation of the Action Plan in the sector of Health and called upon the IBSA Health Ministers to meet within the next three months. Cooperation in this area is of particular importance and needs to be energized.
45. The leaders appreciated the initiative being taken with regard to formulation of joint projects in the sector of Agriculture and expressed the need for their expeditious implementation, for the purpose of inclusive growth and benefits to farmers. They further expressed the need to explore cooperation in the field of food processing.
46. The leaders stressed the need to explore avenues of cooperation in the sector of defence for the common benefit of the three countries.
47. While underlining the importance of cooperation in the S&T sector, they emphasized the need for immediate action to start implementation of joint research projects. They welcomed the creation of a seed fund of US\$ 1 million in each country for collaborative activities.
48. The leaders welcomed the signing of MoUs and Agreements on cooperation in areas of Wind Resources, Health and Medicines, Culture, Social Issues, Public Administration, Higher Education and on Customs and Tax Administration Cooperation, which will help further deepen trilateral cooperation among IBSA partners.
49. The leaders supported the establishment of two additional Working Groups on 'Human Settlement Development' and 'Environment and Climate Change' to further enhance the scope of trilateral sectoral cooperation.
50. The leaders called for an intra-IBSA trade target of US\$ 15 billion by

2010 and urged business and industry to be even more ambitious and exceed this target.

51. South Africa and Brazil welcomed the offer by India to host the 3rd IBSA Summit in 2008.
52. The President of Brazil and the Prime Minister of India expressed their deep gratitude to the President and the people of South Africa for successfully convening the 2nd IBSA Summit which represented a new milestone in the progressive development of IBSA.

## **168. Salient features of MOUs/Agreements signed during the 2nd IBSA Summit.**

**Tshwane, October 17, 2007**

Seven MoUs/Agreement were signed in the presence of Hon'ble Prime Minister of India and the Presidents of Brazil and South Africa during the 2nd IBSA Summit at Tshwane, South Africa on 17 October 2007. The salient features of these MoUs/Agreement are :

### **I. Agreement on Customs and Tax Administration Cooperation**

The purpose of this Agreement is to strengthen trilateral cooperation with the objectives of : Facilitation of legitimate trade and investment; Combating commercial fraud, smuggling, drug trafficking, money laundering and other illicit international trade activities; Curbing abusive tax avoidance transactions, arrangements, shelters and schemes; and Strengthening the modernization programs of the administrations through capacity building and co-operation.

### **II. MoU on Public Administration and Governance**

This MoU provides for cooperation in specialised areas such as e-governance, human resources development, anti-corruption and ethics, and accountability and transparency.

### **III. MoU on Cooperation in the Field of Health and Medicine**

This MoU provides for development of a common strategy to tackle HIV/AIDS epidemic. The areas of cooperation include Tuberculosis (TB), Malaria, Pharmaceutical assistance, Procurement of medicines, vaccines, medical research and development, Traditional Medicine, Intellectual property rights and Disease surveillance.

### **IV. MoU on Cooperation in the Field of Education**

The objectives of this MoU are creation of conditions for cooperation among academic institutions, faculties, researchers and students and by means of joint research projects; alignment of the higher education systems in the way that they relate to each other, to social and economic development, and to local communities; the strengthening of training and high-level professional development programmes; and enhancing the exchange of scientific information and specialized

documentation among the three countries. The focus areas identified are Engineering, Computer Sciences and Mathematical Sciences; Biotechnology, Agriculture and Livestock; Sustainable Development; Social Transformation and Empowerment; and Higher Education Studies.

V. **MoU on Cooperation in the Field of Social Issues**

This MoU envisages cooperation in the field of social development, poverty eradication, social security, social policy, monitoring and evaluation, institutional capacity building, micro-finance, and cooperation in multilateral fora.

VI. **MoU on Cooperation in Wind Resource**

The areas of cooperation under this MoU are wind power resource assessment, standards, testing facilities and certification procedures for wind resource systems, subsystems, and components; deployment of wind power systems; and design and development of wind power systems, especially for low wind regimes.

VII. **MoU on Cultural Cooperation**

This MoU aims to promote the exchange of cultural activities and expertise; develop cooperation in areas of preservation of historic, artistic, cultural heritage and as well as development of creative industries; encourage travel among three countries; and increase awareness amongst peoples of the concerned countries regarding IBSA as a brand name through cultural exchanges.

## SAARC

### **169. Inaugural Address by Foreign Secretary Shivshankar Menon at the Conference of Editors from SAARC Countries.**

**New Delhi, February 9, 2007.**

I am delighted to be here today with you at this conference, which is a first in many ways. It certainly is a first for us in the Ministry of External Affairs, to cooperate with a non-profit trust like the Media Development Foundation and I am very grateful to them for all that they have done to make this possible. It is also a first for us to be with such a distinguished gathering of media personalities from throughout SAARC to discuss all media issues. It is good to see some familiar faces and to be able to put faces to some of the names we have seen above articles which we read regularly. Welcome to all of you, welcome to Delhi.

We are less than two months away from the 14th SAARC Summit, so I thought it might be worth my while trying a few ideas with you and to see where we go from here. After all, SAARC has been in existence for 20 years. So, it is a rather sad commentary that this is the first time that we have a meeting of editors at this level in SAARC. It says something about SAARC and what we have been doing in the organization and in our region. I must be a minority of one in this room, because for me, SAARC actually has done all that could have been expected of it in its first twenty years. There is a general air of pessimism. I know conventional wisdom in South Asia is - look at SAARC, it has not done anything worthy while the other regional organizations are doing so much better. I don't think so, for two simple reasons. If you look at what SAARC started off as, it is an association of states and it is an association of new states, very new states. It is only natural that the first thing states, new states would do is to harden their borders and to assert their identities against each other, in a sense. I therefore, find it quite remarkable that twenty years ago we were wise enough to actually realize that we share a destiny, that we do have complementarities that we need to work with.

It seems to me that when we look at the various reasons for our unhappiness with SAARC, this general impression that SAARC has not achieved much, I think it is more of a measure of our realization of the potential of what we could do if we work together and the more we see the potential, the more

unhappy we are with SAARC. But then what do we do, it is our own SAARC after all, and it is for us to fix it and to enable it to achieve its potential. Fortunately, I think, we are now at a stage in South Asia, in the sub-continent, where I think we have a moment of opportunity to try and enable SAARC to achieve its potential, to try and realize its shared destiny, to use the complementarities that exist.

We are at this moment for several reasons. One is the result of several years of economic development in our own countries. We are not what we were, we as states in South Asia are not what we were 40-50 years ago. We today have the capacities and the potential to do things together which we did not have before. Secondly, we have, as I said, several years of experience of living together as States. We realize the extent of our interdependence, the extent to which we need each other, all of us. This has nothing to do with asymmetries of power, shape, size and whatever - we all need each other. India needs a peaceful periphery if we are to achieve our own goals for ourselves. It is in our self-interest to work with the rest of South Asia. I think the same is true of all of us. But we have that capacity today what we didn't have forty years ago, to work together. The second big reason, I think is technology and what it has done to our lives in the sub-continent. Apart from enabling us to leap-frog stages of development in certain sectors, I think in every sector that you look at, the whole technological revolution has changed our lives. For you I think this is most immediate. For the media, I think, you feel it every day.

You look at the music industry, what the internet has done to the music industry. I don't think that there is any part of our lives where you don't see this. Somebody said, I think, that we have moved from a mass market to a market which is a mass of niches, thanks to technology. But we can actually serve all these niches all at the same time today. It is the same thing in economic terms. We actually have the capacities thanks to technology. And most important I think, we have the basic political understanding today or the beginnings of the basic political understanding in place within the sub-continent, of where we want to go, of what we want to do and how we want to develop ourselves.

So, if we are at this moment of opportunity, if we do have a chance to actually make SAARC achieve its potential, what should we be doing? I think Prime Minister Manmohan Singh, expressed this most clearly at the Dhaka Summit last year, when he spoke and I quote of 'reconnecting the countries of sub-continent, on the one hand, and then re-connecting the

sub-continent to the larger Asian neighbourhood on the other.' This to my mind, represents not just a historic opportunity but actually a historic reversal where it enables SAARC to play its role, enables us to achieve our shared destiny and gives us a chance to overcome the limitations on our own growth which, quite frankly, we had imposed on ourselves. When we talk of reconnecting the sub-continent to itself and to the rest of the world, we think basically in two terms. One is of course, the business of physical connectivity between ourselves and there has been considerable progress or there are major plans in place to do so - to open up channels of communication, of transport. Once again, technology did a lot of this for us over the last twenty years and I think this is proof when you look at the content of the media today in any of our countries.

It draws a lot more from each other thanks to technology not because journalists were actually physically in each other countries, certainly not to the extent that we would like. But thanks to technology, we actually do know a lot more about each other now than we used to. Opening up channels of communication, provision of transit facilities, access to roads, railways, highways, waterways, air connectivity - these are all elements which it seems to us would be very useful if SAARC could work on. This would tie into the logic of not just our economic needs but also our globalized world where we can maximise the benefits of trade and commerce for our people.

But equally important to the business of physical and economic connectivity, I think, is the connectivity of the mind, the connectivity of ideas. This is really where your role is crucial. We have traditionally, I think, looked at borders as limits, as places in a military sense, in a security sense. Whereas, if you look at it civilizationally, traditionally borders are zones where nations, where cultures, where civilizations interact and it is only when we use borders in that sense - where ideas flow freely across those borders - that you've seen periods of historical growth, prosperity and of development. This is why we would attach great importance - in SAARC, in other fora, in any way that we can - to the free movement of media persons, of media products, of doing whatever we can to encourage the free flow of ideas. We need to do this because I think, so far, the flow of ideas has actually been much more limited, than even the flow of goods and services. It's sad. We actually have a deficit here in terms of thinking. Where there has been a flow of ideas, it has seldom been direct between the media in our separate countries, it is often intermediated by the rest of the world and comes to us through filters.

Now, I'd be very interested in, if by the end of your deliberations, we have a sense of what we as SAARC, as an association of states - and don't forget that in itself imposes a certain limitation about what it can do - could do to help in the free flow of ideas. I ask this because one of our great good fortunes in South Asia is the sheer quality of the media that we have. I don't think there are very many regions in the world that can match us in terms of the quality of the media. Maybe this is because of, you know, the principle of the survival of the fittest. We referred to the various pressures that the media operates under. Whatever the result, the fact is that we today have a media in South Asia which is among the best in the world and can match anyone else in the world. Therefore, my question to you is, please tell us what could we be doing in SAARC to encourage free flow of ideas, of media persons, of media products. This is something that we, as India, will certainly try in the SAARC Summit and during our year as Chairman to try and move forward.

I notice from your agenda that you are also speaking about the media and foreign policy. Now this in itself is a huge topic, I think it is also a very complicated topic. I am very glad that you are discussing foreign policy reporting because it is an aspect where again I think there has been too much intermediation and too little direct reporting. It is only in the last few years that I as a consumer have noticed that we are writing in each other's papers, we do get each other's points of view and some understanding of each others' attitudes, why foreign policy decisions are made. This is a very recent and very fragile phenomenon. I think we need much more of this and I would be very interested in the results of what you discuss.

Most important for us is the fact that you are all here, that you do have a very full and complex agenda over the next day and half and I look forward to hearing what you have to say and your framing the terms of the public debate in South Asia as we go forward in our attempt, as I said, to reconnect the sub-continent to itself and to the rest of the world. I wish you success and I hope you enjoy the experience. If you do, let's also think what we need to do in the future, whether there are ways of continuing this effort.

All the very best and thank you very much for the patient hearing.

## **170. Concluding Remarks by External Affairs Minister Pranab Mukherjee at the Conference of Editors from SAARC Countries.**

**New Delhi, February 10, 2007.**

My distinguished friend, Mr. N. Ram, Mr. Sashi Kumar and Mr. Navtej Sarna, distinguished participants coming from SAARC countries.

I consider it a privilege for me to be amidst you in this concluding session. I am quite confident that two days of deliberations has reflected in the conclusion of a resolution. Of course, I have not been able to go through it totally, I just started reading and there would be some recommendations which will be also followed up in the subsequent conference. I am happy indeed to have this opportunity of welcoming you amidst us just on the eve of the 14th SAARC Summit which we are going to host in April. As I mentioned, I understand that the debate has been invigorating on critical issues facing the media of the South Asian sub-continent. It is particularly gratifying that this public-private enterprise launched by our Ministry and the Media Development Foundation has succeeded in bringing together such a distinguished gathering of editors from all the SAARC countries just weeks before we are to host the 14th SAARC Summit in New Delhi.

I have over the last few weeks, undertaken visits to all SAARC countries - Nepal, Sri Lanka, Bhutan, Maldives, Pakistan and Afghanistan carrying letters from our Prime Minister to the Prime Ministers and Presidents of those countries inviting them to attend the 14th SAARC Summit. I also extended invitation to my counterparts to participate in the 28th SAARC Council of Ministers Meeting scheduled to be held before the Summit. Only one member country of SAARC I have not yet visited, that is, Bangladesh which I would be doing shortly before the end of this month. My visits have not only provided me an opportunity to discuss matters of mutual interest but also strengthened in my mind the conviction that the South Asian sub-continent has a common future and we have to work together for it with mutual trust and confidence. For its part, India is committed to developing political relations with its South Asian neighbours on the basis of sovereign equality and mutual respect. What we seek is not an exclusive sphere of influence -as is often misunderstood- but a shared sphere of mutual development and cooperation. Our vision for the SAARC region is one of regionalism. India's strong support to the entry into SAARC as observers, among others - China and Japan - underlines our commitment to open

regionalism in the Subcontinent. In this context, I can also mention very recently we have revised the updated treaty with Bhutan which reflects the ground realities. The treaty which was signed in 1949 immediately after Independence of India required revision and we did so without any problems. This reflects that India wants to extend its hand of cooperation to all countries on the basis of sovereign equality and mutual respect.

India is conscious that no South Asian nation can succeed on its own. Globalisation and the advent of modern technology have endowed us with options that never existed before. We must create a stake for every nation in the economic success of the other. As we prepare to host the next SAARC summit, India will take the initiative in accelerating regional economic and political cooperation. We will play a positive role in the establishment of new trans-border transport networks and energy corridors so that the 14th Summit of SAARC countries gives a clear signal for improving the connectivity within the subcontinent by ensuring free flow of trade, commerce, goods, people and ideas. Only then can we effectively connect South Asia with the abutting regions of South East Asia, Central Asia and the Persian Gulf.

The media of the SAARC region has witnessed dynamic growth across media categories and such growth has thrown up quality issues in its wake. New technologies have blurred traditional distinctions between media formats and the convergence of formats has thrown up new challenges. Gatherings such as these can help share experiences from differing political milieus and lead to strategies that can harness the growth and power of modern media technologies for the good of the common man of the entire region. Given its immense reach, there is a need, perhaps more than ever before, for the media to be fully aware of its own power and its responsibility it bears for creating proper understanding between neighbouring countries. In many ways, the media is the torch-bearer of better people-to-people contacts. This only highlights the need for media persons as well as media products to move easily across our borders. One sentence from any one you have the potential to reach millions. It can correct a wrong; it can create an image; it can plant a seed of understanding. I would encourage that such conferences be held regularly, already you have decided to have the next one in Karachi, so that the full potential of the media in helping create a peaceful and closely integrated neighbourhood is realized.

Thank you.

## **171. Press Release of the Ministry of External Affairs on the SAARC Car Rally 2007.**

**New Delhi, February 15, 2007.**

During the 13th SAARC Summit in Dhaka in November 2005, Prime Minister Dr. Manmohan Singh, put forth a bold new vision of an interconnected South Asia. Emphasizing the need for reconnecting the countries of the subcontinent, and then reconnecting the subcontinent to the larger Asian neighbourhood, he offered transit facilities on a reciprocal basis to all the SAARC countries, including on open skies policy. He proposed that we organise a South Asian Car Rally in the run up to the next SAARC Summit, in New Delhi. The Rally would symbolize our regional identity, highlight our regional connectivity and draw attention to the need to improve our SAARC transport infrastructure.

All the SAARC countries have welcomed this proposal and are cooperating, extending their full support and hospitality for the successful implementation of the SAARC Car Rally. The Rally symbolizes the spirit of SAARC, where our cultural and civilisational commonality translates to bring about a very high degree of connectivity amongst the countries of our subcontinent. The motto of the Car Rally, "Connecting People, Strengthening ties", captures this spirit.

The Car Rally, comprising of teams from all the countries in the region, will cover a total distance of more than 8,000 kms, in 31 days. It will travel to all the SAARC countries. It will start from Cox's Bazaar on March 15 to reach New Delhi during the 14th Summit, on April 3-4, 2007 and finally conclude in Maldives on April 14.

The Rally is being implemented in partnership with the Confederation of Indian Industry (CII), as a public-private partnership. The private sectors in the other SAARC countries are also participating as sponsors. This highlights the role and contribution that the private sector plays in our growth and development. A series of promotional events have been planned in some of the major cities in the region. These will focus attention on our rich cultural heritage, our shared history, encourage people-to-people contact and generate goodwill. It is hoped that the Rally will boost intra-regional trade and promote tourism, business and investment opportunities in the region.

## **172. Opening Remarks by Minister of State in the Prime Minister's Office Prithviraj Chavan at the media launch for the SAARC Car Rally.**

**New Delhi, February 15, 2007.**

Distinguished Guests, Distinguished members of the Media, Ladies and Gentlemen.

I warmly welcome you all to the Media Launch of the SAARC Car Rally and its website.

During the 13th SAARC Summit in Dhaka in November 2005, Prime Minister Dr. Manmohan Singh had proposed that we organise a South Asian Car Rally. Speaking at the Summit, he said, and I quote,

*"If we wish the next twenty years of SAARC to be different, we should take the first decision to reconnect the countries of the subcontinent on the one hand and then reconnect the subcontinent to the larger Asian neighbourhood on the other. We need to recharge and regenerate the arteries of transport and communication that bind us together and in turn link our region to the rest of Asia to reclaim the prosperity that is undoubtedly our due. In pursuit of this vision, let us agree, at this Summit, that all South Asian countries would provide to each other reciprocally, transit facilities to third countries, not only connecting one another, but also connecting to the larger Asian neighbourhood, in the Gulf, Central Asia and South-East Asia. India, which borders each of the members of South Asia, is willing to do so.*

*In this context, I am happy to announce that India offers to hold a South Asian Car Rally. This would be a run-up to our next Summit. It would symbolize vividly our regional identity and also draw attention to the urgent need to improve our SAARC transport infrastructure".*

It is a matter of happiness therefore that all the SAARC member countries have welcomed this proposal with enthusiasm. This is indicative of the spirit of SAARC, symbolizing our cultural ties, our social bonds and our geographical connectivity. Preparations are now underway for a successful implementation of this event.

As you would have learned already, the Rally will cover a total distance of more than 8,000 kms, in 31 days. It will travel to all the SAARC countries.

The Rally will be flagged off by Bangladesh, the current Chair of SAARC, from Cox's Bazar on March 15. It will reach New Delhi during the 14th Summit, when India will assume the Chairmanship of SAARC and finally conclude on April 14 in Maldives.

As a curtain raiser to the 14th SAARC Summit, it will also capture the theme of the Summit, i.e. to reconnect the subcontinent to itself and to the rest of the world.

Let me add here that the 14th SAARC Summit will be a landmark Summit as for the first time in the history of SAARC, it will enlarge its membership to include Afghanistan as a member. We expect Afghanistan to join the Car Rally as full members of the regional grouping. Afghanistan's presence in SAARC will complete South Asia's regional entity and also provide connectivity to Central Asia and beyond.

A unique feature of the Rally is that it is being implemented in all the SAARC countries as a public-private partnership. It highlights the tremendous role and contribution that the private sector plays in our growth and development. A series of promotional events have been planned in some of the major cities in the region. These will focus attention on our rich cultural heritage, our shared history, encourage people-to-people contact and generate goodwill. The Rally has tremendous potential in giving a boost to intra-regional trade and promoting our tourism, business and investment opportunities in the region. It is therefore a fitting tribute to the conclusion of 2006 as the SAARC Year of Tourism.

South Asia is a common cultural and economic unit. Our destinies are linked. We can translate our political boundaries and bring about a very high degree of connectivity amongst the countries of our subcontinent. India has long argued that if South Asia is to become a dynamic component of the larger process of regional cooperation and globalization that is taking place in the world, it must first bring about economic integration amongst itself. If countries in South Asia have to remain focused in its goal of improving the life of its people, then they must start looking at national boundaries not as impenetrable walls, which protect us from the outside world, but rather as connectors to the outside world. The Car Rally, with its Motto, "Connecting People, Strengthening ties", will demonstrate this regional connectivity.

I take this opportunity to express my gratitude to all the SAARC member countries in extending their full support and hospitality to the Car Rally. I also take this opportunity to congratulate the Indian team comprising of

representatives from different Ministries in the Central government and participating State Governments in India and other agencies and our partners, the CII in translating our vision of an inter-connected South Asia into a reality. My sincere thanks go out to the sponsors from the private sectors of all the SAARC countries that have lent their support in making this Rally a success.

Thank you.

### **173. Inaugural Address by External Affairs Minister Pranab Mukherjee at the Second SAARC Business Leaders' Conclave in Mumbai.**

**Mumbai, February 17, 2007.**

Dasho Ugen Tsechup Dorji, President of the SAARC Chamber of Commerce and Industry, Lyonpo Chenkyab Dorji, Secretary General of SAARC, Mr Habil Khorakiwala, President of FICCI, Dr. Amit Mitra, Secretary General of FICCI, Distinguished Business Leaders and participants, Ladies and Gentleman,

I am delighted to have this opportunity to participate in the Second SAARC Business Leaders' Conclave. I extend a warm welcome to the delegates from our neighbouring countries. I also wish to commend the SAARC Chamber of Commerce and Industry (SCCI) and their partners in the respective national chambers of commerce and industry for their activities in energizing this apex body of SAARC whose initiatives have played a constructive role in facilitating greater private sector interaction and partnership in our region.

2. The theme of the Conclave, "Regional Cooperation: A Springboard for Growth and Job Creation", is of relevance to our region today. Most economies of South Asia have shown remarkable improvements in economic growth and many have grown at an average of close to 6 % per annum for the last decade or so. While this has helped South Asia reduce poverty and raised the living standards of its people, it has also attracted the international community's attention to our region.
3. Together with growth, policy reforms have resulted in a greater

integration of South Asian countries with the global economy. Deregulation has enhanced the role and efficiency of the private sector.

4. However, it is ironical that while South Asia has made significant progress in integrating with the global economy, its integration within the region remains limited. South Asian countries have maintained a higher level of protection within the region than with the rest of the world. Our restrictive policies have neutralized the benefits of cultural affinity and geographical proximity. Restrictions on freer movement of goods and people within the region mean that intra-regional trade is the lowest for South Asia. There is little cross-border investment and equally little flow of ideas, as measured by the cross-border movement of people, or the number of telephone calls, or the purchase of technology and royalty payments - all these are all too low for a region with our potential. Poor connectivity and concerns about security have all contributed to South Asia being the least integrated region in the world.
5. With the 14th SAARC Summit less than two months away, this is an appropriate time to suggest some concrete solutions. The 14th Summit will be a landmark Summit for SAARC. For the first time in its history, SAARC would enlarge its membership. We eagerly look forward to receiving Afghanistan as the eighth member of SAARC. This will not only complete its regional identity but also provide SAARC a gateway to Central Asia. This is also the first time that five Observers from outside the region - China, European Union, Japan, Republic of Korea and the United States - would be associated with SAARC. I am confident that these external linkages will benefit SAARC and assist in its global integration.
6. An important subject to be discussed in this Conclave is the issue of Connectivity. You would all recall that during the 13th SAARC Summit in Dhaka, Prime Minister Dr. Manmohan Singh had put forth a bold new vision of an interconnected South Asia. He called for "reconnecting the countries of the sub-continent on the one hand and then reconnecting the continent to the larger Asian neighbourhood on the other". He shared these thoughts at the First SAARC Business Leaders' Conclave Meeting in November 2005 as well.
7. Connectivity implies several things-physical connectivity, economic connectivity and a connectivity of people and ideas. Physical

connectivity would open up the channels of communication and transport. The provision of transit facilities, access to roads, railways, waterways and increased air connectivity are all elements of this. As India prepares to take over the Chairmanship of SAARC, we would like to move this idea forward in all its aspects.

8. To highlight the need to upgrade our connectivity, the SAARC countries are organizing the SAARC Car Rally as a curtain raiser to the 14th Summit. The Rally will symbolize vividly South Asia's regional identity, its geographical connectivity and draw attention to the urgent need to improve regional transport infrastructure. It is intended to promote people to people contact, tourism and business and investment opportunities in the region.
9. An important aspect of economic connectivity is freer trade in the region. A smooth and complete implementation of SAFTA is therefore imperative. SAFTA can be an important instrument to deepen intra-regional trade if it is implemented in letter and spirit. Full implementation of SAFTA will catalyze other areas of economic integration, including enlarging the scope of SAFTA to services and investment.
10. Regional integration also provides opportunities to make progress in other areas of regional cooperation. Some of these opportunities include addressing the problems of energy shortage, the constraints of transit for land-locked regions of our subcontinent and overcoming high transaction costs due to poor trade facilitation across regions. Regional cooperation on transport and trade facilitation can transform these land-locked regions into land-linked regions. The SAARC Multimodal Transport study has given important suggestions which should be carried forward.
11. There are other areas where the region can benefit through cooperation. These include tourism, education, health, and professional services. All these can lead to positive benefits, including peace dividends through regional cooperation.
12. If it is the responsibility of the Governments to create an environment conducive to improved economic performance, it is equally the responsibility of businesses to ensure that our firms become globally competitive. Our entrepreneurs must be prepared for faster regional integration. As the region's largest economy, we are conscious that we have the biggest responsibility. We are prepared to play that role.

13. The destiny of the people of South Asia is interlinked. India cannot be a prosperous, dynamic economy, if our neighbourhood as a whole is also not economically prosperous and politically stable. Similarly, our neighbours cannot prosper if India does not do so as well. There are enormous opportunities and vested interests for promoting mutually beneficial cooperation in South Asia.
14. Business and trade flourish in an environment of security. Therefore, it is imperative to fight unitedly the scourge of terrorism and extremism that haunts our region. Terrorism, by whatever name, has no place in civilized societies. We all know that in an interconnected region, and in our globalized world, the consequences of both poverty and insecurity are indivisible. Business leaders understand this very well. Every country in the region wants to attract more foreign investment. We therefore have a collective stake in ensuring peace and security here because no investor will come to this region if there is no assurance of peace and security. We must join hands to put our collective house in order, as peace and security in the region will benefit us all.
15. It is incumbent upon all of us to think of our region's future, and the need to build a progressive and equitable society. The SAARC Chamber of Commerce and Industry came into being with these objectives. I urge you to continue to your work in that spirit and wish this Conclave all success.

Thank you.

**174. Speech by the External Affairs Minister Pranab Mukherjee at the RIS/SACEPS Conference on "Economic Cooperation in SAARC: SAFTA and Beyond".**

**New Delhi, March 19, 2007.**

Dr. Arjun Sengupta, Syed Babar Ali, Dr. Nagesh Kumar, Distinguished delegates to this Conference, Ladies and Gentlemen:

I am glad to have this opportunity of addressing you at this Regional Conference on Economic Cooperation in SAARC, which could not have been timed better. In ten days from now, we start our deliberations to prepare for the 14th SAARC Summit in New Delhi on April 3-4, 2007. India is keenly looking forward to receiving leaders from the rest of the subcontinent for the Summit, which, we hope, will turn out to be a landmark in the evolution of South Asian regionalism. I believe that 60 years after the subcontinent achieved independence, the region is poised at the cusp of a historic transformation, which has the potential to bring about revolutionary change in the lives of all the peoples of SAARC. Naturally, this change can come about only if we are all willing to recognize the opportunities before us and reach out and grasp them. Letting these opportunities pass us by will only lead to our region falling further behind, while the rest of an increasingly integrating world economy marches ahead. Positive and concrete action is needed, therefore, if the 14th SAARC Summit is to signify more than a mere date and a place. The Summit and its preceding meetings will discuss ways to upgrade regional economic cooperation, including SAFTA and I am certain this Conference will provide us useful inputs.

For more than twenty years now, we in South Asia have attempted to pursue our own separate paths of economic development, while talking about regional cooperation on the sidelines. One result has been a high price paid in terms of the opportunities lost for regional cooperation. The underlying concept of a regional cooperation organization is sharing and exchange - sharing space, resources and talent and exchanging goods, services and ideas. In the past, unfortunately, all that South Asia could share or exchange was poverty. Indeed, the "poverty trap" that engulfed South Asia for so long also tended to limit our imagination in the past about the possibilities for growing together in the region. Now, we must learn the slightly more complex art of sharing prosperity for mutual benefit. This requires a new mindset among our decision makers. A rising tide lifts all boats and sharing wealth, as the rest of the world has figured out, makes all nations richer.

As we assess the task before us, one thing is clear to me. There is today the real prospect of ending economic poverty in the SAARC region in our own lifetime. Thanks to the economic reforms of the last decade, historically unprecedented growth rates have now become the presumed norm in the subcontinent. And India is not the only one growing rapidly. Most of our neighbours, too, have turned in impressive growth trajectories in recent years. Despite many difficulties-political, social and environmental-economic growth in the subcontinent has now acquired a new traction. South Asia is now among the fastest growing regions of the world. As a consequence, we can begin to visualize the reduction of poverty levels in the subcontinent to single digit levels within the next decade. For the first time in centuries, the capacity to provide a decent life to all the citizens of our region is within our grasp.

I would venture to say it is in India's own national interest to see the rest of South Asia prosper. As the fastest growing economy of the region, India has the potential to become a growth opportunity for all our neighbours and I would invite all of them to see it as such. This potential can be fully realized if SAARC as a whole becomes more integrated. However, it is a matter of concern that while countries in South Asia are integrating with the global economy, they remain less integrated among themselves. Even after more than two decades, intra-SAARC exports are a mere 5% of the total exports of the region. Compare this with NAFTA, where intra-regional trade is nearly 52% of total trade, or the EU, where it accounts for more than 55% of the total. For those who choose to see something peculiarly Asian about our low figures, I would cite the similar figure for ASEAN - it is as high as 21.4%.

Therefore, I submit to you that if the SAARC region has to become a dynamic component of the larger process of regional cooperation and globalization that is taking place in the world, it cannot remain disconnected within itself. It must first bring about economic integration amongst the member countries and then with other regional organizations. Otherwise, it runs the risk of being left far behind by other regional organizations.

We have made a small beginning in this regard. The South Asian Free Trade Agreement is at once a visible symbol of the recent progress and the many difficulties that remain to be overcome. Its full implementation would go a long way towards enabling the region to begin to fulfill its undeniable potential. I would therefore urge that the realization of genuine free trade in the region not be undermined by linking it to extraneous political considerations. We have raised our serious concerns regarding non-

compliance with SAFTA by Pakistan and we expect it to revise its position to ensure that international commitments that it has solemnly undertaken are complied with. Otherwise SAFTA and the process of regional economic cooperation will continue to remain fragile. I would emphasize here that, in the subcontinent, we must begin to walk on both legs-simultaneously resolving political differences and expanding economic integration.

To be sure, there are many economic issues standing in the way of freer trade in the region. Many of our neighbours have expressed fears about Indian economic dominance in the context of an incipient liberal regional trading regime. The history of economic cooperation in other parts of the world, however, has shown that the smaller economies stand to gain more than the larger ones in a regional free trade arrangement. Several studies, including a study done by the State Bank of Pakistan, have shown that trade and businesses from the smaller countries are expected to be the biggest beneficiaries of SAFTA. India too has promised to review its non-tariff barriers and generate better access for our neighbours to the Indian market. It is a promise we intend to keep. We fully recognise that regional trade in South Asia is largely about India's trade with its neighbours. Barring Pakistan and Afghanistan, none of our other SAARC neighbours share frontiers with each other. The emergence of the Indian economy over the last few years as one of the fastest growing economies in the world offers opportunities of expanding markets, investments, technology and entrepreneurial resources for the countries in the region. Some successful examples already exist. India's FTA with Sri Lanka has helped it reduce its trade deficit with India. Bhutan's cooperation with India in tapping its hydro electrical potential has helped in its economic development. Trade creating investments in Nepal are yet another successful example of spurring bilateral trade. The growing purchasing power of Indians has helped boost tourism into Maldives, Nepal and Sri Lanka.

Today we are linking India into a web of partnerships with the countries of the region and beyond through free trade and economic cooperation agreements. We have concluded a Free Trade Agreement with Singapore and are in the process of negotiating with ASEAN. We are exploring similar arrangements with other Asian economies. This web of engagements may herald an eventual free trade area in Asia, covering all major Asian economies and possibly extending to Australia and New Zealand. This Pan Asian FTA could be the future of Asia and will, I am certain, open new growth avenues for our economies. It is therefore important that we assess South Asian economic cooperation in the larger Asian context.

Ladies and Gentlemen:

In addition to achieving regional integration, the other major transformation that we must attempt in the region is greater connectivity across South Asian borders. The idea of "open borders" has in fact become an alluring new theme in the sub-continental political discourse. This is not merely a romantic notion for liberal intellectuals in the urban areas of our region. For the many millions of people living in the border regions of the subcontinent, the notion of open frontiers is intimately connected to their own economic, social and political well-being. Because of the post-Partition political evolution of South Asia and the inward-looking nature of the economic strategies adopted by most countries of the region a few decades ago, many of the region's frontiers have become closed and hostile to movement of people and goods between states. As a consequence, many regions of South Asia, which for centuries were integrated economic and cultural spaces, have been torn asunder.

Today, amidst our economic globalization and regional trade liberalization, it is both necessary and possible to restore and upgrade many of the traditional trade and transport connectivities that linked different parts of the subcontinent. India strongly believes that the time has come for reconnecting South Asia within itself and to the rest of the world. Some small advances have already been made. One example is the revival of the old railway links between Rajasthan and the Sindh province in Pakistan, the expansion of bus services between the two Punjabs, the revival of the Srinagar-Muzaffarabad connection across the Line of Control and renewed road and rail transport links with Bangladesh. We are hoping for an early launch of the already agreed truck trade between Srinagar and Muzaffarabad road. After many decades, border trade has once again resumed between Sikkim and Tibet on the Sino-Indian border. Yet, we have a long way to go in realizing the full potential of open borders in the subcontinent.

It is indeed regrettable that when many regions of the world are rapidly pressing ahead with trans-regional highways, trade corridors and energy pipelines, South Asian nations have denied each other basic transit rights for overland trade in goods. Oddly enough, some of our neighbours support movement of goods one way, but oppose two way transit arrangements. We believe the entire region stands to benefit if we end all the current restrictions on overland trade among the nations of the subcontinent. We have expressed interest in transit facilities via Pakistan for overland trade

with Afghanistan. We are also keen on a similar arrangement with Bangladesh to link up with our own North Eastern region and South East Asia. Positive responses to these possibilities would allow our neighbours to simultaneously leverage the growing strength of the Indian market as well as their own geographic location. Comprehensive transit arrangements in South Asia, then, will see everyone win and no one lose.

What applies to transport connectivity also holds true for energy cooperation in the subcontinent. If we can depoliticize cross-border energy projects and create a framework for mutually beneficial energy interdependence, a whole lot of options open up-from large scale trans-border energy projects to more local interconnectivity between electricity grids.

Previous SAARC Summits, particularly, the more recent Summits held in Islamabad and Dhaka, have also acknowledged the need to improve connectivity. The SAARC Summit in Dhaka, in particular, reiterated "the need to strengthen transportation and communication links across the region for accelerated and balanced economic growth" and agreed to undertake trade facilitation measures, including transit for enhancing intra-regional trade and other economic activities. At Dhaka, Prime Minister Dr Manmohan Singh also put forward a bold new vision of an inter-connected South Asia, for freer movement of people, goods and ideas. We hope that the 14th Summit will carry forward this theme of regional connectivity.

The SAARC Regional Multi-modal Transport Study has also made important recommendations for enhancing transport connectivity amongst SAARC countries. Our transport infrastructure, fractured by the partition of India, now needs to be rebuilt. The entry of Afghanistan as the eighth member of SAARC makes the idea of connectivity even more important for all of us. It provides the region a gateway to Central Asia and beyond. South Asia already has linkages with East Asia. An enlarged pan-Asian connectivity can help us recreate a new Silk Route with South Asia as the hub. A first step would be a coordinated and focused commitment of SAARC member states to resolve the identified and non-identified physical barriers, and put in place a regional multi-modal transport system.

There are several trade facilitation related issues that must also be addressed collectively. These include harmonizing and simplification of customs and other procedures, standardization, reciprocal recognition tests and certification and banking facilities. The complementarities in our region should encourage us to expand the scope of SAFTA to cover trade in the services sector. We also hope that we can finalize the Agreement for

Promotion and Protection of Investments, which will contribute meaningfully to further economic integration in the region.

India is a very strong advocate of collaboration in regional projects, particularly in areas such as infrastructure, poverty alleviation and dealing with cross border challenges such as natural disasters, public health and terrorism. India's offer of US \$ 100 million could be utilized for development projects on poverty alleviation once the SAARC Development Fund (SDF) is operationalised. During the 13th SAARC Summit held in Dhaka in November 2005, Prime Minister Dr. Manmohan Singh had also proposed the creation of a South Asian University. This proposal has been welcomed by all the member countries. At an intergovernmental Expert Meeting held in New Delhi recently, it was agreed that the University would be established in India. The text of an Intergovernmental Agreement establishing this University has been finalized and would be considered during the 14th SAARC Summit. The University is envisaged to be an autonomous, non-profit public-private partnership, which will seek support both from each of the national governments and from other sources. It is our earnest hope that it will advance a sense of South Asian community by bringing together future generations of students in the common pursuit of quality education and to prepare them for the challenges of the new millennium.

Ladies and Gentlemen:

India remains fully committed to the SAARC process. We are convinced that on the foundations of their ancient civilizational and commercial inter-linkages, South Asian nations can work together for SAARC to emerge as a major powerhouse of economic creativity and enterprise. We are also conscious that as the largest country in this grouping, India has the largest responsibility. We stand ready to fulfill that responsibility. It will be our effort during our Chairmanship to significantly upgrade regional economic cooperation.

Thank you.

## **175. Briefing by Official Spokesperson on the Fourteenth SAARC Summit.**

**New Delhi, March 21, 2007.**

**Official Spokesperson (Shri Navtej Sarna):** Good afternoon everybody. Thank you. I have with me, as you can see, Mrs. Preeti Saran, Joint Secretary (SAARC). We requested her to come in today to do a sort of curtain raiser with us for the SAARC Summit. As we go along and go to the Summit, naturally there will be another briefing just before the Summit in which we will give you a further update. During the Summit we will have briefings naturally. But we thought we would give you sort of broad framework of the Summit so that you can all begin to think about it, hopefully write about it. I will give you a brief introduction and then I will ask Preeti to fill in the details and also explain to you at length some of the major Indian proposals.

As far as the Summit is concerned, as you know this is the 14th SAARC Summit and the third one that India will be hosting. India hosted the 2nd SAARC Summit in Bangalore in 1986 as well as the 8th SAARC Summit in 1995. So, the 14th SAARC Summit will be on 3rd and 4th April and after that India will assume the Chairmanship of SAARC.

The Summit itself will be preceded by several other meetings. You already know that External Affairs Minister Shri Pranab Mukherjee has visited all the SAARC countries personally, handed over letters of invitation to his counterparts as well as to the Heads who are expected to come.

The preparatory meetings will be as follows. On the 2nd of April there will be - I am going backwards- the 28th Council of Ministers. On 31st March and 1st April, is the 33rd Standing Committee meeting which is at the level of Foreign Secretaries, and on the 30th of March is the Programme Committee meeting. This is basically how the meetings are going to be organized.

A couple of important aspects of this Summit are, of course, firstly for the first time there has been expansion in the SAARC membership. As you know, Afghanistan is now a member and Afghanistan will be attending this Conference as the eighth member of SAARC. Now India, of course, welcomed the Islamic Republic of Afghanistan as the new SAARC member. Given its historical ties and cultural ties with South Asia, this development we see as a natural one which also completes the regional identity of

SAARC. Afghanistan has also been invited to attend all the pre-Summit preparatory meetings. In the beginning of the Summit, there will be a joint declaration which will be signed by the President of Afghanistan and the other Heads which will formalize Afghanistan's entry into SAARC.

The second aspect which I thought I will flag is that there will be five observer countries - China, Japan, RoK, the United States of America, and the European Union. So, they will all be attending the Summit. They will be attending the public opening and closing sessions of the Summit, the Council of Ministers and other Ministerial meetings in agreed areas of cooperation. According to the rules of the Conference, the observers who pick their representatives at the Ministerial level can make brief statements at the public opening sessions of the Summit.

Some other events which have been going on essentially, of course, they are important events themselves but the way it is coming together is they are all sort of strengthening the major theme which we hope this Summit will examine at length and promote and that is the theme of connectivity. During the 13th SAARC Summit in Dhaka, the Prime Minister had stated that if you wish the next 20 years in SAARC to be different, then we should take the first decision to reconnect the countries of the subcontinent and then to reconnect the subcontinent to the larger Asian neighbourhood. This connectivity can be conceptualized in three ways - it is political, economic, as well as the connectivity of ideas and people.

The other events, for instance, the SAARC Car Rally which is already under way which manifests in both physical and cultural terms the theme of connectivity that we are talking about, the Car Rally started from Cox's Bazar in Bangladesh on March 15th. It has presently finished Bhutan, it moves on to Nepal and Pakistan and will reach New Delhi on the 2nd of April. A civic reception is expected to be held at India Gate to welcome the Rally as it comes to Delhi. On the 3rd of April, it will be flagged off by all the leaders who will be personally be present there on the South Plaza of Vigyan Bhavan.

There are other cultural events again which are important when we look at the sub-theme of connectivity of ideas and people. There will be a cultural programme on the 2nd of April which will have performances by invited cultural artistes from SAARC countries. That I understand is being held at Siri Fort auditorium. An artistes' camp has already been held in Jaisalmer and the paintings which have been produced in the camp would be viewed by the leaders just before the Prime Minister's banquet on the 3rd of April.

On the sidelines, of course as you are already aware, there is SAFMA Conference taking place. There will be, besides the journalists who are coming to cover the Conference, people who will be coming from the media in which many of you would be involved. We also expect a group of SAARC Editors to come here in advance. This is a group which we are inviting to have a conversation with the External Affairs Minister just before the Summit. That will provide another platform for the major themes of the Conference to be outlined, delineated and promoted as we go along.

I do not want to go on about this. I would request JS (SAARC) to give you some more details on the Indian proposals and any other ideas that she will have.

**Joint Secretary (SAARC) (Mrs. Preeti Saran)** : Thank you for being here. I think Mr. Sarna has already outlined very broadly what is it that we are looking at in the Summit. So, I will not repeat what he has said except that I will just revisit this idea of connectivity that he spoke about where he said physical connectivity, economic connectivity and connectivity of ideas and people. These are three aspects and we, during our Chairmanship of SAARC, would want to move these three ideas in very concrete terms because in the last Summit, rather in the last two-three summits I think there is growing realization that the time has come to move SAARC from confabulations and declarations into implementation.

Those of you who have observed SAARC more closely would be aware that we have come out with a lot of literature, a lot of meetings, several agreements, conventions but actually we have not really done too well on the side of collaborative concrete projects. To that extent I think there is total unanimity amongst all the SAARC countries that the time has come to move towards implementation. So, when we look at implementation, when we move SAARC into the implementation phase, we would definitely want to implement some concrete infrastructure projects that would be able to help in our trade, transit and communication links. That will be the physical connectivity aspect that we would want to focus on.

In terms of economic connectivity, of course, what we would like to do is to looking at all the soft laws, the physical and non-physical barriers which come in the way of freer movement of goods and freer trade within the region. Inter-regional trade at the moment is not too good. It is just about five per cent compared to NAFTA or EU which is more than 25 per cent, or even ASEAN which is 26 per cent. So, we hope that if we were to address some of the trade facilitation issues such as harmonization of customs

procedures, or look at some of the existing transport arrangements that are there, if we could harmonise some of those procedures to facilitate freer movement of goods through the borders, I think that would definitely contribute to enhancing freer trade in the region.

Connectivity of ideas, of people, minds is a really a freer movement of people, a greater people-to-people contact. SAARC as an entity has largely been focused on the inter-governmental process although a lot in terms of even the SAFMA and several other recognized and apex bodies of SAARC focused on civil society and others interacting, I think is where we wanted to focus so that there is greater connectivity and a freer movement of people, people-to-people contact. Those are three aspects that we would definitely want to play out. Using that I will just come to 3-4 proposals that India had made.

Before that, just to revisit the issue of SAARC Car Rally. Mr. Sarna has already explained to you where all it has gone but just for those of you who are monitoring the Rally and where all it has been, I thought I must let me know that there has been this overwhelming support ever since we first embarked on the Car Rally. When the Prime Minister made the proposal in Dhaka, he said that we should do this to highlight our regional identity and to also symbolize our regional identity and to highlight the need for upgrading our transport infrastructure. That was how it was envisaged. But now, as it is being implemented, it has turned out to be much more than what we had ever imagined.

The motto of the Car Rally is 'connecting people, strengthening ties'. When it was inaugurated in Cox's Bazar, it was reported that there were lines and lines of people who just lined themselves on the roads as the Rally went by, with flowers, bouquets, petals and so on. The kind of profile and the attention that has been given by Bangladesh and Bhutan so far, it was inaugurated by the Chief Advisor himself in Cox's Bazar. Again the Prime Minister of Bhutan inaugurated the civic reception in honour of the Rally in Thimpu. That just goes to show that the amount of potential there is in terms of the amount of goodwill that it has generated, the interest that it has generated in this whole idea of connectivity and also a realization that in the margin of the rally several business events and cultural events have been organized which has again shown to us the potential there is in enhancing our regional tourism, in business opportunities and investments and so on. This is one aspect which closely connected to our theme of connectivity.

Coming back to the concrete proposals at the last Summit, Prime Minister had made some very concrete proposals. I am very happy to inform you that there has once again been an overwhelming support for the proposals made by India. I can quickly run through some of them. One was, of course, the Car Rally. The other was a Disaster Management Centre. At that time it was still fresh after the tsunami and the earthquakes in the region. India's proposal for setting up a SAARC Disaster Management Centre was approved. In fact the Centre has been set up at the National Institute of Disaster Management. We feel that a permanent response mechanism dedicated just to disaster preparedness and risk reduction, etc. would be extremely helpful because disaster has a direct impact on development of developing countries in the region. To that extent, we hope that we can develop this centre as a centre of excellence for this purpose.

Another of several other proposals made by the Prime Minister was a Regional Telemedicine Network Project. Then there is a proposal for a University, and a proposal for setting up of a Regional Food Bank, and lastly setting up a SAARC Museum for Textiles and Handicrafts. I am happy to share with you that again these proposals have been approved. We are working out the modalities of how to implement them. Certainly, there are these texts which are on the table for a Regional Food Bank and even an inter-governmental agreement for setting up of the university which we hope that these preparatory meetings, before the Summit we will be able to finalize. The university will, of course, focus again on a regional centre of higher learning of excellence catering to the youth of the region. As you know, in our own country 50 per cent of our population is really that segment. To enable and develop that human resource that is available to us both in India as well as to the region, I think, will make a major contribution. It will also I think contribute to the sense of a truly South-Asian identity that we all talk about, our civilization identity that we have lived through which in the modern context that we would contribute very concretely to secular democratic values, of developing the youth of today.

The telemedicine network project is again at some stage of discussion where we hope that we would implement it starting with the final project where we connect to hospitals each from all of the SAARC countries to some super-specialty hospitals in India. That will not only be as showcasing as an exemplary project that yes it is possible to do regional collaborative projects within South Asia. But it will also open the door and show the way for doing similar projects in distance learning and several other sectors where ICT is involved.

The SAARC Museum, apart from being merely symbolic that it showcases the richness and the diversity of our crafts, our culture, our handloom traditions and textiles, is not meant just to be a static museum which would just display things. It is really again meant to be a vibrant sector for innovation and training which will again, given our positive interest as well as the excellence we have collectively in the region on the textiles, on the handicrafts side, I think we would be able to showcase that. There is already agreement that this museum will be set up in India. Within this year itself during our Chairmanship we hope that we will start with curating an exhibition to begin with from the temporary premises located at Crafts Museum in Pragati Maidan and thereafter move towards a permanent location.

The Food Bank is again yet another area where we are looking at times of calamities, times of shortages when we can cooperate together and supplement national efforts. So, this Regional Food Bank hopefully should be able to cater to that need in a spirit of regional cooperation. Some of these proposals are what we hope will actually move SAARC towards implementation and actually upgrade the levels of our regional cooperation.

I will stop here at this point. If there are questions, may be we can answer those.

**Question:** I would like to seek a clarification on the Observer countries. Since this is the first time they will be there, what exactly will they be doing? Secondly, in 2004 at the Islamabad Summit, India proposed a SAARC Poverty Alleviation Fund. What is the progress on that? Has it been set up?

**Joint Secretary (SAARC):** On the Observers, yes this is the first time that observers have been invited to attend the Summit. You would recall that at the 13th Summit in Dhaka, a decision was already taken to accept China and Japan to be associated as observers. Subsequently, the Republic of Korea, the United States and the European Union also expressed a similar interest and their proposals were considered at the 27th Council of Ministers meeting which was held in Dhaka in August. During that meeting member-countries sat down to even discuss the guidelines. As explained by Mr. Sarna, the guidelines have clearly brought out the fact that we welcome observers to be associated with SAARC. It just shows the interest they have in our region and also the fact that SAARC should benefit from these external linkages as part of both India's desire to have this web of linkages be connected to itself and then to be connected to the outer world. The

observers have already been invited. But the guidelines stipulate that if they have represented at a Ministerial level, they could make brief statements with the prior approval of the Chair which is what would be the guidelines followed. They would be invited to open plenary and closing meetings. As you know, all SAARC meetings are closed meetings. To that extent, that is the role that observers play.

As regard your other question about the SAARC Development Fund, yes the proposal made by India at the Islamabad Summit in 2004 for a \$100 million (fund) for projects on poverty alleviation in other SAARC countries still remain on the table. Our proposal was reiterated at the 13th Summit in Dhaka at which point and thereafter a decision was taken that there was an entity called a South Asia Development Fund which also had some money in its account. It was decided that all of that will get wrapped up under this SAARC Development Fund with three windows - a social window, an economic window and an infrastructure window. So, those modalities are now being worked out. These are issues that should be in fact discussed in the preparatory meetings to the Summit as to how to operationalise that fund. So, that is where the current status of the fund is.

**Question:** Can you give us an idea of what is the kind of level of representation you might have from some of these observer countries?

**Joint Secretary (SAARC):** At the moment we do not have full, final confirmation.

**Official Spokesperson:** We will tell you next week.

**Question:** Given the political unrest in Pakistan, is there any concern about the Summit being deferred?

**Official Spokesperson:** I have just announced the dates of the Summit.

**QUESTION:** What is the status of SAFTA?

**Joint Secretary (SAARC):** SAFTA has been operationalised and SAFTA works on the basis of sensitive lists. It has a phased tariff liberalization programme. All of us issued our notifications on the 1st of July, 2006. Subsequently there was another notification issued on the 31st of December. India certainly is fully compliant with its SAFTA obligations. But as you are aware, Pakistan has singled India out of that. We have raised this matter in the SAARC meetings. We hope that Pakistan will be persuaded to adhere to its international commitments.

**Question:** Is SAARC thinking of having more Observers on board? Have you got proposals from other countries that would like to come in as observers? Secondly, you are talking about connectivity and upgradation of transport infrastructure in the region. Are we thinking of some pan-South Asia rail network? What are the concrete projects?

**Joint Secretary (SAARC) :** With regard to your question on additional observers, as yet I am not aware and so I suppose collectively the SAARC member countries will take a view should that arise. Regarding concrete projects, at the moment there is nothing concrete in terms of an identified project. But what is available to all the SAARC member countries is a very interesting study called the SAARC Regional Multi Modal Transport Study which has in fact identified special corridors - road, rail, air links - to the region. Those corridors are what I think we would be discussing if we can prioritise some of them. I think those would good guidelines for the SAARC member countries to follow. At one of the recent Ministerial meetings held in Kathmandu on SAFTA a recommendation was made, it will be considered again, that the scope of the study should be extended to Afghanistan. With Afghanistan joining the SAARC family, I think it is important to complete that study to include Afghanistan in that.

**Question:** Is the SAARC Development Fund the same as Poverty Alleviation Fund?

**Joint Secretary (SAARC) :** As I said, there were several funds like the offer of Poverty Alleviation Fund from our side. That was what was called the South Asia Development Fund (SADF). There were several other kinds of funds which have been there in smaller numbers. The decision was to put them all together in what will now become a new entity called the SAARC Development Fund with three windows. The poverty alleviation elements will actually come under the social window.

**Question:** What will be India's contribution to this fund?

**Joint Secretary (SAARC) :** The whole idea of contributions is still under discussion. But our commitment for \$ 100 million for poverty alleviation remains.

**Question:** What about other countries like Pakistan and Sri Lanka? Are they also contributing?

**Joint Secretary (SAARC) :** There is a broad discussion on the social window that other member countries would also contribute so that there is,

at least under the social window, a broad kitty available to initiate the fund. In any case our commitment of \$ 100 million remains.

**Question:** Will Iran's application for observer status be considered?

**Official Spokesperson:** Let the Summit start. If the proposal comes up, I suppose they will consider it. Is there any proposal (to Joint Secretary)?

**Joint Secretary (SAARC) :** I am not aware of it.

**Question:** Could you spell out some of the infrastructure projects that the study has recommended?

**Official Spokesperson:** I think what we will do is, before the Summit we will try and get you a copy of the Study.

**Question:** SAARC Development Fund has been there for some time. What is holding it back? Do some countries have problems with this? Why exactly it has not taken off?

**Official Spokesperson:** Our commitment is already pointed out. May be this is a question that you should address to other countries.

## **176. Media Briefing by Foreign Secretary Shivshankar Menon on the Fourteenth SAARC Summit.**

**New Delhi, March 28, 2007.**

**Official Spokesperson (Shri Navtej Sarna) :** Good afternoon, everybody. I welcome you to this briefing by the Foreign Secretary on the forthcoming Fourteenth SAARC Summit. As is customary, we would request the Foreign Secretary to say a few words and then your questions.

**Foreign Secretary (Shri Shivshankar Menon) :** Thank you, ladies and gentlemen, for coming here in such large numbers. It is good to see such interest in the SAARC.

As you know, we will be hosting the Fourteenth Summit of SAARC in New Delhi on the 3rd and 4th of April. The Summit itself will be preceded by a meeting of the Council of Ministers on the 2nd, by the Standing Committee formed by the Foreign Secretaries of SAARC on the 31st (March) and 1st.

Before that there will be the Programming Committee on the 30th on Friday. You would notice we have compressed the schedule a bit from previous Summits as part of our attempt, I think, to be more efficient and to produce more. The last time we held a SAARC Summit in India was in 1995 in Delhi. Before that, we had held the 1986 Summit in Bangalore, you would remember. So, this is the third time that we are hosting a SAARC Summit as SAARC enters its third decade.

It is a landmark Summit in several ways. We see this as a Summit which enables the subcontinent to reconnect to itself and to the rest of the world. I think the most evident symbol of this is that Afghanistan will be joining SAARC formally as a member at the Fourteenth Summit, which is a cause of some happiness for us. Equally, it will be the first Summit when there will be Observers present at the Summit. So, when I say connecting the subcontinent to the world, the EU, China, Republic of Korea, Japan and the US will be present at the Summit. It is our expectation that all the member-states of SAARC will be represented at either Head of State or Head of Government level. The Observers - the three of them, Japan, China and Republic of Korea - I believe, will be represented at the Foreign Ministerial level. So, it gives us an opportunity actually at a very high level to look at issues which interest our region and to look at our common development, our social and economic transformation as the Charter of SAARC says.

During the Thirteenth Summit in Dhaka in November 2005, you would remember that Prime Minister Manmohan Singh had made several suggestions. He had also pointed out that if we wanted the next 20 years in SAARC to be different from the 20 years before, it was necessary for the subcontinent to reconnect itself and also to work with the larger Asian neighbourhood. We had offered, on a reciprocal basis, air connectivity and transit facilities to all of the countries in the region and had made certain suggestions. Many of these are now in the process of being worked through. We will use the next Summit to try and improve our own connectivity within the region. When I say connectivity, I mean connectivity in various ways. In physical connectivity, there has been a multimodal transport study for the subcontinent which, it is now agreed, will be extended to include Afghanistan. The results of that study are now available to the leaders. So, it will be considered at this Summit. We hope that it will be possible, through the series of meetings over the next week, to start taking decisions about transport connectivity throughout the subcontinent. Telecommunications and energy are other areas of physical connectivity that we would like the

Summit to look at because we think this has immediate, direct benefits in terms of trade, in terms of travel, in terms of connections between people throughout the subcontinent.

Equally, economic connectivity I think for us is very important. SAARC has achieved a considerable amount because it has devoted a great deal of attention to economic connectivity in the past. South Asian Free Trade Area (SAFTA) is really the result of that. There are problems in parts of its implementation. But, for most of the subcontinent we now have a free trade area that actually covers most of what we trade with each other and actually has led to a great increase in trade. It is an interesting phenomenon that if you look around the subcontinent, all our economies are actually doing quite well, are growing at well over five per cent. It is, I think, not a very well recognized fact that this is true not just of the Indian economy, which has very high averages, but it is also true of our neighbours. To a very great extent this reflects the fact that we have a shared destiny here, a shared economic destiny, and there is no question that the more we can open up the linkages between our economies the more we can use our complementarities and synergies, and the fact that our economies have developed in different directions and, therefore, can now complement each other.

Apart from physical and economic connectivity, we will also look at connectivity of the mind. One of the ideas that Prime Minister Manmohan Singh had mentioned in Dhaka, you would remember, was the South Asia University. It has been worked on through the development of concept papers and Expert Group meetings which were attended by Vice-Chancellors from universities throughout the region. We do think we have now something which is ripe for a decision by the Summit and we hope to take it to the Summit. We think we know the way forward to realizing the idea of a South Asia University. We will, therefore, try and discuss this idea too. There are other ideas too about free movement of media persons and products, which I think previous Summits have looked at. We as India would be very keen to see that made as easy as possible. It is something we will certainly work on. We have, in fact even today, the SAARC Car Rally which is going through the subcontinent. Today I believe it was flagged off in Chandigarh in the morning and it has reached Wagah, it is probably crossing right now into Pakistan, going to each of the SAARC countries as a physical symbol. I must confess personally, I was very impressed by the kind of popular response that it seems to have evoked - which to my mind shows the depth of sentiment that there is behind the idea of a

connected subcontinent a popular sentiment and the support that exists today in the popular mind. It is quite a Rally, if you think of it. It covers over 8,000 kilometers in something like 31 days with over a hundred participants in it. The Rally, by the way, will be formally flagged off by the leaders in New Delhi on the 3rd (April) morning, just before the inauguration of the Summit itself.

The other proposals which the Summit and the other meetings will be looking at are the SAARC Development Fund, which you remember, in the Islamabad Summit, two summits ago, India had committed a hundred million dollars to poverty eradication projects in other countries, none of it to be spent in India but to be spent in the other SAARC countries. Thereafter, I think there was the broader idea of a SAARC Development Fund, to which the other members would contribute. That has been now worked and we are now trying to see whether it will be ripe for a discussion at the Summit. We will see once we go through the various meetings. In the last year, some of the other ideas that we had expressed, that Prime Minister had proposed in Dhaka have actually become reality. One is the establishment of SAARC Disaster Management Centre which has been established in New Delhi in October, 2006. I mentioned the work that has been done on the South Asian University. The Regional Telemedicine Network as well is likely to begin soon. As I said, the Regional Food Bank, which would have food available for emergency supplies so that one does not have to start from zero should, God forbid, there be a disaster.

For the last year or so, we have, in preparation for our Chairmanship, also been trying to organize a series of cultural events. We have had artists from all the SAARC countries in India visit India. An exhibition of their paintings will be shown to the leaders during the Summit. We are also holding a SAARC Cultural Festival of Performing Arts at Siri Fort. I think the public performance is on the 2nd of April. A sort of abridged version of their performance will also be seen by the leaders on the 3rd evening. One of the other proposals for the next year is that we might host a Fusion Music Festival. I believe that is popular throughout the subcontinent, but we will see.

There are other issues which will also come up. One is terrorism because it is something that has affected us and it has affected other members. Sri Lanka has told us very strongly that they intend to raise this. It is something that I think the leaders will have to see how we can carry our cooperation against terrorism forward. There is an existing SAARC Convention on the Suppression of Terrorism. There was an additional protocol done in 2004

about the financing of terrorism, about action against financing of terrorism. We will have to see whether what we have done is sufficient and whether we can do more together to try and fight terrorism because this is an issue that concerns all of us.

We would also like to use this Summit to essentially make SAARC a more efficient organization. It is our view that the time has come for SAARC to move now to a stage of implementation rather than just studying the issues, seeing what is possible. I think we have run through that phase and we think it is time now to start actually implementing many of the ideas that we have had. I think we have all realized now in South Asia that not only are our economies linked but, as Prime Minister says, we have shared destinies, and that this is something that we need to work on together that our prosperity is in a sense common prosperity and cannot be divided. So, we hope to use this Summit to try and work on that theme and to get concrete practical steps which help us forward.

We will also, of course, use the opportunity of the presence of so many Heads of State and Government to do bilateral meetings where we will discuss our bilateral relationships with these countries. Both External Affairs Minister Pranab Mukherjee and Prime Minister Manmohan Singh will be meeting their counterparts separately on the sidelines of the meeting itself.

I will be happy to answer any questions which you might have.

**Question:** You have just talked about connectivity being the theme of this Summit. Since Afghanistan is also going to be here and we have been pursuing the transit route through Pakistan to Afghanistan, will this issue be discussed whether in the bilateral or in the main Summit?

**Foreign Secretary:** I think it is an issue that will be raised in various conversations, both bilaterally in the conversations and certainly we will also raise it in the Summit and we will see what action we can take together. SAARC works on the basis of unanimity. Article 10 of the Charter is quite clear. We will have to see what is possible. But certainly it is an issue that we intend to raise.

**Question:** There has been resistance from Pakistan for so many years....

**Foreign Secretary:** I think you have to ask other people.

**Question:** You talked about terrorism being one of the agenda items in the SAARC Summit. In the light of recent developments in Sri Lanka this week,

how have we reacted to the development of air power by LTTE<sup>1</sup>? What does it mean for other terrorist groups in the subcontinent?

**Foreign Secretary:** I think we are very concerned at the escalation of violence in Sri Lanka in the last few weeks. The incident you mentioned is one of a part of a pattern of escalating violence we have seen. The humanitarian consequences of that really worry us, when we see internally displaced people, over 100,000 of them. We would join our voice with that of all those in Sri Lanka and abroad. We would hope that the violence will come to an end soon and that they can find a solution to this conflict which enables all the communities of Sri Lanka to live together in peace. I think that is really the main thing, to get a solution to the conflict. To pick on individual incidents of violence, I do not think helps to solve the root cause of the problem. The cause of the problem is the conflict which has escalated terribly in the last few weeks and that does cause us great concern.

**Question:** On the issue of Iran and SAARC, what is the status? Have they asked for Observer status or membership? What all is going to be played out in the Summit? What is India's position on either Observer status or membership for Iran in SAARC? Their Foreign Minister has earlier spoken on the issue of ...

**Foreign Secretary:** Iran has applied for Observer status in SAARC formally. I think their application has been circulated to all the member states. Naturally, this will be considered because it is something that everybody will have to agree on. We will consider it in this series of meetings, probably first at the Council of Ministers this time and then at the Summit itself if the Council of Ministers approves of it. So far we have not taken a public position because we are going to be in the Chair to conduct this discussion. So, we do not want to take a position and then we have to as Chair be neutral. But, as India we like the idea actually of more involvement in SAARC by our friend.

**Question:** What kind of intra-regional mechanism are you looking at to combat terrorism of the kind which you see off and on here?

**Foreign Secretary:** I think what SAARC has been looking at so far is legal

---

1. The reference was to the first ever use of aerial bombing operation by the LTTE on March 26 in which it targeted the main military base of the Sri Lankan Air Force on the outskirts of Colombo killing three air force personnel and injuring 16 others. The LTTE aircraft was able to sneak all the way from the jungles of Wani in the North right into the middle of airport and return without being challenged. The aircraft would have flown at least 600 km to and from the base and would have been in the air for nearly two hours.

instruments which enable us to work together. That was what the Convention on Suppression of Terrorism was about. That was what the Additional Protocol for fighting the funding of terrorism, for cutting off funding (was about). We have also looked at some other legal instruments - legal assistance, mutual legal assistance and so on. At one stage it had also been proposed that we might look at extradition arrangements within SAARC. But these are discussions that have not yet resulted in unanimity or in an agreement. Those will go on. We will also I think use the occasion, because this is also a political conversation. So, this is an occasion where I think we will look for ideas. I think different States will come with their own ideas of what might be done and we will see what is feasible. But my point is, at this stage, before the meeting has even happened and people have spoken, all I can say is that we know that this will be one of the issues and it is a big issue.

**Question:** *According to the news emanating from Sri Lanka the radar provided by India to Sri Lanka recently failed to perform.<sup>1</sup> Are the Government of India aware of this? What is GOI reaction to such news?*

**Foreign Secretary:** *As far as we are concerned there is no question of its failing.*

**Question:** Another terrorism question. After the LTTE air strikes, have you spoken to Sri Lanka? Have you expressed concern and assured any kind of help? Also with Bangladesh, India has concerns vis-à-vis terrorism and insurgent camps in Bangladesh? Has Bangladesh said anything to us ever since this new caretaker government has taken over looking at our concerns on terrorism?

**Foreign Secretary:** With Sri Lanka, as I said, we have made it clear to everyone concerned. As I just said to the earlier question, we are very concerned at the escalation of violence. The air strike is one example of that escalation of violence in the Sri Lankan conflict. Certainly, we will remain engaged with everyone, Sri Lankan government and everyone, to see what we can do not just to ameliorate the conditions that have been created by this and the humanitarian effects of this escalation of violence, but also to

---

2. The reference was to Colombo media reports quoting official sources to suggest that the radar provided by India failed to perform at the crucial moment and hence the success of the LTTE. The reports suggested that though Colombo was keen on a Chinese radar and was reportedly negotiating one with Beijing, India insisted on providing one in preference to the Chinese.

see what we can do to help towards a solution of this issue, to encourage the Sri Lankans themselves to find a solution to this issue.

On Bangladesh, this is an ongoing conversation. We will have an opportunity in our bilateral discussions this time to discuss the entire range of our relationship with Bangladesh. Obviously, this is one of the issues which is very important. There are other issues also which we look forward to discussing with the government in Bangladesh.

**Question:** Do you have any details on the South Asian University and the Fusion Music Festival

**Foreign Secretary:** What the Working Group has recommended on the South Asia University is that the Member-States might sign an inter-governmental agreement establishing the university and set up an inter-governmental steering committee to do the detailing of the concept which they have approved. The concept they have described was sort of a university. They would like a university which is among the best in the world, which attracts best students and the best faculty - best students from the South Asia and the best faculty from wherever. What they would like is for this inter-governmental agreement to set up an inter-governmental committee, steering committee, which would then do the detailing like the board, how it will be run, and so on, and establish an autonomous institution like this which could run. So, there is still a lot of work to be done in actually bringing about a university on the ground. But I think what we would hope is if this report is endorsed by the Summit, then there would be a decision in principle by our leaders on the shape and establishment of a South Asia University.

**Question:** Do you expect the seat would be in Delhi?

**Foreign Secretary:** Frankly, that is something they have to decide. I think what the Expert Group has suggested is to start with a few faculties in India somewhere. But we keep open the possibility of Centres of Excellence of other faculties throughout South Asia which could be linked.

**Question:** What will be the bilateral agenda for the meeting between the Prime Ministers of India and Pakistan?

**Foreign Secretary:** The India-Pakistan relationship.

**Question:** Will the Joint Anti-Terror Mechanism be discussed?

**Foreign Secretary:** We will discuss the entire relationship including that. That is one of the mechanisms. We will discuss that as well.

**Question:** Pakistan has been raising the basic issue of definition of terrorism. Do all the SAARC members agree on this issue?

**Foreign Secretary:** The Convention makes it clear, from our point of view, what terrorism is. I think quite frankly, when you see terrorism you know it. I do not think we need to get into a semantic discussion of what terrorism is or is not. I think most people, most reasonable people, when they see terrorism they know what it is. I think more important is that we do something about it. That is the important thing about terrorism that we must stop terrorism and we need to do it together.

**Question:** Do you think the time has come for India to play a more direct role in Sri Lanka's negotiations?

**Foreign Secretary:** I think we hope to use our conversations over the next week or so, as I said earlier, to encourage the Sri Lankans themselves to find solutions to this tragic conflict.

**Question:** You mentioned India's concern over terrorism. How do you see the situation now in Kashmir? What is your understanding of the situation at the Line of Control? Has cross-border terrorism dropped? Have we seen a decline in infiltration in the last couple of months?

**Foreign Secretary:** On the situation in Kashmir, I never comment on India's internal affairs. But on the situation across the Line of Control, infiltration goes up and down depending on the season, depending on various other factors. Cross-border terrorism has continued, sometimes less sometimes more. But over a longer period, if you measure in years rather than days, it is continuing.

**Question:** Have India and Bangladesh agreed to create ...(inaudible).... are some talks are going on in that direction? Whether something is to be finalized in this bilateral meeting?

**Foreign Secretary:** We are still discussing it. There is a forum to make these decisions, which is not really the summit-level meetings, which we hope to convene very soon. But as an issue, we are still discussing it with Bangladesh.

*(Text in italics is translated from Hindi)*

## 177. Conversation of External Affairs Minister Pranab Mukherjee with Editors from SAARC Countries.

**New Delhi, March 29, 2007.**

It is a pleasure for me to have the opportunity of this interaction with you just on the eve of the Fourteenth SAARC Summit. All of you are in the field for quite some time. If I say something about the tremendous influence which the media persons have in creating public opinion on any issue, it will be like carrying coal to Newcastle. Therefore, I am not venturing that. What I want to have through this interaction is to convey the message of the SAARC fraternity, goodwill and the need for strengthening SAARC. You are fully aware of the fact that other regional blocs, especially the European Union, apart from its economic and commercial activities, the tremendous influence it is exerting over the international scenario as a bloc, as an entity, is just remarkable. Cutting across the centuries old disputes, war, fights, struggles, differences just within six decades post-Second World War, it merged as the European Union. It is a landmark not only in the history of Europe but the whole world. I am not going into the historical perspective. I am just emphasizing the emergence of the bloc and how different countries as an entity can play a crucial role in the international arena. Keeping that in view, we the SAARC member countries belonging to same cultural milieu, having the same perceptions perhaps through our interaction and closer cooperation, we can do much more than what we are doing currently. When SAARC began its journey from there, we have covered a long way, but we are yet to cover many more miles and it would be our effort in the current Summit to focus on the issue of our closeness, coming together, connectivity and the need to work in close cooperation. I do feel that if our friends from media can convey that type of message, it would be a very positive contribution from your side. With these words, I welcome you once again. Of course, we will have more opportunities of interaction during the course of the Summit. Thank you very much.

**Question (Mr. Mehabul Alam, *Independent*, Bangladesh):** Sir, we talk of connectivity all the time, how will we achieve it?

**External Affairs Minister:** First of all, we have to recognize the need for it and I am now satisfied that all member countries recognize the need for building up connectivity. Connectivity does not merely include physical connectivity by road links or by rail links or by waterways or by air links but also connectivity by expanding knowledge, trade, experiences and sharing

perceptions. Therefore, our efforts would be to identify the projects through which we will be able to implement these ideas. The ultimate objective should be to have a free flow of not only persons, trade, goods and services but also of ideas so that we can benefit from each others' experiences.

**Question (Mr Bandula Jayasekara, *Daily News*, Sri Lanka):** Sir, we have a lot of ceremonial talks in the SAARC, but in terms of implementation nothing much happens? Is it due to lack of political commitment?

**External Affairs Minister:** I don't say it is due to lack of political commitment but we could not or rather we have not been able to pursue certain issues that we have decided to do. Therefore, emphasis should be on implementation. However good decisions you may take, if it is not properly implemented in time, it loses focus. Keeping that in mind, we will try to see that the decisions we take shall be implemented in letter and spirit and within a specific timeframe.

**Question (Mr Ejaz Haider, *Friday Times*, Pakistan):** Sir, even if you try and keep bilateral issues away from the SAARC forum, it keeps on impinging and keeps nibbling on the edges of SAARC. When you say that decisions are made but not implemented because there are so many examples that once the issue moves away from the SAARC forum, there is a bilateral equation which comes in the way and there is a certain degree of cussedness shown by the states bilaterally which is one thing that casts its shadow on the SAARC? How do you suggest that shadow can be removed?

**External Affairs Minister:** If the bilateral issues shadow the collective decisions taken during the SAARC in proper perspective, then we have to improve the bilateral relations also. Though SAARC charter does not permit to bring any bilateral and contentious issue but I do agree that sometimes the bilateral relations overshadow the collective decisions we take in this forum. But if you have noticed, in the recent years strenuous efforts are made by all SAARC countries to improve the bilateral relationship so it is having some impact. It is not to the extent to make it an ideal situation but things are improving in a major way.

**Question (Mr Ejaz Haider, *Friday Times*, Pakistan):** You are saying that it is the bilateral equation that is impacting the multilateral relation rather than the other way around?

**External Affairs Minister:** No, it's not that. If somebody's presumption is that bilateral relations are shadowing the multilateral relationship within

the SAARC framework, in that context, my response is that we should improve the bilateral relation itself so that it does not effect the decision taken collectively. Secondly, we should also have to keep in mind that when we are taking the decision collectively at the multilateral fora, we are obliged to implement it in letter and spirit. Therefore one is not dependent on the other. Both seem to take place simultaneously.

**Question (Mr Ibrahim Khaleel, Maldives Television):** What are the main obstacles that SAARC faces today?

**External Affairs Minister:** When we started SAARC, it was in a different economic scenario. Essentially, it is for economic cooperation. In the nineties, most of the SAARC countries adopted economic liberalization process. As a consequence to that, what we have noticed is that despite difficulties, the SAARC countries have maintained a steady, sustained, substantial GDP growth over a reasonably long period and it is emerging as one of the fastest growing region in respect of individual member countries and collectively together. Therefore, this is the time to harness it to the fullest extent so that we can have more benefits. For instance, though our international trade in terms of volume and value is increasing, the SAARC inter-regional trade is not expanding very fast. Therefore, these are the areas that we have to take focused action so that we can improve.

**Question (Mr Narayan Wagle, *Kantipur Daily*, Nepal):** What difference can the observers make to this Conference according to you?

**External Affairs Minister:** This is the first time we are having observers and one full member. Afghanistan is the full member, eighth member of the SAARC family and three other observers from the region of Asia which is high growth area. China, Japan and Korea - all three countries are having very high growth. Other two of course are European Union and the United States. From the connectivity point of view, if you just categorize in the map, through Afghanistan, SAARC countries can have a link to Central Asia. Through already existing relations and linkages through India and through Bangladesh, (SAARC countries can have a link) with Myanmar, which is the part of the ASEAN. So we are having physical contact on the one hand with one powerful bloc, ASEAN, and we are also having access to Central Asia and to West Asia. But apart from that physical contact, culturally, we do feel that Afghanistan is a part of the subcontinent. So its membership as the eighth member of SAARC is justified. In addition to that, a stable, prosperous and developed Afghanistan is important for the stability and peace of the region as a whole. With closer interaction with the three countries, powerful

economies of Asia, we also have the European Union and the USA having economic and commercial relations with all the SAARC countries. Therefore these are the ideas which we are having and when the decision was taken by the SAARC leaders in the last summit, it was very wise.

**Question (Mr Rinzig Wangchuk, Kuensel, Bhutan):** India is a major global player, how will it help SAARC move forward ?

**External Affairs Minister:** India will play its own role as a large country within the SAARC family and that in our different actions, different programmes we will do it. What we do believe, and we have articulated in earlier occasions also, that it is not necessary that we should emphasize on reciprocity. Many of the decisions which we can afford, we can have it unilaterally. And surely, we would like to play that role in the coming years to ensure that SAARC becomes a prosperous bloc as such .

**Question (Ms Farida Nekzad, Pajwhok Afghan News Agency, Afghanistan):** Do you think by this Summit, when Afghanistan has become the eighth member of SAARC, the transit problem will be solved....(inaudible)... ?

**External Affairs Minister:** Of course, currently we are having limited access. The current arrangement with Afghanistan is that we are having transit through sea port via Pakistan, through Karachi. Now if we have the transit through road also, then through Afghanistan we can have straight linkage to Central Asia. Therefore, the connectivity would be much more expanded and these are the opportunities which will be open to us, and it is for us to decide whether we take this opportunity or advantage or not.

**Question (Mr Bandula Jayasekara, Daily News, Sri Lanka):** SAARC countries have signed many Conventions on formation of Anti Terror Mechanism, but nothing is happening. There is no practical movement?

**External Affairs Minister:** Many of the decisions that we have taken which are yet to be implemented, they should be fully implemented. Decision taking is not adequate unless you implement it in letter and spirit.

**Question (Mr Bandula Jayasekara, Daily News, Sri Lanka):** What Sri Lanka has faced last week, don't you think it is vital and important to take steps soon?

**External Affairs Minister:** These problems are not merely related to this region. Today, of course, you are talking of terrorism because you are the

victims of terrorism for quite some time and in my own Parliament, in response to a question I replied that we have lost more number of civilian people (to terrorism) compared to what we have lost in the declared wars after independence. Therefore, we are fully aware of this problem. After 9/11 it has spread all over the world and today in the post cold war era, terrorism is the biggest menace to world peace and tranquility. It is not only a threat to the SAARC but the entire international community and the entire international community has to assert and fight this menace which is the biggest threat to peace and tranquility of the world.

**Question (Mr Ibrahim Khaleel, Maldives):** Do you think the benefits of SAARC can be shared equally?

**External Affairs Minister:** Not in volumes, but the benefits of policies, cooperation can be extended to you and it will depend on the absorption capacity of the country concerned, to what extent they are willing to absorb. What is the requirement? What is required for me, for instance, to ensure food security? The quantum of India's food requirement cannot be matched with the food requirement of Maldives. It depends on its own requirement, on its own absorption capacity. Just giving you an instance, it is one of the objectives of SAARC to have food security for the entire region. That's why the food bank, concept of food bank was there and perhaps with the approval of the SAARC Council of Minister we are going to have it. Every country big or small has equal right, equal voice as per the international practice. Therefore, every decision in SAARC is taken by the consensus, not by majority or minority. So here, every country enjoys absolutely equal footing, equal status.

**Question (Mr Ejaz Haider, *Friday Times*, Pakistan):** My understanding is that Pakistan is not willing to give overland transit facility to India. Is there any advancement on that?

**External Affairs Minister:** Let us discuss, let us find out if there is any difficulty and let us remove. After all, we have to proceed on the basis of discussions and planning. There is no other way. However strenuous it may be, we shall have to pursue that path.

**Question (Mr Narayan Wagle, *Kantipur Daily*, Nepal):** Is India interested in helping countries in the neighborhood?

**External Affairs Minister:** We have to live with our neighbors. You cannot change your neighbors, perhaps you can change your friends or make or

unmake your friends, but you cannot change your neighbors. Therefore it is desirable that we must have a peaceful and stable neighborhood. If there would be no peace and stability in the neighborhood, all of us, and India is the country which is having borders with almost all the SAARC countries. Therefore we would like to have peaceful, stable neighbors and in our own way, without interfering, try and have peace and stability in the region.

**Question (Mr Bandula Jayasekara, *Daily News, Sri Lanka*):** What is your expectation from the 14th SAARC Summit?

**External Affairs Minister:** I am a born optimist and from my own experiences I can share with you, I chaired the SAARC council of Ministers in 1995 being a Foreign Minister and what I find that when I take stock of the situation, the development of 11 years, from 1995 till today, I find reasons to be optimistic .

**Question (Ms Farida Nekzad, *Pajwhok Afghan News Agency, Afghanistan*):** Will there be further extension of SAARC? Will China join the grouping?

**External Affairs Minister:** China is an observer, as I mentioned China, Japan and South Korea are observers apart from the European Union, but membership of Afghanistan was considered directly because of the geographical proximity and continuity and also because of cultural and civilizational links with large number of SAARC countries. So far as development is concerned, I do feel that Afghanistan is beneficiary partner country and it will be our efforts to see that every country takes benefit and advantage from our joint efforts.

**Question (Mr Narayan Wagle, *Kantipur Daily, Nepal*):** How do you visualize the SAARC process in the next decade?

**External Affairs Minister:** This is the right moment when we can have a quantum jump in the development in our progress. Because as I mentioned earlier, over a reasonably long period which you can describe as sustainable development in terms of the GDP of all the SAARC countries, we are all having the benefit of cooperation I can just give you one example, between India and Bhutan, we are having power projects, hydel power projects in Bhutan, and we are meeting our energy requirements and Bhutan is also having the benefit for its overall development because of the massive investment. It is just one example, examples can be multiplied. Similarly, the free trade agreement between Sri Lanka and India is also beneficial for

both these countries, we will have these arrangements and why I am talking about this decade is important because if becomes really the century of Asia we are an important component of that Asian economy and it is fastest growing economy. Over the years it has sustained its economic development. We have all the abilities, market, talent, natural resources and we can develop it in its proper form and use it. I am quite confident that SAARC has a very bright prospect and with this note perhaps we can end.

Thank you very much.

### **178. Media Briefing by Official Spokesperson on the meeting of the SAARC Programming Committee.**

**New Delhi, March 30, 2007.**

**Official Spokesperson (Shri Navtej Sarna):** I am sorry I delayed coming here but I was trying to actually get you something concrete to see if the Programming Committee would finish its work and then we could discuss, but I think the work is still carrying on. But I will give you a sense of what has happened so far, although, since the report is not finalized, it is a kind of work in progress update I am giving you.

The 29th Session of the Programming Committee began this morning. All the Member States are participating in the Programming Committee. The delegation from Afghanistan is attending as a special invitee. The proceedings were begun by the Leader of the Delegation of Bangladesh, the Chairman till now. He is Mr. Masud Bin Momen, Director-General SAARC (Ministry of Foreign Affairs, Bangladesh). He was in his capacity as the current Chairperson of the Programming Committee. After all the procedure of adopting the agenda, etc., they elected the new Chairperson who, in accordance with the SAARC practice will be the Joint Secretary dealing with SAARC in the Ministry of External Affairs of India, Mrs. Preeti Saran. She has been elected as the Chairperson of the 29th Session and she has been conducting the proceedings of the meeting in that capacity.

In terms of the work of the Programming Committee, in accordance with its functioning mandate it has essentially been reviewing the progress of various bodies - working groups of the SAARC process - and is preparing a report which they will now put up for the consideration of the Standing Committee which begins tomorrow morning.

Some of the things which they have covered include consideration of various reports, for instance, report of the Second Meeting of the Working Group on Biotechnology, report of the Third Meeting of the Working Group on Energy, reports of various governing boards of SAARC Regional Centres which include the SAARC Human Resource Development Centre in Islamabad, the SAARC Documentation Centre in Delhi, the SAARC Tuberculosis and HIV AIDS Centre in Kathmandu, and SAARC Information Centre, Kathmandu. They also considered the report of the Expert Group meeting on the establishment of SAARC Forestry Centre as well as SAARC Coordination Centre for Disease Surveillance. They considered the report of - the other issue which you have been hearing a fair amount of - the meeting of the Expert Group of SAARC Telemedicine Project.

As you know, we have just some background here. Every member country has the idea of proposing two hospitals which will be connected with super specialty hospitals in India with tele-links, and India will provide the infrastructure and the equipment. The project naturally envisages connectivity through satellite so that the entire regional network is covered. This was considered and various delegations gave the names of those hospitals. Those who have not given are in the process of giving.

They also considered the report of the Expert Group which has been set up to finalise the modalities for establishing the SAARC Museum of Textiles and Handicrafts. From its temporary venue at the Crafts Museum, Pragati Maidan, New Delhi, this museum will begin its activities with an exhibition-cum-sale of handicrafts from SAARC countries in November, 2007. Further meetings probably will be needed to work out the details of the permanent premises of the museum. They also considered the report of the Expert Group meeting to finalise the modalities for establishing the South Asian University. India's proposal for setting up such a university, as you would recall goes back to Prime Minister's statement at the 13th SAARC Summit in Dhaka, was warmly appreciated by the Programming Committee. Of course, I think you already have a lot of details about this concept. But, if somebody needs reiteration, I can say this is going to be envisaged as a center for higher education and human resource development and as a center of excellence for higher learning in all the aspects. The modalities, which will form part of an inter-governmental agreement, are what would be under discussion even as we speak.

They also discussed issues relating to the upgradation of the infrastructure of the SAARC Secretariat. The Programming Committee, I understand,

was appreciative of India's proposal to extend assistance of 25 million Indian Rupees for the purpose of renovation and upgradation of existing conference facilities in Kathmandu in SAARC Secretariat.

They, obviously are also now discussing the calendar of activities which then they will propose to the Standing Committee and so on. So, it is a fairly wide-ranging meeting which is actually preparing the groundwork for the meetings that are going to follow in the next four days. This is I think the sense, more or less, of what has been going on through the day. As I said, the work is still going on. So, we do not know when they will finish but they should finish it today.

**Question:** Apart from Iran, are there any other applications for Observer status?

**Official Spokesperson:** Actually, that was not an issue which is discussed in the Programming Committee. I do not have any information on that. That is an issue which will probably come up in the Standing Committee.

**Question:** Can we have any statistics on the trade front that would reflect on such cooperation in regional trade?

**Official Spokesperson:** I think a very detailed briefing was given on this issue. I do not think you were there. So, I would advise you to just check out the (MEA) website. A very detailed briefing was given by the Foreign Secretary particularly focusing on the economic things and what we are looking forward to including the SAFTA issues. As you know, the intra-regional trade within SAARC countries forms, I think, only three or four per cent of their total trade. There is tremendous potential for increasing this. That is why one of the aspects of the main theme of connectivity that we hope this Summit will focus on does remain economic connectivity.

**Question:** Can you tell us about your briefings here (in the next few days)?

**Official Spokesperson:** We would propose to have a briefing every evening. The timings would be again subject to (a) who is doing it, and (b) when the work finishes. So, it will have to be a little flexible. But I think this is the time that you should be looking for. I would request you to sort of drop in here in the afternoon or whenever you feel like and we will keep you informed. I think tomorrow's briefing might be a little later than this.

**Question:** Today's meeting would be the basis for the Ministerial meeting

or the SAARC Summit. So, to what extent do you find agreement among the various participants?

**Official Spokesperson:** The work is still going on. Today's meeting will actually lead up to the Standing Committee meeting tomorrow which is not at Ministerial level but at the Foreign Secretaries level. So, this is the Programming Committee which will now reach its conclusions and they will submit their report. It would not be correct for me to get into more details than that.

Thank you.

### **179. Media Briefing by Foreign Secretary Shivshankar Menon on the meeting of SAARC Standing Committee.**

**New Delhi, March 31, 2007.**

**Foreign Secretary (Shri Shivshankar Menon):** Good evening, ladies and gentlemen. We thought we might brief you on what has happened yesterday and today.

As you know, we had the Programming Committee meeting yesterday, and today morning we started the Standing Committee meeting of Foreign Secretaries of the SAARC countries. Both have been very productive meetings, very smooth, very cordial.

The Programming Committee yesterday agreed upon the calendar activities that will be undertaken. There was a general feeling I think in both meetings, yesterday and today, that we need to rationalize the activities of SAARC and to make it more efficient and I think that is what they have done by agreeing on a set of activities. Some of the more notable things that we have mentioned are: in 2007, in the year that comes, we will be hosting a SAARC Cultural Festival in India in November later this year. There will also be the first exhibition-cum-sale of regional handicrafts and textiles in the SAARC Museum of Textiles and Handicrafts. Some member-countries have also identified two super specialty hospitals each, which are to be linked. That project of telemedicine will be started in the next quarter.

The Car Rally will be reaching Delhi tomorrow after having been flagged off in Cox's Bazar on 15th of March and had a very successful and popular

run through many of our countries. We will also be hosting the second meeting of the Inter-Governmental Committee on Transport back to back with the Transport Ministers' Meeting later in the year. There will be a Conference on micro financing for women and home-based workers which we will host. We will also host in India in the next year a task force to discuss trafficking in women and children to see what we can do to oppose it.

The Programming Committee having agreed the Calendar of Events for 2007 and onwards, we then today met in the Standing Committee where we considered a substantial agenda and the reports of various other meetings that have happened so far. There are three or four things that I think might be worth highlighting. The Committee still has not finished its work. It will meet again tomorrow morning, will meet through the day tomorrow. So, what we will probably do is to brief you at the end of the day tomorrow about the work of the Standing Committee in detail.

As of now, this morning the Secretary-General presented his analytical report on the work of the Secretariat and the work of SAARC. He also reviewed what had been done by SAARC since the 13th Summit in Dhaka last year and spoke about what we would like SAARC to do in times to come. One theme, as I said to you, that ran through most of the statements was the need to rationalize SAARC's work and to make sure that SAARC moved from a declaratory phase to an implementation phase. I think we showed our keenness to do that, to make SAARC more efficient, I think in the way that we did our work today.

The one issue which was not on the agenda but was taken up under 'any other items' was Iran's application for Observer status in SAARC. The Committee decided unanimously to recommend to the Council of Ministers and to the Summit that the application be accepted. This is something that the Summit will have to take a decision on. But it went forward with a positive recommendation from the Committee.

We discussed several ideas which are now ripe or near fruition. The South Asia University for instance, which you would remember, had been suggested last year at Dhaka. There have been Expert Group meetings since. We are now working on an inter-governmental agreement that would enable us to move towards implementation of that concept.

The idea of a Regional Food Bank which would enable us to respond quickly when there is a need, whether due to natural disasters or for other reasons,

also seems ripe for an agreement. So, we are working on that right now. There was a general discussion of connectivity, of how to operationalise the SAARC Development Fund, and of other ideas to try, as I said, the thrust of all these discussions to make SAARC a practical instrument of achieving common prosperity in the region and to see what we could do to do that together.

As I said earlier, discussions were cordial, productive and very forward-looking. For the present, I think that is about all because, as I said, the Committee has not finished its work. We will have to work through tomorrow. At the end of it we would be happy to brief you.

I would be happy to answer any questions that you might have.

**Question:** Can you tell us something about what the negotiations on the SAARC Development Fund? You mentioned it in your previous briefing also. Is that also likely to be agreed upon during this meeting or will that take some more time? Secondly, will this inter-governmental Committee or inter-governmental agreement on the SAARC University be signed this time?

**Foreign Secretary:** As I said, we are close to finalizing the inter-governmental agreement on the South Asia University and we hope to do it in the next few days. That I think is everybody's attempt because everybody wants this done. But we have to do the last minute cleaning up of the text and that is what we are trying to do over the next two or three days.

On the SDF, on the Fund, I think there is clear understanding on the need to operationalise it, especially to get it to fund poverty alleviation projects in the region. You would remember that at the Islamabad Summit in 2004 we had offered 100 million dollars for poverty alleviation projects in other SAARC countries, not in India itself. Thereafter, there had been a series of meetings and there was an agreement on a scale of assessment among the SAARC countries so that we would end up with this 100 million dollars and a total fund of about 300 million dollars which would be available for not just poverty alleviation but to social sector projects as a whole. What we are now doing is, we are discussing really how to structure the fund, how to ensure that it is able to carry out the functions that we would like it to. So, that is really what the discussion is about, it is about the modalities. I hope we can do it. I am constant optimist. I keep hoping that we can do it in the next two or three days. But certainly, I think we are all determined to operationalise it as soon as possible.

**Question:** You said that you want to move from declaratory phase to implementation phase. In this context, have you taken up the issue of SAFTA? It is not yet implemented. Have you discussed this issue today?

**Foreign Secretary:** We discussed SAFTA and we intend to continue discussing it. To be accurate, it has been implemented by most of us for each other. The fact is that SAFTA is in operation for most of the members of the SAARC, for the overwhelming majority of SAARC. I think there is only one member who is not actually implementing it and again only for one other member, for us, for India. That is a problem we will address. We will discuss and we will try and solve that.

**Question:** What was their response in the meeting today?

**Foreign Secretary:** Today in the meeting I think everybody said that they were committed to SAFTA and they look forward to implementing it. In fact, there was discussion also taking SAFTA to the next level, which would be to look at free trade in services, to see whether there was a need for that. Today it is for goods and for a certain specified list of goods. So, the idea was to see how we could improve on this.

**Question:** Would you be at liberty to disclose the location of the South Asian University?

**Foreign Secretary:** We are still talking about it. The idea from the Working Group was that we would start in India but we would keep open the possibilities of campuses in all the other countries. What we would do is we would look at centers of excellence in particular fields and depending on what countries feel that they can do. So, as I said, at this stage what we have is an agreement that would enable us to establish an inter-governmental Committee to do the detailing. I think the ultimate idea of course is to produce an outstanding and world-class university, which would be one of the best in the world, which would cover all range of activities. But I think we will start small and then grow but ensure that we have quality. I think that is the basic idea behind the University.

**Question:** Could you give us an idea of what kind of role Observers will be playing, particularly in sectors of trade and terrorism? Is there any move from their side - some idea or proposal? Particularly I would like to know about China.

**Foreign Secretary:** I think when the decision is taken to have Observers in SAARC, they have also decided how they would associate them in the

working of the Summit and that they would, if represented at the Ministerial level, address the Summit. Also, I think the idea was to enable us to work out cooperation and arrangements between SAARC and the various Observers. That is something that we will have to do after the Summit. This is the first Summit where they will be coming as Observers. Thereafter, we look forward to working our programmes of cooperation with them, whether trade, whether counter-terrorism, whether any of the many subjects that SAARC covers because SAARC covers a whole range of sectors - social sectors, economic sectors. If you look at the list of the meetings for instance, you will see. I think we are open to cooperating with the Observers in all these sectors. But, as I said, it is a bit premature right now. This is the first Summit they are coming to. They will attend the Summit, and then we will work out methods of cooperation with each of them.

**Question:** Did you discuss any possibility of cooperation in telecommunications sector because nowadays among the SAARC countries they are still very high as compared to Europe and other countries?

**Foreign Secretary:** There was a suggestion actually that we should lower the tariffs among ourselves. I think some of us have quite low tariffs domestically but our international tariffs are perhaps higher. There was also a suggestion that we need to improve connectivity in terms of air links, direct air links, and so on among ourselves. This is something that for us is very important, I think, the idea of connectivity being improved by SAARC throughout the region. And, we would certainly encourage ideas like that.

**Question:** This is regarding the study that was conducted on transport connectivity in the region. Any project that you think there would be a discussion on?

**Foreign Secretary:** There was agreement that this Inter-Regional Multi-Modal Transport Study would be extended to Afghanistan as well. I think the basic idea is everybody was supportive and this is why we will now be having the Inter-Governmental Committee on Transport Meeting in the next six months. I think of the various projects that have been identified in the study, you would see three levels of sort of implementation. Some would be national, some you could do yourself in your own country; some would be bilateral, between countries; and some would be regional. So, I think what now remains is really to do that, to sort them into those that we will implement ourselves; those that any two countries would implement bilaterally; or in sub-regional context - three, four; and those which need regional work together. Some are clear. Things like motor vehicles event

and so on would logically be regional. But there are other things like customs stations that would be bilateral. I think that is the part that will now be done. But everybody was supportive of the study and welcomed what it had done.

**Question:** Just a few days before SAARC, both India and Pakistan have tested missiles. Are these fireworks really necessary for a meeting like SAARC?

**Foreign Secretary:** We both informed each other beforehand. When we test, we test for our own reasons, just as, I am sure, Pakistan tests for her own reasons. We would not have tested if we did not think the reasons were valid.

**Question:** There has been a report from the US that the FBI has picked up two Indians on suspicion of exporting various dual-use items to ISRO and a couple of other Indian companies. Apparently somebody in the Indian Embassy has also been named. Do you have any reaction to this?

**Foreign Secretary:** We are looking into the allegations. As soon as we have something for you, we will let you know. As of now, that is all. There are allegations, we are looking into them.

**Question:** This is regarding Sri Lanka. How would India be looking at it, if Sri Lanka raises this issue of ethnic violence in that country? Will India look at it as terrorism? Will it be discussed as terrorism at this forum?

**Foreign Secretary:** The issue that Sri Lanka raised today in the Standing Committee was terrorism. What she raised was joint action against terrorism, the need for the world to condemn it, and the need for SAARC to implement the various legal instruments such as the Convention on Suppression of Terrorism that we have already entered into. I think that is what Sri Lanka stressed. As I said, we are still continuing our discussion. I think we will be discussing that tomorrow when we come to it.

Thank you.

## **180. Media Briefing by Foreign Secretary Shivshankar Menon on the meeting of the SAARC Standing Committee.**

**New Delhi, April 1, 2007.**

**Foreign Secretary (Shri Shivshankar Menon):** Good evening, ladies and gentlemen. I thought I would come and tell you what the Standing Committee did today. We had a very satisfactory and productive morning, adopted our report, finished our work by lunchtime, which shows you how efficient we are. Quite frankly, most of the things I mentioned yesterday, I think, those were brought to fruition in various ways. We used the afternoon to do some other work to look at the agreements. I am happy to tell you that we have made considerably progress in having a clean text of the inter-governmental agreement on the South Asian University. It is nearly finalized and we will now have to do one last check of that. We have the text of an agreement on the Regional Food Bank, which you remember I mentioned to you yesterday. We also, this morning, went around the room and each country pledged amounts to SAARC activity over and above its assessed contribution. You all know, the assessed contribution is what we have to make. It is part of our obligation. But above that each of us normally does something. India quadrupled her pledge to a Rs. 100 million in the next year, 2007-08 towards SAARC activities. Each of the countries did its pledging. What I thought I would do is I will give you maybe the highlights of what are in the Report of the Standing Committee which will now go to the Council of Ministers tomorrow. The Standing Committee, of course, was very happy at the successful organization of the first ever SAARC Car Rally, which you know has now reached New Delhi. We reviewed the work of SAFTA, which the Committee felt is one of the most successful outcomes of our collective efforts and were trying for early and full implementation of SAFTA. We have agreed that we will work towards that.

We looked at the Draft SAARC Agreement on Promotion and Protection of Investment which is still hanging fire and will need a little more work by all of us. We were also very happy to note that several agreements, trade facilitation agreements, have been undertaken since the Thirteenth Summit in Dhaka in November, 2005. These included an Agreement on Assistance in Customs Matters; an Agreement on Avoidance of Double Taxation, which has come into force in December last year, and an Agreement for the establishment of the SAARC Arbitration Council. The Committee also welcomed the offer from Pakistan to host the SAARC Arbitration Council. Among other trade facilitation measures, Sri Lanka offered to host the 8th

SAARC Trade Fair in Colombo in early 2005 and we accepted that with gratitude.

We also looked at the SAARC Development Fund and felt it was important to operationalise it as soon as possible, especially the social window which you know is the portion of the fund that will be devoted to poverty alleviation. We mandated the inter-governmental meeting to finalise the text, as soon as possible, of the agreement on the SAARC Development Fund. We will also look separately at operationalising the social window if we can.

The other issue which was discussed both yesterday and today was, of course, terrorism.. We are recommending to the Council and to the Summit a very strong statement not only of implementation of what we have already agreed but to see what further action we in the sub-region can take against terrorism. On transport, as I mentioned yesterday, it was decided to extend the regional study, Multi-Modal Transport System Study, to include Afghanistan. We also decided on a set of other measures we might take and felt that steps are possible at several levels - at national level, bilateral level, some sub-regional - two-three countries - and regional and listed these for implementation in the near future.

Lastly, again as I mentioned to you yesterday, the Committee today formally decided to welcome the Iranian interest in Observer status in SAARC and recommended its approval to the Council of Ministers. So, we had a very successful, smooth and quick meeting of the Standing Committee this morning where we approved our report, we have completed what we were asked to do. We now move to the Council of Ministers tomorrow. There will be a social event this evening when the External Affairs Minister I think hosts the other SAARC Foreign Ministers to dinner. Then tomorrow morning we will start the formal session of the Council of Ministers. As part of our effort to rationalize and make our work more efficient, it is going to be a one-day Council of Ministers meeting. We hope to conclude the meeting by tomorrow evening. We will come and tell you about it tomorrow evening about what happens in that meeting.

That is really all I have for you. If there are any questions, I will be happy to answer.

**Question:** The Standing Committee is supposed to review the implementation of the past decisions of the Summit. You have said with regard to SAFTA that the member-countries are trying to implement the agreement. What exactly is the situation? According to some reports, and

even the official report, it has come into force from July 1 and it has still to be implemented. What exactly is the situation?

**Foreign Secretary:** I think the actual situation is that SAFTA has been operationalised as of 1st of July last year. If you ask the countries concerned, everybody will tell you that they are implementing SAFTA. There is a difference of opinion in the case of one country which has a positive list system rather than the MFN system on which the rest of SAFTA is based. That is an issue that we will have to work our way through.

**Question:** You have mentioned this very strong statement that you would like to see ..(inaudible)... how the action against terrorism. Can you tell us from your point of view or among the participants, what sort of ideas or concrete measures are being floated on that?

**Foreign Secretary:** I think we are still discussing this. I think it might be best if we went into the concrete specifics at the end of the Summit because this is a process. We have discussed the issue here, we have discussed it yesterday and today, we will discuss it in the Council of Ministers tomorrow and we will ultimately be discussing it in the Summit. So, I think it is best if we get into the specifics at that stage.

**Question:** Would you say that one of the specifics was replicating the Indo-Pak Joint Mechanism experience on a broader scale with SAARC in total? Also, could you give some more details about the Multi-Modal Transport Study which includes Afghanistan?

**Foreign Secretary:** I think the study was actually done with help from the ADB, carried out by SAARC Secretariat. That came up with a series of recommendations where actions could be taken at different levels, as I said, national, bilateral, sub-regional; and priorities them. But this included various forms of transport. When I say multi-modal, it included road, rail and various things. When the study was done Afghanistan was not a member of SAARC. The idea is now to extend it to include Afghanistan and to see what other steps we could take, and to generate specific projects that we will undertake at these various levels, (for) each of us. We welcomed the study, the results that we had so far and we would like to see more of it. So, I think it is a part SAARC's effort to improve connectivity within the region which is so important to our development.

About the specifics of what we might do to counter terrorism, every possibility is open. It is for every country to suggest what it thinks is needed. We will

happily I think look at these ideas. Any idea that helps to counter terrorism, that helps us to eliminate terrorism I think should be welcomed.

**Question:** You just said that that you have finalized the proposal for a South Asia University. Can you tell us little more details? You said you have finalized it and you are giving it to the Council of Ministers tomorrow. Is there something on the location or whether some of the chapters of the University would be spread among the other countries and something like that?

**Foreign Secretary:** What I said was that we had almost finalized the text of the inter-governmental agreement on the South Asia University. That was the work that was done today. We went through the actual text, cleaned up the text and made sure that we all are agreed on the same set of words. On the South Asia University itself, the proposal that is before us in SAARC at these various meetings is the proposal from the Expert Groups from the Vice-Chancellors who met, who produced a concept paper, who suggested an agreement to us. That proposal is to start with a university with certain post-graduate faculties in India and then to expand until we have a University which would also have faculties in other countries in South Asia, each one depending on what they are best at and that we would try and build a University which would be among the best in the world, a world-class university in these faculties. I think that is the goal and that is the attempt. I find that there is a lot of speculation about where the University will be, which city, which place. Frankly, none of that has been actually decided yet. We will have to see as we come. I think we would be guided in this whole process of detailing the concept and actually bringing about the University by the function of this University, as I said, by the goal of creating one of the best universities in the world.

**Question:** You have used the words 'near future' for quite a few measures, basically poverty alleviation... Do you have any time limit?

**Foreign Secretary:** The time is in present continuous. I cannot define exact timeframe for all these things. I am afraid not.

**Question:** You said India quadrupled her contribution to SAARC. What about other member-countries? Have they also hiked their contribution? Secondly, in SAARC did you discuss, identify some issues on which SAARC members can cooperate at multilateral fora, on issues like UN reform or trade negotiations, how to improve the bargaining position of SAARC?

**Foreign Secretary:** Yes, other countries also increased their pledges to SAARC. I expect that this will continue to grow. The reason I cannot give

you the total figures is that each one of us expressed it in our national currencies. So, (it) becomes a bit difficult to convert it into one total figure for everyone. About global issues and coordination in our position, this is something that is normally done at the Council of Ministers level. We discuss it informally among the Foreign Secretaries actually but it is something that is normally done then, and also when the Ministers meet on the sidelines of the General Assembly every year. So, I cannot give you a definite list of all the things but we do make an attempt to coordinate positions on global issues. Things like WTO, for instance, we do discuss among ourselves whenever we get a chance.

**Question:** Mr. Secretary, when you pick up the question of Iran in the fold of SAARC, did you also take into view the positions that Iran and America have taken on account of Iranian nuclear programme, and was the decision unanimous?

**Foreign Secretary:** I think I mentioned yesterday that when the suggestion came it was unanimously welcomed and decided to recommend it. SAARC by definition, Article 10, excludes bilateral and contentious issues from what it does. So, I hope that answers your questions.

**Question:** In your discussion on terrorism, can you give us a flavour of the discussion - what did India say, what did Sri Lanka say, what did Bangladesh say, what did Pakistan say?

**Foreign Secretary:** I cannot.

**Question:** I have a 20 year long question. We have not had a visit of an Indian Prime Minister for the last 20 years. We are talking of regional cooperation in SAARC. When will this happen?

**Foreign Secretary:** I suggest you ask the Prime Minister but the fact is that actually an Indian Prime Minister had visited Sri Lanka in 1998, as you and I know. We also had visits before that by Indian Prime Ministers. Certainly we are looking at it and we hope it will happen soon.

**Question:** My question is on the issue of multi-modal transport or the connectivity as the thing of the SAARC Summit. How are you actually accommodating the bilateral transit facility and the SAARC regional connectivity? There are some differences between the states on the bilateral transit. How are you actually coordinating on this?

**Foreign Secretary:** This is why I said that when we did the multi-modal

transport study, I think we agreed on a set of measures that could be taken. That includes some steps which are actually national steps. For instance, improving land customs station. This is something that each country does for itself. So, it is a national step. There are some steps which are bilateral. If you are building a road, you might as well make sure that it is aligned with the road on the other side. There is some coordination required. Some are bilateral. Some are sub-regional, if it comes to transit between three countries. The question that you mentioned does not necessarily involve everybody at the same time, maybe not the whole region. But there are also issues that affect the whole region. The more we want to connect the region, it makes sense to do things like regional transport arrangements and so on so that it becomes easy for vehicles to move throughout the region. So, we are looking at it at all these levels. I think each country will do what it can depending on its level of comfort. I think that is the way we move it forward. I think the fact is that all the countries are convinced with the utility of connectivity. We will look at the specifics in each case and we will try and move it along whether bilaterally or nationally or sub-regionally or regionally.

**Question:** Will there be any bilateral agreements signed during the Summit at all? You have referred to the University and said that still some work needs to be done. So, apart from the Declaration, will there be any agreements at all? If there are not, do not you think it is a rather thin agenda?

**Foreign Secretary:** I am trying hard not to predict what we are going to be doing three days from now. But I am trying to give you a flavour of what is possible at this stage. And at this stage I do not think I should even say more than that because frankly there is still the Council of Ministers to come, there is the Summit to come. We will keep working at these issues right through.

**Question:** While Car Rally is zipping across South Asia with great fanfare, a poor cycle meaning well for India and Pakistan was stopped at the border without a visa. What kind of message is this sending to SAARC countries?

**Foreign Secretary:** You are asking me? Well, I think we have always made it clear that we would like as free and open a travel regime in South Asia as is possible, and we will work with our partners in South Asia to realize that. It does not exist yet, that is true. You are absolutely right. But we will do whatever we can to make it possible.

## **181. Media Briefing by Foreign Secretary Shivshankar Menon on the meeting of the SAARC Council of Ministers.**

**New Delhi, April 2, 2007.**

**Foreign Secretary (Shri Shivshankar Menon):** Good evening, ladies and gentlemen. We have had a busy day today. We had a very smooth, productive and cordial Council of Ministers meeting. They just finished their work. They have adopted their report.

The Council met, first the Ministers met informally early in the morning, then came into the formal session and went through the items on their agenda which you have with you. Today afternoon, at five o'clock they just finished their work, they adopted their report. One thing that should interest you, they decided that fifty journalists from each country will be given SAARC stickers and visas. So, that at least should interest you directly. I knew that would put you in a good mood<sup>1</sup>.

For the rest, they went through the agenda. Most of the agenda I think you will notice is items that they have prepared or recommended for the Summit meetings tomorrow and day after. They recommended the acceptance of the application from Iran for Observer status for instance.

They also discussed in some detail the operationalisation of the SAARC Development Fund. This was something that had not been finished by the expert level meetings earlier. They came to some clear conclusions on how it should be done, namely, that the SDF and its decision-making structures would be the exclusive domain of the SAARC member states, and that the Fund should start its work with the funds that have already been mobilized. As you know, we had committed a 100 million and others have also committed and totally there is about 300 million committed which has already been mobilized, and that the governance of the Fund would be in accordance with the principles in the Charter, and also that there is a need to mobilize funds outside the region, and that SDF would do so, and would work really through three separate windows - a soft window for poverty alleviation for social projects, there would be other windows which would

---

1. On the same day the External Affairs Minister Pranab Mukherjee addressing the meeting of the South Asia Free Media Association hinted at removal of irritants to free movement of media persons and products across South Asia. Though he did not elaborate on this what he said was: "probably, you will have not much to complain about when you meet next." He prefaced his remarks saying "We must encourage free movement of media products and personnel."

be commercial windows, for instance, for projects for infrastructure development, for other developmental works. So, it is our expectation that by the time we get to the next Council of Ministers in November, we would have the work done now that this Council has given us very clear directives on how to operationalise and what to do. I think that is a big step forward.

Apart from the Council of Ministers meeting today, there have been a series of bilateral meetings as well. In the last two days, External Affairs Minister Pranab Mukherjee met with Foreign Minister Kasuri in the afternoon. He also went to the SAFMA meeting where I think many of you heard what he had to say. In his meeting with the Pakistan Foreign Minister Kasuri, they reviewed bilateral relations, they looked at how we could take the relationship forward, they discussed Siachen, Sir Creek in some detail. Both were optimistic and looked forward to the talks between the Defence Secretaries which will take place in Islamabad from the 6th of April on Siachen and Sir Creek. On Sir Creek they noted that we completed the Joint Survey, that we have, therefore, one common map of the area from which we will now work and try to see how far we can take this issue to a resolution hopefully.

Yesterday evening External Affairs Minister Mukherjee met with the Sri Lankan Foreign Minister Bogollagama where they discussed the developments in Sri Lanka. External Affairs Minister reiterated India's approach that the conflict in Sri Lanka requires a peaceful negotiated settlement within the framework of a united Sri Lanka in which all the communities will feel comfortable. They discussed the ideas of devolution of powers within Sri Lanka. The Sri Lankan Foreign Minister informed him of developments, political developments within Sri Lanka. Minister Mukherjee also raised the issue of firing at our fishermen in the Palk Straits which, as you know, is sensitive. The Sri Lankan Foreign Minister informed him that no Sri Lankan Navy vessels had been nearby. They also discussed what we could do to prevent any such incidents in the future and to make sure that this does not happen<sup>2</sup>.

- 
2. The same day the Sri Lankan Foreign Minister confirmed at a press conference separately that "there is no difference of opinion between New Delhi and Colombo on a negotiated settlement of the ethnic question in Sri Lanka." He said Sri Lanka was evolving a "home gown model" to resolve the ethnic issue. He said the government hoped to present proposals by mid-April. Asked whether the proposals would be unitary or federal, he said the "contents" and not the "label" was important. The Sri Lanka Foreign Secretary earlier told the media that every South Asian country was affected by terrorism at one time or the other. SAARC was the "correct vehicle" to undertake counter-terrorism operations in the region. The obligations under the SAARC had not been translated into law enforcement action by the grouping.

Day before yesterday External Affairs Minister Mukherjee met with the Bangladesh Foreign Minister where again the Minister from Bangladesh explained the situation in Bangladesh, recent developments. As you know, there have been several developments in the recent past. He spoke, particularly, of the determination of Government of Bangladesh to improve relations with India to, I think the term that was used was, 'to see whether we can make a new beginning and move this forward'. He also spoke about the campaign that Government of Bangladesh is presently undertaking against organized crime, against corruption in Bangladesh and their determination to see this through.

Later today, Prime Minister will be meeting the Dr. Fakhruddin Ahmed, the Chief Advisor to the Bangladesh Government this evening<sup>3</sup>. So, we will brief you on that later. Earlier today, Prime Minister met with the Prime Minister of Bhutan. He also met with the Prime Minister of Nepal.

In the meeting with the Prime Minister of Bhutan, they recalled the historic visit of His Majesty King Jigme Khesar Namgyal Wangchuk to India in February, 2007 when, as you know, we revised the treaty between India and Bhutan. Both Prime Ministers reiterated their desire to further strengthen the special warm and traditionally friendly ties that exist between India and Bhutan and to give them even greater momentum. Prime Minister Manmohan Singh reiterated our commitment to Bhutan's economic development and said that he would continue to be a reliable partner and bring full support, and also assured support to Bhutan in her process of transition to a democratic constitutional monarchy.

In the meeting with Prime Minister Koirala of Nepal, which was also held in

---

3. When Mr. Ahamed met the Prime Minister, the latter reportedly told him that India had a vested interest in a stable, prosperous and democratic Bangladesh. Bangladesh Foreign Secretary told journalists that the meeting was extremely positive in tone. "Both the Prime Minister and Chief Advisor wanted to move the bilateral relationship forward", Bangladesh Foreign Secretary Towhid Hussain said. When asked if Dhaka was tackling the Indian insurgent groups operating from Bangladesh, Hussain replied that the two leaders did not go into specifics. Meanwhile media reports said that on the eve of the SAARC Summit India was considering removing investment restrictions on Bangladesh. Along with Pakistan, Bangladesh is banned from making foreign direct investments (FDI) in India. Confirming this thinking Minister of State for Commerce Jairam Ramesh said on April 2: "We have sent a note to the Prime Minister who is looking at this issue seriously. In the context of the current bilateral trade, there is nothing much Bangladesh could export to India. But if Indian investments take place, their exports to India could increase." India had already offered to import an additional 80 lakh pieces of garments from Bangladesh over and above its SAFTA commitments.

a very warm, cordial and friendly atmosphere, Prime Minister conveyed India's full support to the success of the peace process in Nepal, and to the leadership of Prime Minister Koirala of this process. The Prime Minister expressed India's determination to work with Nepal to restore stability and to place Nepal on the path of economic development. There was a brief review of bilateral issues, which are proceeding smoothly, and both reaffirmed their commitment to work towards stronger and more friendly ties. Prime Minister Koirala extended an invitation to our Prime Minister to visit Nepal, which was accepted with pleasure.

I think I will stop there for now. I would be happy to answer any questions that you might have.

**Question:** Did the issue of SAFTA come up in the meeting? What is Pakistan's latest attitude on that?

**Foreign Secretary:** I think we have continued to discuss SAFTA. As you know, for the last three days we have been discussing it. Certainly, we both have I think slightly different views on whether or not what Pakistan has done vis-à-vis India is in compliance of SAFTA or not. This is an issue that we hope to work our way through together and it is something that we will have to continue to discuss. There is a SAFTA Ministerial process within SAARC and that has been asked to sort this problem out. We will continue to work at it.

**Question:** There have been reports coming from the Pakistani side, that have been leaked from their side, where they claim that India proposed a Mutual Legal Assistance Treaty yesterday with an extradition clause in it. We understand that the Pakistani side said that they are not interested in an extradition clause at all, extradition is something that should be bilaterally discussed, and has asked India to prepare a draft of its proposal. Can you confirm those reports?

**Foreign Secretary:** I think what has happened is that this is an issue that we have discussed with Pakistan, with other neighbours, for many years and obviously, we do not have identical views on it. There is a SAARC process, and Sri Lanka has offered to host a meeting to look at these issues. We have offered to circulate a draft of a possible Regional Mutual Legal Assistance Treaty. Once we have circulated the draft, once we have had the meeting, I think that would be the place where we would each then have to see how to work through our positions to see whether these can be reconciled or not. So, rather than jumping to conclusions right now, I think

what we have in place is a means within SAARC to deal with the issue which we hope to use to move this forward.

**Question:** Did the issue of terrorism come up before the Council of Ministers meeting, if so, in what way? Was it a forward movement on this issue or did they remain bogged down on definitions of terrorism? Finally, is there going to be a separate statement on terrorism, or is it going to be a part of the New Delhi Declaration?

**Foreign Secretary:** There was no bogging down on anything. As I said, the discussion was smooth, constructive. Nobody got into an argument about what a definition could be, would be, should be. We did not do that at all. I think it was clear that everybody was opposed to terrorism, that we were agreed that we need to not just implement the existing commitments but see whether we could not go beyond this. We will continue this discussion on terrorism and I think you will see the results at the end of the Summit.

**Question:** As we have a more cooperative Government in Dhaka, have we asked for transit facilities to the North-East through Bangladesh for others? We have been asking for a long time I believe.

**Foreign Secretary:** I think we are discussing the entire range of our relationship with this Government in Bangladesh. They have assured us that they want to remake these relations so that they can realize the full potential of what we can do together. Transit is one of the issues in that but it is not just transit. There is much more to the relationship. I think everything we are discussing. Everything is on the table and we will discuss them all as we work our way through the relationship. Do not forget that this is first contact in a sense. This is the first time that we have the leaders of the new Government in Bangladesh, visiting us, meeting and talking to us at the highest level.

**Question:** My question is on Nepal. Did Prime Minister Koirala ask for ...(inaudible)... What is India's position on the refugee problem between Bhutan and Nepal?

**Foreign Secretary:** On the situation in the Terai, they discussed the situation in the Terai. Prime Minister Koirala mentioned what he saw as the problems. We have already actually strengthened border controls along the Terai when disturbances started because, frankly it is in our interest it is in Nepal's interest. So, that is something that we are both agreed upon.

On the situation with the refugees in the camps in Nepal, Prime Minister Manmohan Singh reiterated the hope that Nepal and Bhutan would be in a position to resume their bilateral dialogue on the issue and find an early solution to what is essentially a humanitarian problem.

**Question:** On the issue of visas, which you referred to earlier, for journalists, at the SAARC Council of Ministers meeting in Dhaka it had been decided that journalists with five years accreditation would be issued SAARC stickers like the other categories that already are in existence for the sticker. Can you explain to us what is the logic of giving fifty stickers to journalists? I mean, how would it work in practice?

**Foreign Secretary:** I think the difficulty is really that there was a decision in principle to issue SAARC stickers to journalists, in Dhaka. But it has not been implemented. It has been some time since then. It has been more than a year. So, what they have done now is to decide that fifty journalists from each country will be given SAARC stickers and told the meeting of the Immigration officials, which is supposed to take place within the next few months to see about implementing this. It is part of the mandate that has been given to the Immigration officials because they are ones who ultimately implement these kinds of decisions. Unless you get it implemented, as you saw for the last year and a half, there is not much benefit for you. So, that is where we are today. The Council has decided to tell the Immigration offices to implement this decision. Now, let us see.

**Question:** What would be the criteria for this fifty of each country?

**Foreign Secretary:** I do not want to jump the gun. Let them go forward and decide this.

**Question:** The present Bangladesh Government has handed over a list of terrorists of Bangladesh who are staying presently in India. Was there any discussion of sending them back to Bangladesh?

**Foreign Secretary:** Not yet. But I am sure in the next few days we will discuss all these issues between us.

**Question:** This is again on SAFTA. Were the issues of services and investment also discussed?

**Foreign Secretary:** There was general agreement when we discussed it both in the Standing Committee and today in the Council among the Ministers that yes it is time to take SAFTA to the next level, to look at trade

in services as well and to bring it within the ambit of SAFTA or to do a separate agreement on trade in services. We are looking at both possibilities.

**Question:** Yesterday both Prime Minister and Prime Minister of Pakistan made strong statements on Kashmir. How did that reflect in the bilaterals today?

**Foreign Secretary:** It did not.

**Question:** You said that fifty stickers will be issued to the journalists. I am asking a question about two Pakistanis and two Indians working here and there for three years and four years, they are getting three months, six months. There is uncertainty with their families. Is it possible to include this one as part of that (proposal on visa stickers)? We are already working here and we are not asking about any welfare...

**Foreign Secretary:** I think that is something that we need to settle bilaterally. We have the suggestion for a revised visa agreement. One of the categories there is in fact for these kinds of visas, for business visas, for people who are working in each other's countries. I think that is something we really need to sort out. I agree with you. This cannot go on like this. I think we need to change it.

**Question:** I want to understand and know the rationale behind this recognition sort that has been given to SAFMA. What is the basis of choosing one body? Does that leave the option for other groups also to emerge and be given similar privileges? Part of the question is also whether SAFMA is going to be the clearing house for these fifty accreditations because lots of us disagree with its aims and objectives.

**Foreign Secretary:** I think the simple answer is that just because there is a particular body that is recognized, this is a recognized body by SAARC, does not preclude other bodies in the same area and the same field of activity from being recognized as well. If it is recognized as the apex body, then, yes it has a certain status which is more than just being a recognized body. But as of now, SAFMA is just a recognized body. So, it does not preclude any other groups. As for the visa stickers, the system is that visa stickers are issued by the Governments of the country where whoever is entitled to the sticker is a national. So, Governments issue stickers to their own nationals. If it is the visa stickers for the journalists, it will be the same system, governments issuing to their own nationals. So, the decision is the governments' themselves.

**Question:** Did Sri Lanka ask for enhanced cooperation in joint naval patrolling in Palk Straits? What is India's response?

**Foreign Secretary:** There was a discussion when the Foreign Ministers met yesterday evening. I mentioned that they discussed steps that could be taken to prevent incidents like this. The Sri Lankan side had suggested coordinated patrolling in the Palk Straits. That was one of the subjects which was discussed. I think we still have not come to a conclusion but it is one of the steps that we are considering, both sides, to see such incidents of firing at fishermen do not happen again.

**Question:** Given the fact that South Asia is one of the worst hit regions by terrorism in the world, what is your sense when the Foreign Ministers meet that how strong a statement will come out, a sort of a combined statement, and how important is that coming from SAARC given that we have Afghanistan, Pakistan, even parts of our own country, Bangladesh, all suffering from this trouble?

**Foreign Secretary:** I think you are absolutely right. It is a very important problem. It is crucial that we address it, we deal with it. I would expect the Summit to reflect that importance in the strength of the statement that it makes.

Thank you.

**182. Address by President Dr. A. P. J. Abdul Kalam to the Heads of State and Government attending the 14th SAARC Summit.**

**New Delhi, April 3, 2007.**

I am delighted to welcome the Heads of States and Heads of Government of SAARC countries from Afghanistan, Bangladesh, Bhutan, Maldives, Nepal, Pakistan and Sri Lanka participating in the 14th SAARC Summit. My greetings to all of you. Particularly, I extend a special welcome to Afghanistan into the SAARC fraternity. On behalf of the Members of both Houses of Parliament, my Government and the people of India, I wish you a successful outcome to your deliberations for making SAARC countries mutually benefit from each other's knowledge and experiences.

Your Excellencies, together we represent 1.47 billion people of this planet, which is around 25% of the world population. The inspiring and unique aspects of SAARC countries, that we share, are: firstly, the high intensity of bio-diversity in our region; secondly, we have the largest population of youth of the world; thirdly, our combined purchasing power has the potential to be the highest in the world; and also we are blessed and interconnected with a civilizational heritage that goes back for thousands of years. What better environment can any region in the world have, which is more favorable for socio-economic development, promoting peace and prosperity of the region as a whole, if we share a common vision and work together to realize our vision through dynamic missions.

In spite of these major structural advantages, there is an impression among the people of the SAARC nations that we have yet to make a distinctive contribution that can make a difference to lives of people in our region. Can we now together make an attempt to change this impression? I would like to share with you, if you agree; two experiences that relate to the impact of connectivities and rural development that are actually making a difference.

**Vision for SAARC 2017**

Let me start with my visualization of SAARC countries in the year 2017:

- a) The people living below poverty line will become near zero from the existing 25%.

- b) The per capita income of the SAARC region as the whole will increase from the present 2,777 US dollars to 10,000 US dollars.
- c) Infant mortality rate will become less than 10 per thousand from the present 260 per thousand prevalent in some of the countries.
- d) All the SAARC countries will be free from water borne diseases and receive affordable, quality health care.
- e) The SAARC countries will realize the goal of 100% literacy from the existing less than 40% in some of the countries.
- f) All citizens of SAARC countries will be empowered with quality education, healthcare and employment potential leading to overall enhancement in prosperity and happiness.

### **Core Competence of SAARC Countries**

The main objective of SAARC is to provide a platform for the peoples of South Asia to work together in a spirit of friendship, trust and understanding for accelerating the process of economic and social development of Member States. SAARC countries have several core competencies and every country has a vision to become a developed nation in a time bound manner. Let us now focus on some of them which can be collectively pooled for mutual benefit. Afghanistan is endowed with natural resources such as untapped oil and natural gas, minerals and metals and animal husbandry resources such as sheep and lamb wool in substantial quantities. The Grameen Bank concept of Bangladesh which has made a difference to the life of many people has received international attention and acclaim. Bhutan is known for its hydel resources and is a model for the promotion of the concept of Happiness Index. India over the years has established itself well in IT and e-connectivity. Maldives is known for its innovation in tourism. Nepal for its bio-diversity and hydel resources. Pakistan has created a name for itself in cotton, textiles and apparels. Sri Lanka is known for tea and rubber processing. Let us see how these national competitive advantages can be harnessed for accelerating the transformation of the region as a whole.

### **Social and Economic Development:**

#### **Transforming SAARC into a fully developed region**

Since over one billion citizens of SAARC countries live in villages, there is

an urgency for all of us to improve the conditions of rural life through better physical connectivity, electronic connectivity, knowledge connectivity, which together will lead to comprehensive economic connectivity. For this mission, we have to ensure that the overall GDP growth rate for SAARC countries has to reach 8% to 10%, and maintained at this level for the next ten years. For this, employment generation, particularly in the rural areas is very essential.

This necessitates spreading the development process to the rural sector. India has nucleated programme called PURA (Providing Urban Amenities in Rural Areas) involving a geographically co-located clusters of multiple villages with four connectivities namely physical, electronic and knowledge leading to economic connectivity. India with its six hundred thousand villages needs to have 7,000 PURAs. The specific needs of the PURA for different SAARC Countries can be worked out by the specialists based on terrain and socio-economic conditions prevailing in the particular region. Each PURA cluster, apart from concentrating on reinforcing agriculture, will emphasize on agro processing, development of rural craftsmanship, dairy, silk production and fishing in those nations having coast lines, so that the non-farm revenue for the rural sector is enhanced, based on the competitive advantage of the region.

It is also essential that the rural economy should be driven by renewable energies such as solar, wind, bio-fuel and conversion of municipal waste into power. With this approach, the core competencies in the rural sector would be harnessed for sustainable development of the economy as a whole.

PURA envisages an integrated development plan with employment generation as the focus, driven by provision of the habitat, healthcare, education, skill development, physical and electronic connectivity and marketing in an integrated way for a cluster of villages with critical mass. In India, we have five operational PURAs such as Periyar PURA, Byrraju PURA, Loni PURA, Chitrakoot PURA and Sakthi PURA. Government of India is also planning, in the first phase, to start two PURA clusters in each of the 600 districts in the country during the 11th plan period. With this strategy for the bottom of the economic pyramid, India should be able to transform the rest of its village economy into cluster based, economically viable village systems in the shortest possible time.

### **Profile of a typical PURA Mission**

Based on the terrain and climatic conditions there could be four types of

PURA in the SAARC Region. They are plain terrain PURA, hill PURA, coastal PURA and desert PURAs. In the plains and coastal regions, the PURA population may be in the region of 20,000 to 100,000, cluster into economic systems of 20 to 30 villages. In a hilly or desert region, PURA may have a population of 7,500 to 15,000 people in a cluster of 30 to 100 villages or hamlets. Only then we can assure a high quality of life in the rural areas in a cost effective manner.

### **Creating competitive advantage for PURAs**

PURAs are conceived not only as self-sufficient, economically viable village clusters, but each cluster is endowed with its unique competitive advantage in the form of a portfolio of special products relevant to that region and the local talents and skills. In this way each PURA will be able to contribute to the rest of the economy within and outside the country and thereby contribute to overall competitive advantage and economic strength of the entire SAARC region. Let me now give one example to illustrate the competitive advantage for PURA.

**Periyar PURA (Tamilnadu):** Periyar PURA complex pioneered by Periyar Maniammai College of Technology for Women, Vallam, Tanjore is functioning near Vallam having a cluster of over 65 villages in Tamilnadu which involves a population of 1 lakh. This PURA complex has all the three connectivities - physical, electronic and knowledge - leading to economic connectivity. The center of activity emanates from the women engineering college that provides the electronic and knowledge connectivity. Periyar PURA has health care centers, primary to post graduate level education and vocational training centers. This has resulted in large-scale employment generation and creation of number of entrepreneurs with the active support of 850 self-help groups. Two hundreds acres of waste land has been developed into a cultivable land with innovative water management schemes such as contour ponds and water sheds for storing and irrigating the fields. All the villagers are busy in cultivation, planting Jatropha, herbal and medicinal plants, power generation using bio-mass, food processing and above all running marketing centre. This model has emanated independent of any government initiative. The committed leadership has been provided by the engineering institution. Recently, 5 of Periyar PURA villages are connected through Wi-MAX Wireless and having minimum 4 mbps connectivity with the Periyar PURA nodal centre. It provides a sustainable economic development in that region.

**Export Products from PURA Clusters:** The members of Periyar PURA in

Vallam have selected 40 products out of 123 which will be produced by Periyar PURA with the support of an Export Promotion Organization. They displayed these products in an exhibition at New Delhi during February 2007 with remarkable success; the PURA members now propose to exhibit their products once again in Japan during June 2007. The feedback from each exhibition will be used to improve the quality and attributes of the product so that the customer satisfaction is enhanced. Technical Consultancy support for improving the product is being provided by academic institutions like Periyar Maniammai College of Engineering for Women. This type of localized support centre ensures creation and faster delivery of PURA products to acceptable national and international standards, by our craftsman and innovators in rural areas. This type of experience we will definitely share with SAARC countries. Now, I would like to share with you an international partnership experience between India and African Union.

### **Pan African e-Network**

During the year 2003-04, I visited African countries such as Sudan, Tanzania and South Africa. I addressed the Pan African Parliament on 16 September 2004, at Johannesburg, South Africa which was attended by Heads of 53 member countries of the African Union. Based on my study of connectivity needs of African countries in communication, healthcare and education, I proposed the concept of Pan African e-Network using seamless and integrated satellite, fiber optics and wireless network connecting all the 53 African countries.

Twelve universities (7 from India and 5 from Africa), seventeen super specialty hospitals (12 from India and five from Africa), fifty three tele-medicine centers and fifty three tele-education centres in Africa will be connected through the Pan-African e-Network project. The first project on tele-education and tele-medicine in Ethiopia has already been commissioned. One of our Indian Universities IGNOU has taken up the MBA Course for 34 Ethiopian students of Addis Ababa and Harmaya Universities. As regards, tele-medicine, the specialists from CARE Hospital, Hyderabad are providing one-hour live tele-consultation daily to doctors in Black Lion Hospital, Addis Ababa in Cardiology and Radiology since November 2006. The Pan African e-Network will primarily provide Tele-Education, Tele-Medicine, Internet, videoconferencing and VOIP services. It also supports e-Governance, e-Commerce, infotainment, resource mapping and meteorological services. Each remote location will be able to access the Internet through the network by linking the HUB to

Internet backbone. Using this network the Heads of the State in all the 53 countries will be connected for instant communication. The network is designed to have 169 terminals and a central hub to deliver tele-education and tele-medicine services. The proposed network will utilize state-of-the-art technology and can be integrated with the latest broadband technologies like Wi-Fi and Wi-Max. The network is scalable to support different applications catering to increased number of users. 22 countries will be connected by the first half of 2007 and the remaining 31 countries will be operationalized by early 2008. This international partnership is mainly aimed to meet the millennium development goals of African Union. Based on this experience, I would like to propose the creation of a SAARC knowledge platform which will generate the knowledge input needed for sustaining our developmental growth and accelerate the regional transformation.

### **SAARC Knowledge Platform**

SAARC Knowledge Platform will combine the core competencies of the SAARC nations and will become the launch pad for many innovations that are waiting to be unearthed only by the combined power of all the scientists and technologists drawn from SAARC countries.

**Missions of SAARC Knowledge Platform:** The convergence of Bio, Nano and ICT is expected to touch every area of concern to the humanity. The SAARC Knowledge Platform will take up the missions, in some of the areas given below, which are of utmost urgency to all of us to make SAARC region a safe, sustainable and peaceful and prosperous place to live:

1. **SAARC Nations' e-Network:** Creating e-Partnership in education, healthcare, business and trade similar to PAN-African network.
2. **Energy:** Transforming energy security to energy independence for the SAARC region.
3. **Water:** Enhancing quality of existing resources, efficient recycling technology, rain water harvesting, interlinking of rivers, seawater desalination using renewable energy.
4. **Healthcare:** Vaccine for HIV/AIDS, Malaria, Tuberculosis and other water borne diseases in the region and also using traditional medicine and working towards molecule to drugs programme based on the raw materials available in the region.

5. **Agriculture and food processing:** Increasing the per capita yield from agriculture, new-technologies for preservation, developing varieties of crops for semi-arid and arid region.
6. **Capacity building:** Capacity building in state-of-the-art internationally competitive skills development and higher education with research as a focus through partnership among the educational and R & D institutions of SAARC countries through direct and virtual class rooms.

The core competence of the SAARC countries will have to be pooled for design, development and marketing of world class products and systems. I would request Your Excellencies, to consider the establishment of SAARC Knowledge Platform meeting the unique needs of the regional development and arrive at a roadmap for its time bound implementation. SAARC countries will become equal partners in this SAARC Knowledge Platform, driven by the core competence of each country in the region.

## Conclusion

India is conscious that GDP alone does not fully reflect in the quality of life of a large number of people, particularly in rural areas and even in urban areas. This may be true in SAARC nations also. For a comprehensive and inclusive approach to a measure of true socio-economic development, we have evolved what is called a National Prosperity Index (NPI) which is a summation of (a) annual growth rate of GDP; plus (b) improvement in quality of life of the people, particularly those living below the poverty line plus (c) the adoption of a value system derived from our civilizational heritage in every walk of life.

It may be noted that the concept of National Prosperity Index includes the factor of the International Human Development Index. That is  $NPI=a+b+c$ . Particularly, 'b' is a function of availability of housing, good water, nutrition, proper sanitation, quality education, quality healthcare and employment potential. 'c' is a function of promoting the joint family system, creation of a spirit of working together, leading a righteous way of life, removing social inequities, and above all promoting a conflict free, harmonious society. This will be indicated by peace in families and communities, reduction in corruption index, reduction in court cases, elimination of violence against children and women and communal tensions. There should also be progressive reduction in the number of people living below the poverty line leading to its becoming near zero by 2017. All our efforts in improving the national economic performance should be guided by the measured National Prosperity Index of the nation at any point of time.

Based on this or a similar model let us evolve a SAARC Prosperity Index which will represent the overall quality of life of the people in the SAARC region. This will enable the SAARC organization and its systems of programme management to implement SAARC programmes in an effective manner that will make a difference to the lives of the people in the region.

I wish you all a purposeful and productive deliberation towards setting up a roadmap for enhancing prosperity and harmony in the SAARC region.

May God bless you.

**183. Address by Prime Minister Dr. Manmohan Singh to the 14th SAARC Summit.**

**New Delhi, April 3, 2007.**

It is a great honour and privilege for me to welcome you all to New Delhi for the 14th SAARC Summit. Excellencies, Please allow me to express, on behalf of all member states, our deep appreciation for the excellent leadership that Bangladesh has provided to SAARC during its Chairmanship over the last one year. I must also thank the SAARC Secretary General and the SAARC Secretariat for their commendable contribution to SAARC and the preparatory work for this Summit.

I also wish to welcome President Hamid Karzai and the Islamic Republic of Afghanistan into the SAARC fraternity. India feels privileged that Afghanistan's first SAARC Summit, as a full member is being hosted by India.

I also welcome amidst us, the People's Republic of China, Japan, Republic of Korea, the United States of America and the European Union, who are Observers to this Summit.

South Asia is in the midst of an unprecedented political and economic transformation. The political transitions, painful as they may be, are something that each one of us has to work out for ourselves, within our countries and between our governments. I see signs of hope that our governments are now addressing the bilateral political issues that have prevented us from achieving our potential. We must now make a break with the past and join hands to realize our common shared destiny.

There is also today economic vibrancy and social change in every country of South Asia. Never before has it been truly within our capacity to envisage a future where our people are free of the twin curses of poverty and disease. It is possible today. It is here that SAARC has the real opportunity to realize the goals of our Charter: "to promote the welfare of the peoples of South Asia and to accelerate economic growth, social progress and cultural development in the region."

The question before us is whether we will seize this unique opportunity that beckons us all. Can we make this association of states touch and improve the lives of our peoples?

Connectivity -- physical, economic and of the mind, enabling us to use fully our geographical and resource endowments, has historically been the key to our region's peace and prosperity. South Asia has flourished most when connected to itself and the rest of the world.

The SAARC Rally that we have just flagged off, and the popular response that it has evoked, are graphic reminders of the potential of connectivity. The study for a regional multi-modal transport system has given us a useful basis to carry this work forward. As an immediate step, I propose that we link all our capitals through direct flights.

However, the dream of full regional connectivity will not be realized merely by building roads and railways. We must commit to actually making the travel freer and easier. As an immediate step, India is announcing a unilateral liberalization of visas for students, teachers, professors, journalists and patients from SAARC countries. Let us aim to double the intra-SAARC flow of tourists in the next five years.

We should encourage our civil society to interact and develop the habit of cooperative thinking. Our agreement to establish a South Asia University, as a world-class institution of learning, will be an important symbol of the connectivity of ideas and of our youth that would build the knowledge economies of the future.

There is an ongoing process of building an open and integrated market from the Himalayas to the Pacific, covering a vast and dynamic economic region. SAFTA could have a major role to play in this new emerging architecture. India is ready to accept asymmetrical responsibilities, opening her markets to her South Asian neighbours without insisting on reciprocity. I am happy to announce today that we will allow duty free access to India before the end of this year to our South Asian neighbours who are Least Developed Countries and further reduce the sensitive list in respect of these countries.

It is time that SAARC Region began to address global issues and to consider how we might do so together. Energy security, food security and climate change are all issues that impact on our development strategies and which need our focused attention.

All of South Asia is now or will soon be short of energy. A South Asian energy community could start by harmonizing systems and methods and grid structures and ultimately move on to an energy exchange with energy markets that cover the whole South Asian region. Promoting appropriate local technologies for harnessing renewable energy is an area we could consider for future cooperation.

We are taking a first step towards improving food security by setting up a Regional Food Bank at this Summit. It will meet shortages and losses caused by natural calamities such as floods and droughts.

I have a compelling vision of an inclusive, plural and rapidly developing South Asia playing its role in an interdependent world's economic development and peaceful evolution. I am therefore particularly happy that this Summit should see the high level presence of observers from outside the region. In the coming years, SAARC will learn to work with our partners from outside the region evolving ways of involving them in our progress.

To realize our hopes, we need SAARC to be an efficient instrument implementing what we member states seek. After several years of effort, the time has come to move SAARC from a declaratory phase to action and implementation. If we can complete work on the tools that we need, such as the SAARC Development Fund, and work realistically with each other, there is no reason why we cannot translate the vision of our Charter into a solid reality. However, a primary requirement for the fulfillment of our vision of prosperity and cooperation in South Asia is peace.

We should therefore implement in a meaningful and sincere manner the commitments and pledges to root out terrorism so as to create the atmosphere in which our endeavours can succeed.

We stand today at a moment of great opportunity. It was once said that, "positive expectations have a way of leading to positive outcomes". I believe that time has now come for SAARC to show that this indeed is so. Let us work together to make it happen.

## **184. Closing Remarks of Prime Minister Dr. Manmohan Singh at the 14th SAARC Summit.**

**New Delhi, April 4, 2007.**

It is my proud privilege and pleasure to extend my profound appreciation and gratitude to your Excellencies for the immense cooperation you have all extended to me.

The Declaration adopted today is comprehensive and forward-looking. It gives SAARC a wider mandate to promote peace and development in our region, including through greater connectivity - in trade, in the movement of people and through the flow of ideas.

During this Summit we had the honour of admitting Afghanistan to take its due place in the comity of SAARC. We also had the privilege of welcoming Observers for the first time. They are among our major civilisational neighbours and economic partners. *This manifests our common desire for SAARC to be outward looking and engaged with the world community; to be a springboard for exploiting the vast physical and intellectual resources of South Asia.*

Our Summit has agreed to operationalise the SAARC Development Fund; establish the South Asian University; create a SAARC Food Bank; and, set up the SAARC Arbitration Council. *The cooperation and accommodation that have characterized our deliberations and negotiations show that our countries are ready for a transformation of SAARC into an effective instrument of regional cooperation.*

The quality of our discussions in the Retreat today morning gives me confidence that we can soon bring the fruits of SAARC to our people. We have agreed to make tangible progress in the next six months on four issues which affect our people's daily lives: water (including flood control), energy, food and the environment. We will work with international agencies to develop and implement viable cross-border regional projects in these four sectors, which address our people's basic needs.

We have also decided to designate 2008 as the "SAARC Year of Good Governance".

Excellencies, Ladies and Gentlemen,

The founders of SAARC based their vision on our ancient links, our contemporary needs and our future potential. We must nurture our common

roots, extend our branches of cooperation and enable the resultant fruits to reach our people. This we owe to our people. This we owe to posterity.

India has come to occupy the chair at an important moment in our region's history. Our region has been transformed in the last half century. Yet, we face the challenge of being home to the largest concentration of poor and illiterate people. We must win decisively the war against poverty, ignorance and disease. *I cannot agree more that the touchstone of our efforts to reinvigorate SAARC must be the difference our efforts make to the lives of the poorest of the poor and the weakest of the weak. This is our highest mandate.*

To win this war, we must work together. We must resolve our differences, and we must enhance regional cooperation. We must also win the war against all forms of extremism and intolerance in our region. Our people have immense creative potential. If we invest in their capabilities and create an environment in which these capabilities bear fruit, South Asia will march forward in confidence and in peace. It should be our endeavour to work together to make that future happen.

In the discussions we have had, *I can say with all sincerity that I did feel a new sense of purpose and determination among the leaders of SAARC. We stand today at the crossroads of historic change and opportunity. I believe that this Summit has given us the hope that we can live in peace and amity and the confidence that we can make SAARC work.* I pledge to work sincerely under the able guidance and cooperation of the leaders of South Asia to make the year ahead a turning point in the history of SAARC. *I believe that a new dawn is breaking out over South Asia and that we are all set to fulfill the promise and vision of SAARC.*

Excellencies, Ladies and Gentlemen

I thank you all, once again, for your leadership, your support and your friendship.

I thank all of you.

## **185. Declaration of the Fourteenth SAARC Summit.**

### **New Delhi, April 4, 2007.**

The President of the Islamic Republic of Afghanistan, His Excellency Mr. Hamid Karzai; the Chief Adviser of the Government of the People's Republic of Bangladesh, His Excellency Dr. Fakhruddin Ahmed; the Prime Minister of the Kingdom of Bhutan, His Excellency Lyonpo Khandu Wangchuk; the Prime Minister of the Republic of India, His Excellency Dr. Manmohan Singh; the President of the Republic of Maldives, His Excellency Mr. Maumoon Abdul Gayoom; the Prime Minister of Nepal, Rt. Hon'ble Mr. Girija Prasad Koirala; the Prime Minister of the Islamic Republic of Pakistan, His Excellency Mr. Shaukat Aziz; and the President of the Democratic Socialist Republic of Sri Lanka, His Excellency Mr. Mahinda Rajapaksa, met at the Fourteenth Summit meeting of the South Asian Association for Regional Cooperation (SAARC) held in New Delhi, India on April 3-4, 2007.

2. The Heads of State or Government welcomed the entry of the Islamic Republic of Afghanistan into SAARC. This was a historic moment as Afghanistan assumed its rightful place as a valued member of the SAARC fraternity.
3. The Heads of State or Government reiterated their commitment to the principles and objectives enshrined in the SAARC Charter. With the welfare of the peoples of South Asia uppermost in their mind, they agreed to build a Partnership for Prosperity and work towards shared economic cooperation, regional prosperity, a better life for the people of South Asia, and equitable distribution of benefits and opportunities of integration among the peoples and the nations.
4. The Heads of State or Government recognised the importance of connectivity in fulfilling these objectives. It was vital to first have better connectivity within South Asia and then with the rest of the world. They agreed to improve intra-regional connectivity, particularly physical, economic and people-to-people connectivity. They agreed to the vision of a South Asian community, where there was smooth flow of goods, services, peoples, technologies, knowledge, capital, culture and ideas in the region. The SAARC Car Rally, in the run-up to the Fourteenth SAARC Summit, had vividly symbolized this connectivity.

5. The Heads of State or Government recognised that the remarkable growth of the economies of SAARC countries has opened new opportunities to pursue the fight against poverty with firm resolve. They called for deepening of pro-poor orientation of growth process, including through enhancing investment in human capital and infrastructure, increasing budgetary allocations for relevant sectors and improved delivery of services. They reiterated their commitment towards project-based cooperation to strengthen collective efforts in the region.
6. The Heads of State or Government acknowledged that there is a wide range of homegrown best practices and innovative solutions for transforming the lives of peoples in South Asia. They decided to earmark one rural community as SAARC Village in each Member State to showcase these innovative models of development in order to further replicate these across the region.
7. The Heads of State or Government recognised that the implementation of the Social Charter needs focused attention and directed the National Coordination Committees (NCCs) to formulate concrete programmes and projects to complement national implementation efforts. They underscored that civil society organizations have a vital role to play in driving forward the implementation of the Social Charter and directed the NCCs to mobilize civil society organizations to achieve this end.
8. The Heads of State or Government appreciated the Independent South Asian Commission on Poverty Alleviation (ISACPA) for its elaboration of the SAARC Development Goals (SDGs), which reflect the regional determination to make faster progress towards attaining the Millennium Development Goals (MDGs). They agreed that the national plans for poverty alleviation should appropriately mirror the regional consensus reached in the form of the SDGs and the Plan of Action on Poverty Alleviation. Deciding that resource mobilization for achieving the SDGs would remain a high priority in the Decade of Poverty Alleviation, the Leaders directed translation of the highest regional level political commitment into action for creating opportunities for productive employment and greater access to resources for the poor that are essential for them to enhance their livelihood and realize their potentials. They entrusted the Two-tier Mechanism on Poverty Alleviation to monitor the progress and fine-tune the approaches towards pro-poor growth process.

9. The Heads of State or Government recognized the full benefits of an integrated multimodal transport system in the region. They emphasized that this would not be realized unless physical infrastructure and matters relating to customs clearance and other facilitation measures, including multimodal transport operations, were addressed comprehensively. They called for an extension of the SAARC Regional Multimodal Transport Study (SRMTS) to include Afghanistan as well. They also called for early implementation of the recommendations contained in the Study in a phased manner. In this context, the Heads of State or Government directed the Inter-Governmental Group on Transport to identify and develop sub-regional and regional projects based on the prioritised recommendations of the SAARC Regional Multimodal Transport Study (SRMTS) and to develop appropriate regional agreements. They noted the offer of India to hold the Meeting of SAARC Ministers of Transport in New Delhi in 2007. They also directed that pilot projects for improving connectivity be identified and implemented through mutual consultations among the Member States.
10. The Heads of State or Government emphasized that in its third decade of existence, there was an urgent need to move SAARC from declaratory to implementation phase. They directed that the focus of SAARC should be on implementing collaborative projects that are concrete and effective. The SAARC Development Fund (SDF) is an important pillar that would bring concrete benefits to the people of the region. They directed that the SDF be made operational at the earliest. They agreed that the resources for SDF would be mobilised both from within and outside the region. They stressed the importance of decision making and working of the SDF being consistent with the SAARC Charter. They called for early identification and implementation of regional and sub-regional projects under the SDF.
11. The Heads of States or Governments recognized the region's rapidly increasing energy demands for meeting the developmental needs of SAARC countries. They also acknowledged the need of expediting development of conventional sources of energy in a sustainable manner and for strengthening renewable energy development such as in hydropower, bio-fuel, solar and wind. They welcomed the organizing of the first ever South Asia Energy Dialogue in March 2007 in Delhi. They called for early implementation of the recommendations of the Second SAARC Energy Ministers' Meeting to enhance regional cooperation.

12. The Heads of State or Government reiterated their deep concern at the continued degradation of environment and reaffirmed the need to further strengthen cooperation towards protection and conservation of the environment as a priority area. In this regard, while noting the progress in the implementation of the SAARC Plan of Action on Environment, they called for concerted efforts to implement various initiatives under the Plan in a timely manner.
13. The Heads of State or Government expressed satisfaction at the launching of 2007 as the 'Year of Green South Asia'. They reiterated that collaboration in addressing the problem of arsenic contamination of groundwater, desertification and melting of glaciers and assistance to affected peoples should be deepened. They expressed deep concern over global climate change and the consequent rise in sea level and its impact on the lives and livelihoods in the region. They emphasised the need for assessing and managing its risks and impacts. They called for adaptation of initiatives and programmes; cooperation in early forecasting, warning and monitoring; and sharing of knowledge on consequences of climate change for pursuing a climate resilient development in South Asia. They agreed to commission a team of regional experts to identify collective actions in this regard.
14. The Heads of State or Government stressed the need for closer regional cooperation in the field of information and communication technology. They noted with appreciation the establishment of a collaborative health care project involving a regional telemedicine-network. They directed that steps be taken to extend it to other ICT enabled fields such as education. They agreed to take steps to facilitate rationalization of telecom tariff on a reciprocal basis. They also agreed that national and regional telecom infrastructure should be upgraded to boost people-to-people connectivity in the region.
15. The Heads of State or Government noted with satisfaction timely ratification of SAFTA Agreement by all member countries. They stressed the need for ensuring effective market access through smooth implementation of trade liberalization programme and directed the SAFTA bodies to review the progress on a regular basis. They emphasized that SAFTA should be implemented in letter and spirit. Successful implementation of SAFTA will catalyse other areas of regional economic cooperation. They stressed that to realize its

full potential, SAFTA should integrate trade in services. They called for a finalisation of an Agreement in the services sector at the earliest. They also directed that the Agreement on Investment Promotion and Protection be finalized.

16. The Heads of State or Government underlined the importance of implementing trade facilitation measures, especially standardization of basic customs nomenclature, documentation and clearing procedures. They directed that a comprehensive agreement on harmonizing customs procedures be finalised. They also noted that harmonization of technical and phyto-sanitary standards and their implementation in a trade-friendly manner is important in boosting intra-regional trade. They appreciated the establishment of the SAARC Standards Coordination Board that would function as a precursor to the SAARC Regional Standards Body.
17. The Heads of State or Government complimented the SAARC Finance Ministers for finalising the framework of cooperation on financial issues in the region. They expressed satisfaction at the work of the Inter-Governmental Expert Group on Financial Issues.
18. The Heads of State or Government emphasized the need to develop, at an early date, a roadmap for a South Asian Customs Union and a South Asian Economic Union in a planned and phased manner.
19. The Heads of State or Government noted the cultural and social ties among the SAARC countries, based on common history and geography, and reiterated that the future of peoples of South Asia is interlinked. They stressed the importance of people-to-people contact as a key constituent in regional connectivity. They acknowledged the importance of intra-regional tourism and increased exchanges, particularly among the youth, civil society, and parliamentarians. They launched the SAARC Agenda for Culture and directed that annual SAARC Festivals for cultural exchange be institutionalized. They agreed to take measures to charge nationals of SAARC Member States fees for entry into archeological and heritage sites as applicable to their own nationals. They also directed that an enlarged SAARC Scholarship Scheme in ICT and related areas be instituted. They welcomed the offer of Bangladesh to host the First SAARC Youth Camp in 2007.

20. The Heads of State or Government decided to establish the South Asian University in India. They welcomed the signing of the Intergovernmental Agreement establishing the University. They further directed that the Intergovernmental Steering Committee be set up at the earliest to complete its tasks relating to the Charter, bye laws, rules and regulations, curriculum development, business plans and other issues. They also decided to strengthen cooperation and dialogue on educational matters through development of exchanges between academics, experts, policymakers, students and teachers. They called for inter-institutional cooperation, partnerships, and other regional initiatives in the field of education.
21. The Heads of State or Government acknowledged that women's full participation in all spheres of society, including participation in the decision-making process are fundamental for the achievement of equality and development. They noted that many sections of women and children continue to be in disadvantaged positions and lack equal opportunities for economic and social development. They emphasized that women's empowerment should be a major objective of regional cooperation. Regional projects should focus on addressing issues relating to women and children.
22. The Heads of State or Government stressed the need to collectively overcome the challenges of poverty, disease, natural disasters and terrorism. They confirmed that countries of South Asia must work together to deal with these challenges in order to secure the region's collective prosperity.
23. The Heads of State or Government acknowledged that countries of South Asia face challenges of food insecurity and malnutrition. In order to manage emergencies caused by natural and manmade calamities and food shortages, they welcomed the signing of the Intergovernmental Agreement establishing the SAARC Food Bank with the participation of all the SAARC countries. The Food Bank will supplement national efforts to provide food security to the people of the region.
24. The Heads of State or Government noted the challenges confronted by the countries of South Asia in ensuring food and nutritional security as well as in maintaining vibrant rural economy for agricultural development. They underscored the need for enhancing productivity and real wage in rural sectors, and for creating adequate non-farm

employment to sustain the progress made in reducing poverty. Noting the constant decline in land availability and biodiversity, depleting soil and natural resources, lowering ground water levels, shrinking farm holdings as well as low and stagnating productivity, they recognized the imperative of reducing the wide gap between yields at the research and the farm level. They stressed, in particular, that South Asian agriculture must benefit from collaborative efforts within and among SAARC countries in developing an effective agriculture research, extension and farmers' linkages, and exchange of farm technology.

25. The Heads of State or Government underlined that terrorism is a threat to peace and security in the region. They condemned the targeted killing of civilians and terrorist violence, in all its forms and manifestations, wherever and against whomsoever committed. The Heads of States or Government affirmed that terrorism violates the principles of the Charters of the United Nations and SAARC and is a clear and present threat to international peace and security. They reaffirmed their commitment to implement all international conventions relating to combating terrorism, to which SAARC Member States were respectively parties, as well as the SAARC Regional Convention on Suppression of Terrorism and the Additional Protocol to the SAARC Regional Convention dealing with the prevention and suppression of financing of terrorism. While urging continued efforts to combat terrorism, the Heads of State or Government also called for urgent conclusion of a Comprehensive Convention on International Terrorism.
26. The Heads of State or Government agreed to work on the modalities to implement the provisions of the existing SAARC Conventions to combat terrorism, narcotics and psychotropic substances, trafficking in women and children and other trans-national crimes. They expressed their commitment to take every possible measure to prevent and suppress, in particular, financing of terrorist acts by criminalizing the provision, acquisition and collection of funds for such acts, including through front organizations and also to counter illicit trafficking of narcotic drugs, trafficking in persons and illicit arms. They reiterated the need for law enforcement authorities of Member States to enhance cooperation in the prevention, suppression and prosecution of offences under these Instruments. They noted the initiative of India to prepare a draft of SAARC Convention on Mutual

Assistance in Criminal Matters and welcomed the offer of Sri Lanka to hold a meeting of Legal Advisers to examine the idea of a draft convention, before the Second Meeting of SAARC Interior/Home Ministers scheduled to be held in October 2007 in India. They also directed them to ensure regular follow-up and implementation of the decisions taken.

27. The Heads of State or Government recognised that corruption was an issue of serious concern and agreed to exchange information on national experience in combating corruption to effectively address this problem.
28. The Heads of State or Government reaffirmed their commitment to a rule-based multilateral trading system. They recalled that the Doha Round was premised on the centrality of development. They directed the Commerce Ministers to work closely to co-ordinate their positions to ensure that the centrality of the development dimension in all areas of negotiations for creating new opportunities and economic growth for developing countries was fully realized. They called upon all members of WTO to show commitment for a successful conclusion of the Doha Round.
29. The Heads of State or Government welcomed the People's Republic of China, Japan, European Union, Republic of Korea and the United States of America, to be associated as Observers to SAARC. The region would benefit from these external linkages and help its economic integration with the international community. The Heads of State or Government also welcomed the Islamic Republic of Iran to be associated as Observer to SAARC.
30. The Heads of State or Government welcomed with appreciation the offer of the Maldives to host the 15th Summit Meeting of the Heads of States or Governments of the South Asian Association for the Regional Cooperation (SAARC).

## **186. Media Briefing by External Affairs Minister Pranab Mukherjee at the end of 14th SAARC Summit.**

**New Delhi, April 4, 2007.**

**External Affairs Minister:** We have just concluded a very successful, indeed a landmark, 14th SAARC Summit. Let me briefly go over some of the main points.

For the first time in its history, SAARC expanded its membership to welcome Afghanistan as its eighth member. Again, for the first time, five Observers from outside the region attended the Summit, which also decided to give a similar status to Iran. The expansion of SAARC and the developing external linkages are indicative of the high level of maturity that SAARC has reached as an organization.

The Summit adopted a comprehensive and forward-looking New Delhi Declaration, which sets out the core principles underlining our collective vision of an inter-connected South Asia where there is a free flow of goods, services, people and ideas. At the Retreat this morning, the Leaders agreed to make tangible progress in the next six months on four issues that affect the daily lives of our people. These include water (including flood control), energy, food and the environment. They decided to work with international agencies to develop and implement viable cross-border regional projects in these four sectors, which address our peoples' basic needs. The Leaders also decided to designate 2008 as the "SAARC Year of Good Governance".

During the last few days, there have been intensive discussions on how to move SAARC forward at a time when South Asia is in the midst of an unprecedented political and economic transformation. There was unanimous support for moving SAARC from the declaratory to the implementation phase. In this context, we committed ourselves to early operationalisation of the SAARC Development Fund. This will allow us to implement concrete projects, particularly for alleviation of poverty in the region. India is keen to utilize its offer of \$ 100 million for this purpose.

This has been a highly productive Summit in terms of two very important intergovernmental agreements that were signed to establish the SAARC Food Bank and the South Asian University. The Food Bank will be developed as an exemplary model of regional cooperation to collectively meet our region's food shortages in times of emergencies and natural calamities.

The South Asian University, which will be developed as a center of excellence in higher education for the entire region, is yet another milestone in the history of SAARC. This will be a multi-campus University. We will set up a Steering Committee to draw up the Charter, bye-laws, course curriculum, governance structure, and administrative and financial issues for the University.

Connectivity was the overarching theme of the Summit. This was aptly symbolized by the flagging off of the SAARC Car Rally just before the inaugural by the Leaders. We decided to extend the SAARC Regional Multimodal Transport Study to Afghanistan that will speed up the move to greater connectivity in our region and in turn connect our region to Central Asia and beyond. The Intergovernmental Group on Transport has been directed to identify and develop sub-regional and regional projects based on the prioritized recommendations of the SRMTS.

There was full agreement that SAFTA was one of the most successful outcomes of SAARC's collective efforts. We all agreed that it must be expanded to cover trade in services. We also underlined the importance of trade facilitation measures. As the largest country in the region, India is ready to accept asymmetrical responsibilities, including opening her markets to her South Asian neighbours without insisting on reciprocity. PM has already announced that before the end of the current year, India will allow the Least Developed Countries among its South Asian neighbours duty free access to its markets. It will also further reduce the sensitive list in respect of these countries. India also hopes that difficulties related to the full operationalisation of SAFTA will be resolved and that all member States will be in full compliance of SAFTA provisions in letter and spirit.

The decisions that we have taken at this Summit will not only boost intra-regional trade and investments but also promote cultural exchanges and travel within our region. In this regard, Prime Minister, Dr. Manmohan Singh proposed connecting all the SAARC capitals with direct flights. He also announced unilateral liberalization of visas particularly for students, teachers, professors, journalists and patients from the region. The Summit also decided to cover 50 journalists from each SAARC country under the SAARC Visa Exemption Scheme.

A calendar of activities has also been drawn up for this year to prioritize and rationalize our programmes. As the present Chair of SAARC, India will focus on implementing decisions taken and projects initiated. Within this year, we will implement a regional telemedicine network connecting two hospitals in

each of the SAARC countries with super-speciality hospitals in India. The Museum of Textiles and Handicrafts will begin its activities with an exhibition-cum-sale of artifacts, crafts and textiles from the region. Each member State will also earmark one rural community as SAARC Village to showcase innovative models of development and poverty alleviation and home grown best practices for transforming the lives of the people in South Asia.

India will also host Ministerial meetings of Finance, Commerce, Home and Transport to prioritize our work in these areas.

Deliberations at the Summit and other meetings also reflected the strong condemnation of terrorism. The Leaders re-affirmed their commitment to combat this scourge and agreed to consider India's proposal to work towards finalizing an Agreement on Mutual Legal Assistance in Criminal Matters.

In terms of atmosphere, this was the smoothest, least contentious Summit ever. Clearly, this is on account of the fact that there is recognition that SAARC is an idea whose time has come. The constructive deliberations at various meetings of the Heads of State or Government, of the Council of Ministers and of Senior Officials and the high level presence of Observers, including the expression of interest of others, are all testimony to the fact that this is recognized not just within the region, but also outside of it.

The presence of Leaders at the Summit provided an excellent opportunity to hold bilateral discussions for energizing our substantive neighbourly ties with each of the Member States of SAARC.

Let me conclude by stating that India is firmly committed to regional cooperation for mutual benefit. I would like to reaffirm our wholehearted support and cooperation to our SAARC partners so that we succeed in our efforts to translate ideals into meaningful cooperation on the ground. As India assumes the Chair of SAARC, we are determined to utilize the forthcoming year to implement and build on this successful Summit.

**Question:** Mr. Minister, I would just like to ask you, much has been spoken of terrorism and peace, what is the threat perception from LTTE for India at the moment and what steps have been taken post the Katunayake Air Base attack?

**External Affairs Minister:** In fact, we have already assured the Sri Lankan Government our full assistance if they ask for it. But, as we believe, to resolve the problem we must also engage in the peace process which was initiated, as military solution ultimately would not yield results. Therefore,

we have suggested that both sides should exercise restraint. The devolution mechanism which is contemplated and from which all-party representative Committee have made recommendations should be examined and be implemented within a time frame so that the legitimate aspirations of various ethnic groups find their reflection within the framework of Sri Lankan constitution while maintaining its territorial integrity.

**Question:** What is the threat perception to India from LTTE at the moment? What is our assessment of that?

**External Affairs Minister:** Look, threat perception of a country depends on various circumstances. Generally, I can point out that terrorism and terrorist activities are the biggest menace to world peace and tranquility, not merely to India but all over the world. But, apart from that, we shall have to ensure that peaceful, conducive atmosphere prevails and as far as possible, shall have to try to resolve these issues through dialogue, at the same time without letting (go of) administrative efforts.

**Question:** What gives you hope this time that the tall agenda that you have got in the Delhi Declaration will be implemented? We have had SAARC Summits each year. We have an agenda but half of the things are not implemented. So, what is different this time?

**External Affairs Minister:** Lot of differences in the sense, as I mentioned to you, we have signed two agreements. I have also indicated and Prime Minister in his concluding observations stated that we should expose important projects in collaboration with the international agencies in four crucial areas which will affect the livelihood of a large number of SAARC countries. They include flood control, energy, food and environment. There too we have indicated apart from the general declaration, it was decided in the Council of Ministers meeting that SAARC Development Fund would be operationalised at the shortest possible time and the Inter-Governmental Committee suggested to make their recommendations to the next meeting of the SAARC Ministerial Council which is likely to take place by the end of November. The short point which I am trying to drive is that on different projects we are identifying, the timeframe by which we can take the decisions.

**Question:** There were media reports about joint management of Kashmir. What is India's position?

**External Affairs Minister:** In fact, the news item which appeared in a section of the press, I checked up from Prime Minister H.E. Mr. Shaukat Aziz. He

mentioned that in response to a question in his press conference, he indicated that we are having discussions on all issues including Jammu and Kashmir and there has been good progress. He himself told me that he refused to give any details at what level what type of discussions are taking place. I think that is adequate to dispel any doubt or any question if anybody has.

**Question:** Sir, I wanted to ask you about the part of the Declaration which deals with terrorism. When one reads that, it essentially appears to be a reiteration that the countries have agreed to finally implement what they had agreed earlier. Would India have liked to see a stronger statement on counter terrorism, or at least something more concrete on counter terrorism? Are you a little disappointed that that has not happened?

**External Affairs Minister:** In fact, if you look at the Declaration, we have mentioned both in paragraphs 25 and 26, the position which has been reiterated by the leaders. In addition, we have the SAARC Convention on Terrorism. It has been pointed out and that too is reflected in the Declaration that various countries should work on having arrangements for mutual legal assistance in respect of the criminal activities. Once it is institutionalized within the legal framework, it would be possible to take appropriate measures against terrorist activities. You read these two paragraphs, it is quite strong.

**Question:** Mr. Mukherjee, what is your reaction to the Pakistani Prime Minister's assertion that Kashmir is the core issue and resolving outstanding disputes like that is a prerequisite for infusing new life into SAARC<sup>1</sup>?

1. While addressing the opening session of the SAARC Summit on April 3 EAM said there was a direct link between security and development which required "us to resolve the differences and disputes within and between our countries through dialogue and compromise." He said there was a need to build mutual trust and confidence thereby removing the obstacles of the trust deficit that had hampered meaningful cooperation in the region. He went on to say that "we have remained mired in conflict management. The consequent drain on our energies has held us back from achieving the goals that we set for ourselves in the SAARC Charter." He separately conceded that Islamabad and New Delhi had managed to reduce some of the "trust deficit" between them, resulting in more interaction and movement of people and goods than five years ago. Mr. Aziz said dispute resolution was the cornerstone of the improvement in the relations. "If there is a will, we are capable of moving ahead," he said, citing the Irish peace process. He, however, refused to be drawn into the specifics of the "public and non-public" talks that were under way on Kashmir. He also sidestepped questions on whether he considered the dispute one of the "root causes" of terrorism in the subcontinent. "Deprivation in any form is one of the causes... but I would rather give a general answer since specifics are not appropriate at this stage," he said. While the root causes existed, terrorism also had to be dealt with as a security issue and all countries, including Pakistan and India, should work together.

**External Affairs Minister:** I think on several occasions Pakistani authorities have declared that Kashmir is the core issue. Therefore, to me it is nothing new. But, at the same time, we are having talks. Fourth round of Composite Dialogue has begun. Confidence-building measures including along LoC in Jammu & Kashmir have been taken. This is continuing for almost more than three years. Therefore, I am not very much perturbed over a particular expression through. But, I am a bit optimistic about the progress which we are having in our dialogue within the framework of Composite Dialogue on all issues including Jammu and Kashmir.

**Question:** Would you explain what do you mean by the Arbitration Council? What would it do if there are bilateral disputes? You already have institutions set up in Pakistan and India. So, what would it do? Would it resolve issues between like Bhutan and Pakistan, or what?

**External Affairs Minister:** You know, to deal with the business contracts there are domestic laws, municipal laws and international laws to implement it. Therefore, I do feel all the legal courses will be taken care of by it.

**Question:** Admission of Afghanistan in our fold, as you claim, is a historic event. But as you know well, the country has been marked for rehabilitation and reconstruction. How is SAARC going to help them and what is the timeframe?

**External Affairs Minister:** Inclusion of Afghanistan within the SAARC family will provide an opportunity to have connectivity through Afghanistan to Central Asia. So far as the reconstruction activities of Afghanistan are concerned, a number of countries including India are engaged or providing bilateral assistance, as you are aware of. Our commitment to the reconstruction activities in Afghanistan is about US \$ 750 million and more than US \$ 300 we have already spent. Many other countries are also engaged in it. I do feel that with the inclusion of Afghanistan within the SAARC family, many other countries may also show interest in building up their activities in Afghanistan.

**Question:** Yesterday the Prime Minister of Nepal had proposed to eradicate poverty by mutual cooperation. How is the SAARC leadership going to address this problem?

**External Affairs Minister:** The whole objective is to improve economic conditions and the specific proposal which we have indicated, the basic objective of creation of the SAARC Development Fund and specially the

present commitment of 300 million US dollars, is to ensure that poverty alleviation programmes could be identified and taken up immediately. In addition to that, all the core issues like food security, energy security, connectivity, water management, all ensure adopting the programmes for the overall economic development and poverty alleviation. But we are just not believing in the theory of trickling down. That is why through the window of SAARC Development Fund we want to confront the poverty alleviation programme with specific projects funded through this Fund.

**Question:** Indian Prime Minister has given duty-free entry to the least developed countries in SAARC and you already have a free trade area agreement with Sri Lanka. This means that India has free trade with five of the seven member states except for Pakistan. So, now it is only Pakistan which is not having free trade with India and apparently Pakistan has to make up its mind whether it wants to join SAFTA or having free trade with you or not, and Pakistan has already indicated its mind. My question is, how important is Pakistan for the success of SAFTA and for Indian trade? A related question, how actively Pakistan participated in the preparations of the Delhi Declaration? I asked that because you said it was the smoothest and least contentious Summit.

**External Affairs Minister:** As you know, so far as SAFTA is concerned, there is a paragraph in the Declaration itself and all the Heads of State and Government committed to operationalise SAFTA, the exact words used there are 'in letter and spirit'. Therefore, I do feel that an international arrangement, a regional arrangement agreed upon would be implemented. Secondly, as you know the practice, when we discuss and prepare a document, almost every sentence and every paragraph is debated in the Council of Ministers meeting, before that in the officers level meeting, and through this process it comes to the Heads of State and Government, and participation of every country at this stage takes place. Therefore, there is no question of not having participation by any country or anybody.

**Question:** Mr. Minister, since SAARC is talking about moving from confabulation to implementation and India has announced that it will liberalise its visas for SAARC countries in particular categories, can you tell us what liberalization of visas mean? Is there a timeframe to implement this visa? For instance, students from many countries in SAARC, especially Pakistan have difficulty in coming and studying in India. Is that finally going to be removed now, also because since we are going to have a South Asian University in place?

**External Affairs Minister:** There are two issues. The first issue is that certain liberalization process will be taken by India unilaterally in respect of the students, professionals, journalists, etc. In addition to that, we have also agreed that fifty journalists from each SAARC country will be given visa under the SAARC Visa Scheme and everything will be implemented. So far as unilateral decision of India is concerned, I do hope it will be possible to implement it shortly and under the SAARC visa system, we will be able to do as soon as we get the requests from the countries concerned.

**Question:** Prime Minister talked about connecting all the capitals. He was talking about open skies. We already have open sky with Sri Lanka. As you are aware, tourism creates maximum jobs. Prime Minister also talked about doubling tourism, intra-SAARC tourism. Could you just throw more light on it as to when it is going to happen, how it is going to be achieved?

**External Affairs Minister:** In fact, tourism is expanding and if we provide the facilities which are needed and make aggressive campaign, it would be possible to enhance the tourism and to reach the target. If you look at the trend of growth of tourism within the SAARC countries, it is expanding very fast. What is needed to be provided is the necessary infrastructural facilities which the tourists expect at the tourist spots and the connectivity. One instance I can give you. If we can connect all the SAARC capitals through air routes, naturally it would have larger impact than what we are having today. Visa liberalization is another incentive. In addition to that, every member state is building up their infrastructure and facilities to accommodate the tourists.

**Question:** This is a question regarding Point.22 - the Heads of State and Government have stressed the need to collectively overcome challenges of poverty, disease, natural disasters and terrorism. My question is, are they already of one mind, have they agreed on what should be the definition of terrorism and poverty?

**External Affairs Minister:** In fact, the various programmes which have been undertaken basically it is the objective which we are going to have already we have goals before us - Millennium Development Goals, SAARC Developmental Goals. In the developmental plans of the respective countries, where members of the SAARC countries will like to integrate these plans. In addition, as I mentioned through the projects specially directed to the poverty alleviation and social projects through the SAARC Development Fund, it can be operationalised faster. Different projects can also be operationalised through SAARC Development Fund. So, we are

emphasizing on operationalising it faster so that the benefit can be reached to the member countries.

**Question:** India has announced unilateral tariff reduction for SAARC LDCs. What will be its impact on Indian economy? On these LDCs, do you think it will be injurious to India's small-scale industry?

**External Affairs Minister:** I do not think (that) because we have done tariff reductions on several occasions on several items. At one point of time it was suggested that if you give duty concessions to Jamdani sarees from Bangladesh, our textile industry is going to be affected. But it has not affected because market is expanding so fast and consumption pattern is changing so fast. Therefore, if we reduce the tariff, there is no need to have any apprehension that because of the reduction of tariff, it is going to be flooded by imported goods. After all, market is competitive.

**Question:** I want to ask you about the meeting between the Prime Minister and Shaukat Aziz, Prime Minister of Pakistan. Did Mr. Shaukat Aziz say anything about the Kashmir issue? And also, was there any discussion on Siachen issue and what is India's response to both?

**External Affairs Minister:** In fact, when the two leaders discussed among themselves, they covered a large number of their bilateral relations. Not merely bilateral relations, they shared their perceptions about the regional and international issues also. So far as Kashmir is concerned, as I mentioned to you, we are having regular dialogue within the framework of the Composite Dialogue. This is the institutional arrangement continuing for quite some time. In respect of Siachen, Defence Secretary level talks are going to take place in a couple of days, I think on 6th or 7th of April it will take place and that will be the 11th round of the talks. So, talks are going on.

Thank you.

**187A. Address by External Affairs Minister Pranab Mukherjee to the Conference of Parliamentarians from SAARC region on 'Evolving South Asian Fraternity'; Calls For Free Movement of People and Goods in the Region.**

**New Delhi, June 3, 2007.**

It gives me immense pleasure to address the concluding session of the conference of parliamentarians from the SAARC region organized by South Asian Free Media Association (SAFMA) on 'South Asian Parliament: Evolving South Asian Fraternity'.

The choice of Shimla as the venue and the commemoration of 150 years of the 1st War of Independence at this conference, are strong reminders of South Asia's shared history, its common destiny and a future, which is interlinked.

At the moment of the birth of SAARC, Rajiv Gandhi drew attention to the relevance of our South Asian identity in these eloquent words: *"The South Asian region has been one of the great crucibles of human creativity. Here, an indigenous civilization, whose origins stretch back into an unfathomed antiquity, interacted with peoples and races who poured in from distant parts of the world. Out of the intermingling of their ideas, philosophies and ways of life grew the noble heritage to which each of our seven nations can lay claim."*

India is convinced that on the foundations of its civilisational and commercial interlinkages, South Asian countries can work together to emerge as a major powerhouse of economic creativity and enterprise.

After all, South Asia is home to 1.5 billion people representing 1/5th of world's humanity. Its rich cultural, natural and human resources make it one of the richest regions in the world. Today the countries of South Asia are on the threshold of a historical moment. Collectively, we stand a good chance of transforming the economic conditions of our people and in the development of human civilization in the 21st century. For the first time, in the last 350 years, the global economy is indicating a shift in its centre of gravity from the continents of Europe and North America to Asia. Asia's real income per capita has risen 7-fold between 1950 and 2005 and its share in world trade has more than doubled during 1970 and 2005. If countries of South Asia make a joint effort and use the complementarities of the region as a whole, they can use of this opportunity available to them at this juncture.

To reclaim its heritage and realise the full potential of South Asia, it is essential that existing barriers that restrict the movement of people, goods and investments within and across the region be dismantled. It is with this perspective that India has extended its hand of friendship and cooperation to all her neighbours and proactively addresses whatever differences there may be. It is again with this perspective that India participated in the 14th SAARC Summit.

The 14th SAARC Summit was a landmark Summit in many respects. The positive atmosphere, the spirit of cooperation and the forward looking Declaration adopted at the end of the Summit are a demonstration of the new, emerging South Asian fraternity. In terms of atmosphere, this was the smoothest, least contentious Summit ever. The constructive deliberations at various meetings of the Heads of State/Government, of the Council of Ministers and of Senior Officials and the high level presence of Observers from outside the region, including the expression of interest of others, are all testimony to the fact that this was recognized not just within the region, but also outside of it.

For the first time in its history, SAARC expanded its membership to welcome Afghanistan as its eighth member. Given Afghanistan's civilisational, historical and cultural ties with South Asia, its admission into SAARC was a natural development. We consider Afghanistan a valued member of the SAARC fraternity and the region's gateway to Central Asia and beyond.

The Summit underlined the collective vision of the leaders of SAARC countries of an interconnected South Asia where there was a free flow of people, goods, services and ideas. Under the overarching theme of connectivity, the Summit took some important decisions. An important decision in this respect was to extend the SAARC Regional Multimodal Transport Study to Afghanistan. It was recognized that South Asia should first be integrated within itself and then integrate further to the rest of the world. The SAARC countries also committed themselves to combat terrorism. The important decisions taken at the Summit will bring concrete and tangible benefits to the people of our region.

We are aware that as the present Chair of SAARC, India has an important responsibility. Let me share with you some of the steps that we intend to take in moving SAARC forward.

As the largest country in the region, India is ready to accept asymmetrical responsibilities, including opening up her markets to her South Asian

neighbours without insisting on reciprocity. During the Summit, Prime Minister announced duty free access to India's markets to the LDCs in SAARC from this year itself. India is committed to reducing the Sensitive Lists for the LDCs. Prime Minister has also announced unilateral liberalization of visas, particularly for students, teachers, professionals, journalists and patients from the region and called for doubling intra SAARC flow of tourists in the next 5 years.

It is our effort that, during our Chairmanship of SAARC, we carry forward the theme of connectivity to implement concrete projects and upgrade regional cooperation and integration. We would try to focus on improving regional connectivity through upgrading trade, transport and telecommunication links; address issues relating to trade facilitation such as harmonization of customs procedures and standards; increase understanding through greater people to people contact, particularly among the youth, the civil society, cultural personalities, academics and parliamentarians.

We have started work on the establishment of the South Asian University. We propose to set up a Project Office for the University in New Delhi and appoint an interim CEO assisted by a team of academics/experts from the region. It is our earnest hope that this University will advance a sense of South Asian community by bringing together future generations of students in the common pursuit of quality education and to prepare them for the challenges of the new millennium.

We realize that greater interaction particularly among the youth and the student community will contribute significantly in enhancing understanding. We intend to promote students and faculty exchange among the SAARC member countries both at school and college level.

India would also host the First SAARC Cultural Festival in November this year to bring together artists and cultural performances from the entire region to showcase the richness, the diversity and similarity of our culture. We are planning a series of events including cultural performances, seminars, workshops, exhibitions, film and food festivals.

The SAARC Museum of Textiles and Handicrafts would be inaugurated with its first exhibition entitled 'Textile Traditions of South Asia' at the end of the year. This exhibition will be held in the Crafts Museum at Pragati Maidan in New Delhi for three months. We propose to open a sales outlet of regional textiles and handicrafts on the sidelines of the exhibition. We

have joined hands with the Fashion Design Council of India to organize a SAARC Fashion Festival that will showcase the rich textile traditions of the SAARC countries and how are they being used in contemporary fashion. This will give a boost to our regions textiles and crafts industries.

The SAARC Food Bank would be developed as an exemplary model of regional cooperation to collectively meet our region's food shortages in times of emergencies and natural calamities. The First Meeting of the Governing Board of the SAARC Food Bank will meet to consider the terms and conditions of exchanging and assisting each other in times of natural calamities and food shortages.

The importance of addressing issues relating to the empowerment of women has been recognized in SAARC. India will host three important meetings to address the issue of home-based workers, micro-financing and the problems relating to trafficking in women and children.

We look at the SAARC process as a stimulus to strengthen cross-border economic linkages, through initiatives such as SAFTA and the SAARC Development Fund (SDF). In our view, these can create opportunities for exploiting synergies based on comparative advantages, increased intra-regional trade, investment in cross border infrastructure projects and coordinated programs to address challenges in governance, environment, social development and other fields that spill over national boundaries.

Today, we live in an increasingly interdependent world. Our collective endeavours can be more than the sum of our individual efforts. SAARC offers us the hope and the opportunity to fulfill this imperative of our times. The time has come for a new vision, a new commitment and a new sense of purpose in South Asia. It is now the collective responsibility of all the member countries to carry it forward towards purposeful cooperation. In achieving the objectives of SAARC, I would like to reaffirm India's firm political commitment to regional cooperation for mutual benefit.

Thank you.

## **187B. Agreement among the SAARC Countries for the establishment of a South Asian University.**

**New Delhi, April 4, 2007.**

**The Governments of the South Asian Association for Regional Cooperation (SAARC)** Member States comprising of the Islamic Republic of **Afghanistan**, the People's Republic of **Bangladesh**, the Kingdom of **Bhutan**, the Republic of **India**, the Republic of **Maldives**, **Nepal**, the Islamic Republic of **Pakistan** and the Democratic Socialist Republic of **Sri Lanka**;

**Realizing** the need to provide a forum where our academicians, scholars, researchers and gifted students can work together in the service of human advancement;

**Desirous** of establishing an institution that will advance a sense of South Asian community by bringing together the future generations of South Asians in a common pursuit of quality education and prepare them for the challenges of the time;

**Recognizing** the need to offer world-class education, comparable to the best universities in the world, and hoping to attract faculty and students of the same world-class caliber from the region and internationally;

**Realizing** the need to educate women and men, who - imbued with humane values, a commitment to social justice and fellow feelings, endowed with democratic ideals, a commitment to tolerance, multicultural and secular co-existence, and steeped with a critical and scientific outlook - will provide leadership not only in their own countries but throughout the region.

**Have** agreed as follows:

### **Article 1 Establishment of the South Asian University**

1. There is hereby established an institution to be known as the South Asian University (hereinafter referred to as the "University"), which shall be a non-state, non-profit, self governing international educational institution with a regional focus for the purposes set forth in this agreement and shall have full academic freedom for the attainment of its objectives.
2. The main campus of the University shall be located in India.
3. The University shall have full legal Personality.

4. The legal capacity of the University shall, *inter alia*, include:
  - (a) The power to confer degrees, diplomas and certificates
  - (b) The capacity to contract;
  - (c) To sue and be sued in its name;
  - (d) To acquire, hold and dispose of properties;
  - (e) To establish campuses and centres in the region; and
  - (f) To make rules, regulations and bye laws for the operation of the University.

### **Article 2** **Objectives & Functions of the South Asian University**

The objectives and functions of the University shall, *inter alia*, include:

1. To create a world class institution of learning that will bring together the brightest and the most dedicated students from all countries of South Asia-irrespective of gender, caste, creed, disability, ethnicity or socio-economic background - to impart to them liberal and humane education and to give them the analytical tools needed for the pursuit of profession and inculcate in them the qualities of leadership.
2. To build a South Asian community of learning where every student will be able to develop her/his fullest intellectual potential and to create a South Asian community by strengthening regional consciousness;
3. To impart education towards capacity building of the South Asian nations in the domain of science, technology and other areas of higher learning vital for improving their quality of life;
4. To contribute to the promotion of regional peace and security by bringing together the future leaders of South Asia, and enhancing their understanding of each others' perspectives.
5. To foster in the students sound civic sense and to train them to become useful citizens of democratic societies;

### **Article 3** **Funding**

The University shall be a non-profit public-private partnership, which will seek support from each of the national governments of member states and

from other sources but will be autonomous and accountable to its board of trustees/governors.

#### **Article 4** **The Fiscal Status**

1. The University and its campuses and centres shall be exempted, in the state where it is located, from paying and from collecting all direct and indirect forms of taxes and duties for the establishment and operations of the University.
2. The University shall enjoy treatment in relation to priorities, rates and charges for utilities that are not less favourable than that accorded to state owned enterprises and universities.
3. The University shall have the right to accept inter vivos as well as testamentary gifts, contributions, and donations in cash or in kind for the objectives of the University. All such gifts and donations from any legal or physical person are fully deductible without any limit against the income of such donor or contributor in the respective Founding States.
4. Taxation and social protection of the citizens of the Founding States employed by the University shall be regulated in accordance with the national legislation of the respective States. The employees of the University from countries other than the host country will be governed by the income tax laws of the home countries and will not be taxed as per the laws of the host country.

#### **Article 5** **Governance Structure**

1. The University shall be governed by a Governing Board, composed of two members from each member state, and will be headed by a Chairperson. The Chairperson shall be elected from among the members of the Governing Board.
2. Each member of the Governing Board shall serve office for a fixed term of three years, and shall not hold office for more than two consecutive terms. The members shall be selected from amongst the distinguished persons from the region and shall be responsible for the overall policies and directions of the University. The powers and functions of the Chairperson of the Governing Board and the role of the Board shall be decided as per the rules and regulations of the University.

3. The University shall be headed by a President, appointed by the Governing Board. The appointment, tenure, powers and functions of the President shall be decided as per the rules and regulations of the University.
4. The President shall also be the Chief Executive Officer (CEO) and an ex-officio member of the Governing Board. The President as the CEO of the University, will report to the Board and hold office at the pleasure of the Board. He will be responsible for implementing the vision and the foundation statement of the University, ensuring the purposes and objectives of the University, upholding uniformly high academic standards, and fulfilling the policy directives of the Board of the University.
5. The President as the Chief Executive Officer of the University shall act under direction of the Governing Board. The President shall be assisted by an Executive Council. The President shall constitute the Academic Council, different committees and appoint the principal officers of the University as per the bye laws.

#### **Article 6** **Visa and Resident Permit**

The Member States shall provide appropriate visas to the students, faculty and staff for travel in all the SAARC Member States and grant necessary resident permit for students, faculty and administrative staff to work in the University and its different campuses, centres and collaborative educational institutions.

#### **Article 7** **Recognition of the Degrees**

This Agreement shall facilitate the mutual recognition of degrees and certificates awarded by the University in all the SAARC Member States at par with the degrees and certificates issued by their respective national universities/institutions.

#### **Article 8** **Amendment**

This Agreement may be amended by consensus amongst the member states. Any member state proposing amendment(s) shall notify the other member states through SAARC Secretariat. Such amendment(s) shall

become effective upon the notification issued by the SAARC Secretariat on completion of formalities, including ratification by all member states.

**Article 9**  
**Entry into Force**

This agreement shall enter into force on completion of formalities including ratification by all member states and upon issue of notification there of by the SAARC Secretariat.

**Article 10**  
**Depository**

This Agreement shall be deposited with the Secretary General of SAARC.

**IN WITNESS WHEREOF**, the undersigned being duly authorized thereto by their respective governments have signed this agreement on establishment of South Asian University.

**DONE** at New Delhi on this the Fourth Day of April, Two Thousand Seven in ten originals in English language.

**188. Press Release of the Ministry of External Affairs on the First Meeting of the SAARC Transport Ministers.****New Delhi, August 31, 2007.**

The first Meeting of the SAARC Transport ministers was hosted by India on August 31, 2007 in New Delhi. This Meeting was preceded by the 2nd Meeting of the Technical Committee on Transport (August 29, 2007) and 2nd Meeting of the Intergovernmental Group on Transport (August 30, 2007).

2. The Meeting deliberated on the Report of the SAARC Regional Multimodal Transport Study prepared and funded by Asian Development Bank (ADB) and recommended extending the SAARC Regional Multimodal Transport Study (SRMTS) to include Afghanistan.
3. In keeping with the spirit of the decisions taken at the 14th SAARC Summit to move SAARC from the declaratory to the implementation stage, the Ministers had constructive and focused deliberations. The following pilot sub-regional and regional projects were recommended by Bhutan, India and Sri Lanka for consideration of the SAARC Member States:

**Bhutan:**

- i. Linkage from Phuntsholing to Hashimara
- ii. Procurement of customs related equipment for faster clearance of cargo.

**India:**

- i. Birgunj-Kaatihar-Singhabad-Rohanpur-Chittagong with links to Jogbani, Biratnagar and Agartala
- ii. Kathmandu-Birgunj-Kolkata/Haldia
- iii. Agartala-Akhaura-Chittagong
- iv. Air-connectivities: Malé-New Delhi and Islamabad-New Delhi

**Sri Lanka:**

- i. Rail Corridor No. 5 between Colombo and Chennai

- ii. Ferry Service between Colombo and Cochin
- iii. Colombo and Tuticorin as two pilot projects
4. Member States would be examining the viability/desirability of these projects for reporting to the Third Meeting of the Inter-Governmental Group on Transport scheduled to be held in Sri Lanka in second week of March 2008.
5. The Member States examined the preliminary technical inputs provided by the Asian Development Bank and the alternate draft motor Vehicles Agreement proposed by India. The SAARC Secretariat would prepare the final draft after consolidating all Member States views on it.
6. A presentation on Postal Connectivity by India was appreciated by Member States.

**189. Speech by External Affairs Minister Pranab Mukherjee at National Seminar “SAARC: Accelerating Cooperation through Connectivity” organised by Ministry of External Affairs -Federation of Indian Chambers of Commerce and Industry-Research and Information System (RIS)-Global India Foundation (GIF).**

**New Delhi, September 1, 2007.**

Distinguished Speakers, Ladies and Gentlemen,

I am delighted to be present here today to inaugurate this National Seminar on SAARC. The initiative taken by the Public Diplomacy Division and the SAARC Division of MEA is in keeping with the mandate that was given to the Public Diplomacy Division<sup>1</sup> to find

---

1. Ever since its creation in April 2006, the Public Diplomacy Division of MEA has been in contact with researchers, think tanks, academia, civil society and industry, both within India and abroad, to highlight the contours of Indian foreign policy, as well as initiate debate and discussion within the wider public about the key foreign policy issues confronting India. It is in furtherance of these objectives that the Public Diplomacy Division organized this seminar to discuss the opportunities and challenges to accelerating cooperation within SAARC.

multiple ways and means of informing the public about our foreign policy initiatives and more importantly to hear their views. It gives me great pleasure to see that this conference has been organised in partnership with FICCI which is the Indian Chapter of the SAARC Chamber of Commerce and Industry, the RIS which is a premier think-tank and the Global India Foundation which is the local partner in Kolkata. I was also particularly keen that our dialogue with civil society should not be restricted to Delhi. In the last few months, such interactions have been organised in Shillong and now in Kolkata. Over the next few months, meetings are planned in Srinagar, Guwahati, Pune, Nagpur, Mumbai, Thiruvananthapuram and Chandigarh. These kind of extensive outreach activities are the rationale behind the creation of the Public Diplomacy Division.

2. Today's conference is focussed on SAARC and how greater connectivity would give impetus to regional cooperation. As the current Chair of SAARC, I feel the role we can play in regional cooperation will only be strengthened if there is acceptance among our people of the benefits that accrue from such cooperation. At times, there is reticence among certain sections in society because of perceived challenges. I think it is important to identify these challenges and to sit across the table and frankly and candidly discuss how such challenges can be overcome. What I would, however, like to tell all my friends here, who represent so many partner institutions, is that protectionism as a buffer against regional cooperation is neither a credible nor a legitimate strategy. After all, let us recognise realities: India is the only country which shares a geographical border with the majority of SAARC nations. Can we, then, think of protectionism as a strategy to safeguard against competition? I do not think so. I believe that geography and the unique shared values of the South Asian region should be the building blocks for regional cooperation.
3. The essential theme of the 14th SAARC Summit in New Delhi was Connectivity; physical connectivity, economic connectivity and people-to-people connectivity. I am happy to note that this conference will address each of these issues. I was going through the agenda and in the real business sessions which will start after this inaugural will focus on each of these items, and I am looking forward to the conclusions of today's business.
4. Before I discuss these specific issues and why Connectivity was

specifically identified as a theme, I think it is important to flag that India has always believed that if we are beset with the serious problems of inequality, hunger, poverty and the lack of development, these are also issues that should bring our governments together in the collective pursuit of regional cooperation as a means of addressing them. India has been a strong advocate of regional cooperation as the basis for development and the 14th SAARC Summit has placed important responsibilities on our shoulders, which we will discharge.

5. Physical connectivity makes it incumbent for us to find ways and means through which we are able to facilitate not only the movement of goods but also of people and services. This will act as a major stepping stone in the east for our Look East policy and in the west, to our links with Central Asia. Such physical connectivity will act as a gateway to invigorated economic activity. Trade and investment constitute a core fundamental, in my view, to enhanced relations between our countries. Industry and Commerce for mutual benefit will open up an entirely new dialogue avenue. We believe this is possible in South Asia. What we also believe is that if SAARC succeeds, South East Asia and Central Asia will open up to our economies at a faster pace.
6. The question that I am sure many will ask is whether SAARC will succeed. It was created over twenty years ago and if in this timeframe, the sceptics will ask, it has not been able to demonstrate any major tangible benefit, what does the future hold? I can only say that at a time of rapid economic globalisation and the integration of the national economies in the global economic system, coupled with the current stalemate in the WTO negotiations, there is no alternative to accelerated regional economic cooperation. The trend of discussions in the Doha Round seems to suggest that development is not a core concern of the developed countries. With the composition of SAARC, development is, in my view, our core concern. Growth for us is important. But growth without development is not our objective or end game. I believe that none of the SAARC countries would disagree with me on this. Common prosperity is indivisible and interdependent. I will request FICCI to take a serious look into this and to consult other chambers in particular, the small and medium enterprises who might feel threatened. We simply cannot, by virtue of our size, succumb to protectionism. Let us lead the way.

7. On people-to-people contact, I believe we have all made a positive beginning. A liberalised visa regime for students, teachers, professors, journalists and patients is to be introduced. A SAARC Cultural Festival will be held, which we are trying to organise keeping in mind the current likes and dislikes of today's youth. For example, the popular Saregama Music Award ceremony, is being tailor-made for SAARC participation. There will be a fashion show and a food festival to supplement these events. Student Exchange Programmes during this time will bring together schools and universities within SAARC on a common platform for exchange of ideas in education and greater understanding of each other's priorities. Most importantly, worth mentioning here is the decision to set up a SAARC University in India. This will be a unique centre of excellence where young minds from the region will be nurtured and encouraged to respond to the demands of globalisation and the opportunities of regional cooperation.
8. The theme of connectivity is, thus, critical to regional cooperation and dialogue. The Ministerial Meeting on Transport which concluded yesterday has identified a select list of road, rail and waterway corridors for facilitating travel of people and goods amongst the SAARC member states. To my mind, this is an important step forward. I look forward to the deliberations of the forthcoming meetings of the Finance Ministers, as well as of the Commerce Ministers to assess the progress on the negotiations of SAFTA. There will be a meeting of Home Ministers which would not only address regional security concerns, such as transnational crimes, terrorism, narcotics and psychotropic substances, but also look at measures on how national legislation and procedures may be harmonised for the benefit of victims of crime and human trafficking, and explore how they should be rehabilitated. Here I entirely agree with the observations of the Chief Minister of West Bengal that terrorism which is going to be the biggest menace and a stumbling block on the road of development should be treated fairly and squarely. Perhaps the time had come when the International Community, communities in the region as a whole will have to accept a policy of zero tolerance towards terrorism.
9. I believe that meetings of this nature would give us a clearer insight on how civil society sees the process of regional cooperation. Your views will assist us in our deliberations, both internally and with our SAARC partners. I would only urge that when you think and suggest, think of the bigger picture.

10. I thank you for your patience and take pleasure in inaugurating this important national conference.

**190. Speech of Finance Minister P. Chidambaram at the second meeting of the Finance Ministers of the SAARC.**

**New Delhi, September 14, 2007.**

The Hon'ble Ministers of the SAARC Member Countries reviewed the progress made in SAARC since the First Meeting of the SAARC Finance Ministers held in Islamabad in July 2006. The Hon'ble Ministers, in their country statements, informed the distinguished gathering about the domestic financial situation and the reforms being undertaken in their respective countries. They lauded the recent initiatives in SAARC including SAFTA, increasing harmonization of financial norms between Member States that have led to increase in the growth of the South Asian economies. In keeping with the spirit of the decisions taken at the 14th SAARC Summit to move SAARC from the declaratory to the implementation stage, the Ministers had constructive and focused deliberations identifying specific areas for cooperation in the field of finance.

All Member States agreed that early operationalization of SAARC Development Fund (SDF) should be expedited by an urgent finalization of its Agreement. This would accelerate the implementation of sub-regional projects identified under its Social Window. They approved the recommendation of the Finance Secretaries on identifying three areas namely Maternal and Child Health; Women's empowerment; and Capacity Building for enhancing the quality of education for project implementation under SDF. The Meeting recommended that the Sub-Group on Investment and Arbitration be directed to finalize the Agreement and submit it for the approval of the next session of the Standing Committee which will meet in December 2007. The Meeting directed the Inter-Governmental Group on Financial Issues to develop a roadmap for achieving the South Asian Economic Union in a phased and gradual manner.

In order to facilitate institutional cooperation aimed at development of Capital Markets in the region, the Meeting recommended Harmonization of Securities Market regulations; facilitation of cross-border transaction on the Capital Side; and Formal

Agreements among regulators and Ministries of Finance of SAARC Countries. The Meeting recommended the establishment of an Expert Group on Development of Capital Markets in South Asia.

On behalf of the Chair of SAARCFINANCE, Deputy Governor, Reserve Bank of India Shri Rakesh Mohan presented the report of the SAARC FINANCE for consideration of the Hon'ble Ministers. The SAARCFINANCE is a regional network of SAARC Central Bank Governors and Finance Secretaries that work towards harmonization of banking legislation and practices within the region and strive for higher monetary and exchange cooperation.

India, as a current Chairman of SAARC, took a lead role in offering training programmes for the SAARC countries and identifying new areas of cooperation like Financial Inclusion. India offered to provide relevant capacity building support for the development of Capital Markets in the region at the National Institute of Securities Market.

Maldives offered to host the Third Meeting of the SAARC Finance Ministers in Male in early 2009.

The heads of delegations who attended this conference were: 1. H.E. Dr. Anwar ul Haq Ahady, Minister of Finance, Islamic Republic of Afghanistan; 2. H.E. Dr. A.B. Mirza Azizul Islam, Hon'ble Adviser, Ministry of Finance & Planning, Government of the People's Republic of Bangladesh; 3. H.E. Lyonpo Leki Dorji, Minister for Information and Communications, Bhutan; 4. H.E. Mr. P. Chidambaram, Finance Minister, India; 5. H.E. Mr. Mohamed Ahmed, Financial Controller, Ministry of Finance, Maldives; 6. Hon. Dr. Ram Sharan Mahat, Minister of Finance, Nepal; 7. Dr. Salman Shah, Adviser to Prime Minister on Finance, Revenue, Economic Affairs and Statistics, Pakistan; 8. Hon. (Dr.) Sarath Amunugama, Minister of Enterprise Development and Investment Promotion, Sri Lanka; 9. H.E. Mr. Chenkyab Dorji, Secretary General, SAARC Secretariat.

**191. Press Release of the Ministry of Finance on the Conference of the Finance Ministers of the SAARC countries.**

**New Delhi, September 15, 2007.**

The Hon'ble Ministers of the SAARC Member Countries reviewed the progress made in SAARC since the First Meeting of the SAARC Finance Ministers held in Islamabad in July 2006. The Hon'ble Ministers, in their country statements, informed the distinguished gathering about the domestic financial situation and the reforms being undertaken in their respective countries. They lauded the recent initiatives in SAARC including SAFTA, increasing harmonization of financial norms between Member States that have led to increase in the growth of the South Asian economies. In keeping with the spirit of the decisions taken at the 14th SAARC Summit to move SAARC from the declaratory to the implementation stage, the Ministers had constructive and focused deliberations identifying specific areas for cooperation in the field of finance.

All Member States agreed that early operationalization of SAARC Development Fund (SDF) should be expedited by an urgent finalization of its Agreement. This would accelerate the implementation of sub-regional projects identified under its Social Window. They approved the recommendation of the Finance Secretaries on identifying three areas namely Maternal and Child Health; Women's empowerment; and Capacity Building for enhancing the quality of education for project implementation under SDF. The Meeting recommended that the Sub-Group on Investment and Arbitration be directed to finalize the Agreement and submit it for the approval of the next session of the Standing Committee which will meet in December 2007. The Meeting directed the Inter-Governmental Group on Financial Issues to develop a roadmap for achieving the South Asian Economic Union in a phased and gradual manner.

In order to facilitate institutional cooperation aimed at development of Capital Markets in the region, the Meeting recommended Harmonization of Securities Market regulations; facilitation of cross-border transaction on the Capital Side; and Formal Agreements among regulators and Ministries of Finance of SAARC Countries. The Meeting recommended the establishment of an Expert Group on Development of Capital Markets in South Asia.

FINANCE for consideration of the Hon'ble Ministers. The SAARCFINANCE is a regional network of SAARC Central Bank Governors and Finance Secretaries that work towards harmonization of banking legislation and practices within the region and strive for higher monetary and exchange cooperation.

India, as a current Chairman of SAARC, took a lead role in offering training programmes for the SAARC countries and identifying new areas of cooperation like Financial Inclusion. India offered to provide relevant capacity building support for the development of Capital Markets in the region at the National Institute of Securities Market.

Maldives offered to host the Third Meeting of the SAARC Finance Ministers in Male in early 2009.

**192. Press Release issued by the Ministry of Home Affairs on the second meeting of the SAARC Home/Interior Ministers.**

**New Delhi, October 25, 2007**

India hosted the Second SAARC Meeting of Ministers of Interior/Home here today under the Chairmanship of Union Home Minister Shri Shivraj V. Patil. Today's meeting was preceded by the meeting of the SAARC Interior/Home Secretaries yesterday and the meeting of the Police Chiefs on October 23. Afghanistan attended the meeting for the first time after its induction into SAARC.

The Home Ministers reiterated their commitment to the 14th SAARC Summit Declaration of moving from the declaratory to the implementation phase and reaffirmed their commitment to the need for a secure environment for facilitating economic growth, development and progress of the region. The Home Ministers also expressed satisfaction at the working of the institutional mechanisms within the ambit of the Home Ministries and urged enhanced coordination and networking among the police forces of the SAARC countries.

The meeting noted that terrorism remains a serious threat to sustainable peace and development in the SAARC region, and called upon the Member States to strengthen institutional mechanisms with the aim to facilitate closer co-operation and more frequent interaction and regular exchange of

information amongst the law enforcement agencies of the Member states to effectively combat the menace of terrorism and other related crimes such as drug trafficking money laundering, human trafficking, arms smuggling, counterfeit currency etc.

The meeting considered the recommendations made by the Secretaries in the 2nd SAARC meeting of Secretaries of Interior/Home held yesterday, which, in turn, had considered the recommendations made by the Police officials in the Sixth SAARC Conference on Cooperation in Police Matters held on 23.10.2007.

Considering the need for more frequent and higher level of interaction, the Ministers agreed that the SAARC Conference on Cooperation in Police Matters should be upgraded to the level of Police Chiefs and should be held bi-annually as against the present system of annual meetings. Pakistan has offered to host the next meeting at Islamabad in February 2008. The Ministers also agreed that the SAARC Terrorist Offences Monitoring Desk (STOMD) and the SAARC Drug Offences Monitoring Desk (SDOMD), located in Sri Lanka, need to be strengthened and operationally energized. The meeting noted the Indian offer to provide assistance in strengthening the infrastructure of these Desks. The implementation of the SAARC Regional Convention on Suppression of Terrorism and the Additional Protocol and SAARC Convention on Narcotic Drugs and Psychotropic substances was reviewed and progress appreciated, while reiterating the need for pro-active and sustained measures and mutual co-operation to combat these phenomena.

With regard to the proposed SAARC Convention on Mutual Legal Assistance in Criminal Matters, it was agreed that the process should be accelerated and Legal Advisers from SAARC countries should meet for the second time by April, 2008 to examine the draft of the Convention. Sri Lanka's offer to host this meeting in early 2008 was welcomed.

The Ministers also discussed the SAARC Visa Scheme. It was agreed to provide a special tenure-linked dispensation to the officials of the SAARC Secretariat. It was also agreed that retired Judges of Supreme Court/serving High Court Judges should be included in the Consolidated List of Entitled Persons.

Later today, the Interior/Home Ministers are scheduled to proceed for a Retreat at Agra where informal consultations will be held.

**193. Message of Prime Minister Dr. Manmohan Singh on the 22nd Anniversary of the signing of the Charter establishing SAARC.**

**New Delhi, December 3, 2007.**

It gives me great pleasure to extend greetings and felicitations to all fellow South Asians on the 22<sup>nd</sup> anniversary of the signing of the Charter establishing the South Asian Association for Regional Cooperation.

An integrated South Asia will bring great benefits to the people of the region. It was in recognition of this that the 14<sup>th</sup> SAARC Summit in New Delhi decided to emphasize the implementation of many important regional initiatives. The early ratification of SAFTA and the decisions to establish the SAARC Development Fund, a South Asian University, and the SAARC Food Bank are important steps in this direction, which we seek to actively promote.

It is my hope that SAARC will become, a shining example of regional cooperation and reflect the immense potential and shared heritage of the people of South Asia.

I would take this opportunity to reaffirm India's commitment to working with all SAARC member countries to realise the aspirations and goals that are enshrined in the SAARC Charter.

## **194. Media Briefing by Foreign Secretary Shivshankar Menon on the SAARC Council of Ministers meeting.**

**New Delhi, December 4, 2007.**

**Official Spokesperson:** Ladies and Gentlemen, welcome to this briefing by the Foreign Secretary on the SAARC Ministerial Conference which has already started at the Programming Committee level before we go on to Foreign Secretaries' level tomorrow. May I request FS to say a few words and then we will take questions.

**Foreign Secretary:** Thank you Navtej. I thought we will brief you about the SAARC Council of Ministers which is going to take place on the 7th and 8th of December here in New Delhi. This is the inter-sessional Council of Ministers. As usual, it will be preceded by two days of the Standing Committee, on the 5th and 6th, where the Foreign Secretaries are present. Today and yesterday, the Programming Committee, which is at the DG level, the Joint Secretary level, has been preparing for the other two meetings.

This is the inter-sessional meeting which takes places between Summits. As you know, we normally do our Summits in the first quarter of the year. The last Summit, the Fourteenth Summit, was held in New Delhi in April. The inter-sessional Council of Ministers normally looks at implementation of the various decisions of the Summit; checks whether any adjustments or anything is due in what SAARC is doing and how implementation is going; sees what things we can push forward; and what we can hope to achieve at the next Summit. In that sense it is an important meeting because it is a chance for making sure that we are implementing something and also for course corrections, if necessary. It gives everybody an opportunity to look at the SAARC programme in considerable detail.

At the Fourteenth Summit, you would remember, there were three main things that we tried to achieve. We tried to move SAARC from a declaratory phase to an implementation phase. I see some of you smiling. You have heard that phrase before. But I think for the first time, may be to your surprise I hope, we have managed to achieve something. I will get into that. The other thing that I think we all felt very necessary was connectivity. You remember we spoke of connectivity not just physical - roads, railways and airlines - but also of connectivity of the mind, of people, of ideas and so on. The third thing was to put in place some of the institutions that this requires. We have made a beginning on the SAARC Development Fund but have

not quite completed that work. We were talking about a Bilateral Investment Protection and Promotion Agreement. We had actually signed the agreement on the South Asia University. We have signed the agreement on the Regional Food Bank which will make food grains stocks available to each other. We have several other ideas to provide the institutional framework in which we could do these things. What these meetings will do is really see how well we have done on all these fronts.

In terms of operationalising SAARC, there were two big ideas. One was at the retreat, you remember at the end PM has announced, the leaders had identified four areas where they thought we should do concrete regional or even sub-regional projects between two countries or three countries. They were food, water including flood control, energy and environment. In all four of these what we have done is we have talked to each other, we have established, we have we think the outlines of certain projects. For the first time we had also said we will go to multilateral agencies to help us to draw up the projects, to implement them, if necessary to provide funding as well. So, we have done that. We have some projects on the table - which we will now take to the Ministers, take to the Standing Committee - which we have developed, for either two countries, three countries, four countries or whoever is interested. We will take that.

We also have made considerable progress on some ideas that we have been talking about. On telemedicine, for instance, we have a project ready to go or most of the countries have identified the hospitals concerned. The infrastructure is in place and we have that ready to go. We will look at those projects as well.

In terms of connectivity, at the last Transport Ministers' meeting which was held from 29th to 31st of August in Delhi, we had identified a series of, in fact it is a fairly long list, specific linkages. You know, Phuntsholing to Hashimara, for instance in Bhutan, improving customs related equipment at some of visa and customs stations in SAARC countries, Birganj, Katihar, Chittagong links all the way across which would involve Nepal, India, Bangladesh, Kathmandu, Birganj, Haldia link. They are very concrete sort of specific proposals of what we need to do like air connectivity between Male- New Delhi and Islamabad-New Delhi none of which exists right now. There is a Rail Corridor between Colombo and Chennai which would involve some ferry, some transshipment and creating a Rail Corridor; and maybe even a ferry service between Cochin and Colombo, for instance. Very concrete specifics which we hope that once the Council can approve, they

will look at it, discuss it, see which ones they are comfortable with or we can move to implementation.

Thirdly, in the institutional side we will review how far we have got on the two agreements we have signed. I think they have been signed, ratified by some countries; we will encourage the others to. We will also report the progress we have made on the South Asia University because there is an Inter-governmental Steering Committee which has been meeting. There two Vice-Chancellors from each country on this Steering Committee. They have gone through a fairly detailed round of how they need to appoint a CEO, devise an academic plan for the University, devise a business plan also on how it will run. We as India are committed to providing land and the CEO. That Steering Committee has met twice and produced a report. So, we hope to do that.

On Food Bank also, we have done what we had to do. On the other two things which we thought would help us to implement many of these projects, the SAARC Development Fund, is very close to finalization. The Finance Ministers met here last month. We think we might even be able to do it this time around at the Council of Ministers, at least to freeze an agreed text if we can. We will try and do that. We will need a little more discussion among ourselves. The Investment Protection Agreement also is very close. I think we have discussed it at considerable length. I think we are now all comfortable with what we have. But we need to find the precise words to express what we think we all agreed, which we will do, we hope, in the next few days.

All in all it has not been a bad period for SAARC. In fact Secretary-General Lyonpo Chenkyab Dorji was saying that he cannot think of a time when SAARC has done as much in as little time. So, I think it has been a good period for SAARC, but let us see. At these meetings we will see what else we can do. There were some things in the declaration where, you remember it was supposed to adopt a village in each country and to see whether SAARC could then help to develop those. I think we are now moving towards the idea of actually adopting clusters of villages rather than just one model village. We hope that each of the countries has done some homework. We have talked about it and we hope that at this meeting we can maybe make some progress on that idea as well.

They have a busy agenda. As I keep saying, it is a very practical and concrete agenda. I think that is really what SAARC should be. So, when we said it is moving into a phase of implementation, we are maybe not self-satisfied because we always want more, at least we can say we have done a fair amount in this period.

The other big thing that you would remember that in the Declaration was the connectivity of the mind, of the ideas, people-to-people contacts. I think what we are trying to do during this year is to try and involve younger people, do much more student exchanges. Right now we have a student exchange programme where they are doing home stays, children from SAARC countries staying in other SAARC countries and spending an extended period in the school in the other country. In fact, they are doing it right now. I do not know if any of you saw the bands festival in Connaught Place. It is an attempt really to get younger people involved in SAARC so that it does not stay just a bureaucratic exercise with people like us sitting around the table and talking. I think there is some success in it. But let us see, we will look for new ideas when we have any other ideas.

There is a SAARC Food Festival this week by the way in Delhi for those of you who are interested. There will be a fashion festival, there is a folklore festival, textile festival. SAARC countries were our partner countries in the Trade Fair as well. There will be folklore festival as well. I think the idea is to get SAARC out among the people doing non-bureaucratic things. Let us see. I hope it works.

I will be happy to answer any questions.

**Question:** Is SAFTA being implemented?

**Foreign Secretary:** SAFTA is being implemented by those who want to, which is all of us, except Pakistan for India. We have implemented SAFTA for all the SAARC members.

**Question:** How many countries are sending their Foreign Ministers? I understand Pakistan is sending Mr. Inam ul Haque. But will it lessen its importance somewhat because he is caretaker Foreign Minister. What about bilateral meetings on the sidelines?

**Foreign Secretary:** I should have mentioned this actually. All the SAARC Foreign Ministers will be collectively calling on the Prime Minister on Saturday. Before that, during the Council of Ministers, it is customary for the Ministers to have bilateral meetings on the sidelines. Our Minister will be looking forward to meeting all his counterparts from other SAARC countries including the Foreign Minister of Pakistan. How much business they want to do, what they want to do, is what we have to leave to them to decide between themselves.

**Question:** What if we they not?

**Foreign Secretary:** As far as we are concerned, there will be a bilateral. The External Affairs Minister will have a bilateral with each of his counterparts. How much it will do, what they will achieve, let them meet and discuss. I am not going to sit here in judgment about how much capacity, power, what they are going to do and predict what is going to happen. I have said this before, I am not an astrologer.

**Question:** This bilateral is going to take place at a point of time when the Fourth Round of Composite Dialogue is over and the review meetings are remaining. Will the dates and schedules of the review meeting be decided?

**Foreign Secretary:** I will tell you the outcome of the meeting when it happens.

**Question:** Is there any agenda prepared for them?

**Foreign Secretary:** I think there is a normal review. They review the state of bilateral relations, what can be done to improve them, carry them forward and they discuss issues of common concern in the international arena.

**Question:** This is about Iran. Can I ask?

**Foreign Secretary:** Sure.

**Question:** There is a report early this morning saying that US intelligence agencies have found that Iran stopped its nuclear programme in 2003. What is your reaction to that?

**Foreign Secretary:** Like you, I have seen the report. I believe they have issued the National Intelligence Estimate; the last one was in 2005. I have just seen the reports. We would like to look at the Estimate, study it and then we will give you a considered reaction.

**Question:** Do we have our intelligence assessment of Iran?

**Foreign Secretary:** We do our own assessment of what concerns us. But let me study what it says first. Because until I know what it says, I cannot tell you what we think of it.

**Question:** But what is our independent assessment of Iran's nuclear programme?

**Foreign Secretary:** I will tell you when we come to it.

**Question:** Talking about air connectivity, especially Islamabad-Delhi flight,

where are we at this point? On the targeting of the Indian community in Malaysia, how are we taking up this issue? Apparently this has been going on for many years. Were we aware of this or this kind of just erupted all of a sudden?

**Question:** If I can add my question on the situation in Malaysia, did we call in their envoy to the South Block and make him aware of our position?

**Foreign Secretary:** On air connectivity, for the Islamabad-Delhi flight we have agreed in principle that we would like such a flight. But I think both the airlines, the designated national carriers - which under the present agreement, are Indian Airlines and PIA - have said that they have capacity constraints; they do not have enough planes. We have been discussing, therefore, bilaterally with Pakistan whether we can designate private carriers or not. We have scheduled a round of civil aviation talks with Pakistan early next year where we will go over this. We will see what the possibilities are. But in principle both sides have agreed that we would like these flights to take place.

On the situation in Malaysia, I must make it clear that you have seen the levels of concern in India about the reactions among the Indian-origin community - these are Malaysian citizens - to their treatment. It was raised in Parliament. We have drawn the attention of the Malaysian authorities to the widespread concern in India. We have made it clear to them that this is something that naturally is a social concern. We have been assured by them, when we raised it with their Mission here, that they will do everything they can to deal with this issue which they regard as an internal issue of Malaysia.

**Question:** Was the Malaysian High Commissioner called in?

**Foreign Secretary:** There is no Malaysian High Commissioner here. There is an Acting High Commissioner. But we did talk to their Mission yesterday.

**Question:** ...*(Inaudible)*... ... suggested that ...*(Inaudible)*...

**Foreign Secretary:** I do not think so.

**Question:** A follow up on Malaysia. There is a report that the HINDRAF leaders will be in Delhi and there is a meeting scheduled for them?

**Foreign Secretary:** I have nothing more for you except what I told you.

**Question:** This is a SAARC-related question. During the regime of Ms Jayalalithaa, on the Rail Corridor between Chennai and Colombo she had

put her foot down on security reasons. Similar concerns were raised on the Kochi and Colombo connection as well. How is the present State Government placed? What is your sense? Are we at a security risk?

**Foreign Secretary:** First of all I said, we first have a Technical Study, which was also helped by the ADB, which identified a whole series of such projects not only the ones between India, Sri Lanka, but across the board. Then they came through the sieve of the Transport Ministers meeting where the Transport Ministers looked at what they thought was important to them from the point of view where is the traffic, what is important, what is feasible, what they think is worth doing. They have done that. Now, it will come to the Council of Ministers where we will see which ones we are comfortable with. The rest is an internal process. We as India will subject it to our own international examination. We will see. So, this is as true of the Cochin-Colombo ferry, it is as true as Phulbari or Darjeeling. It is true of any of these. It will go through a process of being examined by each Government. They will see whether they are comfortable with. These are the results of the technical exercise which has thrown them up. The answer to your question is we will go through the technical process as India, which includes everybody in India by the way including State Governments and whoever. We will go through the process of seeing what we are comfortable with, which we think have potential, which ones are useful for us; and we will discuss it with our partners and we will see.

**Question:** Has the question of security considerations been resolved?

**Foreign Secretary:** Security is one of the issues in any thing. Security is one issue, economic viability is another, need is another and there has to be mutuality of benefit in any such project. You cannot end up doing a project between three countries which only benefits one. There is a whole series of criteria and security is one always.

**Question:** You spoke about getting SAARC operational. You spoke about a whole lot of projects. Which out of these projects will be the first to see the light of day? Do you have any time-line for any of these projects?

**Foreign Secretary:** I think the telemedicine is ready to go right now because the infrastructure exists, the institutions have been identified and they have been in touch with each other. We think that we can get back and do it right away. But all of them are at various stages of realization. We would like to see as many as possible in as little time.

**Question:** What about the University project?

**Foreign Secretary:** The University is a bigger issue. Building of university is not an overnight job. Even if you do have set up the university, which I do not think is something you can do in six months or one year, to develop the whole culture of a good university will take time. The ambition, as you may remember, of the Summit was to build a world-class university. That is not something you do overnight or just by declaring it world-class. But it will happen. One of the aspects is to do an academic plan, somebody will also have to do the whole business plan of how it will run. The idea on the agreement was to have an autonomous institute which we would set on its own feet and also that there would be some public-private partnership in the establishment of this. That was the original idea, remember, when we talked about it in April. This has to be worked out and then ultimately the Inter-governmental Steering Committee, where all countries are represented, will have to find the best way. There are several plans on the table, several ideas.

**Question:** Just a clarification on the Malaysian issue. You spoke to the Acting Malaysian High Commissioner.

**Foreign Secretary:** Not me.

**Question:** The Ministry spoke to the Acting Malaysian High Commissioner. Was he called to South Block? Did the meeting happen in South Block? Also, when you said they said it is an internal problem, was that a response to your drawing attention to the widespread concern?

**Question:** I think that is something that we accept that it is an internal problem. It is not that we do not accept that. Yes, I think they had the conversation yesterday in South Block.

**Question:** ...*(inaudible)*...British Columbia is in town. I am just wondering if the issue of support to Khalistani extremists within Canada will be raised with him? Is that an issue of concern which we still talk about to the Canadians?

**Foreign Secretary:** There are extremist elements in most societies and especially in open democratic societies they find the space to operate. So, it is an issue that comes up in our conversations with Canada. But this is an issue where the authorities in both countries are on the same side. So, when we have something to do, something to deal with, yes, we mention it.

**Question:** Is it a concern?

**Foreign Secretary:** It has been a concern for some time but it is not as though it has certainly now become a concern or anything has increased recently.

**Question:** Reports coming out of Punjab police and IB, the Delhi blasts and Rahul Gandhi being on the hit list, etc., seem to suggest that there is a increase in terrorist activity. Is it reflected in the talks?

**Foreign Secretary:** I am not qualified to tell you whether criminal activity, terrorist activity is up or down. It is best to talk to those who actually know about these things. But as far as dealing with Canada, discussing this kind of activity with them, on counter terrorism we have a Joint Working Group with them. We discuss it with them. It is a regular feature of our conversations with the Canadian authorities.

**Question:** Is the Group working well?

**Foreign Secretary:** It works well.

**Question:** Is the problem to Delhi-Islamabad airlink only limited to shortage of planes or are there other reasons also?

**Foreign Secretary:** I can only tell you what they tell us. I am sure they will then study how much traffic there is, what the market is. But in principle the Governments have decided that all the capitals of SAARC countries should be linked by air. These are two of the links which do not exist – with the Maldives and with Islamabad, Pakistan – as far as we are concerned. Otherwise, we are connected to all the other SAARC capitals. But I can only tell you what the Airlines tell us that they do not have the aircraft right now, when they have new aircraft they hope to.

**Question:** What is the position in case of the Maldives?

**Foreign Secretary:** Right now we have connections through Trivandrum and Bangalore. But we have a decision in principle that we will open these direct routes between capitals.

**Question:** As a follow up, is the proposal of the private carriers coming up just from the Indian side or is the Pakistani side also interested?

**Foreign Secretary:** I think we have discussed it with Pakistan informally as well and they also seemed ready for that.

**Question:** Is there any plan to discuss common transport policy on the

lines of European Union? Will road connectivity to Nepal be finalized in this meeting?

**Foreign Secretary:** We have discussed a motor vehicles agreement for the region. In fact we had suggested that some time ago, there was a Technical Committee also. This is one of the ideas which were considered by the Transport Ministers. But it is not an idea that really has reached fruition yet. I think we still need a little time. It takes time, you know, for everybody to digest a new idea, look at it and see how it works for them. It will probably take a little time. But in the long run, yes, it is a goal that we will work towards. With Nepal, bilaterally we are working on road connectivity. Some of the things I mentioned under SAARC here, the ones I mentioned, are really trilateral. Most of them involve Nepal, India and Bangladesh.

**Question:** Yesterday the Navy Chief expressed concern about the delivery of the warship Gorshkov. While expressing his concern he had spoken to the extent of reviewing the relations with Russia. How much do you share with his ideas?

**Foreign Secretary:** I think you should ask him about what he says. As far as I am concerned, I am sure that we have excellent relations with Russia and any issues we have to discuss among ourselves I am sure we can settle happily.

### **195. Press Conference by External Affairs Minister Pranab Mukherjee after the 29th Council of SAARC Ministers Meeting.**

**New Delhi, December 7, 2007.**

**Official Spokesperson:** Welcome to this Press Conference by hon'ble Minister of External Affairs. May I request the Minister to kindly make his opening remarks? And then we will take a few questions. We will be circulating the statement afterwards.

**External Affairs Minister:** Good evening ladies and gentlemen.

The 29th session of the Council of Ministers met in New Delhi on 7th December, 2007. All SAARC member states participated in these meetings. The Council of Ministers reviewed implementation of decisions taken at the 14th SAARC Summit in New Delhi in April, and took important decisions to move SAARC from declaratory phase into implementation mode.

The Council of Ministers decided that the SAARC Development Fund be operationalised immediately. A temporary cell is being established in the SAARC Secretariat for its operationalisation, and implementation of identified projects from available funds. Several projects identified by Ministerial and other meetings will be implemented now. These include social sector projects and physical connectivity projects. A list of some of these is being distributed to you

I particularly draw your attention to social projects which will now be implemented in all our countries. These include maternal and child health including immunization, empowerment of women and other disadvantaged sections of the society, and capacity-building aimed at enhancing the quality of education including teacher training. A project on telemedicine is also commencing implementation.

The Council of Ministers also considered economic issues. They agreed that the development of regional infrastructure for trade as part of overall regional connectivity in South Asia should be given priority.

The Council of Ministers also endorsed the SAARC Home Ministers' recommendations for a security network within SAARC. They directed that the draft Agreement on Mutual Legal Assistance in Criminal Matters be finalized as soon as possible. A meeting of Legal Advisors to attempt to finalise the agreement will be held in Sri Lanka in April 2008.

The Council of Ministers deeply appreciated the contribution of the present SAARC Secretary-General, His Excellency Mr. Chenkyab Dorji, and the excellent work done by him during his tenure. The Council of Ministers approved the appointment of the new SAARC Secretary-General, who will be Dr. Sheel Kant Sharma from India.

The meeting of the Council took place when the effect of climate change on our countries is increasingly evident. Our deep concern at this phenomenon which threatens our people's lives and livelihood, and our conviction of the need for a global response has been expressed in a Declaration by the Foreign Ministers of the SAARC countries which is being released today. This is a significant beginning of an important SAARC initiative.

Owing to domestic preoccupations in 2008, the Maldives will be hosting the SAARC Summit in 2009. Sri Lanka has kindly offered to host the Summit in 2008 to coincide with the 60th Anniversary of Sri Lanka's Independence. The Council welcomed the Sri Lankan offer.

The Council's meeting was accompanied by several popular and cultural events which you are aware of including a Fusion Bands Festival, a Food Festival, a Textile Museum and a Folklore Festival. The popular response and the friendly, productive and smooth conduct of the Council meeting underlines the deep reservoir of goodwill existing between the SAARC countries and people. This augurs well for our common future.

Thank you.

**Question (Parul Malhotra):** What is the corpus of this Development Fund? Could you give us a sense of the bilateral with the Pakistani Foreign Minister?

**External Affairs Minister:** It is expected that the Fund would be of US\$ 300 million. But India already committed earlier - before this Fund was conceptualized even - we wanted to offer about a US\$ 100 million for the social projects. It has been decided that the work will start from this Fund, and as and when the other commitments come the Fund will be developed.

On the bilateral with Pakistan, yes, we had some discussions with Pakistan Foreign Minister, His Excellency Inam ul Haq. He mainly briefed me about the latest situation prevailing there, and also explained the situation. Election will be held sometimes in January, as you are aware of. The mandate of the present Government is to carry on the election and to complete the election process as per their Constitution. As you are aware, the Fourth

Round of Composite Dialogue has been completed and only the remaining part is left, wrapping up at the level of the Foreign Secretary. Both sides expressed hope that immediately after the installation of the new Government, Foreign Secretaries will meet and complete the Fourth Round. Thereafter we will launch the Fifth Round of discussion. The other mechanism which has been established among our countries will also be put into operation. Because of certain circumstances prevailing there we could not carry on the normal work which we were carrying on earlier. Bilateral trade between our two countries is expanding. I think this year it will be around US\$ 1.6 billion dollars. Confidence building measures in various sectors are also being worked out. Joint Survey on the Sir Creek has already been completed. Both sides will resume their discussions as soon as possible. Therefore, both sides exchanged our ideas about this process and how to carry it on. Of course, we will have to wait till the regular Government takes place and comes in position in Pakistan.

**Question (Seema Guha):** Could you give us some details about the security network within SAARC?

**External Affairs Minister:** I have given one detail. First there will have to be exchange of information amongst the SAARC countries because a number of SAARC countries are the victims of terrorism. Therefore, hard, real time information exchange is an important aspect which we can take into account while taking appropriate steps against this type of terrorist activities. The second thing is that we should have Mutual Legal Assistance Agreement amongst the SAARC countries to tackle the criminals and to prevent the undesirable activities. In my statement I have already mentioned that some work has been progressed. The legal advisors will be meeting in Colombo to finalise the text of this agreement. Once this text is finalized it will be approved by the Council of Ministers, and then it will be appropriately signed and operationalised. Various other ideas are also coming. SAARC Home Ministers' meetings are taking place regularly. They are reviewing the security scenario of the SAARC member countries and that is also taken into account from time to time.

**Question (Manish):** Talking of this Legal Aid Agreement, last time when at the Summit level this issue figured first we believe there was some resistance from some countries like Pakistan and maybe Bangladesh. This time around what was your sense? Are they on board on this? Also, there are some anti-India operatives known to be working against India in Bangladesh, Pakistan and other countries. Will this Legal Aid Agreement

enable us to get them here to bring them to justice?

**External Affairs Minister:** It is not legal aid, it is Mutual Legal Assistance Agreement. In our deliberations there had been any discordant views because in the text of my statement I have specifically mentioned that we directed that this agreement is to be expedited so that we can operationalise it quickly. To finalise the text of the agreement the Legal Advisors of SAARC countries are expected to meet in April 2008 at Colombo, Sri Lanka. Thereafter the text will be available So, I do hope in the course of discussions various viewpoints will come and after discussions when we arrive at a conclusion we will go by that conclusion.

**Question (Srinjoy):** Sir, today the Government of Malaysia has said that people of Indian origin there have links with the Tamil tigers, the LTTE. Has this issue been taken up with Kuala Lumpur and also during our talks with the Srilankan authorities?

**External Affairs Minister:** I have not seen the text of the observations made by the Malaysian Government. But so far as the question of persons of Indian origin residing in Malaysia and the problems which arose and which figured in Indian Parliament is concerned, we have taken it up with Malaysian Government. In respect of any terrorist connection of any citizen of any country, it is the international convention that all countries take appropriate actions as per the legal provisions to which most of the countries are party to. I do not consider a terrorist should be identified with his country of origin. A terrorist is a terrorist, and a terrorist is nothing but a criminal against humanity.

Thank you.

## **INDIA-RUSSIA-CHINA TRILATERAL CONFERENCE**

**196. Briefing by Official Spokesperson Navtej Sarna and Indian Ambassador in China Mrs. Nirupama Rao on the Visit of the Chinese Foreign Minister at the Trilateral Meeting between India, Russia and China.**

**New Delhi, February 13, 2007.**

Please See Document No 335.

**197. Opening remarks by External Affairs Minister Pranab Mukherjee at the media interaction after the India-Russia-China Trilateral Foreign Ministers Meeting.**

**New Delhi, February 14, 2007.**

The Sixth India-Russia-China Trilateral Foreign Ministers Meeting took place today in a very frank and cordial atmosphere. It was the second time that the three Foreign Ministers met exclusively for a trilateral meeting after the first one in Vladivostok in June 2005. In July 2006, Prime Minister Dr. Manmohan Singh, President of the Russian Federation H.E. Mr. Vladimir Putin and President of the People's Republic of China H.E. Mr. Hu Jintao met in St. Petersburg for the first summit level trilateral meeting. We will issue a Joint Communiqué which covers the nature of today's discussions and the shared views of the three countries.

We had very useful exchanges on future contacts and cooperation in the trilateral format. We agreed on the need to strengthen cooperation amongst the three countries. In particular,

- (a) India will host a trilateral business meeting with the participation of businessmen from the three countries later this year. The business meeting could consider specific initiatives in areas such as energy,

civil aviation, biotechnology, information technology, pharmaceuticals and financial services;

- (b) India has proposed that it would host a trilateral seminar on emerging geo-strategic trends with the participation of officials and scholars in 2007; and
- (c) We also discussed the formalities of expert-level discussions among the three countries on issues such as energy, bio-technology and public health.

We shared our thoughts on the political, economic and security aspects of the global situation, the present world order and recent developments in various areas of mutual concern. We agreed that cooperation rather than confrontation should govern approaches to regional and global affairs. We also agreed on the importance of the UN and that there was a need to make it more effective so that it reflects contemporary global realities. The three countries felt that their interaction would contribute to strengthening peace, security and stability in our region and the world. There was coincidence of views against terrorism in all its forms and manifestations and on the need to address financing of terrorism and its linkages with narco-trafficking.

We agreed to continue our interaction in the trilateral format in the future and the next trilateral Foreign Ministers meeting is to be hosted by China.

## **198. Joint Communiqué on the results of the Trilateral Meeting of the Foreign Ministers of India, Russia and China.**

**New Delhi, February 14, 2007.**

A trilateral meeting of the Foreign Ministers of the Republic of India, the Russian Federation, and the People's Republic of China was held in New Delhi on February 14, 2007.

The Ministers noted that the mechanism of trilateral meetings is a manifestation of enhanced mutual understanding and trust among the three countries and positively assessed the outcome of their meetings. They agreed that the Summit level trilateral meeting held in St. Petersburg on July 17, 2006 on the sidelines of the G-8 Summit demonstrated the willingness of the three sides to carry forward consultations on issues of shared interest, at the highest political level, with the aim of promoting the development objectives of the three countries as well as peace, security and stability in the region and the world. They reaffirmed that trilateral cooperation was not directed against the interests of any other country and was, on the contrary, intended to promote international harmony and understanding and find common ground amidst divergent interests. They also emphasized the strong commitment of India, Russia and China to multilateral diplomacy.

The Ministers discussed the political, security and economic aspects of the current global situation, besides exchanging views on how international relations are being presently conducted. They noted that globalization opens up opportunities for a more even distribution of development resources and influence in the world thus creating a foundation for a more stable and balanced international system. They also emphasized the need to preserve the cultural and civilizational diversity of the contemporary world and to promote the existing initiatives for dialogue among civilizations and religions. They expressed their conviction that democratization of international relations is the key to building an increasingly multi-polar world order that would be based on principles of equality of nations - big or small, respect for sovereignty and territorial integrity of countries, international law and mutual respect. The Ministers acknowledged that the UN is an appropriate instrument for promoting and attaining such a world order. The Sides stressed the importance of reforms at the UN, including the UN Security Council, in order to deal with the myriad challenges of today's world more effectively. They shared the view that member states should aim to make

the UN more transparent, efficient and reflective of contemporary realities. The Sides agreed to take steps in this direction. In this context, the Foreign Ministers of Russia and China reiterated that their countries attach great importance to the status of India in international affairs, and understand and support India's aspirations to play a greater role in the United Nations.

The Ministers noted that international terrorism continued to pose a grave threat to all nations and expressed concern about the new and evolving forms of the menace. They agreed that under central and coordinating role of the UN and within the framework of its Global Counter-Terrorism Strategy collective action must be strengthened further by taking into account the mutating character of terrorism and its networks. They agreed that an early entry into force of International Convention for the Suppression of Acts of Nuclear Terrorism and the earliest possible adoption in the UN of the India-sponsored draft Comprehensive Convention on International Terrorism would lead to further consolidation of the international legal basis for combating terrorism. The Sides underlined the substantial potential of their counter-terrorism cooperation in regional organizations. They agreed that there can be no justification for any act of terrorism, irrespective of motivations, wherever and by whosoever committed. They stressed that selective approaches in counter-terrorism cannot yield sustainable results and it should be combated in a consistent, sustained and comprehensive manner without any double standards. The Sides also agreed to coordinate action against all factors that feed international terrorism, including its financing, illegal drug trafficking and trans-national organized crime.

The Ministers agreed that India, Russia and China, as countries with growing international influence, can make substantive positive contribution to global peace, security and stability. In this context, the Ministers exchanged views on various regional and international issues of concern. They agreed that cooperation rather than confrontation should govern approaches to regional and global affairs. While welcoming India's joining the Shanghai Cooperation Organization (SCO) as an observer country, the Foreign Ministers of Russia and China stated that they would actively facilitate early realization of mutually beneficial contribution of India to the SCO.

The Ministers paid specific attention to the high potential of trilateral cooperation and synergy in the economic field. The Ministers reiterated the considerable potential for mutually beneficial economic interaction among the three countries in areas such as energy, transport infrastructure, health, high technologies, including IT and biotechnology. Recognizing the

important role of the business and industrial circles of the three consistently growing and large economies, the Ministers agreed to advise their respective apex business bodies to organize a trilateral business forum taking into account the capabilities and potential of the three countries. The Ministers agreed to monitor this process with a view to facilitating the agreed business meeting which would take place during 2007. The Ministers expressed satisfaction at the results of the trilateral meeting in New Delhi and agreed to hold their next meeting in China.

## **199. Statement of External Affairs Minister Pranab Mukherjee on arrival in Harbin for the Trilateral Foreign Ministers meeting.**

**Harbin, October 23, 2007.**

I am glad to be in China once again. This is my first visit to the beautiful city of Harbin. It is my pleasure to be in a city famous not only for its ice-sculptures and unique architecture but also for its interesting history.

On 24 October 2007, we will have the third<sup>1</sup> stand-alone trilateral India- China-Russia Foreign Minister's meeting. I would also like to thank the Foreign Minister of China for taking the initiative to host this trilateral Foreign Ministers' meeting. It will be an opportune occasion to continue our talks and follow on the last meeting in New Delhi in February this year.

In a short span of time, our trilateral mechanisms have made significant progress starting from a forum for exchanging views to identifying concrete projects of cooperation. I am looking forward to meeting my Chinese and Russian counterparts to continue our discussions on trilateral cooperation in tomorrow's meeting.

- 
1. This will be the third stand-alone trilateral Foreign Ministers' meeting after the last one in New Delhi on 14 February 2007 and the first one in Vladivostok on 2 June 2005. The three Foreign Ministers have also met on the sidelines of multilateral forums in September 2002, September 2003, October 2004 and September 2005. En route to Harbin, External Affairs Minister Pranab Mukherjee said the trilateral meetings were useful as they gave the three countries an opportunity to discuss issues relating to peace and stability. "It creates better understanding among ourselves," he said, adding: "We want to benefit from our development experiences." Mr. Mukherjee said there were differences of perception on matters like the expansion of the United Nations Security Council, but the idea was to discuss these issues. Media quoted C.V. Ranganathan, co-chair of the India-China Eminent Persons Group, from Bangalore to say that the time had come for the three to move beyond the "declaratory stage" to fulfilling their intent through concrete cooperation projects. However, Ranganathan, the former Indian ambassador to China, said: "I do not, in any way, undervalue the importance of these meetings. They signal a certain common understanding of global issues." According to him, Mukherjee, Yang Jiechi and Sergei Lavrov could take up key questions like the stabilisation of Afghanistan and take a "certain view" on developments in Pakistan. The proposal of a "strategic triangle" between India, Russia and China was first forwarded by Russian Prime Minister Yevgeny Primakov in 1988 during a visit to New Delhi. In the Joint Declaration issued at the end of the Summit meeting between Russian President Putin and the Chinese President Hu Jintao in Beijing on March 21, 2006 a call was made by the two leaders to set up an institutional framework between China, Russia and India for trilateral cooperation. The Declaration said: "The side favour an early establishment of a mechanism of trilateral cooperation in the Russia-China-India format in the belief that this will contribute to a fuller realization of their potentials for economic development and will strengthen international efforts to stand up to new threats and challenges." During the visit of Chinese President Hu Jintao to Delhi in November 2006 the concept of trilateral cooperation found expression in the Joint Declaration issued on November 21, 2006. It said: "The two sides positively assess the trilateral dialogue mechanism among India, China and Russia and agree that exchange and cooperation under it should be further substantiated."

**200. Opening Remarks by External Affairs Minister Pranab Mukherjee at the Joint Press Interaction after the Foreign Ministers' Trilateral meeting.**

**Harbin, October 24, 2007**

Good evening,

We had a very useful interaction in continuation of discussion at the last Trilateral Foreign Minister meeting in New Delhi in February 2007. It was my privilege and pleasure to be in the company of my colleagues from Russia and China in this beautiful and impressive city of Harbin.

We exchanged views on regional and international issues and ways to broaden trilateral cooperation. The international community faces serious challenges such as regional conflicts, terrorism, narco-trafficking, under-development, poverty and climate change.

We believe that our trilateral dialogue mechanism improves mutual understanding and trust with regard to these common challenges and contributes to strengthening peace, security and stability in our region and the world. The Joint Communique outlines our shared views on specific issues. We have agreed to take our trilateral cooperation forward through various initiatives. India will be hosting a trilateral business forum on 15 December 2007 in New Delhi which will focus on sectors of common business interest.

The three countries also expect to hold discussions among their officials on cooperation in areas such as agriculture, disaster mitigation and public health. We have also agreed to hold a trilateral seminar on emerging geo-strategic trends with the participation of officials and scholars from the three countries in India in early 2008.

Our trilateral engagement holds considerable potential to help expand cooperation and improve mutual understanding.

Thank You,

**201. Joint Communiqué issued after the meeting of the Foreign Ministers of the People's Republic of China, the Republic of India and the Russian Federation.**

**Harbin, October 24, 2007.**

The Foreign Ministers of the People's Republic of China, Republic of India and the Russian Federation met in Harbin, China on 24 October 2007.

2. The three Foreign Ministers positively assessed the important role played by the Foreign Ministers' meeting mechanism in enhancing mutual trust and understanding and increasing trilateral exchanges and cooperation. They believe that trilateral cooperation has excellent prospects for development. They reaffirmed that trilateral cooperation is not targeted against any other country or organization and is intended to promote international harmony and mutual understanding and seeks to broaden common ground amidst divergent interests.
3. The three Foreign Ministers exchanged views on the international situation and reaffirmed that they would abide by the principles and purposes of the UN Charter and other accepted principles of international law. They further emphasized that they would continue to promote democratization of international relations and evolution of a more just and rational international order.
4. The three Foreign Ministers believe that the development of China, India and Russia is a major contribution to peace and development of the region and world and is beneficial to the process of global multipolarity. The three countries have chosen their respective development paths in accordance with their domestic situation and past experience and have contributed to the diversity of world civilization and world development patterns. With their continuous development and growing role in international affairs, China, India and Russia will further contribute to world peace, security, stability and prosperity.
5. The three Foreign Ministers believe that in order to safeguard the diversity of world civilization and increase mutual understanding, further steps to enhance multilateral cooperation in conducting dialogue among civilizations would be useful.

6. The three Foreign Ministers emphasized that globalization has brought about closer interrelation and interdependence among all nations, and that multilateralism and collective action should be promoted in addressing urgent issues and meeting new challenges and threats. Drawing lines on the ground of ideologies and values is inconsistent with the trends of the times and does not help solve various global issues facing the international community.
7. The three Foreign Ministers underlined that the United Nations is the most representative and authoritative international organization. In order to deal with various problems and challenges facing the international community more effectively, it is important to strengthen the role of the United Nations, improve its efficiency and conduct a comprehensive reform of the United Nations. The Foreign Ministers of China and Russia reiterated that their countries attach importance to the status of India in international affairs, and understand and support India's aspirations to play a greater role in the United Nations.
8. The three Foreign Ministers said that the three countries attach great importance to the issue of climate change and reiterated the principles and provisions of the UN Framework Convention on Climate Change and its Kyoto Protocol, including the principle of "Common but Differentiated Responsibilities". They stated their adherence to the Convention and its Kyoto Protocol as the major framework for tackling climate change, and agreed that the three countries will actively participate in the Conference of the Parties to the Convention and the Protocol to be held in Bali, Indonesia in December 2007. The three Foreign Ministers said that the three sides will enhance technical cooperation in implementing the Convention and its Kyoto Protocol, including adapting to climate change, increasing energy efficiency and develop renewable energy resources.
9. The three Foreign Ministers reiterated their strong condemnation of terrorism in all its forms and manifestations. No act of terrorism can be compartmentalized, and there can be no justification for terrorism on any grounds. It is imperative for the international community to come together to combat terrorism in a long-term, sustained and comprehensive manner. Collection action within the framework of the UN Global Counter Terrorism Strategy and under the central and coordinating role of the United Nations and its Security Council should be strengthened. Double standards should not be adopted. It

is imperative to finalize the draft UN Comprehensive Convention on International Terrorism urgently. The three sides agreed to further coordinate their action against all factors that feed international terrorism, including its financing, drug trafficking and trans-national organized crime.

10. The three Foreign Ministers had in-depth discussions on the Asian regional situation. They believe that peace, development and cooperation are the mainstream in the evolution of the Asian situation. Asia is one of the most vibrant regions enjoying the fastest economic growth in today's world. At the same time, Asia is also faced with pressing issues of imbalanced development and non-traditional security threats. The three Foreign Ministers stated that the three countries will enhance cooperation in all areas including coordination within the framework of regional organizations and dialogue mechanisms to the benefit of the people of Asia.
11. The three Foreign Ministers decided that there is the necessity to set up a consultation mechanism at the level of Director-General / Division Head between the three Foreign Ministries to strengthen trilateral coordination and cooperation on regional and international issues and to implement the agreements reached at the three Foreign Ministers' meetings.
12. The three Foreign Ministers discussed the process for launching cooperation in economic and cultural interactions. They felt that pragmatic cooperation in these areas has enormous potential and complementarity.
13. The three Foreign Ministers decided that working-level mechanisms of Division Head/Director-General should be established between Ministries of the three Governments looking after agriculture, disaster management, medicine and health to explore concrete ways and methods of cooperation for the development of agricultural resources, processing of agriculture produce, research and development, capacity-building and application of technology in disaster risk mitigation, exchange of information on the prevention and control of contagious diseases and in traditional medicine, etc.
14. The three Foreign Ministers stated that the three countries will encourage and promote entrepreneurs and regions to enhance contacts and launch cooperation among them and facilitate this

process. They expressed appreciation that the trilateral business forum will be held in New Delhi on 15 December 2007.

15. The three Foreign Ministers positively assessed the role of meetings among their scholars in promoting mutual understanding and cooperation among the three sides and expressed support for scholars of the three countries to further expand exchanges and cooperation in all forms. They noted India's offer to host a trilateral seminar on the evolution of geopolitical strategic trends with the participation of officials as well as scholars and agreed to hold it in 2008.
16. The three Foreign Ministers expressed satisfaction at the results of this round of meeting and decided to hold the next meeting in Russia.

## INDIAN OCEAN RIM COUNTRIES

### **202. Statement by the Minister of State E. Ahamed at the 7th Meeting of the Council of Ministers of IOR-ARC.**

**Tehran, March 7, 2007.**

Mr. Chairman Honourable Ministers Distinguished Delegates

Let me, at the outset, convey my warm appreciation to the Government and people of the Islamic Republic of Iran for the gracious hospitality extended to me and the members of my delegation and for the excellent arrangements made for our meeting here.

2. This is the second consecutive year that Tehran is hosting the Council of Ministers Meeting. We value the forum of IOR-ARC and attach importance to its potential. It is useful to have this opportunity to review developments since our meeting in February last year.
3. I would like to appreciate the efforts of South Africa in facilitating the meeting of the Working Group of Heads of IOR-ARC Missions in South Africa under the stewardship of the Deputy Minister of South Africa and Chairperson of the Committee of Senior Officials there. The Working Group has met twice last year and these meetings have been

found useful in follow-up and review of the projects. These meetings should continue to be held on regular basis. Their detailed consideration of activities will provide useful inputs and guidance to the functioning of our regional Association.

4. Our senior officials have had detailed deliberations over the past two days. They have, inter-alia, discussed administrative and budgetary concerns. The recommendations they have made for our consideration are practical and result oriented. We need our Secretariat to be assured of logistical and budgetary support so that we can demand commensurate results from it.
5. Mr. Chairman, in assessing the achievements of our organisation, we must also take into account the fact that we are a diverse group of countries, with different levels of economic development and also belonging at times to different regional groupings. However, it is the Indian Ocean, which sustains the maritime lifeline of over 50% of world trade that binds us together.
6. The year 2007 marks the first decade of IOR-ARC. As the economic grouping steps into its second decade of its existence, this is the opportune time to review IOR-ARC's achievements and devise strategies to carry forward our common vision of mutually beneficial cooperation. We should encourage and task the three working groups - the Academic Group, the Business Forum and the Working Group on Trade and Investment to come up with tangible proposals based on our complementarities and synergies.
7. As you all are aware, IOR "Chair" in Indian Ocean Studies is designed to play a catalytic role in fostering research in the fields of common interest to the IOR-ARC and to promote trade and investments in the region. India and Mauritius are in the process of reviving the "Chair" in the coming months.
8. I would like to suggest that we organise workshops on issues having direct relevance to our trade and industry sectors, and for developmental activities in our countries. There are many areas where we can benefit by sharing each others' developmental experiences, technologies, traditional knowledge or best practices. Some sectors that have a great deal of potential include technology cooperation in new and high technologies, shipping and maritime cooperation, tourism. Technology, including ICT, is an added

strength of regional countries, which could be a key to successful cooperation.

9. Disaster Mitigation and Management has emerged as a significant area of international cooperation. We are willing to share the experience that we have gained in mitigation of natural disasters. At the same time, we would be happy to learn from the experiences of other Member States. Towards this end, we had offered to host a meeting of experts on the technical aspects of a comprehensive disaster forecasting and mitigation system in the Indian Ocean. The Member countries are requested to provide information regarding their technical focal points. We would also be willing to provide opportunities for training and capacity building in the areas of prediction, modelling, forecasting and early warning of natural disasters.
10. Mr. Chairman, the Indian economy has made remarkable progress in recent years. This is attracting major global companies to invest in India, as well as utilize the country as a manufacturing and R&D hub. At the same time, the Indian private sector is also looking for investment opportunities overseas. My Government is ready to facilitate investments in IOR-ARC member states for mutual benefit. In this context, I may mention that a Buyer Seller Meet was held in Mumbai in November 2006, to enhance Agro Food Processing and Fisheries trade within the region.
11. I would like to take this opportunity to mention that India Trade Promotion Organisation (ITPO) has been successfully organizing India International Trade Fairs (IITF) annually in New Delhi for over two decades. This is India's most prestigious trade fair. A large number of companies from India and abroad participate in the Fair. We would like to invite the IOR ARC Member Countries to participate in a big way in the Trade Fair, to be held this year from November 14-27, 2007. An "IOR-ARC" Pavilion will be specially set up for this purpose. On this occasion, a sectoral seminar and a Buyer Seller Meet will also be held. I would strongly urge all Member Countries to encourage participation in the Trade Fair. In the spirit to promote participation by all IOR-ARC countries in the Trade Fair, we offer a 3 x 3 sq. mtr. stall free of cost to fellow developing countries, namely, Bangladesh, Madagascar, Mozambique, Tanzania and Yemen.
12. Mr. Chairman, you would agree with me that people-to- people interaction should play a pivotal role in making our grouping more

vibrant. We should think of initiating activities which can lead to a better visibility of our grouping in our own countries and beyond. In this context and also in view of the year 2007 being designated a 'Year of Tourism', we offer to host IOR-ARC Film Festival later this year. We would request all Member Countries to provide at least one film each for this purpose.

13. Various training programmes are organized by India under Indian Technical and Economic Cooperation programme popularly known as "ITEC". In this context, I am happy to announce that specialized courses could be organized under the umbrella of IOR-ARC Cooperation, in the fields of IT and E-government, entrepreneurship development, development of Small and Medium enterprises; rural electrification, pharmaceuticals and hydrology. To begin with, we offer under ITEC two specialized courses; (i) on IT and E-government; and (ii) Small and Medium Enterprises, and invite 2 participants from each Member Country for these courses..
14. Mr. Chairman, I am glad that educational exchanges amongst the IOR - ARC countries have made rapid strides in the recent years. On one hand, substantial Indian students are going for higher studies to Australia and Singapore, on other hand, we are recipient to a large number of students from Iran, UAE, Oman and Mauritius and Yemen, to mention a few. My Government will continue to facilitate and further strengthen these exchanges for greater people - to - people contacts in our region.
15. Before I conclude, let me express Mr. Chairman, my delegation's full support and our political commitment for the Indian Ocean Rim Association for Regional Cooperation for mutual benefit so that we succeed in our efforts to translate ideals into beneficial cooperation on the ground.

Thank you, Mr. Chairman.

## **MEKONG-GANGA COOPERATION**

### **203. Report of the fifth ministerial meeting of the Mekong-Ganga cooperation.**

**Manila, August 1, 2007.**

1. The Fifth Ministerial Meeting of the Mekong-Ganga Cooperation was held in Manila, Philippines, on 1 August 2007.
2. The Meeting was attended by H.E. Mr. Hor Namhong, Deputy Prime Minister and Minister of Foreign Affairs and International Cooperation of the Kingdom of Cambodia, H.E. Mr. Pranab Mukherjee, Minister of External Affairs of the Republic of India, H.E. Dr Thongloun Sisoulith, Deputy Prime Minister and Foreign Minister of the Lao PDR, H.E. U Nyan Win, Minister for Foreign Affairs of the Union of Myanmar, H.E. Mr. Nitya Pibulsonggram, Minister of Foreign Affairs of Thailand, H.E. Mr. Le Cong Phung, First Vice Foreign Minister of Vietnam, and their respective delegations. The List of participants appears at Annexure-A
3. The Meeting was chaired by H.E. Mr. Pranab Mukherjee, Minister of External Affairs of the Republic of India. The leaders had a productive exchange of views on regional issues, as well as on issues of importance to the Mekong-Ganga co-operation.

#### **AGENDA ITEM 1: ADOPTION OF AGENDA**

4. The Meeting considered and adopted the Agenda, which appears as Annexure-B.

#### **AGENDA ITEM 2: BUSINESS ARRANGEMENTS**

5. The Chair announced the business arrangements for the meeting.

#### **AGENDA ITEM 3: OPENING REMARKS BY CHAIR**

The remarks are placed at Annexure-C.

#### **AGENDA ITEM 4: OPENING REMARKS BY LEADERS OF OTHER DELEGATIONS**

The remarks are at Annexure- D.

**AGENDA ITEM 5: REVIEW OF THIRD MEETING OF MEKONG-GANGA CO-OPERATION IN VARIOUS SECTORS**

6. The Meeting reaffirmed the importance of inter-linking MGC countries in four sectors, namely, tourism, culture, human resource development/education, and transport & communications, and emphasized the need for MGC projects to make timely progress. It was noted that MGC projects should be relevant to the needs of the people in the region.
7. The Meeting reviewed and discussed the progress made in the implementation of agreed projects since the Third Meeting of Mekong-Ganga Co-operation at Phnom Penh, Cambodia. It was noted that the progress has been modest. However, this is not because of any absence of political will. It was decided that MGC countries will work collectively for implementation of identified projects.
8. Lead countries in each of the four areas of cooperation reported on progress in their respective sectors.

**Tourism**

9. The Meeting welcomed India's offer to host a delegation comprising of 20 travel agents (4 each from every MGC member country) in India and organize interaction for them with the Indian travel agents and tour operators. The Meeting recommended that direct flights connecting all MGC countries would be a step forward to further promote trade and tourism in the region. In addition, the Meeting also agreed that in order to promote tourism cooperation in our region, air linkages between the World Heritage sites in MGC countries should be encouraged.
10. The Meeting expressed appreciation of Thailand for its offer to provide information on MGC Rate Hotels (3-stars hotels in MGC countries) in CD and directories formats, subject to member countries providing the relevant information. The Meeting also welcomed Thailand's offer to support the pilgrimage tourism as well as development of religious circuits for the promotion of tourism. The Meeting encouraged the member countries to explore the feasibility of the pilgrimage initiatives for their full participation. The Meeting took note of Thailand's proposal to host MGC tourism meeting at Working Group Level in January 2008.

## **Culture**

11. The Meeting reviewed the progress made in the implementation of setting up of a Museum of Traditional Asian Textiles in Siem Reap, Cambodia. It was noted that Cambodia has provided one hectare of land at Siem Reap for the Museum site and India has provided funds for the architectural designs etc for the project. The first phase of the project has since been completed. However, the construction work is yet to start. The Meeting noted with appreciation the offers of Thailand and Lao PDR to provide weaving equipment, textile samples and expertise, at the Museum. It was decided to fix some time frame for completion of project and explore the possibility of financial sustainability of the project after completion of the construction work. The Meeting also explored the possibility of other member countries to extend assistance for the project and agreed that this project should be realized as early as possible.
12. The Meeting expressed appreciation of India's offer to host 100 Buddhist pilgrims from MGC countries, as announced at the last MGC Ministerial Meeting at Cebu in January 2007. The Meeting noted with satisfaction that this visit is being organized during September 2007.
13. The Meeting regarded the importance of the conservation of World Heritage sites and appreciated Thailand's offer to work with India in the renovation and restoration of cultural heritage sites in member countries within the MGC framework.

## **Transport & Communication**

14. The Meeting agreed on the need for a comprehensive review of connectivity in the region, particularly the construction of a trilateral highway from Moreh in India, through Bagan in Myanmar, to Mae Sot in Thailand, and a feasibility study for a railway link between Delhi and Hanoi as well as the possibility to build the missing link between Loc Ninh and Phnom Penh.
15. The Meeting acknowledged the completion of the road connecting Myawaddy and Tenasserim Mountain Range, 18-kilometer in length, in June 2006. The road link is part of the construction of a trilateral highway which connects Moreh-Bagan-Mae Sot. The Meeting noted Thailand's initiative to incorporate the MGC transport and communication cooperation with other cooperative frameworks such

as ACMECS, GMS, etc. Thai side agreed to provide a transport cooperation proposal comprising all member countries of ACMECS, GMS and BIMSTEC as well as Malaysia and Singapore and welcome inputs in this regard from all MGC member countries.

### **Education**

16. In the Meeting it was agreed to strengthen regional educational cooperation by tapping of the region's centers of excellence in education for this purpose.
17. The Meeting expressed appreciation to India's continued support for 50 MGC scholarships. However, it was noted that the utilization of these scholarships needs to be improved.
18. The Meeting also welcomed India's offer to organize educational fairs in MGC countries which would help in creating greater awareness about educational facilities available with India.
19. In this regard, the Meeting expressed the desirability of the scholarships offered being fully funded to the extent possible and in areas most needed by the countries utilizing these scholarships.

### **AGENDA ITEM 6: REVIEW OF THE HANOI PROGRAMME OF ACTION FOR MEKONG-GANGA COOPERATION**

20. The Meeting reviewed and discussed the progress of implementation of the Hanoi Programme of Action for MGC and noted that the progress thus far was modest. The Meeting agreed that the existing projects proposed under the Hanoi Programme of Action should be implemented as per agreed time-frame.
21. The Meeting noted that the Hanoi Programme of Action (HPA) continues to be relevant and decided to extend it for another period of six years, i.e., August 2007 to July 2013. The Meeting reaffirmed that the implementation of the Phnom Penh Roadmap (PPR) would contribute to the realization of the Hanoi Programme of Action. The Meeting decided that a Working Group comprising of expert(s) from each member country will meet shortly to make the HPA/PPR action-bound and focused. This Working Group would also consider ways and means to mobilize financial resources to implement the HPA/PPR.
22. The Meeting agreed that in order to make progress, projects needed

to have clear timeframes, sources of funding, implementation mechanisms, and review mechanisms.

#### **AGENDA ITEM 7: ANY OTHER BUSINESS**

23. The Meeting agreed to consider the proposal made by the Lao PDR with regard to setting up of the virtual Secretariat of the MGC in New Delhi to facilitate better coordination and monitoring of projects implementation and for dissemination of information.

#### **AGENDA ITEM 8: DATE AND VENUE OF THE SIXTH MINISTERIAL MEETING ON MGC**

24. The Meeting agreed that the Sixth Meeting on MGC will be convened in (Kolkata, India) in 2008 under the chairmanship of India. The Meeting also agreed to India hosting the SOM meeting prior to the next MGC Ministerial Meeting.

#### **AGENDA ITEM 9: ADOPTION OF REPORT**

25. The Meeting adopted the Report
26. The Meeting expressed its appreciation to the Government of Philippines for the excellent arrangements made for the meeting. The Meeting also expressed appreciation of India for its hosting the meeting.

#### **Annexure- A**

#### **PARTICIPANTS**

##### **Cambodia**

1. H.E. Mr. Hor Namhong \*\*\*\*\* Leader  
Deputy Prime Minister and Minister of Foreign Affairs and International Cooperation
2. H.E. Mr. Kao Kim Hourn, Secretary of State  
Ministry of Foreign Affairs and International Cooperation

Deputy Director General, International Relation,  
Department Office of Government
6. Mr. Nguyen Hoai Nam  
Director Economic Cooperation Forum Division,  
Economic Department, Ministry of Foreign Affairs

### **Annexure-B**

#### **AGENDA FOR THE FIFTH MINISTERIAL MEETING ON MGC MANILA, AUGUST 1, 2007**

1. Adoption of Agenda
2. Business Arrangements
3. Opening Remarks by Chair

4. Opening Remarks by Leaders of other Delegations
5. Review of co-operation in various sectors:
  - a) Tourism
  - b) Culture
  - c) Education
  - d) Transport & Communication
6. Review of Hanoi Programme of Action
7. Any other business
8. Date/Venue of the 6th Ministerial Meeting on MGC
9. Adoption of Report

#### **Annexure-C**

#### **Chair remarks by H.E. Mr. Pranab Mukherjee, Minister of External Affairs,**

**India** It is my privilege and honour to welcome you all to the Fifth Ministerial Meeting of the Mekong-Ganga Cooperation. I also avail of this opportunity to thank our hosts, the Government of Philippines, for making arrangements for this meeting.

Our grouping signifies our desire to recapture the essence of historic ties and complementarities of a region which is the birth place of enduring civilizations, sustained and nurtured by two of the great river systems in the world. This is an effort to bring together geographically contiguous countries with shared historical and cultural traditions.

The Hanoi Programme of Action, which we would consider under agenda item 6, is an expression of our collective will to revive the centuries' old dynamic interaction in commerce and culture and also to revive our synergies which could be of common benefit to our peoples.

Distinguished Colleagues, we cannot shy away from the fact that progress so far has been rather limited. We need to revitalize collectively the implementation of the ideas mentioned in the Hanoi Programme of Action. I look forward to receiving your suggestions in this regard.

I have a suggestion regarding exchange of visits amongst travel agents of our countries. We can host a delegation comprising of 20 travel agents (4 each from every MGC member country) in India and organize a wholesome interaction for them with Indian travel agents and tour operators.

While accepting the chairmanship of the MGC at Cebu, the Philippines on 12 January 2007, India had offered to host 100 Buddhist pilgrims from MGC countries. I am happy to announce that we would be able to organize this visit in September.

India had in 2002 announced a contribution of US\$1 million for setting up an MGC Museum of Traditional Asian Textiles. Cambodia committed to provide a plot of land. Thailand had indicated that it would associate with the project by providing textile experts and material for display, including assistance and expertise for displaying the exhibits. I request the Leader of the Cambodia delegation to apprise us about the time-frame for completion of the project and the financial sustainability of the project after completion of the construction work.

India, Myanmar and Thailand had agreed in April 2002 to cooperate in the construction of a trilateral highway from Moreh in India, through Bagan in Myanmar, to Mae Sot in Thailand. The route alignment for the highway has, however, not yet been finalized. I seek the views of member countries about taking this idea forward.

India offered to conduct a feasibility study for a rail link between Delhi and Hanoi. As a first step, RITES was commissioned to carry out a feasibility study for an India-Myanmar rail link. The executive summary of this study which has since been conducted has been made available to all MGC member countries. I seek comments of my distinguished colleagues on how to take further this project.

India offers 10 scholarships to each of the MGC member countries, including international air fare (i.e. 50 scholarships on annual basis) for culture related studies in Indian universities. However, the record of utilization leaves scope for improvement. For instance, in the ongoing year, only 30 applications have been received, of which only 16 admissions have been confirmed. I request the Leaders of the delegations present here to inform their concerned authorities of this and impress upon them the need to make nominations in larger numbers so as to ensure fuller utilization of these scholarships.

India also proposes to organize educational fairs in all the ASEAN member

countries. This would cover all the MGC member countries as well. We hope that this endeavor would lead to greater awareness about the educational opportunities available in India and would help strengthen our educational ties.

The Hanoi Programme of Action adopted at the second MGC Ministerial Meeting held in Hanoi in July 2001. It provided for specific action to be taken by the MGC in four areas of cooperation i.e. tourism, culture, education and transport and communication. The Hanoi Programme of Action has a six year time-frame, covering the period from July 2001 to July 2007. It is a very comprehensive programme and its contents continue to be relevant.

We propose extension of the Hanoi Programme of Action for another six years i.e. from August 2007 to July 2013. Such a recommendation has also been made by the SOM to us. I seek your suggestions in this regard.

I seek the views of the member countries regarding the next MGC Ministerial Meeting.

We would be willing to host the Meeting in India, but would be willing to go along with the consensus in this matter. In our view, while meeting back-to-back with ASEAN/EAS events would be easier for us from the logistical point of view, we may consider a meeting for our Senior Officials prior to our next meeting.

Distinguished Colleagues, it is our endeavor to strengthen multi-faceted linkages amongst our countries. I also thank you for the confidence that you have reposed in India.

---

Annexure-D

### **Remarks by H.E. Deputy Prime Minister Hor Namhong Minister of Foreign Affairs & International Cooperation, Cambodia**

I wish to recall that after the announcement of Mekong-Ganga Cooperation (MGC) initiatives by the foreign ministers of the six countries in Bangkok on July 28, 2000, we adopted the Vientiane Declaration on Mekong-Ganga Cooperation at the MGC Inaugural Ministerial Meeting in Vientiane in November 2000, which set out a vision for cooperation aimed at developing closer relations and better understanding among MGC member countries

by identifying four priority areas of cooperation, namely, tourism, culture, education and transport & communication.

At the Second Ministerial Meeting in Hanoi in July 2001, we adopted the Hanoi Programme of Action for MGC, which provided specific action to be taken in the said four priority areas to be carried out in the six year timeframe from July 2001 to July 2007.

To ensure the implementation of the Vientiane Declaration and the Hanoi Programme of Action, the 3rd MGC Ministerial Meeting held in June 2003 in Phnom Penh, adopted the Phnom Penh Road Map to implement concretely the 4 interested sectors.

On tourism cooperation, in the Roadmap, we agreed to develop a combined tourist destination linking more than one member country and to explore the possibility of relaxation of traffic rights and visa formalities.

I appreciate that during the ASEAN India- Summit meeting in Cebu in January 2007, Indian PM Manmohan Singh reiterated Indian willingness to engage ASEAN in a discussion on an open skies policy. I believe that direct flights connecting to all MGC member countries would be a step forward to promote cooperation in air service and linkages as well as tourism in the region.

On culture, Cambodia welcomed the commitment by India to offer fund for the establishment of MGC Museum of Traditional Asian Textile in Siem Reap, during the 1st ASEAN-India Summit in Phnom Penh in 2002 and at the 3rd MGC Ministerial Meeting in June 2003 in Phnom Penh.

After that, Cambodia has provided one hectare of land at Siem Reap for the museum site and India has provided funds for architectural designs. However, it seems that progress has been slow since then. I urge that the project should be realized as early as possible. At the same time we will consider how to explore the possibility of financial sustainability of the project after completion.

On education, at our MGC Ministerial Meeting in June 2003 in Phnom Penh, we concurred to increase MGC Scholarship in different disciplines; to train the trainers in IT and to create a MGC websites and information news letters.

In this regard, we are very much grateful to India for the scholarship provided to MGC member countries. However, it would be more

appropriate if India could also offer round trip airfares to the scholarship holders.

On Transport and communication, we agreed in the Roadmap to support the trilateral road linkages among India-Myanmar-Thailand and consider further expansion to other MGC member countries and to set up a team to study feasibility on rail linkage from New Delhi to Hanoi in Vietnam and the missing links.

For the rail link, I have learned that Vietnam in collaboration with China Railway Construction Corporation is planning to build Saigon-Loc Ninh rail link, designing to connect this point of Vietnam's border to Cambodian border in Kampong Cham province where the missing link to Phnom Penh still exists.

May be India could consider to contribute to the realization of this missing link in Cambodia in the framework of rail linkage from New Delhi to Hanoi.

By and large, I have noted that not many progresses had been made in the implementation of projects in the four areas of cooperation in the Phnom Penh Roadmap, due to lack of funding.

To revitalize our cooperation, I would propose the followings: First, as financial resource is the key factor to ensure the effective implementation of the projects, I am of the view that we should first of all work out during our present deliberation an efficient and concrete solution to this crucial problem. Second, as the Phnom Penh Road Map was formulated to ensure the implementation of Vientiane Declaration and the Hanoi Programme of Action, I suggest that the Phnom Penh Road Map should be reactivated to realize the Hanoi Programme of Action with a new extension period of 6 years timeframe (2007-2013).

In conclusion, I wish to reiterate that funding is a vital factor for MGC advancement, without financial resources we can never move forward. Therefore, we should think together now how we can find out a best way to solve this problem.

---

**Remarks by H.E. Dr. Thongloun Sisoulith, Deputy Prime Minister, Minister of Foreign Affairs of the Lao PDR**

It is a great honor for me to participate in the Fifth Mekong-Ganga

Cooperation Ministerial Meeting and I would like to take this opportunity to express our appreciation and sincere thanks to the Government of India for their effort and arrangement of this important meeting.

At the beginning of this year, we were very successful over the chairmanship of the Mekong-Ganga Cooperation from Thailand to India. I am confident that under your able chairmanship, India will play a significant role in leading us towards achieving the key objectives of our cooperation in an effective and fruitful manner.

Since the 3rd MGC Ministerial Meeting which has passed four years, we have made tremendous progress in our cooperation framework. However, there are some obstacles in front of us which should be removed by our member countries. In this regard, I would like to congratulate to the MGC Senior Officials for joining their efforts in reviewing the progress of implementation projects and proposing an appropriate mechanism to speed up our cooperation.

We have a very clear picture that the Hanoi Programme of Action is providing specific actions to be taken aiming at achieving our common goal as set forth the Vientiane Declaration. In addition, we also adopted the Phnom Penh Roadmap to ensure the successful implementation has been modest over the past six years. In order to speed up our cooperation framework to become more dynamic in the future, the coordination mechanism needs to be improved. In this connection, I would like to propose for setting up the MGC Virtual Secretariat in new Delhi to facilitate our better coordination with a new validation of the Hanoi Program of Action.

The Lao PDR, as the chairman of Transportation and Communications cooperation, will continue to work closely with MGC member countries to implement the priority projects productively. In this connection, I would like to draw our attention to continue the feasibility study on road connecting Myanmar to Hanoi (Vietnam) similar to the connection between India and Myanmar which has already been completed. The road connecting India to Vietnam through Lao PDR is a vital link promoting economic and trade exchanges in our region, as it will link two oceans' market with enormous population. At the same time, the air linkages between the world heritage sites in MGC countries should be encouraged in order to promote tourism.

Regarding the establishment of the Museum of Traditional Asian Textiles in Siem Reap, the Lao PDR would like to provide weaving equipment, textile samples and expertise to the Museum.

I am confident that our meeting today will generate positive outcomes which will help us to achieve the set-target of MGC framework.

I wish to conclude my remarks by conveying my best wishes to all of you for good health, happiness and success during your stay in Manila.

**Remarks by H. E. U Nyan Win, Minister for Foreign Affairs of the Union of Myanmar**

On behalf of the Myanmar Delegation and on my own, I would like to express my warmest thanks and appreciation to the Government of the Republic of the Philippines for the warm welcome and generous hospitality accorded to my delegation and for the excellent arrangements made for the successful holding of this important meeting in this beautiful city of Metro Manila.

At the last MGC meeting held back-to-back with the ASEAN Summit in Cebu at the beginning of this year, we were able to handover the Chairmanship of this august meeting from Thailand to India. In this respect, I wish to take this opportunity to express my gratitude to the Royal Thai Government for the smooth and excellent transition. I also like to extend our congratulations to India on its assumption of the chairmanship of the MGC. I firmly believe that under the able leadership of the Indian chairmanship, we will be able to make more progress in enhancing the existing cooperation among the MGC countries.

There has been a general perception that, despite seven years of efforts by MGC countries to move forward in areas designated for cooperation, there has been very slow progress. I do not believe that this is a result of lack of political will. Considering a long and rich historical, religious and cultural background embedded in the two civilization trails, we would be able to seek ways and means to identify the respective strengths and comparative advantages of each MGC country and to use these strengths more effectively to enhance our current cooperation. In this respect, I wish to stress that more coordination among the members is essential. There is an important role to play by the Chair. I am convinced that the Chair is well capable of providing the necessary leadership.

We have already identified four priority areas for cooperation namely tourism, culture, education and communications and transport. We also have the necessary frameworks for cooperation in the Hanoi Programme of Action and Phnom Penh Road Map. What we urgently need to exert effort is in regard to how we will effectively implement the projects we have already agreed to and decided on and also to identify what problems and

obstacles there are in the effective implementation of them. In my opinion if we really wish to move forward in our cooperative efforts we should first focus on the doable and in areas where MGC countries can participate in promptly and without much difficulty.

We fully realize the importance of tourism industry for the economy of MGC member countries. Myanmar has been striving to make this industry one of the major foreign-exchange earning industries. However, for various reasons we have not been able to make as much progress as we would like to. We therefore welcome any new ideas or initiatives that will promote this particular industry. It is heartening to note that there have been many new ideas on the table to promote this industry. We will fully cooperate with other members to realize these proposals as soon as possible. Proposals such as pilgrimage tours and visits of travel agents to MGC countries will much contribute to our efforts in this sector. Myanmar will coordinate with the Chair as well as with other members to follow up on these ideas.

In the Cultural sector, we have the Traditional Textile Museum to be established in Cambodia. We wish to express our deep appreciation for India's financial contribution and also for Cambodia's provision of one hectare of land at Siem Reap for the Museum site. We understand that it needs the full participation of MGC members to make this project a success. In fact this project has been, to say the least, the first historic project of our group and the success or failure this project will reflect positively or negatively on us. Myanmar will make every effort to participate in this project. We are encouraged that our senior officials were able to discuss the promotion of cultural heritage sites in the region and to explore valuable ideas in this respect. I would like to take this opportunity to express our appreciation for Thailand's offer for the renovation and restoration of culture heritage sites in the MGC member countries.

The development of education and human resources in our country are essential at this juncture in time. The Phnom Penh Road Map has laid down the promotion of closer interaction in the areas of distant education, information technology, education planning research and language training. We realize that there are many centres of excellence in education in MGC countries. It would be highly beneficial for us if we are able to take advantage of these opportunities in a manner that suits the needs of the country concerned. We are extremely encouraged that there have been many offers of scholarship from our fellow members. However, for various constraints we have not been able to utilize these opportunities. If the offers of

scholarship could be fully funded to the extent possible, we will be in a better position to utilize these offers. I hope that we can rely on the generosity of the country offering scholarship. I would like to take this opportunity to express Myanmar's interest in having fully funded scholarships in areas like information and technology.

We attach great importance to the trilateral highway between India, Myanmar and Thailand. We believe that this highway will not only enhance the trading and tourism industry but also will open new routes to the regions of South Asia and South East Asia including China. To enhance the connectivity in the region will certainly benefit the MGC countries and therefore we are ready to explore and identify ways and means to do that. We will carefully look at the current proposals that have been submitted.

Despite the political will and the firm commitment of MGC countries to make progress in this framework, there has been a consensus that we are making only modest progress. However, we are not discouraged by this state of affairs because we are fully aware of the potential of each and every member to make this MGC framework a success. With the existing Hanoi Programme of Action, which we still view as relevant and the Phnom Penh Road Map, I am convinced our able Chair will make every effort and take any initiative to move forward in our endeavours for the socio-economic development of our countries. Myanmar assure our fellow members of MGC that it will not relent in these joint efforts.

---

### **Remarks by H.E. Mr. Nitya Pibulsonggram Minister of Foreign Affairs of the Kingdom of Thailand**

It is my pleasure to be here today and participate in the 5th Ministerial Meeting of Mekong-Ganga Cooperation (MGC), the first Ministerial Meeting under India's chairmanship.

Allow me to express my appreciation on behalf of the Thai Delegation, to the Delegation of India for exceptional arrangements without which this meeting would not have been possible. Rest assured, Mr. Chairman, of the full support of the delegation for the success of this meeting.

MGC is a forum for bilateral and multilateral cooperation linked by two of the great rivers in Asia, the Mekong and the Ganga. MGC provides a venue for us to maximize our vast economic potentials as well as create a bridge of economic and cultural cooperation among our peoples. We should draw

from the strength of our common cultural and historical heritage and translate into shared economic goals and interests. And from these shared goals and interests, we will seek to generate concrete benefits in areas of mutual interests for our people. It is imperative for MGC members and their peoples to recognize these similarities and view them as a means toward effective cross-cultural communication and cooperation in the Sub-region.

Since the inaugural MGC Ministerial Meeting in November 2000, four areas of cooperation have been identified; there are tourism, culture, education, and transportation communication. During the Second MGC Ministerial Meeting in July 2001, we have taken an important step forward by implementing these areas of cooperation through 'Hanoi Programme of Action' (HPA). This action plan provides guidelines for coordinated activities assigned to each MGC member.

Over the last six years, the HPA has endeavored to bring our peoples closer together by encouraging exchanges of specialized knowledge and personnel across MGC borders. Despite some obstacles along the way, the HPA remains essential for the success of MGC. Under the MGC framework, the Experts Working Groups have been developed in line with the four areas of cooperation in order to ensure its continuing dynamism.

Today, we are at the turning point of the MGC, the HPA expired yesterday, new commitments are therefore required to generate further progress. In order to sustain the momentum of the MGC, we should need to build on the results of the Hanoi Programme of Action based on the findings by the Experts Workings Groups on the effectiveness of HPA.

Thailand, as the lead country in tourism, is ready to coordinate the MGC's concerted effort in our tourism marketing campaign. Given the assistance and information provide by member countries, Thailand is pleased to provide advertising materials for MGC tourism promotion purposes. Over the years, Thailand has had an established record in launching many successful tourism campaigns. So let me state, here and now, that Thailand stands ready to share our experiences with fellow member MGC countries. To underline Thailand's commitment to the development under the MGC framework, Thailand plans to host an MGC tourism meeting at Working Group level in 2008.

I should like to take this opportunity highlight India's commendable leading role in moving the MGC cooperation activities forward. India's contribution is indeed indispensable for cooperation within the sub-region. Its economic

and cultural potential, I am confident, will continue to be the driving force for the MGC in the years to come.

I believe that the MGC has excellent prospects. The shared cultural and traditional values of our countries can surely enhance the mutual understanding and create greater solidarity among the Mekong-Ganga Sub-region.

It is time to renew our endeavors in advancing this cooperative framework. I am convinced that the political will of all MGC members will enable us to strengthen and achieve our shared vision-a vision of a sub-region of closer ties amongst its peoples, living in shared prosperity.

Thailand remains committed to this cooperative framework and intends to be a constructive player under MGC. I believe that our Sub-region's potentials could be reached in full. With our shared political will and close cooperation, we will indeed be successful.

---

### **Remarks by H.E. MR. LE CONG PHUNG, First Vice Foreign Minister of Vietnam**

It is my great honor to attend the 5th Mekong- Ganga Cooperation Ministerial Meeting on behalf of H.E. Mr. Pham Gia Khiem, Deputy Prime Minister and Foreign Minister of Vietnam, who regrettably cannot be here today with us due to his engagement in the first important Session of the newly - elected National Assembly of Vietnam. Our Deputy Prime Minister and Foreign Minister would like to convey his best regards to the esteemed Foreign Ministers of the MGC countries.

We appreciate the efforts of India in hosting this important MGC Ministerial Meeting, which takes place in the context that the multi-faceted relations, particularly economic and trade relations among the MGC countries have been growing rapidly. These are important foundations on which the MGC countries will forward our cooperation along a more substantive and effective track.

We understand clearly that our meeting today, once again, not only affirms our strong determination to promote the cooperation among MGC countries, but also provides a practical platform for strengthening the ASEAN- India partnership. Vietnam fully supports India's chairmanship of the MGC and believes that in this important capacity and with a refreshed "Look East"

policy, India will further contribute actively and effectively to our fine cooperation.

As a nation in the Mekong basin enjoying close traditional relations with countries in the Ganga basin, Vietnam attaches great importance to MGC. Side by side with other MGC members, Vietnam will try her best to translate the Hanoi Program of Action into reality by implementing concrete cooperation projects. I am confident that with our joined efforts, the MGC will keep on going ahead and make effective and substantial progress in the interests of the MGC countries.

The Mekong and Ganga river basins are endowed with abundant potential for tourism development thanks to diversified ecological resources and distinctive cultures. There are many things we could do in this area. For example, we would appreciate India publishing and producing tourism promotion CD-ROM discs based on the MGC tourism festival directories compiled by Thailand as agreed in the Phnom Penh Road Map. We also propose the MGC countries to explore the possibility of setting up an MGC tourism website for joint promotion. Vietnam highly appreciates India's offer to host a travel agents' delegation from MGC countries to visit India and interact with Indian travel agencies to discuss cooperation activities.

In education sector, human resource development is a central factor in ensuring sustainable development and bridging the development gap. Vietnam once again would like to thank the Government of India for providing the MGC scholarship program. We are in high need of training in business and economic management and information technology (IT), and wish that India could extend more MGC scholarships in such training areas to Vietnam. Beside graduate and post - graduate scholarships, we also propose that the MGC countries explore the expansion of MGC scholarships to cover vocational training, with particular priority given to Cambodia, Laos and Myanmar.

We also support India's initiative to organize educational fairs in MGC countries. We would like to ask India to draft a concrete concept paper and work plan to circulate to member countries soon so that our respective agencies could begin the preparation for the fairs, perhaps sometime next year.

Regarding culture cooperation, Vietnam fully supports the establishment of the Traditional Textile Museum in Siem Riep, Cambodia with the aim at conserving and restoring traditional textile designs and products of the

MGC countries. Vietnam highly appreciates initial commitment of one million USD by India for the Museum and expects the construction work to be started soon.

We agree that it is necessary to ensure the financial sustainability of the Museum upon completion of the construction work and therefore we think a task-force should be formed to look into the matter and report to the next Ministerial Meeting.

We welcome India's new initiative of hosting 100 Buddhist pilgrims from MGC countries in the near future.

For transport and communication sectors, we appreciate the efforts of the MGC countries in completing the feasibility study of the New Delhi- Myanmar railways. To be sure, transport development requires a lot of capital, whereas our capacity remains limited. We propose the MGC working group to work out a plan with a specific road-map, in which flagship routes and viable solutions for capital mobilization be identified.

Beside roads and railways, Vietnam suggests exploring the possibility of opening new direct flights between the major economic centers in the MGC countries for better promoting tourism, trade and investment exchanges.

Till now, institutional frameworks for MGC have basically been established with objectives, principles and prioritized cooperation areas as set out in the Vientiane Declaration, the Hanoi Program of Action (HPA) and the Phnom Penh Road Map. However, due to various reasons, the MGC cooperation still falls short of bringing our potentials and advantages into tangible outcomes in response to our expectation. We have seen only a small number of projects under the MGC framework being implemented, whereas others are still in a stall-still mode. Thus, it is imperative for us to further substantiate our efforts individually and collectively to put the Hanoi Program of Actions into life. To this end, I fully share the recommendations and proposals made by Your Excellencies Foreign Ministers, in particular, India's suggestion to extend the Hanoi Program of Actions for another period of six years.

We would like to further propose the followings:

First, one of the biggest difficulties currently facing the MGC is the lack of financial resources for the implementation of concrete projects. Apart from taking advantage of outside assistance, it is needed to redouble efforts to make full use of our available internal resources. In this connection, I propose

to renew our commitment to the establishment of the MGC Fund as agreed in the Hanoi Program of Action. Vietnam highly appreciates the initial donation of 100,000 USD by India and expects India to substantiate its contribution and welcomes other MGC members to donate seed money to the MGC Fund.

Second, regarding institutional arrangement, our coordination mechanism has showed some shortcomings. For example, since the MGC chair country is not always the host of MGC Ministerial Meetings, there might be some difficulties in coordinating the arrangements for MGC Ministerial Meetings. Therefore, we propose that the chair country be also the host of MGC Ministerial Meetings and the chairmanship be rotated on the alphabetical order. In this connection, Vietnam fully supports India to continue her MGC chairmanship for the next year and believes that in this important capacity, India will further contribute effectively to our fine cooperation.

The constructive and frank discussions we had today at this important meeting, and great efforts by member countries, especially the renewed commitments and new initiatives put forward by India, give us hope and reasons to believe that together we would be able to move our cooperation forward to meet both our potentials and aspirations, in the interest of each and every nation in the region of the two great rivers - the birthplaces of many rich and proud cultures.

## NAM

### **204. Statement by Minister of State E. Ahamed at the NAM Ministerial Meeting on Human Rights and Cultural Diversity.**

**Tehran, September 3, 2007.**

H.E. Mr. M. Mottaki, Minister of Foreign Affairs of the Islamic Republic of Iran & Chairperson of the Meeting

H.E. Mr. Felipe Perez Roque, Minister of Foreign Affairs of Cuba, & Chairperson of NAM

Hon'ble Ministers, Excellencies, Ladies and Gentlemen

We feel honoured to have the opportunity to participate in this important NAM Ministerial Meeting, particularly as it is being held in this beautiful and historical city of Tehran. The presence of the Hon'ble President of Iran in our midst at the inaugural session this morning is a clear indication of the high importance that the Islamic Republic of Iran attaches to this historic event.

2. The relations between the two ancient civilizations of India and Iran are a living testimony to the relevance of an approach encompassing human rights and cultural diversity. We share deep civilizational ties and our historical links go back several millennia. A steady interaction between our societies based on mutual respect and tolerance has been an abiding feature of our relationship. The New Delhi Conference on "Dialogue Among Civilizations - Quest for New Perspectives" held in New Delhi in 2003 as a joint initiative of India and the Islamic Republic of Iran also recognized that the objective of any dialogue is to reinforce tolerance, solidarity, mutual understanding and respect, and to promote pluralism, democratic values and institutions. NAM must continue to reinforce that message.

**Mr. Chairman,**

3. As non-aligned countries, we have been in the forefront of blocking attempts to divide the world into ideologically irreconcilable blocs. We espoused peaceful co-existence and the higher cause of humanity beyond narrow divisions. Today, we again confront the

danger of a world being split along an artificially created cultural and religious divide, and the concomitant effect that it has had on the effective enjoyment of human rights. An appreciation of a culture of tolerance, respect for cultural diversity, and common understanding of the effective realization of all human rights for all, has become more compelling than ever before.

4. Globalization has made us all citizens of a global village. It has also made it even more essential that we show greater mutual understanding and tolerance of each other. We must also guard against a tendency to threaten diversity and unique cultural attainments as a result of globalization and technological change. Attempts to project racial or cultural superiority should be rejected outright.
5. Today the Non-Aligned Movement is once again uniquely placed with well over half of the membership of the United Nations to play the role of a bridge of understanding that promotes cultural diversity while ensuring respect for human values and dignity. The distinctive character of the Movement, encompassing every religion professed by mankind, every ethnic group and ideological persuasion, makes it an effective forum for addressing these challenges confronting us. Our cooperative world view is in itself a rejection of the notion of a "clash of civilizations". In the words of the Prime Minister of India, Hon'ble Dr. Manmohan Singh, "our message to the world should be that it is possible to work for a confluence of civilizations". At the heart of this message lies the need for greater respect for each others culture and values, while upholding the dignity of the individual and the rule of law.

**Mr. Chairman,**

6. Pandit Jawaharlal Nehru in his book "Discovery of India" wrote in 1945 that "it was India's way in the past to welcome and absorb other cultures". That is much more necessary today, for we march to the one world of tomorrow where national cultures will be intermingled with the international culture of the human race. We shall, therefore, seek wisdom and knowledge and friendship and comradeship. Thus, we shall remain true Indians and Asiatics, and become at the same time, good internationalists and world citizens. These words remain as valid and true today as they were more than 60 years ago.
7. In the South Asian region too we are making efforts to celebrate our common cultural heritage. India, as Chairperson of the South Asian Association for Regional Cooperation, along with the other members

of that Association, has taken several steps to promote people-to-people contacts and intercultural dialogue in the region.

8. At the World Summit of 2005 in New York, our leaders recognized the inter-linked and mutually reinforcing nature of human rights, development, and peace and security, as pillars of the United Nations system. They also committed us all to advancing human welfare, freedom and progress everywhere, as well as to encouraging tolerance, respect, dialogue and cooperation among different cultures, civilizations and peoples. The newly established Human Rights Council should now develop suitable frameworks to address challenges to cultural pluralism in the promotion and protection of human rights.

**Mr. Chairman,**

9. With the support of all the NAM countries, the UN General Assembly unanimously adopted in June this year a resolution under the agenda item "Culture of Peace", declaring Mahatma Gandhi's birthday, October 2, as the International Day of Non-Violence. The ideas and values espoused by Mahatma Gandhi remain as relevant today and show us the way forward to addressing contemporary world problems. Emphasizing and promoting the principle of non-violence contributes to the realisation of the 1999 UN Declaration and Programme of Action on a Culture of Peace.

**Mr. Chairman,**

10. I am happy that the draft Declaration to be adopted at the end of our meeting fully addresses the current challenges to cultural pluralism in a globalizing world, and also delineates responsibilities of various actors in charting an effective course to promote values and principles such as non-discrimination, democracy, justice and equality. It also recognizes the crucial role of education in fostering respect for both human rights and cultural diversity.
11. In conclusion, I would like to thank our hosts, the Government of the Islamic Republic of Iran, for the excellent arrangements made in organizing this meeting and for the traditionally warm hospitality that has been extended to us from the moment of our arrival here.

Thank you, Mr. Chairman.

## **G-77**

### **205. Statement by Deputy Permanent Representative at the UN Ajai Malhotra at the 31<sup>st</sup> annual meeting of the Ministers of Foreign Affairs of the Group of 77.**

**New York, September 27, 2007.**

**Mr. Chairman,**

At the outset I would like to congratulate Pakistan on the leadership it has provided to the Group of 77 since the beginning of 2007 and for promoting the Group's interests at UN fora.

I would also like to greet Antigua and Barbuda on its election as the Chairman of the Group of 77 for the year 2008. We wish Antigua and Barbuda a very productive tenure as our Chair and reiterate India's whole-hearted support to it in pursuit of our common goals and objectives.

**Mr. Chairman,**

At the Millennium Summit seven years ago, we set ourselves the target of achieving the Millennium Development Goals by 2015. We are at the half-way mark today. Yet, despite best efforts and notable successes, it is clear that many developing countries are unlikely to achieve the targets that were set. Full implementation of MDG 8 – the global partnership for development - remains an imperative in order to assist developing countries in their efforts to achieve the MDGs, and other internationally agreed development goals. To do so, the commitments made by developed countries regarding official development assistance, trade, technology transfer and enhanced market access must be fulfilled expeditiously. Unfortunately, this has not happened and the trend is now in the opposite direction.

We note with concern the drop in ODA that has taken place during 2006. Moreover, a substantial part of ODA is being channeled towards debt relief, with no additional or new resources being made available. Given that the process of debt relief has been largely completed for most donors, the prognosis remains grim for a future increase in aid so as to reach the targeted 0.7% of GNI. Moreover, there is an upward trend in overall resource transfer from developing to developed countries. Real and effective technology transfer needs to take place to developing countries, and it is time that the IPR regime looks at balancing the rewards for the innovator with the benefit to humankind. In this regard, we fully support the newly

strengthened Economic and Social Council playing its due role in promoting awareness and giving policy guidelines in the area of development cooperation, and to follow-up major UN Summits and Conferences.

In this context, the implementation of the outcomes of the Monterrey Conference, on creating an international economic environment conducive to development and ensuring that predictable and sufficient resources are made available to developing countries to pursue their development policies, remain a central objective. Unfortunately, progress remains limited. The recent crisis in the financial markets has demonstrated yet again the potential threat to the 'real' economy and, consequently, to development policies, posed by esoteric and speculative financial products, and the need for effective surveillance for such transactions through a financial system that has greater legitimacy than current structures.

At the same time, a comprehensive review of the international economic and financial architecture, so as to ensure a greater voice and increased participation by developing countries in decision-making and norm setting processes, continues to elude us. There is a need to redouble our efforts in order to achieve tangible progress in this area. We express our appreciation to the Government of Qatar for offering to host the Monterrey Review Conference in 2008, and we hope that it will provide an opportunity for a detailed review of progress made and enable us to chart the way ahead. We also look forward to the biennial High-level dialogue on Financing for Development to be held in October 2007 and the preparatory process for the Review Conference to provide useful inputs for it.

**Mr. Chairman,**

The Doha round of trade negotiations needs to ensure the primacy of the development dimension. Subsistence farming in developing countries cannot be compared with the enormously subsidized farming that takes place in developed countries. It is unfair to link progress on this issue with NAMA. It is important for developing countries to maintain flexibilities and preserve policy space particularly in the context of NAMA, in order to avoid the danger of deindustrialisation for some developing countries. The overarching principle of special and differential treatment remains a categorical imperative. We hope that our developed country partners show the necessary flexibility so that progress in the negotiations can be achieved.

The recent meetings in the UN General Assembly and other fora have served to highlight the urgent need to address the issue of global warming

and climate change. We look forward to the meetings of the UNFCCC in Bali later this year and hope that developed countries will commit to, and implement, sharper emission reduction targets for the post-2012 period under the Kyoto protocol. We also underline the need for additional financial resources, technology transfer, and capacity enhancement in developing countries in order to assist them in addressing climate change and related concerns. Sustainable development must be addressed in a holistic manner through its three pillars of economic development, social development, and environmental protection.

**Mr. Chairman,**

The need for solidarity among developing countries continues to be important. The singular success of this Group has been in its ability to project our common interests with one voice and the continued cohesiveness of the Group remains key to ensuring that the interests of developing countries are adequately protected and promoted. It gives me great satisfaction to note that even on areas where some of our members have somewhat varying concerns, the Group has been able to coalesce around common elements.

Our diverse membership in turn brings diverse concerns to the fore. However, we must be cognizant of the need to specifically address the concerns of the Least Developed Countries, the Landlocked Developing Countries, the Small Island Developing States, the African countries and others who need our support. In this regard, we also look forward to the Review Conference of the Almaty Programme of Action for Landlocked Developing Countries next year.

**Mr. Chairman,**

The Group of 77 has a special role to play in promoting the common interests of developing countries and in fostering South-South cooperation. India is already active in sharing its developmental experiences with several partner countries, as also its expertise in certain areas of capacity building and technology. India remains ready to expand such cooperation with our developing country partners in future as well. We believe that the Group of 77 has been a most valuable asset for the developing countries. We shall remain fully engaged in exploring cooperative solutions both among ourselves and with the wider international community. I would like to reiterate India's full support and involvement in this effort.

Thank you, Mr. Chairman.

INDIA'S FOREIGN RELATIONS - 2007

**206. Speech by the External Affairs Minister Pranab Mukherjee at the International Seminar on "Economic Security for Peace and Development in South Asia" at the Institute of Defence Studies and Analysis.**

**New Delhi, 16 March, 2007.**

I thank the Institute of Defense Studies and Analysis and the Indian Council for Research on International Economic Relations for organizing this Seminar on the important and relevant subject of "Economic Security for Peace and Development in South Asia". Coming as it does barely a fortnight before the opening of the 14th SAARC Summit in New Delhi, this Seminar could not have been timed better.

**Mr. Chairman,**

"The battle for peace has to be fought on two fronts. The first front is the security front, where victory spells freedom from fear. The second is the economic and social front, where victory means freedom from want. Only victory on both fronts can assure the world of an enduring peace."

These words, spoken by Edwin Stettinius, the US Secretary of State during the founding conference of the UN, remain as true today as they did when he uttered them in 1945.

South Asia is home to about 1.3 billion people, representing almost 1/5th of humanity. Through rich in cultural, natural and human resources, the region suffers from the problem of a large concentration of mass poverty. However, today, the countries of South Asia may also be on the threshold of a historic moment. It is up to them to recognize the potential for transforming their economic conditions and, together with other Asian countries, play a key role not only in the global economy but also in the development of human civilization in the 21st century. For the first time in the last 350 years, the global economy is undergoing a shift in its centre of gravity from the continents of Europe and North America to Asia. Asia's real income per capita rose seven fold between 1950 & 2005 and its share in world trade has more than doubled during 1970-2005. Globalization, while creating unprecedented opportunities for the progress and prosperity of all countries, has also brought new challenges for developing countries, including in South Asia. It is, therefore, imperative for the countries of this region to make joint efforts and make the best use of the complementarities of the region as a whole to avail of the positives of globalization.

**Mr. Chairman,**

India has long argued that if South Asia is to become a dynamic component of the larger processes of regional cooperation and globalization, it must achieve economic integration, first within itself and then with other regions that abut it. SAARC as an institution of cooperation in the region is thus significant and indispensable. Though its potential has been belied, the adoption of the South Asian Free Trade Agreement (SAFTA) and the reiteration by the leaders of the need to strengthen the institution, at the Dhaka summit held in 2005, has given a new hope.

For its part, India is firmly committed to the SAARC process. Our growing economy can create a ripple effect in the region and our neighbours can and should participate in this process with a view to sharing in economic progress and prosperity. While these are choices that individual countries will have to make, we firmly believe that closer economic and developmental cooperation offers immense benefits to all sides.

A case in point has been our contribution to the development of war torn Afghanistan with nearly US \$750 million of assistance to support economic rehabilitation and reconstruction. A sovereign, stable, democratic and prosperous Afghanistan is not only in our best interest but also essential for peace and stability in the region. Afghanistan's participation in SAARC will also strengthen the traditional and historical linkages between South and Central Asia.

Indo-Bhutan co-operation in the hydro-electric sector is another model of economic partnership in South Asia. It has been a win-win proposition, creating employment, economic opportunity and contributing to sustainable development.

Similarly, the Free Trade Agreement (FTA) with Sri Lanka, signed in 1998 and operationalised in 2000, has resulted in a phenomenal increase in trade between the two countries. We are now moving towards a Comprehensive Economic Partnership with Sri Lanka. Our other trade agreements in the region, for instance, with Nepal and Bhutan, operate on the principle of non-reciprocity. We are also ready to offer unilateral tariff concessions to Bangladesh.

**Mr. Chairman,**

Economic security in the South Asian region cannot be defined merely in terms of investments, energy security or greater flow of goods and services.

One must also examine the conditions for economic growth and development to maximize gains from trade and commerce for our people. Amongst these is our ability to tackle issues like terrorism, drug-trafficking, money laundering etc., which have assumed transnational dimensions. Countering them requires joint action through enhanced vigilance, information sharing, improvement of border infrastructure, capacity building and mutual legal assistance in criminal matters, besides extradition treaties.

International terrorism, particularly, can be dealt with much more effectively if nations cooperate honestly and transparently. Groups and individuals involved with organized crime and drug trafficking operate from both inside and outside the region. Often, they have linkages with terrorists groups and provide them with logistics support and funding. This relationship between organized crime and terrorism requires a thorough analysis to enable states to develop appropriate counter measures.

Counter terrorism was a major theme at the 13th SAARC Summit in Dhaka. There was strong condemnation of terrorism in the Summit Declaration and renewed commitment to eliminate this scourge, both from the region as well as from the world. There can be no double standards in tackling this collective challenge. The first meeting of SAARC Home Ministers, held in Dhaka on May 11, 2006, also called upon member states to provide enabling legislation for the Convention on Suppression of Terrorism. An effective implementation of this Convention and the Additional Protocol will help us to collectively tackle the problem of terrorism.

**Mr. Chairman,**

The establishment of adequate and efficient infrastructure is the key to economic development in the region and constitutes one of the foremost challenges before the South Asian states in achieving security and development. It is essential for all of us to create or upgrade infrastructure for world class connectivity, which would not only open us to each other but also to the world beyond.

For economic integration to succeed, such connectivity is essential. There are of course many forms of connectivity, but I would restrict myself to three. First is physical connectivity, through physical infrastructure in the areas of transport and energy; secondly, electronic connectivity; and, finally, knowledge connectivity.

At the Dhaka SAARC Summit, the Prime Minister of India, Dr. Manmohan Singh, had suggested that South Asian countries provide transit facilities

to each other on a reciprocal basis. India, which borders each of the member countries, is willing to do so. In this regard, India's proposal to hold the South Asian Car Rally in the run up to the next SAARC Summit is intended to draw attention to the need to improve SAARC transport infrastructure.

Related to this is the need to improve air connectivity between SAARC member States. The increased frequency of flights between India and Sri Lanka and the Maldives in recent times has led to a great increase in tourist flow. We believe that an Open Skies arrangement would benefit all of us in South Asia.

There is also need to improve rail and land connectivity in the region. There is a proposal for a land bridge to connect Rameshwaram in India with Talaimannar in Sri Lanka. In the area of virtual connectivity, an undersea optical fibre link has already been established between Tuticorin and Colombo. Within Sri Lanka, India is helping to refurbish the Colombo-Matra railway line under a US \$100 million credit line. We are keen on obtaining transit facilities through Bangladesh, which will give a further fillip to India-Bangladesh trade and provide India a shorter, more efficient route to our North East region.

I also want to emphasize here that, over the years, we have closely worked with our neighbours, for example Nepal and Bhutan, to ensure that our natural linkages are translated into meaningful and mutually beneficial economic, commercial and cultural ties. Important initiatives are already under way to strengthen infrastructure on our borders with these countries. These include setting up of modern integrated check-posts, cross-border rail-links, access to roads, air-connectivity, waterways and up-gradation of our border road infrastructure. Modernization of infrastructure and greater connectivity - in the broadest sense - will no doubt promote freer flow of goods and services.

Development of tourism, sports and cultural links should be another priority. These are areas which can give instant returns. If people of South Asia are allowed easy travel for short visits within the region and even if a small proportion of the population starts to travel among South Asian countries, we are talking about millions of people contributing to tourism. We are then talking serious figures for new economic activity in the region that would unleash not only a tourism boom but also a construction boom in the countries of South Asia with the need for new hotels, shopping malls, recreational facilities, and transport facilities. I feel that if we loosen up

now, within a few years regional tourism could be a huge industry, creating millions of new jobs in our countries.

Today's economies are dominated by the knowledge-based industry. If South Asian countries are to integrate themselves with the emerging Asian economies, then they have to achieve certain indices in human resource development and to keep abreast of cutting edge technologies and scientific research. The suggestion to set up a South Asian University that could provide world-class facilities and professional faculty to students and researchers from every member country will be a major contribution to realization of this goal over the next two to three years. Naturally, one of the key issues in the future would be to devise modalities for including services under SAFTA.

**Mr Chairman,**

Civil society, electronic and print media are important pillars of any democratic framework. It is heartening to note that we have in the region a very active civil society and an alert media. They have a vital role to play in connecting people and to disperse ideas in the region.

In our view, democratic institutions and a culture of democracy, coupled with an independent judiciary, a vibrant civil society and a free media, provide the most appropriate platform that would allow South Asian states to nurture the aspirations of their diverse communities in a pluralistic milieu. This would also ensure long term peace and security.

**Mr. Chairman,**

Other major challenges that South Asian countries will have to face in years ahead are food security, energy security, disaster management and public health. Prime Minister Dr. Manmohan Singh had put forward some suggestions to address these challenges. These included establishing a Regional Food Bank to be used to meet shortages and losses caused by natural calamities in any of the member countries, initiating a South Asian Energy Dialogue involving experts, academics, environmentalists, officials and NGOs, to recommend measures to tap and promote regional cooperation for energy security. Moreover, we hope that the SAARC Development Fund, to which India has offered to contribute US \$100 million, will help to address the problem of poverty alleviation and development in general. We also have to come up with practical, workable and affordable solutions to contain and handle the dangers posed by HIV/AIDS and Avian Flu, etc.

**Mr. Chairman,**

The stakes are indeed enormous for the citizens of South Asia. The peace dividend would run into billions of dollars, forever changing the lives of the citizens of South Asia. The goal of more than doubling the South Asian region's per capita income can be easily achieved in a conducive environment and with cooperative action. This would, however, require that the leadership of South Asia accept the challenge of propelling South Asia into the 21st century as the fastest growing region of the world. We have an opportunity to actually make this subcontinent achieve its potential. On its part, India stands ready to go the extra mile for a better future of the region.

Thank you.

**207. Question in the Lok Sabha: "India's Financial Assistance to Neighbouring Countries".**

**New Delhi, May 16, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether the Government is providing any financial assistance to the neighbouring countries and other developing countries;
- (b) if so, the details of such assistance provided to those countries during the last three years;
- (c) whether the Government has proposed to increase the assistance during the current year; and
- (d) if so, the details thereof?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a) The Ministry of External Affairs provides financial assistance to neighbouring and other developing countries under its 'Aid' Budget.
- (b) Details of such assistance provided to the neighbouring countries and other developing countries are as below:

Year	Rs. in Crores
2004-05	1347.61
2005-06	1492.82
2006-07	1286.74

- (c) Yes.
- (d) A budgetary provision of Rs.1567.50 crore has been made for 2007-08 for this purpose.

**208. Lakshman Kadirgamar Memorial Lecture delivered by Finance Minister P. Chidambaram at the Institute of International Relations and Strategic Studies on the subject of: "Growth Prospects in South Asia: Challenges and Opportunities".**

**Colombo, November 11, 2007.**

I am deeply grateful to the Lakshman Kadirgamar Institute of International Relations and Strategic Studies for inviting me to deliver this lecture. In particular, I thank Mrs. Kadirgamar who prevailed upon me to find a date for this lecture amidst my rather chaotic schedule. Her persuasion, persistence and patience, I am told, are well known. I am sure that many of you who know her better will agree with me when I say that her qualities can move mountains.

As a fitting tribute to Mr Lakshman Kadirgamar, the Sri Lanka Institute of Strategic Studies was re-christened in August 2006 as the Lakshman Kadirgamar Institute of International Relations and Strategic Studies and given a broader mandate. The objectives of the Institute encompass the vision of Mr Kadirgamar, the most important feature of which is that Sri Lanka should regain its historic internal harmony by embracing its multi-cultural and multi-ethnic character. Mr Kadirgamar himself was a product of Sri Lanka's unique character. He was a Tamil; he was born in the Jaffna region; he was a Christian; he celebrated Vesak, the full moon day on which Lord Buddha was born; he read literature at Oxford; he was called to the Bar from the Inner Temple in the United Kingdom; and he practised law

at the Judicial Committee of the Privy Council. From international civil servant to foreign minister, he held many offices with great distinction.

India regarded Mr Kadirgamar as a statesman who devoted many years of his life - especially his years as foreign minister - to bring peace to this tortured nation. Under the most adverse conditions, he carried out his duties as a public servant in the manner that he played cricket. And how did he play cricket? To recall his words, "I played without helmet and thigh guards, on matting wickets that were full of holes and stones, and I had my share of broken bones to show for it." None could break his spirit as a cricketer and none could break his spirit as a public servant imbued with the high ideals of a statesman.

It is a little over two years since Mr Kadirgamar was assassinated. I pay my tribute to this great Tamil and great son of Sri Lanka, and I am honoured to deliver this lecture instituted in his memory.

### **The Asian Resurgence**

The Asian continent is the cynosure of all eyes. The countries of Asia - except a few - emerged in the middle of the 20th century from long periods of colonial rule. In the initial years they struggled to find their feet and establish suitable models of governance. It was only a matter of time before one or more countries of Asia would burst on the economic scene and capture the attention of the world. And it happened in the 1980s when Singapore, South Korea, Malaysia and Thailand emerged as tiger economies. At the end of the 80s, the question on everyone's lips was whether and when the countries of South Asia would accept the challenge of growth.

South Asia is home to 1470 million people living in eight countries. India is the largest in terms of population and size. The smallest population is in the Maldives and the smallest in size is also the Maldives. The people of the sub continent speak 415 languages, belong to several races and faiths, and have many identities that they cherish. The countries of South Asia also follow different models of governance: without being judgemental, I would simply recall the fact that some of these models have failed. Such failure has consequences for the growth and prosperity of South Asia.

According to the Asian Development Outlook 2007, growth in South Asia since 2003 has averaged 7.5 per cent a year. In 2006, South Asia's GDP grew by 8.7 per cent, with India recording the highest growth among the

large economies and the Maldives recording the highest growth among the small economies. On practically every measure, 2006 was a good year for South Asia. The current account deficit was 2.1 per cent of GDP, thanks largely to workers' remittances; exports grew at 18.8 per cent and imports, even more impressively, at 24.9 per cent. Foreign exchange reserves increased and real effective exchange rates were stable. The Outlook rated the region's prospects in 2007 as "bright due to strong domestic demand and investment."

The growth story has continued in 2007, although one forecast made by the Outlook has turned out to be wrong. It was predicted that world prices of oil and other commodities were likely to fall. What has happened is the exact opposite. However, another prediction has proved to be more than correct, and that is the prediction that the region will attract large capital flows. I am not fond of predictions but I would not mind if I could find some one who could predict which of the predictions will turn out to be true!

### **Growth is an Imperative**

The lesson we should draw from our past history is that nothing can be taken for granted, including growth. We must work hard for growth, we must do the right things and we must avoid doing the wrong things. Even when we do the right things, it is not always that the right consequences will follow because we are a part of the global economy and we will be affected by the ups and downs in the global economy.

For South Asia, growth is an imperative. It is the best antidote to poverty - and I refer to not only income poverty but also poverty as measured by many human development indicators. According to the UNDP's Human Development Report 2004, 31.4 per cent of all South Asians were below the poverty line which was defined as having an income of less than US\$ 1 a day.

The human development index for South Asia in 2003 stood at 0.587. Life expectancy at birth was 63; female literacy rate was 45 per cent; and the gross enrolment ratio was 57 per cent. The infant mortality rate was 63 per 1000 live births. 46 per cent of children under the age of 5 years were underweight and, by inference, undernourished. Of the total population, 14.8 per cent did not have access to safe water and 64.8 per cent did not have access to sanitation.

South Asia remains a region where there is still an unacceptably high level of poverty and deprivation. Despite its impressive rate of growth in recent

years there are, in India, nearly 250 million people who are below the poverty line. Pakistan struggles with a high fertility rate, a low gross enrolment ratio and a low gender-related development index. Nearly one half of the population of Bangladesh is below the income poverty line and it has the lowest rank among South Asian countries on the human development index. Nepal has the lowest GDP per capita and the lowest ratio of population with access to sanitation. Sri Lanka has the lowest public expenditure on education as a proportion of GDP but the highest defence expenditure per capita. Bhutan has the largest proportion of the population without access to safe water and the highest proportion of children, aged 10 to 14 years, in the labour force. The Maldives has the highest fertility rate and the highest rate of growth of population but produces no cereals and is heavily dependent on food imports. We do not yet have reliable data on Afghanistan.

Thus, the challenges that face South Asia are enormous. The answer to these challenges is faster and more inclusive growth.

### **Governance is the Key**

What compounds these challenges is the shadow of political uncertainty that has fallen over most of the sub-continent. It appears to me that the countries of South Asia, barring India, have still not resolved the fundamental question of the model of governance that is suited to each of them; consequently, the political institutions in these countries have not yet taken firm roots. While change is unavoidable and there can be no quarrel with occasional experimentation, a state of constant flux or political turbulence is hardly conducive to rapid economic growth. In fact, absent democracy, whatever growth that may be achieved in short spells may turn out to be iniquitous growth and may exacerbate the social and economic disparities in the society.

In multi-cultural and plural societies, there is no model of governance better suited to reflect and respond to the needs and aspirations of the people than democracy. Furthermore, it is not democracy at one level alone that will assure social and political stability. While there should be a strong central or federal government for the country as a whole, it is equally important that the political system recognizes the geographical or linguistic or ethnic divisions among the people and creates political institutions that will accommodate these differences and give voice and representation to all sections of the people.

### **India - a Connecting Thread**

India is conscious of its role and responsibility in South Asia. India is the largest country in the sub-continent. In recent years, it has recorded the fastest rate of growth among the large economies. Given its size, location and rate of growth, India is at the very centre - in many senses of the word -- of the region. According to one view, India is a connecting thread. India's desire is that all its neighbours -- as well as India -- should seize the opportunity of becoming prosperous countries in a prosperous region.

India is aware of the asymmetry between India and each of its South Asian neighbours and has addressed the issue with candour and boldness. It has done so through bilateral agreements as well as through the South Asian Association for Regional Cooperation (SAARC). Some examples are the grant of MFN status to Pakistan despite the fact that this has not been reciprocated by Pakistan so far; the open trade borders with Nepal and Bhutan; the special tariff concessions offered to Bangladesh; and the India Sri Lanka Free Trade Agreement. India has also taken a forward-looking position on SAFTA.

### **Regional Integration**

Regional integration has many advantages as other regions such as Europe, East Asia and Latin America have discovered. It enables the countries of the region to pool their resources and act in concert to address common problems. It multiplies the attractiveness of the region to other countries as well as enhances the capacity of the region to enter new markets. Regional trading arrangements are often described as building blocks for a rule-based world trade order; in practice, however, regional blocs are driven by their self interest and adopt tough bargaining positions with countries that trade with them. A regional bloc, rather than an individual country, has a greater chance of securing better deals with another regional bloc.

It is an irony of the development trajectories pursued by South Asian countries that while each one of them has made significant progress in integrating its economy with the world's, integration within the South Asian region remains stunted. The tariff and non-tariff barriers between the countries of the region are still too high. Trade facilitation between the countries is still poor. There is insufficient coordinated action to prevent smuggling, especially of fake currency, drugs and arms. There is no concerted effort so far to stamp out money laundering. SAARC does not act as a regional bloc in dealing with other countries or other regional blocs,

and each member country has pursued an independent line in its bilateral and multilateral dealings. For instance, SAARC does not have a SAARC position in the WTO or the IMF. In the negotiations in the Doha Round, there is no SAARC negotiating stance as compared to the stance of the European Union or NAFTA or the CAIRNS Group.

Intra-regional trade among the South Asian countries is barely 5 per cent, which is the lowest rate among practically all regional groups in the world. NAFTA's intra-regional trade amounts to 52 per cent of the group's total trade. In the case of the European Union, the proportion is higher at 55 per cent. Even in nearby ASEAN, intra-regional trade accounts for 21.4 per cent of all trade. Low proportion of intra-regional trade, limited cross border investments, restricted cross border movement of people and low levels of connectivity make the region not a forward-looking regional bloc but a cluster of inward looking member-countries.

### **Growth-enhancing Opportunities**

It is a matter of some concern that South Asia is unwilling to address even non-controversial growth-enhancing issues such as telephone connectivity and travel. Telephone tariffs between the countries of the region are still high. Travel costs are also high. Instead of being a more connected region, the story so far has revealed a South Asia that is perhaps the least integrated region in the world. If South Asia should become a dynamic regional bloc in the larger process of globalization, the region cannot remain disconnected within itself.

The 14th SAARC Summit earlier this year took note of the significant step of the ratification of the SAFTA agreement by all member-countries. SAFTA is important not only to promote intra-regional trade but also to usher in new areas of cooperation in services and investments. There are a number of common problems which are beyond the purview of trade. These include issues such as the constraints of land-locked countries, high transaction costs, inadequate investments, visa restrictions and lack of many professional services. There are also other emerging issues such as energy shortages, disaster management, diseases and epidemics, and climate change. These and other issues can be more effectively addressed if the countries of South Asia showed greater political will and the determination to act as a regional group rather than as discrete countries taking separate roads.

### **The Theme of Connectivity**

Ladies and Gentlemen! You will recall that at the 14th SAARC Summit the Prime Minister of India, Dr Manmohan Singh, unfolded his vision by placing before the Summit the theme of connectivity. He said, and I quote,

*"Connectivity - physical, economic and of the mind, enabling us to use fully our geographical and resource endowments, has historically been the key to our region's peace and prosperity. South Asia has flourished most when connected to itself and the rest of the world."*

In other regions of the world, member-countries are pressing ahead with bold projects such as trans-regional highways, trade corridors and energy pipelines. Despite the fact that the countries of South Asia have greater commonality, it is unfortunate that they have not made a beginning in the direction of greater connectivity. Consider the power and impact of a trans-regional highway or an energy pipeline upon the economies and the lives of the people of the region. Consider also the fact that the region is home to many places of antiquity, historicity and heritage, including Buddhist sites: a culturally sensitive and socially inclusive tourism can catalyze economic growth. In my view, the theme of connectivity needs to be taken up with utmost seriousness. The countries of South Asia should immediately explore the possibilities of establishing more air links, telecom corridors, tourism circuits and energy grids.

The countries of South Asia also need to pool their resources through collaboration in regional projects, including in areas such as infrastructure, poverty alleviation, public health and disaster management. At the 14th SAARC Summit, member-countries brought into operation the SAARC Development Fund. India has also launched the SAARC tele-medicine project. We should, as early as possible, establish a South Asian University to bring high quality education to all countries in the region. The abundant human resources in South Asia are the most valuable resource base of this region and its expansion as well as enhancement will act as a powerful trigger for rapid economic development.

### **Development Cooperation between India and Sri Lanka**

Let me conclude this lecture with a special reference to the development cooperation between India and Sri Lanka. I may again recall the Free Trade Agreement between the two countries. The economic partnership between India and Sri Lanka could serve as a benchmark for similar partnerships between India and the other countries of South Asia.

Sri Lanka is India's largest trading partner in South Asia. Bilateral trade between the two countries, at the end of March 2007, stood at US\$ 2726 million. I may point out that trade turn over has quadrupled in the last six years. In fact, during the period of six years, Sri Lanka's exports to India have increased ten-fold.

There is also a surge in bilateral investments. Businesses from India have invested in Sri Lanka in sectors such as petroleum, cement, hospitality and transport. We hear every day of growing interest among Indian investors in emerging sectors such as telecom, energy and infrastructure. Equally, it is a cause of great satisfaction that efforts are being made by Sri Lankan business persons to invest in India. There have been significant beginnings in biscuits, beverages and garments. India welcomes the new model of partnership emerging between India and Sri Lanka that is based on a healthy two-way movement of goods, services and capital.

We have also witnessed strong growth in service industries such as shipping, tourism, logistics, banking and insurance. 70 per cent of the calls at Colombo port are from India. Four Indian banks and one Indian insurance company are operating in Sri Lanka. Four airlines from India operate services to Sri Lanka, even while Sri Lankan Airlines remains the dominant player operating about 95 flights a week to India and earning nearly 50 per cent of its profits from its Indian operations. It is not a matter of surprise that 21 per cent of all tourist arrivals in Sri Lanka are from India.

Sri Lanka and India are working together towards greater development cooperation especially in the area of infrastructure. Indian companies have undertaken several projects in Sri Lanka including refurbishment of the Southern Railway corridor. Nearly 50 per cent of the development assistance to the SAARC region provided by India flows to Sri Lanka. There are also small projects for capacity building in education, health and agriculture.

The success of the Free Trade Agreement has encouraged the two countries to begin negotiations on a Comprehensive Economic Partnership Agreement that will expand cooperation beyond trade and goods. I am happy to note that the negotiations are at an advanced stage and it is likely that a draft agreement could be reached very soon.

### **Peace and Stability**

In order to make full use of these opportunities, it is necessary that there is an environment of peace, stability and security in Sri Lanka. India is

committed to the unity, sovereignty and territorial integrity of Sri Lanka. India has made this clear on every occasion; at the same time India has emphasized that the ethnic conflict in Sri Lanka, arising out of a sense of discrimination and a sense of negation of cultural, linguistic and human rights, should be resolved through a negotiated political settlement that includes a credible devolution of powers. Senseless acts of terror on the one side or planned operations by the armed forces on the other side will only result in more death and destruction. Neither side can finally prevail over the other through conflict. Peace must be forged at the negotiating table and the peace agreement must win a vote of confidence from the people. Witness the happy conclusion reached in Northern Ireland after years of strife. The continuation of the armed conflict in Sri Lanka will deepen the divisions in Sri Lankan society and will make a negotiated settlement more difficult. It will also have an adverse impact on the economy, evidence of which is already noticed.

### **South Asia must seize the Opportunity**

It is now generally acknowledged that South Asia, given its recent economic performance, can match East Asia's growth rates. Sound macroeconomic policies can attract huge investments to the region. Capital, joining hands with the abundant and talented human resources of the region, can turn the region into a veritable economic powerhouse.

I shall leave you with a question: will South Asia, inspired by the broad and humanising vision of leaders like Mr Lakshman Kadirgamar, keep its tryst with destiny?

**(i) COUNTRIES OF THE SAARC**

## AFGHANISTAN

### 209. Joint Press Conference of External Affairs Minister Pranab Mukherjee with Afghan Foreign Minister Dr. Spanta.

**Kabul, January 23, 2007.**

**Afghan Foreign Minister Dr. Spanta:** As you all know, Afghanistan and India have special relations. These relations have been linked with historical similarities. India and Afghanistan have common values, political and regional similarities. India is the largest democracy in the world. A country with indulgence, a multicultural and a country with sound coexistence of different cultures. Afghanistan can learn much from this positive experience of India in relations to the tradition of indulgence.

Since the overthrow of Taliban, Republic of India has played a major role in the reconstruction of Afghanistan. India has contributed and pledged 650 millions USD in the fields of reconstruction, capacity building, and scholarships for Afghan students, which we really appreciate. H.E Pranab Mukherjee will elaborate on these contributions and new initiatives of Indian government during his remarks.

In 2006, I had the chance to pay a visit to India as the FM of Islamic Republic of Afghanistan and we had constructive discussions and H.E President Hamid Karzai is also a graduate of India, paid a visit to India and received Indira Gandhi's award for peace which is a symbol of President Karzai's efforts in bringing peace in Afghanistan. We are grateful from Indian people for the construction of parliament's new building in Afghanistan. This building has a symbolic meaning and concept for us, because India is the largest country in the Third World with a rapid development rate. The current India has been successful in democracy we hope that our newly established parliament will similarly represent our people and strengthen democracy in Afghanistan.

In our today's talks, besides strengthening bilateral regional cooperations with India, membership of Afghanistan in SAARC, we also discussed common threats facing the region. The common stand of SAARC members in the 2006 declaration of this organization states that terrorism is an international threat.

Since 2001, 29 MoUs and agreements have been signed, and today we

witnessed the 30th MoU signed between these two countries, which mark a high quality of reciprocal relations between our countries. Nearly, 300 Indian experts and labourers are working in different projects of road construction, reconstruction and energy in Afghanistan. We really appreciate their efforts. Meanwhile, I would like to once more convey condolence of Afghans and Afghan government for the killing of Indian Engineers by terrorists in Afghanistan.

Strengthening of relations between these two countries will be in favor of our neighbouring countries, and it will not sustain a loss to any country. We want to use these relations for the benefits of strengthening relations between South Asian and Central Asian countries.

Afghanistan wants to function as a linking bridge among Central Asia, South Asia, East Asia and Middle East.

Once more I extend my warm welcome Foreign Minister.

**External Affairs Minister, Shri Pranab Mukherjee :** I would like to thank my gracious host, Foreign Minister Dr. Spanta, for the warm hospitality extended to me and to my delegation. My visit to Kabul is in the context of the 14th SAARC Summit to be held in New Delhi on 3-4 April 2007. However, it has also given me an opportunity to discuss bilateral relations with leaders here.

We are extremely happy that it will be our privilege to welcome Afghanistan in New Delhi when it joins as a member of SAARC in the first ever expansion of this Association. Later today, I will be calling on H.E. President Karzai to convey the invitation of Prime Minister Dr. Manmohan Singh to the SAARC Summit.

I have also invited Foreign Minister Dr. Spanta to participate in the 28th meeting of the SAARC Council of Ministers in New Delhi on 2 April 2007 as a Special Invitee.

Earlier today, I called on the President of Wolesi Jirga, His Excellency Mohammad Yunus Qanooni. I also met Chairman of the Committee of Foreign Relations of Wolesi Jirga Ustaad Rasool Sayyaf and discussed India-Afghanistan relations with members of the Committee.

We have just concluded detailed talks with Dr. Spanta and his delegation on SAARC and on the entire gamut of bilateral relations. We also exchanged views on the regional situation.

Afghanistan has made commendable progress since the Bonn Agreement of December 2001. We recognize the challenges faced by the people of Afghanistan but we are confident that they will overcome them and rebuild Afghanistan into a strong and vibrant country that will contribute to peace, prosperity and stability in the entire region.

India-Afghanistan bilateral relations are fast developing into a partnership which is very special to us. We are glad to be able to contribute to the reconstruction and rebuilding of Afghanistan.

As part of India's long-term commitment to the stability, progress and peace in Afghanistan, I would like to announce the following new initiatives:

- (a) Enhancement of India's assistance pledge by an additional US\$ 100 million. With this additional pledge, India's total assistance to Afghanistan's reconstruction becomes US\$ 750 million.
- (b) Launching the projects under the Small Development Projects (SDP) programme, for which an MOU was signed on August 28, 2005 during the visit of Prime Minister of India to Afghanistan. The objective of the programme is to focus on small projects of less than US \$ 1 million which have short gestation and can be implemented by local communities who can derive immediate benefit from them.
- (c) Contribution of US\$ 1.08 million for Capacity Development Facility of Afghanistan, the MOU for which has been signed a short while ago.
- (d) Handing over of Polyclinic Block of Indira Gandhi Institute for Child Health (IGICH). The new Polyclinic Block, constructed by Government of India, is well integrated with a diagnostic centre and laboratory to house a new Out-Patients Department and Operation Theatre. The new Polyclinic will be instrumental in providing holistic health care to patients, in particular to children and women, not only from Kabul but also from far-flung areas.
- (e) I also propose to visit Indira Gandhi Institute for Child Health Care where I will hand-over a consignment of medicines from India for the benefit of patients at the hospital.

Later today, I will have the honour of unveiling the plaque naming the road adjacent to Indira Gandhi Institute for Child Health (IGICH) as "Indira Gandhi Road", in memory of former Prime Minister Smt. Indira Gandhi. I would like to convey my deep appreciation on behalf

of Government of India and people of India for this special gesture, by the Government of Afghanistan and the local authorities.

**Question:** As you said, Afghanistan is going to be a linking bridge between South Asia and Central Asia, Have you discussed on the broken connection with Pakistan or not?

**Dr. Spanta:** We do believe there are some problems in this regard, but I am pretty much confident that countries of the region, Afghanistan, Pakistan, India and other countries of the region with a perspective to their national interests will solve this problem in the long run. We hope that closed ways are soon reopened and it will be soon.

**Question:** Pakistan has so many times raised concerns over the increasingly improving relations of India and Afghanistan; could you please tell us the cause of their concerns? How do you assess Pakistan's stand to the issues regarding its neighbours, especially India?

**Shri Pranab Mukherjee:** Our policy has so far been to have good relations with all our neighboring countries. In my previous visit to Pakistan, we reiterated on the importance of improving relations with Pakistan and that they should get closer so that peace and stability is secured in the region. I also flagged that Pakistan facilitate the trade which is now being carried out through ports, so that land connection with Afghanistan is reestablished.

**210. Statement by Indian Ambassador in Kabul and Head of the Indian Delegation Rakesh Sood at the meeting of the Political Directors' Joint Coordination and Monitoring Board meeting.**

**Berlin, January 30, 2007.**

Mr. Co-Chairmen,

Distinguished delegates,

Ladies and Gentlemen,

It is a pleasure to be here at this special meeting of the Joint Coordination and Monitoring Board in Berlin today. I would like to thank the hosts for the gracious hospitality and the excellent arrangements made for the meeting.

Mr Co- Chairmen, the international community has been united in committing itself to the reconstruction and development of Afghanistan since the commencement of the Bonn Process. The coordinated effort by the Government of Afghanistan and the international community to bring Afghanistan from its decades of destruction to the path of peace, stability and development led to the adoption of the Afghanistan Compact in London in January last year. A year later, we meet again to review the progress and instill confidence in the people of Afghanistan and reaffirm the unwavering commitment of the international community of the challenge of reconstruction of Afghanistan.

India has demonstrated its full commitment to rebuilding its neighbour, Afghanistan. The modest assistance of Government of India, which started soon after the ouster of Taliban from Kabul, has now expanded several folds. During the recent visit of External Affairs Minister of India to Kabul on January 23-24, 2007, India announced an additional pledge of US \$ 100 million, thereby taking India's total aid to Afghanistan to US \$ 750 million.

We have ensured that every project is taken up after due consultation with the Government of Afghanistan, implemented in close coordination with them and conforms to Afghan priorities. We have taken up projects in almost all the important sectors including, education, health, telecommunication, transport, civil aviation, agriculture and irrigation, industry, power generation and transmission, human resource development, media development, road building and many other areas. These include humanitarian projects of

providing medical care to around 350 thousand patients annually in Afghanistan by Indian doctors; and supply of 100 grams of fortified biscuits to more than one million school children every day in various parts of Afghanistan in collaboration with WFP. From next month onwards, India will embark upon the task of implementation of the Small Development Projects in the outlying districts of Afghanistan, in which several quick gestation projects like school buildings, medical clinics, veterinary centres, bore-wells, plant nurseries, orphanages, etc will be built, by local community.

I would like to highlight especially the capacity development efforts, which is a crosscutting issue in the Afghanistan Compact. Since 2001, India has trained more than 1300 Afghans in India. In order to accelerate this effort, since 2006, we have embarked upon an ambitious programme of training 500 Afghans in short-term courses and 500 Afghan in graduate and postgraduate courses, annually in India. Additionally, India also signed an MoU on 'Capacity Development in Public Administration' for Afghanistan, with the Afghan Independent Administrative Reforms and Civil Service Commission and the United Nations Development Programme. Under this, India will provide 30 experts with rich civil service experience, to work with the Afghan ministries and other agencies to help build competence and capability. In addition, India has also made efforts to include a strong capacity development component in all its infrastructural projects in Afghanistan.

Mr. Co-Chairmen, India fully shares the concerns expressed by the Afghan government over the escalation of violence in recent months due to revival of Taliban, Al-Qaeda and other extremist groups, the existence of cross border safe havens for these groups, and growing incidents of suicide bombing and IEDs. It has been our endeavour to strengthen the Government of Afghanistan in order that a strong political message is sent all around that the problems posed by narcotics, terrorism and insecurity in Afghanistan will not deter the international community from its agenda of economic development of Afghanistan. We as the international community have a responsibility to deal with such challenges in a joint manner so that this region attains peace and stability. India believes that the reality with respect to the prevailing security paradigm in Afghanistan needs to be reflected accurately in the JCMB reports to enable the international community, especially those countries that are involved in the security sector, to adopt effective policies and measures against cross-border terrorism, which is having a destabilizing influence in Afghanistan and the region.

Mr. Co-Chairmen, Afghanistan's recent admission as a member of SAARC is recognition of its historical links with South Asia and would encourage free trade and participation in shared economic activities. I would like to call upon regional countries to commit itself to the pledge made by them at the 2nd Regional Economic Cooperation Conference on Afghanistan in New Delhi in November 2006, wherein they agreed to enhance regional cooperation on opportunities of mutual benefit. In addition, I would like to endorse Government of India's firm commitment to support the efforts of JCMB in carrying forward the Compact and implement the development of Afghanistan in a coordinated manner as projected in the document.

To conclude, I would like to reiterate India's commitment to work with the Government and the people of Afghanistan and the international community for socio-economic upliftment of Afghanistan and peace and stability of the region.

Thank you.

**211A. Question in the Lok Sabha: "Visit of External Affairs Minister to Afghanistan".**

**New Delhi, March 7, 2007.**

**Will the Minister of EXTERNAL AFFAIRS be pleased to state:**

- (a) whether the Minister of External Affairs has visited Afghanistan recently;
- (b) if so, the details of discussions held and the outcome thereof;
- (c) whether the issues like terrorism and security of Indians working in Afghanistan also came up for discussion;
- (d) if so, the outcome thereof;
- (e) the steps taken by the Government for the safety of Indians;
- (f) whether the Minister of External Affairs has announced enhancement of assistance being provided to Afghanistan ;
- (g) if so, the details thereof including the assistance provided by India during the last two years; and

(h) the names of sectors for which assistance is being provided?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a)-(b) External Affairs Minister, Shri Pranab Mukherjee visited Kabul on January 23-24, 2007 to invite President Karzai to the 14th SAARC Summit to be held in New Delhi on April 3-4, 2007. During the visit, EAM called on President Hamid Karzai, Speaker of the Wolesi Jirga Mohammad Yunus Qanooni, Chairman of the Parliamentary Committee on Foreign Relations of the Wolesi Jirga Ustad Rasool Sayyaf and Foreign Minister Rangin Dadfar Spanta. In his interactions with the Afghan leaders, the entire gamut of bilateral relations was discussed. An MoU on Co-operation in the Field of Development in Public Administration was also signed with UNDP and Afghan Government. EAM also handed over the Polyclinic Block of Indira Gandhi Institute for Child Health (IGICH), built with Indian assistance. He also unveiled a plaque naming a street adjacent to Indira Gandhi Institute for Child Health Care (IGICH) as "Indira Gandhi Road".
- (c)-(e) Issues like terrorism and security of Indians also came up for discussions. Both the sides agreed on the need to eradicate terrorism. Government of India are taking all possible measures to ensure the safety of Indian workers in Afghanistan. The Indian Mission/Posts in Afghanistan issue regular security advisories and updates for the benefit of Indians working in Afghanistan. Indian workers are urged to register themselves with the Indian Embassy or any of the Consulates. They have been instructed to take adequate security measures and inform their employers and the Embassy/Posts in case they perceive any security threat. Government of India is in constant touch with the Government of Afghanistan, at various levels. Government of Afghanistan has assured that it will take all the steps necessary to provide security to Indians in Afghanistan.
- (f) As part of India's long-term commitment to the stability, progress and peace in Afghanistan, during the visit of EAM, India announced an additional pledge of US \$100 million. With this additional pledge, India's total assistance pledge for the reconstruction of Afghanistan becomes US \$750 million.
- (g)-(h) The Indian assistance to Afghanistan during the financial year was Rs.272.25 crores and for the financial year 2005-06, it amounted to

Rs. 383 crores. India's assistance has mainly been in the sectors that have been identified by the Afghan Government as priority areas of development. They are construction, agriculture, industry, telecommunications, information & broadcasting, power, urban development, technical assistance, education and health.

**211B. Statement by Permanent Representative at the UN  
Nirupam Sen on the Situation in Afghanistan at the  
Security Council.**

**New York, March 20, 2007.**

Please See Document No 599.

**212. Memorandum of Understanding between the Government of the Republic of India and the Government of the Islamic Republic of Afghanistan for setting up of the India - Afghanistan Foundation.**

**New Delhi, April 3, 2007.**

**The Government of India and Islamic Republic of Afghanistan**

**Desiring** to promote mutual understanding and cooperation between the peoples of India and Afghanistan by a wider sharing of knowledge and professional talents through academic and technical exchanges and contacts,

**Have agreed** to conclude this Memorandum of Understanding for the setting up of the India-Afghanistan Foundation (hereinafter called the **Foundation**).

**Article I**

There shall be established a Foundation, to be known as the India-Afghanistan Foundation, with the objective of fostering educational, cultural, scientific and technical cooperation between Afghanistan and India. This Foundation shall function under the terms of the present Memorandum and shall implement a programme aimed at achieving the above-mentioned goals.

**Article II**

The Foundation shall be financed through revenues from a Trust Fund, This Trust Fund shall be set up principally through grants made available by Government of Afghanistan and the Government of India. It may, however, also accept contributions from other agencies, both public and private.

**Article III**

The revenues from the Trust Fund, within the conditions and limitations hereinafter set forth, shall be used by the Foundation for the purpose of:

- (1) financing higher studies, research and other educational activities and in service training for citizens of Afghanistan at institutions of learning located in India, and vice versa.
- (2) financing visits and exchanges between India' and Afghanistan of

scholars, poets, writers, journalists, artists, and of teachers, instructors, professors and other professionals both in the general field of education and in the fields of agriculture, public health, science and technology, and such other fields as may be mutually agreed upon by the *two* Governments.

- (3) financing other related programmes and activities such as seminars, symposia/ colloquia, workshops, etc. on subjects of common interest.
- (4) extending financial support to non-Governmental organizations, both in Afghanistan and in India, whose work helps achieve the objectives of the Foundation.
- (5) contributing towards the publication of standard works in the field of Afghanistan's history and culture.
- (6) encouraging the translation of standard works of Afghanistan's literature into Indian languages and vice-versa and arranging for their publication.
- (7) adopting any other measures, which may be considered necessary for the fulfillment of the objectives of the Foundation.

#### **Article IV**

The following shall be the thrust areas for the activities to be carried out by the Foundation: i) Education and culture; ii) Agricultural Research; iii) Science and technology; iv) Health; v) Technical training; vi) Developmental Studies; vii) Women's Studies; and viii) Area Studies.

#### **Article V**

In furtherance of the aforementioned purposes, the Foundation may, subject to the provisions of the present memorandum, exercise all the powers necessary for carrying out the purposes of the present memorandum including the following:

- A) Receive funds;
- B) Open and operate bank accounts in the name of the Foundation;
- C) Disburse funds and make grants and advances of funds, including payment for transportation, tuition, maintenance and other expenses incidental thereto;

- (D) Plan, adapt, carry out programmes in accordance with the purposes of the present Memorandum;
- E) Recommend/ nominate to the Universities/ Colleges in India, and in institutions run by the Government of India, trainees, professors, research scholars, teachers and professionals resident in Afghanistan for various programmes/ courses in India, and vice versa;
- F) Provide for periodic audit of the accounts of the foundation by auditors selected by GOA and GOI.

**Article VI**

All commitments, obligations and expenditure incurred by the Foundation shall be made pursuant to an annual budget to be approved by the GOA and the GOL

**Article VII**

The management and direction of the affairs of the Foundation shall be vested in a Board of Directors consisting of 10 Directors (hereinafter designated as "the Board"). The Ambassador of India to Afghanistan and the Ambassador of Afghanistan to India shall be the Co-Chairpersons of the Board. The GOA and the GOI shall each nominate four other members of the Board. Respective Embassy officials designated by the concerned Ambassadors shall act jointly as Secretaries of the Foundation.

**Article VIII**

The Board shall adopt such by-laws and appoint such Committees, as it shall deem necessary for the conduct of the affairs of the Foundation.

**Article IX**

A report on the activities of the Foundation shall be prepared annually by the Board and presented to the GOI and the GOA.

**Article X**

The Co-Chairpersons of the Board shall be responsible for the direction and supervision of the Board's programmes and activities in accordance with the Board's resolutions and directives and the provisions of this memorandum.

**Article XI**

Meetings of the Board shall be held twice a year alternately in Kabul and New Delhi.

**Article XII**

Wherever, in the present Memorandum, the terms the GOI and the GOA are used, it shall be understood to mean the Foreign Secretary of Ministry of External Affairs of Government of India and the Deputy Foreign Minister (Political Affairs) of the Ministry of Foreign Affairs of Government of Afghanistan.

**Article XIII**

The present Memorandum may be amended by the exchange of diplomatic notes between the GOI and the GOA,

**Article XIV**

The GOI and the GOA shall make every effort to facilitate the exchange of persons and programmes provided for in this Memorandum and to resolve problems, which may arise in the operation thereof through bilateral discussions.

**Article XV**

The present Memorandum will come into force upon the date of signature.

IN WITNESS WHEREOF, the undersigned, being duly authorised thereto by their respective Governments, have signed the present Memorandum of Understanding.

**DONE** at New Delhi on 3<sup>rd</sup> April 2007 in two originals each in Hindi, Dari and English languages, all texts being equally authentic. In case of any divergence in interpretation, the English text shall prevail.

**213. Briefing points by Official Spokesperson on signing of MOU on India-Afghanistan foundation and naming of the road in New Delhi after Ahmad Shah Massoud.**

**New Delhi, April 5, 2007.**

The Government of India and the Government of Afghanistan signed an MOU on India-Afghanistan foundation on 3rd April 2007 in New Delhi. The MOU was signed by the Ambassador of India to Afghanistan, Shri Rakesh Sood, and the Ambassador of Afghanistan to India, Dr. Sayed Makhdoom Raheen, in the presence of External Affairs Minister Shri Pranab Mukherjee and Afghan Foreign Minister Dr. Rangin Dadfar Spanta.

2. The India-Afghanistan Foundation (IAF) is being set up with the objective of fostering bilateral cooperation in areas of education, culture, science and technology, agricultural research, health, technical training, developmental studies and women's studies. IAF will facilitate higher studies, research and other educational activities for Afghan students at institutions of learning in India and vice versa, as well as promote exchanges between India and Afghanistan of scholars, poets, writers, journalists, artists, teachers, and professionals in the above-mentioned areas.
3. The Government of India has decided to name the Cross Road No. 1 between Niti Marg and Shantipath in New Delhi after 'Ahmad Shah Massoud'. In this context, a plaque 'Ahmad Shah Massoud Marg' was unveiled by H.E. Mr. Hamid Karzai, President of the Islamic Republic of Afghanistan, and Shri Pranab Mukherjee, Minister of External Affairs, Government of India on 5 April 2007. Smt. Sheila Dikshit, Chief Minister of Delhi, was also present in the ceremony. Cross Road No. 1 will be the first street in Delhi named in honour of any Afghan leader.
4. Commander Ahmad Shah Massoud was a prominent leader of Afghanistan and was a hero in the war against Taliban. He is widely recognized and honoured in Afghanistan as a national icon. Commander Massoud was affectionately called Sher-e-Panjshir (Lion of Panjshir) [Panjshir is the famous valley in Hindukush mountains, from where Massoud hailed]. He was assassinated by suicide bombers sent by Taliban or Al Qaeda on September 9, 2001.

**214. Press Release of the Ministry of External Affairs on the Intervention by External Affairs Minister Pranab Mukherjee at the Asia-Europe Meeting (ASEM) on Afghanistan in Hamburg.**

**New Delhi, May 28, 2007.**

I use the opportunity you have provided me today to share some thoughts on Afghanistan.

In 2002, there was a strong international consensus and commitment that the rebuilding and reconstruction of Afghanistan must continue apace with a stabilization of the security situation. The Bonn, Tokyo and Berlin conferences, the Regional Economic Cooperation Conference (RECC) on Afghanistan in New Delhi, the successful completion of Presidential and Parliamentary elections- all these are prominent landmarks of the gains so far. But the challenges remain, indeed they have grown and the resurgence of the Taliban has set the entire process on precarious ground.

The increase in suicide attacks, kidnappings and most of all the growing strength of the Taliban through Afghanistan's south make us now confront a problem which has acquired threatening proportions and which calls for a well thought out counter strategy. An oft repeated truism stares us in the face; if we forget history, we will be condemned to repeat it. The international community must do all that it can to prevent the reenactment of the ghastly dance of death of the past.

The area of instability now covers both sides of the Durand Line. It radiates and projects its influence in all areas west of the Indus. Early warning signs of this happening were perhaps ignored. We now face a situation where in a large swathe of Southern Afghanistan, international development activity has slowed down to the point of being non-existent.

Afghanistan's concerns at the incidence of cross border infiltration have been accompanied by serious clashes between the border guards of Afghanistan and Pakistan. The arc of instability is spreading. The international community must stand united with the Afghan people and reassure them that we intend to stay the course. As a victim of the evil of terrorism, we knew that the fight against global terrorism was never going to be an easy one. We cannot allow our enthusiasm to wane or

improvise solutions by way of compromises - whether with the Taliban or with others. We are dealing with a globally and regionally interconnected alliance of terrorist groups. The Al Qaeda the Taliban feed off each other, nourish and protect each other and actively cooperate in carrying out attacks against their enemies - which includes most of us present here today! Appeasement will only embolden them and they will use every concession to undermine, cripple and destroy the very base of the democratic and plural structure that the international community seeks to build there.

What can we do? We have to be determined to stay the course and deal with the security challenge as well as the developmental effort. The gap between pledged contributions and actual inflows must be bridged. Developmental activity cannot be allowed to suffer. India on its part will do what it can. We have a large and ambitious assistance programme in place, ranging from roads and hydroelectricity to small developmental projects, education and training. Much more needs to be done. But developmental efforts have to be simultaneously accompanied by action on the security front. On our part, we are ready to work together with Afghanistan, Pakistan, and the international community towards this end.

**215. Press Release of the Ministry of External Affairs on the demise of His Majesty Zahir Shah, Baba-e-Millat.**

**New Delhi, July 23, 2007.**

The President, the Prime Minister and the External Affairs Minister have conveyed their condolences to the Government of Afghanistan at the demise of His Majesty Zahir Shah, Baba-e-Millat.

In their messages, His Majesty Zahir Shah's commitment to friendly relations between Afghanistan and India was recalled.

Shri Saifuddin Soz, Minister of Water Resources and Shri A Rehman Khan, Deputy Chairman, Rajya Sabha will represent the Government of India at the funeral tomorrow<sup>1</sup>.

As a special mark of respect, the National Flag will fly at half mast at all Government buildings in the capital and in our Missions and Posts abroad during day light hours tomorrow.

\* \* \* \* \*

---

1. On July 25, the Spokesperson told the journalists that Minister of Water Resources Saifuddin Soz accompanied by the Deputy Chairperson of Rajya Sabha Mr. K. Rahman Khan officially represented India at the funeral. They had in their entourage Joint Secretary in the External Affairs Ministry dealing with Afghanistan, Shri T.C.A. Raghavan besides of course, Ambassador Shri Rakesh Sood. Paying homage to King Zahir Shah, Minister Soz recalled the efforts and programmes initiated by His Majesty Zahir Shah to build modern Afghanistan. In recollecting His Majesty's affection and friendship with the government and the people of India, Mr. Soz paid rich tributes to the contributions of His Majesty in strengthening the relationship between the two countries. Conveying the condolences on behalf of the Government of India and the people of India, he added, an era had come to end in the history of Afghanistan.

**216. Statement by External Affairs Minister Pranab Mukherjee  
at the high level meeting on Afghanistan.**

**New York, September 23, 2007.**

Your Excellency, President Karzai,

Your Excellency, Secretary-General Ban

Colleague Ministers,

Distinguished Delegates,

First of all, I would like to express our solidarity with Italy on the

It is a pleasure to participate in this High-Level Meeting on Afghanistan, and to discuss co-operation between the Government of Afghanistan and its international partners in the reconstruction and development of the country. This is a timely event, which will allow the participants to reaffirm their commitment to support the consolidation of the many achievements recorded so far, and to overcome the current challenges and work more effectively together in future to achieve our shared goal of a stable and prosperous Afghanistan.

India remains fully committed to the Joint Coordination and Monitoring Board (JCMB) structure and processes, put in place painstakingly by the Afghan government and the international community for supporting the implementation of the Afghanistan Compact benchmarks adopted at the London Conference in January 2006, as well as for addressing the totality of security, political and developmental challenges facing Afghanistan.

**Excellencies,**

India's commitment to the rebuilding and development of Afghanistan remains unflinching. Our assistance, which started with the Berlin Conference soon after the ouster of Taliban from Kabul has now reached US\$ 750 million, despite our limited resources, making India one of the largest bilateral donors in the country. Of the total pledge, India has already disbursed around US \$ 300 million in the implementation of various assistance projects since 2002. India has taken up projects in virtually all regions of Afghanistan, covering almost all sectors, including education, health, telecommunication, transport, construction, civil aviation, agriculture and irrigation, industry, power generation and transmission, information

and broadcasting as well as human resource development. In the second phase of our assistance, India's focus is on Small Development Projects, focusing on the participation of the local communities, which will be able to provide aid quickly to the provinces that have not yet seen the benefits of development. Our diverse assistance programme is fully aligned with Afghan priorities and is implemented in close coordination with the Afghan stakeholders, focusing particularly on local implementation, management and ownership of assets.

The present meeting is both a time for stock-taking, and a valuable opportunity to look at ways to make existing mechanisms more effective by reaching a consensus amongst donors and Afghan partners on the way forward. The real challenge is to turn high-level political commitments into concrete outcomes that will create the conditions for greater national ownership and leadership of the security, reconstruction and developmental processes in the long term.

With respect to security, India fully appreciates the Afghan government's position that the challenge of terrorism, suicide attacks, bombing, poppy cultivation, cross-border infiltration, corruption and dissidence among the Afghan people requires both, a robust international political solution as well as a stronger internal military response. At the same time, we sense that security challenges need to be addressed realistically: we need to provide appropriate tactical responses, including both security enforcement measures and also economic and developmental strategies. India shares the deep concerns of the international community at the security situation. We cannot and must not underestimate the ferocity of the Taliban and Al Qaeda resurgence. None of us can afford to improvise partial solutions that seemingly provide temporary relief. There is no option to remaining resolute and determined.

With respect to the developmental challenge, India is fully convinced that the key to the sustainability of the work being undertaken in Afghanistan will be capacity and human resource development of Afghan people. For this, a multi-pronged approach is required, which will ensure that skills are transferred to the Afghan people, along with decision-making powers, and that employment opportunities exist in the fields where these skills are transferred. So far, India has trained more than 2,700 Afghan citizens in India. Since 2006, we have embarked upon a programme of annually training 500 Afghan public officials in short-term courses and 500 Afghan students at University-level courses in India. India is also implementing a

capacity development programme in public administration with UNDP for deputation of 30 Indian civil servants to the various Afghan Ministries. In addition, India is including a strong capacity development component in all its infrastructure projects in Afghanistan. India also fully supports the Afghan Government's focus on South-South Cooperation as an appropriate and affordable strategy towards enhanced national capacity.

### **Excellency,**

The regional aspect is crucial in the reconstruction and donor-led development processes in Afghanistan. Regional economic cooperation is an important benchmark of the London Compact, and a strategic element of the Afghanistan National Development Strategy. Several regional cooperation events have taken place since the Bonn Conference, including the Kabul and New Delhi Regional Economic Cooperation Conferences. Afghanistan's entry into the South Asian Association for Regional Cooperation in April 2007 will not only further strengthen its historical links with the South Asian region, it will also provide the region lasting benefits in free trade and shared economic activities. The challenge will be in developing coordinated measures to implement programmes formulated in these regional processes covering cross-border terrorism, law enforcement, land transit as well as the broader investment, trade and business issues. India is willing to take on any appropriate supportive role in the regional cooperation process in the context of Afghanistan's reconstruction. India also welcomes the decision to make regional economic co-operation the main focus of the next meeting of the JCMB next month in Kabul.

An effective national communications and public outreach strategy, to which the Afghan government already attaches high priority, remains a compelling policy element. This will involve creation of the appropriate support infrastructure and dissemination systems, to reach out to the people at the sub-national levels. This will not only assuage overloaded public expectations, but also help mainstream the provinces into the national polity, which is one of the key objectives of the JCMB platform.

### **Excellencies,**

Ultimately, all the different political and developmental processes in place in Afghanistan must be "Afghan-ized", with Afghan-led identification and prioritization of projects, implementation, ownership and management. At the same time, there is a need for a realistic assessment of key needs and

capacity impacts, clearer prioritization and costing of projects, due focus on infrastructure, capacity building, anti-corruption efforts, improved information sharing as well as greater donor co-ordination.

To conclude, I would like to reiterate India's continued commitment to partner the government and the people of Afghanistan, as well as the international community, in the socioeconomic upliftment of Afghanistan, for peace and stability of the region.

Thank you.

**217A. Report on External Affairs Minister Pranab Mukherjee's rejection of the Afghan proposal to engage "Good Taliban" in the peace process.**

**Moscow, October 12, 2007.**

India does not support the initiative of Afghanistan President Hamid Karzai to engage the "good Taliban" in the peace process, External Affairs Minister Pranab Mukherjee said in Moscow after Co-Chairing the India-Russia Inter-Governmental Commission on October 12.

"Some make a distinction between 'good Taliban' and 'bad Taliban' - I don't, because I've seen the Taliban, they have only one cult - the cult of violence," Mr. Mukherjee said. Mr. Mukherjee denied media reports that India had shifted its position on the issue of talks with the Taliban at a United Nations high-level meeting on Afghanistan in New York last month<sup>U</sup>. "Our stated position is zero tolerance for terrorists," he told daily *The Hindu*. "What I stated in New York is that if extremist organisations give up violence and come forward to join in the reconstruction and rebuilding of Afghanistan, there is no problem."

Asked whether he saw any faction in the Taliban that can be engaged in talks, Mr. Mukherjee bluntly said: "No. They are simply indulging in violence, and have even launched attacks on civilians, which is a new development."

(Mr. Karzai has recently been arguing in favour of opening talks with those Taliban leaders who are not linked to Al-Qaeda. British Defence Secretary Des Browne last month warned that there was "no possibility" of establishing

<sup>U</sup> Please see Document No 216

a Western legal system in Afghanistan and called for involving the Taliban in peace efforts.

Mr. Mukherjee said India and Russia saw eye to eye on the issue of rejecting talks with the Taliban. (Speaking at the New York meeting on Afghanistan on September 23, Russia's Deputy Foreign Minister Alexander Yakovenko deplored the fact that "some of our colleagues still have the illusion that by making peace with the Taliban who have allegedly repented, it is possible to bring stability to Afghanistan.")

**217B. Statement by Permanent Representative at the UN  
Nirupam Sen on the question of Afghanistan at the  
Security Council.**

**New York, October 15, 2007.**

Please see Document No 620.

**218. Press Release of the Ministry of External Affairs on the terrorist attack in Pul-e-Khumri, Afghanistan.**

**New Delhi, November 7, 2007.**

We were deeply saddened to hear of the loss of life following the suicide attack in Pul-e-Khumri yesterday. We condemn in the strongest possible terms such blatant acts of terrorism and the consequential loss of innocent lives. It is particularly reprehensible that Members of Parliament are being specifically targeted. We were specially grieved to hear that many children were amongst the victims of this attack.

2. We greatly regret the death in this attack of Mr. Mustafa Kazimi, a distinguished former Minister of the Government of Afghanistan.
3. Such acts underline the need for a renewed commitment by the international community to the Government and People of Afghanistan in their task of developing a democratic, stable and prosperous nation.

## BANGLADESH

### **219. Response of the Official Spokesperson to a question relating to political developments in Bangladesh.**

**New Delhi, January 3, 2007.**

As a friendly neighbour we are naturally interested in Bangladesh remaining peaceful, democratic and stable. The election machinery in Bangladesh should inspire confidence in its neutrality in the mind of the electorate. It is our hope that the people of Bangladesh will be able to elect a government of their own choice in a free, fair, credible and democratic election<sup>1</sup>.

### **220. Response of Official Spokesperson to a query regarding the political developments<sup>2</sup> in Bangladesh.**

**New Delhi, January 11, 2007.**

We have just heard of developments in Bangladesh and are closely studying the evolving situation. It remains our hope that the people of Bangladesh will be allowed to exercise their democratic right to choose their own government in a free and fair process through credible elections in which all major political parties are in a position to participate.

1. The grand political alliance of political parties led by Sheikh Hasina's Awami League announced the boycott of the parliamentary elections scheduled for January 22 alleging that the electoral process under the caretaker government was "stage-managed". "We have decided not to participate in stage-managed elections....we cannot give legitimacy to such an election being held without a legitimate voters list," said Sheikh Hasina while announcing the alliance's decision at a press conference in Dhaka on January 3.
2. The Spokesperson was referring to the development in Dhaka in which on January 11 the Bangladesh President Iajuddin Ahmed resigned as chief of the non-party caretaker government and pledged to reconstitute his Council of Advisers afresh within the next few days for holding a participatory, credible elections. In a nationwide telecast Mr. Ahmed said he decided to resign due to a strong national controversy over his taking over on October 29. A new chief of the caretaker government would be soon appointed. The President was under severe attack from the opposition parties for being "grossly partisan" towards the immediate-past ruling coalition headed by Begum Khaleda Zia. He was also accused of going ahead with an election which had been boycotted by the grand alliance of political parties led by the main opposition Awami League.

**221. Statement by External Affairs Minister Pranab Mukherjee on arrival in Dhaka to extend formal invitation to Bangladesh to attend the SAARC Summit.**

**Dhaka, February 19, 2007.**

At first, before making my statement here, I would like to pay my deep respect to all the language martyrs of Bangladesh. The people of Bangladesh are now remembering their sacrifices and paying their regards to the martyrs by organizing various programmes.

I am happy to be in Dhaka. On behalf of Prime Minister Manmohan Singh, I will be extending a formal invitation to Bangladesh to attend the 14th SAARC Summit in Delhi from April 3rd-4th, 2007. In recent weeks, I have travelled to other SAARC capitals to deliver similar invitations. As you know, this is the SAARC tradition and practice.

During my day-long stay in Dhaka, I will be paying courtesy calls on H.E. President Iajuddin Ahmed, the Hon'ble Chief Adviser to Caretaker Government Dr. Fakhruddin Ahmed and former Prime Ministers Begum Khaleda Zia and Sheikh Hasina. I will also be holding a meeting with the Adviser on Foreign Affairs, H.E. Dr. Iftekhar Ahmed Chowdhury.

Though my visit is in the context of the forthcoming SAARC Summit, I intend to reiterate during these meetings the high importance attached by the Government of India to our relations with Bangladesh. I will also be discussing various bilateral issues during my meetings. India wishes Bangladesh well and will continue to work to develop good neighbourly friendly relations between our two countries.

**222. Statement by External Affairs Minister Pranab Mukherjee before his departure from Dhaka.**

**Dhaka, February 19, 2007.**

I have had a very useful and productive visit to Bangladesh today. In the forenoon, I paid a courtesy call on the President of Bangladesh, Dr Iajuddin Ahmed and extended an invitation to Bangladesh to participate in the 14th SAARC Summit being held in New Delhi from April 3-4, 2007. I had detailed discussions with the Chief Advisor of Caretaker Government, Dr Fakhruddin Ahmed. He has graciously agreed to attend the SAARC Summit. I also called on former Prime Minister & Chairperson of Bangladesh Nationalist Party, Begum Khaleda Zia and former Prime Minister & President of Awami League Sheikh Hasina.

During my meetings with the Chief Advisor Dr Fakhruddin Ahmed and Foreign Advisor Dr. Iftakhar Ahmed Chowdhury, the discussions centered on bilateral relations and the forthcoming 14th SAARC Summit. In the context of bilateral relations, both sides agreed to take steps to place bilateral relations on an 'irreversible higher trajectory'. With the view to providing impetus to bilateral economic linkages, I have announced that India will grant unconditional duty free access to import of 2 million pieces of readymade garments from Bangladesh. The issue of restrictions being placed on import of cosmetics from Bangladesh has also been resolved. The Bangladesh side has been kind enough to offer early operationalisation of Sealdah-Joydevpur passenger train service and to build a bridge over Ragnacherra river. Both sides have agreed to jointly combat terrorism, which today poses the most grave challenge to our society and threatens the rapid economic development of our nations.

The discussions on SAARC focused on ensuring the success of the forthcoming SAARC Summit and early and full implementation of SAFTA. Both sides have agreed to lay emphasis on better connectivity among SAARC countries, including between India and Bangladesh. Further, we have also agreed on the establishment of a South Asia University as a centre of excellence.

India attaches the highest importance to its relations with Bangladesh. I have reiterated India's desire to strengthen and further enhance the friendly cooperative relations between our two countries. It was agreed that further discussions would be held in Delhi and Dhaka to take forward the friendly relations.

**223. Question in the Lok Sabha: "Talks with Bangladesh and Nepal on anti-India activities".**

**New Delhi, May 9, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- a) whether the Government has taken up the matter with Bangladesh and Nepal regarding anti-India activities being carried out on their soil;
- b) if so, the details thereof; and
- c) the outcome thereof?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

(a) to (c) A statement is placed on the Table of the House.

**STATEMENT**

Government have been regularly taking up with the Government of Bangladesh, the issue of anti-India activities emanating from Bangladesh. Assurances have been provided by the Government of Bangladesh at the highest level that its territory will not be allowed to be used for activities inimical to India. Government of India have emphasised to them the need for concrete and sustained action towards fulfilling this assurance.

Besides taking up the matter regularly with the Government of Bangladesh, Government have also taken various measures to curb illegal influx into the country, which, *inter alia*, include strengthening of Border Security Force (BSF), accelerated programme of construction of border roads and border fencing and improved surveillance.

With regard to Nepal, all cross-border security issues, including criminal and anti-social activities are discussed in bilateral institutional mechanisms set up with the Government of Nepal. Government of Nepal have assured us that they will not allow such activities to take place, and will render their full cooperation to address such problems

**Mansukhbhai D. Vasava:** *Both in Bangladesh and Nepal anti-Indian activities are going on. In reply to the question the Minister said that several steps to strengthen the border such as border road construction, fencing, and deployment of security forces have been taken. Yet after so many*

*steps thousands of infiltrators from Bangladesh and Nepal are coming in. Is the Government aware of that? What steps are being taken to stop this?*

**Shri Pranab Mukherjee:** The hon. Member is aware of the fact that so far as Nepal is concerned, there is trade and transit treaty with Nepal and people can come freely from Nepal to India or go freely from India to Nepal. So far as Bangladesh is concerned, it is true that some infiltration, illegal migrations are taking place. We have taken up these issues with the Bangladesh Government

Apart from taking it up with the Bangladesh Government, we have also taken certain preventive steps, which I have referred to in the Statement, including fencing, strengthening the border, construction of the border roads. All these measures are to prevent illegal migration from Bangladesh.

**Shri Mansukhbhai D. Vasavan:** *The Bangladesh and Nepalese governments have only given an assurance. But anti-Indian activities are going on. Are those governments cooperating in checking infiltration and the illegal activities in our country and whether the government is aware of these activities? If yes, What steps the government is taking to stop those activities?*

**Shri Pranab Mukherjee:** Sir, the hon. Member is confused between Nepal and Bangladesh. Sir, as I have mentioned to you, there is no question of illegal migration from Nepal because people can come here, and there is free movement.

So far as Bangladesh is concerned, yes, illegal migration is taking place, and in order to prevent that, throughout the border of 4,096 kilometres we have taken certain steps to prevent it. In respect of anti-India activities indulged by some insurgent groups, we have taken it up with the Bangladesh Government. During my last visit to Bangladesh on 19<sup>th</sup> February, I have received an assurance from the highest in the Government that they would not allow the Bangladesh territories to be used by persons inimical to India, and I hope that they will keep their commitment.

**Shri Hari Singh Chawda:** *The whole country is aware of the infiltration and militant activities from across Nepal and Bangladesh. Sir, I want to know how many infiltrations have taken place from Bangladesh? Out of these how many have been sent back? What steps have government taken to stop this?*

**Shri Pranab Mukherjee:** Sir, there is no firm estimate about the illegal

migrants. But at one point of time, a figure was assessed, and about 15 to 16 lakh of illegal migrants are still staying in India. As the hon. Member would appreciate, illegal migrants do not stand in the queue and say: "I am an illegal migrant. I am going to enter into your country." Therefore, these are all estimates.

So far as Nepal is concerned, perhaps the hon. Member is aware of the recent development. It is true that for more than a decade, the Maoists Groups spread their activities in Nepal and they believed in armed revolution. But in the latest development in Nepal, the Maoists have given up violence. The armed cadres are now put in different cantonments; they are quarantined. They have surrendered their arms and those are deposited under the supervision of the UN representatives. The most important part of it is that the Maoists have declared that they would join the mainstream of the Nepalese political activities, and they have joined so. Therefore, we do hope that these kinds of activities will come to an end.

**Md. Salim:** Sir, there is no doubt that the Government has taken up this matter with the Nepal and Bangladesh Governments on a very long-term basis so that the land of Nepal and Bangladesh cannot be used for anti-India activities.

But despite that, we also know that such things are happening, and particularly the North Bengal and the North-Eastern States are affected. Now, there are a lot of changes inside Nepal and Bangladesh. So, with this changed domestic and political scenario in their respective countries, whether the Government of India has taken up with renewed vengeance, keeping in mind the changed scenario with the Governments of Bangladesh and Nepal. Only reiterating or renewing the same old assurance would not help much. But some effective steps can be taken to curb the anti-India activities utilizing the soil, particularly of Bangladesh.

**Shri Pranab Mukherjee:** Sir, it is a continuing exercise. As I mentioned, even during the last talk between our BSF and the BDR, we had given them a list of 176 Indian insurgent group camps, and a list of about 339 criminals. They had also given us a list of some criminals, who are from Bangladesh committing crimes. Those criminals are not political activists or extremists; they are ordinary criminals; and they have also taken shelter in some parts of India including Kolkata. So far as India is concerned, whenever we get the information, we promptly act on it. We have requested the Government of Bangladesh also to act on it, and I do hope that it would be possible for the Government of Bangladesh to take appropriate action.

Sir, in the course of discussion, particularly, when their outgoing Prime Minister, the former Prime Minister visited India, I, myself as the then Defence Minister, raised this issue and requested her to take note of the existence of the problem. Sometimes, it happens that they simply deny the existence of the problem. Therefore, I had suggested to their former Prime Minister to recognize the problem, because once you recognize the existence of the problem, then perhaps, ways to solve the problems could be found out. I do hope that the new dispensation in Bangladesh will adhere to their commitment, which they have made to us.

**Shri Mohan Rawale:** *I am surprised at the Minister's reply. He said 15 – 16 lakh Bangladeshis have come. When Bangladesh was created, lakhs of our soldiers and political leaders sacrificed their lives. The previous NDA Government and before that there was the Congress Government, it was then stated that one to two crores of Bangladeshis have come here. But you are only mentioning 15 – 16 lakhs. I want to know what strategy has been adopted to send them back. One way is to check their birth certificates. These should be Indian. But if you check you will find these are from Bangladesh. Please verify it; only then you can send them back.*

*I want to mention another point. You have often admitted that there are anti-Indian camps in Bangladesh. They get trained there and come to our country. Is Bangladesh destroying those camps? If not, what steps are you going to take in this connection?*

**Shri Pranab Mukherjee:** Sir, the hon. Member will have to appreciate that when we deal with a sovereign country, we have to depend on them. I cannot enter into their territory and destroy the camps. It is not possible. Therefore, it will have to be understood... (*Interruptions*)

**Mr. Speaker:** Hon. Member, please, let him reply.

**Shri Pranab Mukherjee:** Secondly, the hon. Member should also know that it was a commitment by the independent country starting from Pandit Jawaharlal Nehru to Mrs. Indira Gandhi that those, who came from the then East Bengal, East Pakistan to India up to 24<sup>th</sup> March, 1971, will be extended the Indian citizenship automatically. But if you start talking that every Bengali-speaking person is an illegal migrant, in that case I would also come in that category! ... (*Interruptions*)

**Shri Mohan Rawale:** I never said like that... (*Interruptions*)

**Mr. Speaker:** Do not record anything except the answer of the hon. Minister.

(Interruptions) ... U

**Shri Pranab Mukherjee:** Therefore, let us assume... (*Interruptions*) I have already stated about the figure that 'it is estimated.' Nobody can give you the accurate figure. If we could give you the accurate figure, then we would have prevented them. These are the estimates. It may be 10 lakhs; it may be 15 lakhs; it may be 20 lakhs... (*Interruptions*)

**PROF. VIJAY KUMAR MALHOTRA:** But, Sir... (*Interruptions*)

**MR. SPEAKER:** Nothing would go on record except the reply of the hon. Minister.

(Interruptions) ...

**SHRI PRANAB MUKHERJEE:** Let us not go into that aspect... (*Interruptions*) But this also is being denied by the Government of Bangladesh. Therefore, the steps, the physical preventions, which we are taking, I hope, would prove to be very effective, and with the cooperation of their Government, it would be possible for us to prevent them.

U Not recorded

**224. Joint Press Statement issued on the occasion of Foreign Office Consultations between India and Bangladesh.****Dhaka, June 26, 2007.**

The Foreign Secretary of India, H.E. Mr. Shivshankar Menon, visited Dhaka during June 24-27, 2007 at the invitation of the Bangladesh Foreign Secretary, H.E. Md. Touhid Hossain, for Foreign Office Consultations. During his stay in Dhaka, the Foreign Secretary of India called on H.E. Dr. Fakhruddin Ahmed<sup>1</sup>, Chief Adviser of the Caretaker Government, H.E. Dr. Iftekhar Ahmed Chowdhury, Foreign Affairs Adviser and Gen. Moeen U. Ahmed, Chief of Army Staff.

2. The two Foreign Secretaries held constructive and forward-looking discussions on issues relating to security, peaceful management of borders, water resources, economic and trade matters, cultural relations and regional cooperation. The discussions were held in a warm and cordial atmosphere<sup>2</sup>.
3. The two sides emphasized the need for enhanced security cooperation particularly information sharing. They reiterated their

- 
1. During his call on the head of the Caretaker Government Fakhruddin Ahmed, Mr. Menon was informed that Bangladesh expected increased Indian cooperation on key issues, particularly water sharing. Dr. Ahmed told Mr. Menon that the meeting at the level of Foreign Secretaries should be held on a regular basis for stocktaking on bilateral relations. He thanked the Government and the people of India for providing \$10 million assistance for the victims of recent landslips in Chittagong. He conveyed his warm wishes to Prime Minister Manmohan Singh and said he looked forward to meeting him. "Bangladesh, as a matter of principle, does not allow its territory to be used by any force inimical to the interest of India," remarked the caretaker chief during the talks. He said the spirit of cooperation could help resolve many issues and strengthen ties. Dr. Ahmed welcomed the announcement Dr. Singh made during the 14th SAARC summit that India would allow duty-free access to the products of the LDCs (least developed countries) in the region, including Bangladesh, by December 2007.
  2. This round of talks was taking place after over two years. Mr. Menon told reporters at the airport on arrival that he intended to hold substantive discussions on bilateral issues and explore possibilities of taking the ties forward. He hoped to take the relations on an "irreversible higher trajectory." He said: "As a friend and close neighbour, India is deeply interested in Bangladesh's peaceful, democratic and stable development. India wishes Bangladesh continued economic progress and prosperity. We intend to explore how we can further strengthen our bilateral cooperation, and also discuss other matters of mutual interest." Before the talks began a Bangladesh Foreign Ministry press release had said: "The government is of the view that the visit of the Indian Foreign Secretary will be yet another important opportunity to carry on the process of constructive and forward-looking engagement between the two countries."

commitment not to allow their territories to be used in any manner for activities inimical to the other. In this regard, it was decided to hold the next meeting of the Home Secretaries at a mutually convenient date. The two sides agreed to carry forward the engagement on the implementation of the 1974 Land Boundary Agreement and consider practical ways to facilitate its early implementation taking into account the ground realities. They welcomed the recent visit of the members of the Joint Boundary Working Groups to select enclaves and adverse possessions in Bangladesh and India. Both sides expressed their commitment to facilitate the early resolution relating to completion of demarcation of land boundary between the two countries, exchange of enclaves and adverse possessions.

4. Discussions in the area of water resources included sharing of common river waters, minor irrigation and drinking water schemes, data on flood forecasting and warning, dredging and river bank protection works. It was agreed to hold the meeting of Joint Committee of Experts headed by respective Water Resources Secretaries to be followed by the meeting of the Joint Rivers Commission at the earliest.
5. Keeping in view the mutuality of interests, the two sides underscored the need to take steps to facilitate trade and economic cooperation. Regarding the announcement of duty-free access to products of LDCs at the 14th SAARC Summit, the Indian side conveyed their intention to implement the scheme in phases by December this year. The two sides discussed several issues relating to tariff and non-tariff barriers, coordinated development of land customs stations, establishment of border haats and facilitation of investment. The need to improve rail, road, river and air connectivity between the two countries was underlined. While taking positive note of the decision to start a passenger train service between Dhaka and Kolkata, it was agreed that the railway authorities should meet soon to finalise the operational modalities. Proposals related to additional bus services linking the two countries as well as improving the functioning of Inland Water Trade and Transit protocol were considered. The two sides also signed a Memorandum of Understanding between Bureau of Indian Standards (BIS) and Bangladesh Standards and Testing Institute (BSTI) to facilitate technical cooperation in the fields of standardization, certification, testing, measurement and quality assurance systems. It was agreed that the Joint Working Group on Trade would be convened soon.

6. The two sides discussed various issues related to regional cooperation under SAARC and BIMSTEC. Highlighting the importance of early implementation of the decisions taken at the 14th SAARC Summit, they agreed to stay engaged so that the next Council of Ministers meeting in New Delhi later this year can take substantive decisions. Both sides also agreed to intensify cooperation in trade and other related fields under BIMSTEC before the next summit in New Delhi early next year. The two Foreign Secretaries also expressed satisfaction at the level of understanding and cooperation that exists between the two countries in various multilateral fora including the United Nations.
7. The two sides agreed that India and Bangladesh have a shared destiny. Both sides agreed to remain engaged with a view to further expand and strengthen bilateral relations for mutual benefit in accordance with the wishes of the two peoples.
8. The Foreign Secretary of India, H.E. Mr Shivshankar Menon deeply appreciated the warm welcome and gracious hospitality extended to him and his delegation during their stay in Bangladesh. The Indian Foreign Secretary extended an invitation to the Foreign Secretary of Bangladesh for the next round of Foreign Office Consultations to be held in New Delhi next year. The dates for the meeting would be decided through diplomatic channels.

**225. Speech by Foreign Secretary Shivshankar Menon at the Bangladesh Enterprise Institute: "Creating a South Asian Community: India-Bangladesh Relations".**

**Dhaka, June 27, 2007.**

Ambassador Farooq Sobhan,

Ladies and Gentlemen

Thank you for arranging this event and for this opportunity to speak to such a distinguished audience. I know that Ambassador Sobhan changed his plans to make this possible. Your institute has played an important role in innovative policy approaches on a wide range of domestic and international issues. It is an honour to be here.

I thought I would speak today on the idea of a South Asian community, where we stand in that quest, and on how India and Bangladesh, as two important countries of the region, can help to realize this vision.

**The Idea**

The idea of a South Asian community has a long history. It was partly an instinctive reaction to our history in the late nineteenth and the first half of the twentieth century. More than that, it recognizes that historically our periods of prosperity and well-being have come when the subcontinent was connected to itself and to the rest of the world. Our best times economically, politically and culturally, have been when we worked together and were linked together. It was then that we managed to realize our potential. This was the impulse that led Bangladesh to suggest the formation of SAARC and to host its first summit.

Given the situation we found ourselves in, it was natural that thinking South Asians would envisage such a community as a means to free our people from poverty, enabling each of our citizens to lead a life of dignity, free from hunger and illiteracy.

The objective basis for such a community exists. In comparison to other sub-regions in the world, our subcontinent probably has more affinities and common historical experience than most.

That is why Prime Minister Manmohan Singh has said that we need to work for a South Asian Community where borders have ceased to matter, and where there is an unhindered flow of goods and peoples, culture and

ideas. We believe that the destiny of the people of South Asia is interlinked. It is not just our past that links us, but our future too.

Our leaders have endorsed the vision of a South Asian community formally at successive SAARC summits since 1998. At the fourteenth summit in New Delhi this April they envisioned a South Asian community where there was a smooth flow of goods, services, peoples, technologies, knowledge, capital, culture and ideas in the region.

### **The Present Opportunity**

Unfortunately, our real progress towards this goal has been uneven and limited by the intervention of political factors. In 1948 over 34% of our trade was within the Indian sub-continent. Today it is less than 6%. This is the lowest amongst all the regions in the world, except perhaps for sub-Saharan Africa. SAFTA and other measures which would have enabled us to break out of the patterns of the recent past are only now being operationalised, and even then not by all of us. The list of future steps remains long.

Fortunately there is recognition within the region today of an opportunity to break out of the sterile patterns of some of our relationships in South Asia, and to put in place the building blocks of a true South Asian community.

This opportunity arises because of changes in India, changes in our neighbours, and a relatively benign international environment. South Asia is today one of the fastest growing regions of the world.

India has seen sustained economic development, with about 6% growth over the last twenty-five years, accelerating in the last three years to over 8%. The resulting changes in the structure and competences of the Indian economy, and the scale and pace of changes in India, have meant that we in the subcontinent have complementarities that never existed before. The potential to work together for mutual economic benefit is greater than ever before.

We believe that India's economic growth offers unique opportunities to our neighbours, who can become stakeholders in this expanding economy. Some of our neighbours have been quick to recognise the benefits of cooperation. The India-Sri Lanka FTA, which became operational in 2000, quadrupled bilateral trade in six years, (from US\$ 658 million in 2000 to US\$ 2.3 billion in 2006), with Sri Lankan exports growing much faster than India's and thus redressing the balance of trade somewhat. The FTA attracted Indian investment to Sri Lanka, made Indians the largest source

of tourism income, and converted Sri Lankan Airlines into the largest foreign airline operating in India, with 90 flights a week! That FTA would not have been possible without the changes in the Indian economy after 1991, and that opportunity is available to India's other neighbours.

India's preferential trade agreements with neighbours do not seek reciprocity and recognize asymmetry. At the recent SAARC Summit Prime Minister Manmohan Singh announced that SAARC LDCs like Bangladesh will enjoy zero-duty access to the Indian market by the end of this year. We will also prune our sensitive list of items considerably. We are well on course to implement these commitments.

Secondly, our neighbours have seen sustained economic growth and change, despite some difficult political situations. I do not have to tell you about the changes in Bangladesh and your own remarkable economic performance. High growth rates in the region are an opportunity to advance together through trade, open borders and economic cooperation, to bring about shared prosperity between India and her neighbors. Between us economics is no longer a zero-sum game.

The rate at which trade in South Asia has grown recently, (and the extent of the unofficial trade), suggest that the potential complementarities created by recent changes are still far from being tapped. Some estimates say that while official two-way India-Bangladesh trade in 2005-6 was US\$ 1.83 billion, informal trade may be twice as much again.

Interestingly technological changes such as the internet and satellite TV have also meant that today there is increased exposure and interaction among the peoples of our countries, breaking down stereotypes and building popular support for cooperative relationships.

Finally the international environment is also conducive. The post Cold War world that we are in today is one where globalization and other trends have led to a degree of unprecedented inter-dependence between the major powers, where they are therefore engaged in both competition and cooperation simultaneously. A new international balance of power is evolving and there is a window of opportunity which can be helpful to our quest for development.

The SAARC Summit in April proved some of these propositions. It was easily the least contentious and smoothest summit that we have seen, and was productive and practical. Afghanistan became a formal member,

decisions were taken on establishing a South Asian University and a South Asia Food Bank, and the regional multi-modal transport study was approved. We are now working on concrete projects for implementation by SAARC in energy, food, environment and water (including flood control).

It therefore seems that a combination of factors has created a window of opportunity for us to remake our relationships in the subcontinent.

### **Challenges**

This is not to say that there are no obstacles to our realizing the vision of a South Asian community. If the opportunities are economic, the challenges that come to mind immediately are primarily political. Terrorism is one such. A South Asian community can hardly be realized if terrorist violence and the politics of hate and confrontation continue in our subcontinent.

Common threats, like fundamentalism and terrorism, which recognise no boundaries, must be confronted together. India is ready to work with together with her neighbours in this quest. We must confront such obstacles with our united efforts.

Political transitions also pose a challenge. Many of us are in the midst of political and socio-economic change. It is for each of our countries to choose its own political path. But these choices also have broader consequences and effects. India will not interfere in the internal affairs of her neighbours, believing that decisions on their own future are best taken by the people of these countries themselves through free, fair and democratic political processes. We are close neighbours with shared destinies. It is natural, therefore, that India sees a peaceful, democratic and prospering neighbourhood as being in our own interest. Security, democracy and economic development are the best answers to common threats like fundamentalism and terrorism and the political misuse of religion.

The vision of a South Asian community must include as an essential component the idea of a South Asia free from violence and disputes, at peace with itself, free to concentrate on its primary tasks of abolishing poverty, improving the life of its people as well as seeking common prosperity.

### **The Way Forward**

The successful outcome of the 14th SAARC Summit in New Delhi in April this year is an encouraging sign that our countries recognise the value of

mutual cooperation. To realize the vision of a South Asian community several steps could be taken in tandem.

We need to work on improving physical and economic connectivity and our connectivity of the mind. Dismantling barriers will enable not only cross-border investment flows and transfer of technology, but also facilitate market access to a wide range of small and middle-sized businesses that may not be able to enter developed markets. In our case, Bangladeshi handicrafts, ethnic clothing, Jamdani sarees, marine, poultry and dairy products, fruits and vegetables could then be easily exported to India.

Then there needs to be a freer flow of people across the region to build upon the cultural and civilizational affinities that we enjoy. There is also a need to work together to deal with the challenges of terrorism and other threats to the life, peace and security of all our peoples. No country can pretend that one man's terrorist is another's freedom fighter. No government can pretend that what happens across the border is not going to hurt it.

Be it poverty, be it disease, be it natural disasters, or future challenges such as energy security, food security, water or climate change, the destiny of South Asia is inter-linked and we must learn to work together to deal with these challenges.

### **India - Bangladesh Relations**

A few words on India-Bangladesh relations. We see better relations between India and Bangladesh as integral to a South Asian community. After all it was Bangladesh's vision, which put forward the idea of SAARC.

A peaceful, stable, democratic, secular and prosperous Bangladesh is in India's own national interest. Our unique relations are based on shared history, culture, traditions and common language and literature. India attaches the utmost importance to strengthening our friendly and cooperative ties with Bangladesh. I also wish to reiterate that India fully respects Bangladesh's independence and sovereignty. The people of Bangladesh and their political parties should resolve outstanding issues through discussions and dialogue among themselves, rather than through external intervention or pressure.

It is natural for close neighbours to have problems. Intimacy is not always easy. In the last few days, during our foreign office consultations and in meetings with your leaders, we have sought to review the entire gamut of our relationship, the positive and the complicated, and sought mutually

satisfactory solutions or ways forward together. We have discussed issues such as security, our land boundary, the rivers that join us and other emotive issues. We have also looked at the complementarities that creates our opportunity.

I see positive trends in our relations with Bangladesh and am confident that these will become stronger in the coming years. Our commonalities far outweigh our differences. About half a million Bangladeshis visited India legally last year. Visitors between us always return with a profound impression of inherent goodwill. Businessmen from both countries are increasingly discovering that it is most convenient to procure goods and services from each other, rather than from more distant sources. I am particularly pleased by the sharp increase in Bangladesh's exports to India in the last two years.

Bangladesh's geographical location and its common border with a number of Indian States offer considerable opportunities. Over 80% of our bilateral trade is currently routed through Benapole-Petropole. We hope to diversify, opening additional routes and Land Customs Stations. We hope that the Kolkata-Dhaka passenger train can commence operations soon and will be the precursor for a comprehensive network of bus, train and ferry links. We can also cooperate to revive our waterways, which once carried so many of our goods. India is willing to improve air connectivity by establishing daily air services to our metropolitan cities, Delhi, Mumbai, Chennai, Bangalore, Hyderabad and Kolkata, and to 18 other destinations across India.

The possibility of Bangladesh exploiting its strategic geographic location to position itself as a transportation hub for South Asia, South East Asia and China, by upgrading roads, railways and ports, has been articulated by prominent Bangladeshis, such as Nobel Laureate Mohammad Yunus and Prof. Rehman Sobhan, among others. Better connectivity can include linking national power grids, gas pipelines, and telecommunications, to overcome shortages in certain areas and create synergy.

India is prepared to work with friends in Bangladesh to take our bilateral relations to an "irreversible higher trajectory" and to strengthen cooperation in all spheres. We have revived existing mechanisms for bilateral dialogue and hope to intensify these exchanges. We look forward to identifying solutions to outstanding issues through friendly negotiations and to ensuring that the people of our countries can enjoy the fruits of vigorous interaction and buoyant linkages.

### Conclusion

To conclude, I am optimistic about our future. Prime Minister Manmohan Singh has said that, "every Indian wants to live in a neighbourhood of peace, stability and prosperity. People in our neighbouring countries share the same aspirations". The common aspirations of our peoples provide the basis on which we can work together to usher in an era of peace and prosperity for our peoples. Let us remake our relations and remake our future.

### 226. Reaction of Official Spokesperson to questions on the arrest of Sheikh Hasina on corruption charges by the Bangladesh Authorities.

New Delhi, July 16, 2007.

**Question:** Is there anything on the arrest of Sheikh Hasina?

**Official Spokesperson:** Let me again say, as we have said earlier, as a close and friendly neighbour India would like to see a peaceful, stable and liberal democratic Bangladesh. India notes the roadmap announced by the Bangladesh Election Commission with regard to the next Parliamentary Elections to be held between October and December 2008. We hope that this roadmap includes reconstitution of the Election Commission, electoral reforms, preparation of electoral rolls and delimitation of constituencies, leads to early restoration of democracy in Bangladesh. It is our expectation that the people of Bangladesh will be able to participate in a process leading up to a free, fair, credible and democratic election. We are closely monitoring the internal developments in Bangladesh including arrests of high level politicians in Bangladesh. In all such cases, it must be ensured that there is no violation of due process as established by law and that basic individual rights are fully respected.

**Question:** Isn't it interference in the internal affairs of Bangladesh?

**Official Spokesperson:** I said we are closely monitoring the internal affairs. As a close and friendly neighbour, we have certain views.

\*

\*

\*

\*

**Question:** Has Hasina been a friend of India?

**Official Spokesperson:** I think I have said all that I can say on the subject.

**Question:** Has any senior leader spoken to Sheikh Hasina considering that she has been in custody?

**Official Spokesperson:** I do not have any information.

**227. Joint Press Statement issued at the end of talks between the Home Secretaries of India and Bangladesh.**

**New Delhi, August 3, 2007.**

1. The Eighth Home Secretary Level Bilateral Talks between India and Bangladesh were held in New Delhi on 2-3 August, 2007 in a warm, friendly, positive and constructive atmosphere.
2. During the meeting, both sides approached all issues on the basis of mutual understanding and appreciation of each other's position and sensitivities, on the basis of reciprocity and mutual confidence. Both sides renewed their commitment to ensure that co-operation between the two countries is further widened, and to address issues of concern in a spirit of mutual understanding.
3. Both sides noted the exchange of high-level visits in the recent months, which had given impetus and momentum to the diversified cooperation between the two countries and the commitment of the Governments to move the bilateral relationship forward. Both sides have expressed the hope that the current round of talks would provided a great opportunity to boost their historical relationship and would lead to enhanced and visible mutual cooperation in various aspects of security, border management and capacity building.
4. Both sides strongly condemned terrorism and extremism and underlined the need to strengthen the existing bilateral arrangements by instituting new institutional mechanisms for enhanced cooperation and continuous and regular exchange of information to combat this menace. Both sides also agreed to revive the mechanism of the Joint Working Group (JWG) at the level of

Joint Secretaries in the Ministries of Home Affairs and decided that the meetings could be held at regular intervals alternatively in India and Bangladesh.

5. Pursuant to the discussions in the last Home Secretary level talks in August 2006, Bangladesh side has nominated JS (Political) as the nodal point for dealing with matters related to trafficking in women and children. In this regard, it was noted that the Indian side had already nominated Joint Secretary (CS) Ministry of Home Affairs for this purpose.
6. The Bangladesh side agreed to expedite their inter-ministerial consultations on the drafts of Extradition Treaty, Mutual Legal Assistance Treaty in criminal matters and the Bilateral Agreement on combating international terrorism, organized crime and illegal drug trafficking already with them.

(The Indian side requested for finalization of the draft before the forthcoming SAARC Home Ministers Conference in October 2007.)

7. Noting that terrorism is a common threat, it was reiterated that the use of the territory of either country would not be allowed for terrorist and criminal activities against the other country and that sustained cooperation and information sharing would benefit both the countries. Both sides agreed with the necessity of real time exchange of actionable information between the security agencies of the two countries, in addition to the existing mechanisms of information sharing between the BSF and BDR. The modalities of designation of nodal points would be decided separately by mutual consultations.
8. Both sides agreed to initiate swift action on information received about groups and elements and other fugitives from the law of either country taking shelter in the other country. India assured all possible assistance, within the law of the land, to the request made by Bangladesh in tracing criminals wanted for criminal activities in that country and are reportedly taking shelter in Indian territory. The Indian side repeated its request to Bangladesh to take deterrent action against Indian Insurgent groups and their members. The Indian delegation requested for expeditious action on red corner notice (RCN) subjects through enhanced interaction between the Interpol designated points. The Bangladesh delegation noted the request.
9. Appreciating the response of the Government of Bangladesh, after

the meeting between the Directors General of BSF and BDR in February- March, 2007 in permitting small development works posed by the BSF within 150 yards of the border, the Indian side requested for an early and positive response on its long pending request to permit construction of fence within 150 yards of the border to fill the gaps in about 250 places, which would help in effective border management and in checking the movement of criminal elements and illegal migrants. The Bangladesh Home Secretary appraised the Indian delegation about the Bangladesh position in this regard and said that this issue is being examined.

10. Both sides expressed satisfaction at the joint visit to a few enclaves and territories under adverse possession on May 29-30, 2007. The two sides agreed to hold the next meeting of the joint boundary working groups at an early date.
11. On the issue of river bank protection works, both sides recognized the humanitarian dimensions of this and some other rivers related issues and agreed to address them at the forthcoming meeting of the two water resources Secretaries i.e. scheduled to take place in Delhi on August 7-8, 2007.
12. Highlighting the desire of the peoples of both the countries for an early commencement of a passenger train service between Dhaka and Kolkata, the Indian side requested an early response to India's request for building a protective structure to sanitize the rail line between zero point and Gede railway station on the Indian side. The Bangladesh side conveyed that Indian request was under consideration and they would revert soon.
13. On the issue of incidents of border firing and death of unarmed civilians during such firings along the border, both sides expressed satisfaction at the improved situation along the border in the recent months and agreed to take appropriate steps to further improve the situation.
14. India noted with appreciation the clearance given by Bangladesh to its pending request to take a floating Border Outposts to Dhubri (Assam) through Bangladesh. Both sides also agreed to step up the riverine patrolling. The Indian side expressed its willingness to supply riverine patrolling vessels to Bangladesh in case such request is made.

15. Both sides expressed the need for initiating cooperation in the field of capacity building of police forces. The Indian side provided details of the training courses at various training institutions, which can be made available to Bangladesh. Similarly, NCB's expertise in capacity building in certain areas like precursor control, legal instruments etc. were offered.
16. Both sides agreed to carry forward the cooperation in the field of countering drug trafficking in the spirit of the Bilateral Agreement, 2006 between the two countries.
17. The talks ended on a note of satisfaction and commitment on both sides to carry the process of further widening and deepening bilateral relationship between the two countries forward in a significant and meaningful manner.

## **228. Response of Official Spokesperson to a question on Bangladesh.**

**New Delhi, August 27, 2007.**

In response to a question regarding developments in Bangladesh, the Official Spokesman said: "We continue to watch developments in Bangladesh closely. As a friendly neighbour, India is interested in a stable, democratic and prosperous Bangladesh<sup>1</sup>."

At this difficult time, it is our hope that the people of Bangladesh, their representatives, and their leaders will be afforded every lawful opportunity to take Bangladesh to the full restoration of democracy through peaceful, free and fair elections."

---

1. The Spokesperson was referring to the Supreme Court of Bangladesh extending the stay on a High Court's ruling granting bail to the Awami League leader, arrested on charges of extortion by military-backed government during its massive anti-graft drive. The full bench of the Appellate Division of the apex court headed by Chief Justice M Ruhul Amin, hearing a leave to appeal petition filed by the government, said the stay would continue till the High Court decides Hasina's plea challenging the move to charge her under the tough emergency rules in the trial court. She had contended that the alleged incidents of extortion took place long before Emergency was promulgated in January this year. Hasina, 60, was arrested on July 16 and kept in a makeshift jail at parliament complex, following complaints by Bangladeshi businessmen Noor Ali and Ajam J Chowdhury. The Supreme Court, however, granted Hasina seven more days to submit her wealth statement to the Anti-Corruption Commission (ACC) as demanded earlier by the powerful anti-graft body. The High Court had, while granting bail to Hasina on August 7 directed the government to explain why its decision to indict the ex-premier on two extortion charges under tough emergency powers rules "should not be declared illegal" and stayed a notice of the ACC seeking her wealth statement in another case. Hasina's main lawyer Rafiqul Haq said they would now seek disposal of the petition in the High Court.

**229. Response by Official Spokesperson to a question on a front page article in the Bangladeshi newspaper "*Naya Diganto*" regarding a secret meeting between EAM and some Bangladeshi politicians/activists.**

**New Delhi, August 29, 2007.**

In response to a question on a front page article in the Bangladeshi news paper "*Naya Diganto*" regarding a secret meeting between EAM and some Bangladeshi politicians/activists, the Official Spokesperson said:

"The story in the Bangladeshi newspaper is misleading, motivated and malicious. The External Affairs Minister does not meet with visitors from Bangladesh to interfere in matters relating to internal political developments in that country. India has and will respect the sovereignty of Bangladesh, which is a close and friendly neighbour."

**230. Response of Official Spokesperson to questions about the arrest of Begum Khalida Zia.**

**New Delhi, September 3, 2007.**

We have seen reports to this effect. We would hope that the people of Bangladesh will be enabled to choose their representatives in a free, fair and democratic process. In our view, the early and full restoration of democracy, due process of law and respect for individual rights will contribute to the evolution of a stable, democratic and prosperous Bangladesh.

**231. Press Report of the agreement between India and Bangladesh on construction activities in No-Man Land along the India - Bangladesh border.**

**Dhaka, October 25, 2007.**

On October 25, 2007, ending a long-standing irritant in bilateral ties, Bangladesh and India agreed to the proposal for construction activities in no-man's land along the border. The consensus on building the infrastructure in no-man's land was reached on the first day of talks between the paramilitary border guards of the two countries, BSF Director General Ashish Kumar Mitra said.

As per the consensus, both sides agreed to construct 27 infrastructures within 150 yards of the border to ease the people's movement from the two countries, he said

This marks a change in the stand of Bangladesh which had been resisting India's proposal for long.

Mitra, who met Foreign Affairs Adviser of the interim cabinet Iftekhar Ahmed Chowdhury, said India would continue to extradite suspected Bangladeshi criminals back home despite the absence of an extradition treaty between the two cou

"The suspects, who are living in India and facing cases, would be sent back to Bangladesh," he said.

Mitra said a list of 10 to 12 such suspects was under consideration of the Indian authorities while 12 such suspects were already in custody for repatriation after necessary formalities.

Indian authorities had earlier this month for the first time handed over three Bangladeshi criminals to Bangladesh while officials said they were expecting to return two more high-profile wanted gangsters Tanvirul Islam Joy and Harris Ahmed alias Hares from Kolkata soon.

**232. Suo-moto statement of External Affairs Minister Pranab Mukherjee in Parliament on the cyclone in Bangladesh.**

**New Delhi, November 19, 2007.**

I rise to inform the House about the recent cyclone and the devastation it has caused in neighbouring Bangladesh.

As honourable members would be aware, a severe cyclone hit Bangladesh, especially its coastal districts, on 15th November, causing in its wake death and devastation. More than 2300 are reported dead as of now and several thousands rendered homeless. An estimated 2.7 million people have also been affected, thousands of livestock killed and standing crops and infrastructure severely damaged.

Rashtrapatiji and Prime Minister have written to their counterparts in Bangladesh expressing our distress at this tragedy and conveying our deep condolences and our readiness to assist in the relief efforts. Yesterday, I have spoken to Dr. Iftexhar Ahmed Chowdhury, Foreign Adviser to the Caretaker Government of Bangladesh and mentioned to him our readiness to send relief supplies to supplement the efforts of the Government of Bangladesh.

As Bangladesh struggles to come to terms with this devastation, in keeping with our close ties and our empathy with the friendly people of Bangladesh in this hour of need, the Government of India has decided to respond immediately with a comprehensive relief package. Our offer will consist of relief material required urgently by those affected. This package will consist of medicine, food items, milk powder, tents and blankets, first-aid kits and other relief items.

The Honourable Members will recollect that India has always responded readily to such requests from Bangladesh earlier, the most recent one being a few months ago when considerable devastation was caused by mudslides during the monsoons. We are already in the process of supplying essential food items to Bangladesh. We will continue to extend whatever assistance we can this time as well<sup>1</sup>.

1. Earlier on November 17, the Official Spokesperson had briefed the media on the message that the Prime Minister had sent to Bangladesh Chief Advisor Dr. Fakhruddin Ahmed expressing the grief of the people of India as well as his own at the devastation caused

---

by the hurricane on November 15 and promised India's help in the relief process.

On the 18<sup>th</sup> November the President of India, Smt. Pratibha Devisingh Patil in her message to the President of Bangladesh, Professor (Dr.) Iajuddin Ahmed said she was deeply saddened to learn about the tragic loss of lives and substantial damage to property in the aftermath of the hurricane and conveyed her deep condolences to the President and the people of Bangladesh. Smt. Patil also said she was confident that, "as always, the people of Bangladesh will face this tragedy with courage and fortitude".

External Affairs Minister too spoke to Dr. Iftekhar Ahmed Chowdhury, Foreign Adviser to the Government of Bangladesh and indicated India's readiness to send relief supplies to supplement the efforts of the Government of Bangladesh.

On November 19 the Spokesman of the Ministry of External Affairs made the following announcement of relief supplies on behalf of the Government of India: "As Bangladesh struggles to come to terms with this devastation, in keeping with India's close ties and empathy with the friendly people of Bangladesh in this hour of need, the Government of India has decided to respond immediately with a comprehensive relief package of US \$ 1 Million. This package will consist of relief material required urgently by those affected, including medicine, food items, milk powder, tents and blankets, first-aid kits and other relief items.

India has always responded readily to such requests from Bangladesh earlier, the most recent one being a few months ago when considerable devastation was caused by mudslides during the monsoons. India is already in the process of supplying essential food items to Bangladesh. India will continue to extend whatever assistance it can in this hour of need."

On November 28<sup>th</sup> it was announced in New Delhi that EAM Pranab Mukherjee would personally visit Dhaka and handover relief supplies and offer the sympathies of the Government of India and the people of India to Bangladesh people and its leaders.

**233. Suo moto Statement by the Minister of External Affairs Shri Pranab Mukherjee in Parliament, regarding 'Stay of Ms. Taslima Nasreen in India'.**

**New Delhi, November 28, 2007.**

I rise to inform the House of the Government of India's stand on an issue which has attracted considerable public attention in recent days. As Hon'ble members are aware, noted Bangladeshi writer Ms. Taslima Nasreen has been in India for some time. Throughout history, India has never refused shelter to those who have come and sought our protection. This civilizational heritage, which is now government policy, will continue, and India will provide shelter to Ms. Nasreen. Those who have been granted shelter here have always undertaken to eschew political activities in India or any actions which may harm India's relations with friendly countries. It is also expected that the guests will refrain from activities and expressions that may hurt the sentiments of our people<sup>1</sup>.

While these guests are in India, the Union and the State Governments provide them protection. This policy will also apply in Ms. Taslima Nasreen's case.

---

1. The problem arose about the stay of the writer Taslima Nasreen in Kolkata because of her writings, which a section of the minority community found offensive.

**234. Arrival statement by External Affairs Minister Pranab Mukherjee on his visit to Bangladesh.****Dhaka, December 1, 2007.**

On behalf of the people and the Government of India, allow me to express our deep sadness on the devastation caused to life, property and infrastructure in Bangladesh by the cyclone of November 15. As a mark of our respect for those who lost their lives, and as a symbol of the shared sense of loss that we, as a nation, feel with your people, our Parliament expressed its sorrow in a resolution on November 19 and observed a moment of silence.

2. India has always attached high importance to its relations with Bangladesh. With Bangladesh, we share not only a common history of struggle for freedom and liberation but also enduring feelings of civilisational, fraternal, linguistic and cultural ties. It is, therefore, but natural that, like always, we stand by Bangladesh in its efforts to rebuild the lives of those affected by the cyclone.
3. On hearing of the calamity, India has already rushed some immediately required relief assistance like medicines, ready-to-eat meals, blankets, tents and portable water purifiers worth about Taka 11 crore. In response to Bangladesh Government's request, India has also announced a waiver of ban on exports of rice to Bangladesh for 50,000 tons of rice. In addition, 20,000 tons of rice is being sent by sea to Chittagong. In fact, India's total relief assistance to Bangladesh this year so far amounts to more than Taka 270 crores.
4. Given the magnitude of the natural calamity, I would like to make two more announcements today:
  - a) One, India has decided to waive the ban on export of rice to Bangladesh for an additional five lakh tons of rice; and
  - b) Two, India would propose to the Government of Bangladesh its willingness to adopt ten severely affected coastal villages for rehabilitation.
5. I would be discussing the details of these in my meetings today. I would be paying a courtesy call on the Hon'ble Chief Adviser to Caretaker Government, H.E. Dr. Fakhruddin Ahmed. I would be holding talks with my host, the Adviser on Foreign Affairs, H.E. Dr.

Iftekhar Ahmed Chowdhury, who has been kind enough to receive me personally here. I would also be undertaking a brief tour of the cyclone-affected areas and meet some of the victims.

6. Ladies and Gentlemen, I have an old association with this historic city and its resilient people. I bring the solidarity of my country in your hour of need, and an assurance that as a friendly neighbour, India would always be interested in a stable, prosperous and democratic Bangladesh.

**235. Statement by External Affairs Minister Pranab Mukherjee to the Bangladeshi media prior to departure from Dhaka.**

**Dhaka, December 1, 2007.**

First of all, I would like to express my gratitude to you for being present here in such a large number. Since my arrival in the morning, I am having some limited interaction with you and I told at the airport that I will have interaction with you before I depart and after I visit the Cyclone-affected areas. After my arrival, I made a brief arrival statement at the airport itself. Some of you might have been present there. There, I announced two programs in which we are participating. As you know, currently, India's policy is we do not allow rice exports to any country. We have put a ban on rice export because the factor is demand-supply. The production which you will have is just above our requirement, so we decided that there should be a ban. But after the Cyclone when we got the report and had some discussions with the Bangladesh authorities, a suggestion was made to us that we should lift the ban. So we have decided, that only in respect of Bangladesh, this ban will be lifted to the extent of 5 lakh tons of rice.

I come from the other part of Bengal, which is part of India, therefore I know the food habits, the agricultural system here that the par-boiled rice which is taken by the people of Bangladesh, like the people of West Bengal, that is relatively cheap also, so it could be possible to meet part of the shortfall which has been caused by the devastating Cyclone. I visited some of the affected areas, but as I landed at Sharankhola and visited the camp there, where a large number of people are staying. Various relief arrangements are being made particularly to provide potable water because the water has been contaminated to a great extent. So, the pure drinking water is

being made available. Some arrangements have been made and 2 rehabilitation plants have been established in two different areas. On my arrival at Barisal airport, a detailed briefing was given to me by the authorities. Some of the officers like General Matin went with me to the affected areas and also briefed me about its history.

Advisers who were present there, the Army officers as well as civil officers, briefed me in detail about the various operations and I must commend both the residents of the people of Bangladesh about how bravely and courageously they have faced this devastating challenge. It speaks of their courage, fortitude and determination to face the challenges. At the same time, the administration has responded to the challenges adequately and various steps have been taken. I do hope it would be possible for them to tackle the problem.

In the morning, I had a discussion with Chief Adviser Dr. Fakhruddin Ahmed and after that, I had a discussion with my counterpart Foreign Affairs Adviser Iftekhar Ahmed Chowdhury and we discussed about the proposals for lifting the ban on export only for Bangladesh for 5 lakh tons of rice. Another proposal I have suggested is that 10 villages which are worst affected by the Cyclone are to be identified, and Government of India will take the responsibility of bearing the entire cost of reconstruction. The details have to be worked out in consultation with the Bangladesh Government what agencies will be operating, what would be the modalities of this will depend on how they will like to execute this. We will bear all the expenditure and this will be all comprehensive infrastructure, construction of roads, school building, construction of the Cyclone shelters, other type of health care, other type of activities which are needed, which are the necessities of the villagers those should be provided in these 10 villages. It is not very big from the rehabilitation point of activity but it is just some sort of symbol and a good gesture from the people of India.

One thing has been clearly established by this disaster that natural disaster does not respect any political boundaries. People suffer equally, therefore, we cannot prevent but what we can do is that we can stand by each other at the time of their distress and at the time of their need. My visit is precisely because of this. I suggested to my colleague Dr. Iftekhar Ahmed, when I met him at Kampala on the occasion of Commonwealth Heads of Governments Meeting. There I suggested to him I was bit hesitant, hesitant not because of any other thing, I knew that the administration will be totally busy at this point of time, so I did not want to cause any inconvenience to

them and to disturb their daily routine. So I requested him that if you do not find any inconvenience I would like to go and visit some of the areas. I cannot do much as my going is not going to either bring back the lives of the people which have been lost or the damage which has been caused, but as it happens in our social lives when somebody is in difficulty, people come and stand by the persons affected. It is simply that at this hour of distress, I would like to stand by the people of Bangladesh to assure them that friends, you are not alone and we are also with you in our limited capacity whatever we can do we shall try to do that.

I have come here to convey this message and I am really grateful to them, that despite their busy schedule, they have been able to accommodate me, they have been able to see me and I had the time to discuss with them. The purpose was absolutely relief related, Cyclone-relief related because during the last couple of months since I took over External Affairs Ministry, I had interaction with my counterpart Foreign Affairs Adviser Iftekhar Ahmed Chowdhury on several occasions at the margin of meeting of the Commonwealth Heads of Government meeting, at the conference of ASEM, at the conference at Manila of ASEAN and East Asian Summit, at the margin of the United Nations General Assembly session. These are the occasions, apart from the discussions which we had at the 14th SAARC Summit which took place in April, 2007. Next week, we are going to hold the 29th meeting of the SAARC Council of Ministers, which will be held in Delhi. I have already extended invitation to the Foreign Affairs Adviser and he will be coming here. There also, we will have discussions so we did not devote much time on the bilateral discussions because this is not the time or occasion. Thank you very much. Now I leave the floor to you.

#### **QUESTION & ANSWER SESSION:**

##### **Question- 1**

**Mr. Shamim Ahmed, UNB**

There is perception that Cyclone-Sidr was the reflection of global warming. So, Bangladesh and the other LDC's like Maldives of Asia are going to be the victims of the climate change. How India would stand by the LDCs, whether India thinks that Bangladesh and other LDCs should be compensated because of the climate change and the developed countries that are responsible for polluting the atmosphere, whether those nations should come forward to help countries like Bangladesh and others?

**EAM:** There are two aspects to the question which you have put.

I entirely agree with you that this is an issue which the international community will have to address and that it is serious. It is not only that low-lying land near the coast is affected, as sea level is going up. These types of incidents are likely to take place even in future. I remember, in 1999, we had similar type of cyclone in Orissa coast and the entire city of Bhubaneswar was completely destroyed. I was telling this story to my counterpart that when I entered, it was the third day after the cyclone. When I entered into the residence of Chief Minister I could not enter, not to speak of going by car, I had to take the branch of one tree, jump from the trunk of tree just like the monkey as the way they move from tree to tree, in that way I had to enter into the residence of the Chief Minister in the capital city! Because, all the trees of the city were uprooted, completely the connection was destroyed, that was the type of devastation. Coastal areas, it is better not to speak of, village after village was completely washed out. Then we had the Tsunami, where some of the southern coastal districts were completely wiped out.

At that time, I was Defense Minister, it happened on the eve of Christmas Day. Next day I arrived at Car Nicobar. My entire Air Force base was wiped out; I was received by the Station Commander in his night clothes. When naturally some questions perhaps appeared on my facial expression, then later on I was told that when he heard some unnatural sounds then he came out of his house and he found that huge waves are coming and some little children were trying to run out. So, he rushed to them, put them in his Jeep and took them to a high place, which is relatively higher and when he tried to return, in between his entire establishment was wiped out. For 24 hours, he lived in the same night clothes, which he wore at the time. So that is the magnitude of the devastation which is caused by the natural disaster. Therefore, we shall have to adjust to it.

About the compensation, I do not know it may be very ideal, but who is going to pay compensation to whom? From the days of Kyoto Conference, we are trying to impress upon the industrialized countries that the commitment of the reduction of GHG, please undertake the responsibilities and the commitment, which you have made at Kyoto Conference. A number of countries have not even fulfilled it, therefore, we may express our desire that we should be compensated because of certain happenings for which we are not responsible, but I am little skeptical on that but I am surely quite convinced that this is an area where we shall have to work together.

I do hope at Bali Conference, which is taking place next week, the foreign

community, international community will be able to find some solution to this problem. As it happened in the conference which took place on 24th September at the initiative of UN Secretary General, thereafter another conference of the major Economists' which was held in Washington during that period at the initiative of President Bush. So, international community is aware of it but we must find a way out on how to tackle this problem.

#### **Question- 2**

**Mr. Omar Khasru, Voice of America:** Honorable EAM, you have said that you are waiving the ban on export of rice. I would like to know when would this ban be waived and how would the rice be distributed - whether through the Government distribution system or through the private bodies?

**EAM:** Immediately. I have already said that you suggest what modalities of distribution will be convenient to you. We do not want our private operators to pay. From our side, 2 public sector organizations MMTC and STC, they will procure in the market, but those who will like to buy it from Bangladesh- that can be Government agency or from private sector, which is designated by the Government, so that those issues and modalities will be worked out. So far as the date of implementation, the decision has been taken and notification will be issued almost immediately. So far as the additional 50,000 tons which we have committed already, that is additional. That is Government-to-Government aid.

#### **Question- 3**

**Mr. Akbar Hossain, BBC BANGLA:** Mr. Minister, you have said that considering the aftermath of the Cyclone in BD, India has decided to send 500,000 tons of rice. As you know, the price of rice is a big issue in Bangladesh at present. We all know that the price issue is determined based on the relation between demand and supply. Is there any chance that India can export the 5 lakh tons rice at a cheaper price, so that it is affordable for the BD people?

**EAM:** I only can say that based on quality, our (Indian) rice is the cheapest, compared to all other countries. This type of good quality rice is more expensive in any other country compared to India. We will have to export it at the market price. We will have to give subsidy in case we

intend to sell the rice at a rate lower than the market price. No Government will want to give such subsidies.

**Question- 4**

**Mr. Masud Karim, JUGANTOR:** Mr. Minister, the Indian military ship is coming to join the relief efforts, and if it is so, what type of activities will they do?

**EAM:** We had made a proposal to send helicopters to conduct rescue operations, if you think it is required. But your Government said that there is no need. So, there is no question of sending helicopters. The ships carrying the food items will leave BD immediately, after delivery of the relief items, as it is Government-to-Government aid.

**Question- 5**

**Mr. Badiul Alam, NEWS TODAY**

Mr. Minister, how do you see the presence of US Naval ships in the Bay of Bengal?

**EAM:** That is for the Bangladesh Government to decide and to comment. Who am I to comment?

**Question- 6**

**Mir Mostafizur Rahman**

Mr. Honorable Minister, you have said in the morning that India is interested in seeing a stable democracy in Bangladesh. Would you explain what you mean by stable democracy?

**EAM:** No, what I used were four phrases- we want stable, peaceful, prosperous and democratic Bangladesh, that is our desire. But, what type of system of administration a country would like to have depends on the people of the country.

**Question 7**

**Mr. Abdul Majid, SAMAKAL**

India is in the chair of SAARC, so is there any opportunity to get any assistance from SAARC?

**EAM:** This has no relation with the Cyclone, but already in the SAARC

summit it was declared by our Prime Minister that to all the Least Developed Countries belonging to SAARC, India will provide duty-free access for their goods and services to India. In respect of that, there is a negative list in respect of each country. The negative list talks are already going on to reduce the number of items in the negative list. We are going to have a meeting, the SAARC Council of Ministers' will be meeting on 7th and 8th December. I think this issue may be discussed there and if something emerges, you will come to know.

### Question 8

Did you have any other bilateral talks during the meeting with our Foreign Affairs Adviser apart from the Cyclone issue?

**EAM:** We had some discussions on how to enhance and expand our bilateral relations and how to resolve the issues through having dialogue and discussions. But I have already said that this visit was mainly focused on the Cyclone and how the relief operations may be undertaken. But, while working in the Indian Government, especially as a Minister during the rule of the Congress Government, I have experienced that a Government in its initial stage becomes very much attentive when any disaster takes place. But, long-term rehabilitation after the disaster is not given necessary attention. As a result, a comprehensive plan has to be drawn up to rehabilitate the affected people, besides domestic and foreign assistance.

For example, many fishermen have lost their boats, their nets have been completely destroyed, they should be provided with boats and nets immediately. We had faced a similar crisis during the Tsunami in 2004 within the 5 southern states of India. We had adopted institutional arrangement program in which the banks were asked to provide loans however, as the banks could not be asked to provide loans as charity, the Government to pay off the interest on the loans. Similarly a mid-term or long-term rehabilitation policy has to be drawn up. Crops have been destroyed at several places where only Aman (a variety of rice) is cultivated. It has to be discussed with the agricultural scientists if at those places winter crops/Rabi crops can be cultivated and what types of seeds, fertilizers and credit will be required for the purpose. We have discussed these points and I have said that we will assist as much as possible from our side.

## BHUTAN

### **236. Briefing by Official Spokesperson on the agreement on an updated India-Bhutan Friendship Treaty.**

**New Delhi, January 8, 2007.**

Good afternoon everybody, I have a statement on India-Bhutan relations. It would be useful to read out to you.

India enjoys the closest relationship with its friend and neighbour, Bhutan. These relations rest on the firm foundations of historical ties, shared interests and mutually beneficial cooperation which have been nurtured by both countries during the last almost five decades since the historic visit of Pandit Jawaharlal Nehru to Bhutan in 1958. Over this period, India-Bhutan relations have expanded and deepened to encompass almost every sphere of activity.

Against this background, discussions have been held between India and Bhutan during the last few years to review and update the Treaty relating to the promotion of, and fostering the relations of friendship and neighbourliness which was signed 57 years ago at Darjeeling on 8th August 1949 by the two governments, with a view to bringing the Treaty in conformity with the expanded nature of our relationship. This review was conducted most recently during the visit of the King of Bhutan His Majesty Jigme Singye Wangchuck to India in July 2006, visit by Foreign Secretary Shri Shivshankar Menon to Bhutan in October 2006, and during the visit of External Affairs Minister Shri Pranab Mukherjee to Bhutan in December 2006. Based on these discussions, we have, together with Bhutan, reached agreement on the text of an updated India-Bhutan Friendship Treaty.

The India-Bhutan Friendship Treaty not only reflects the contemporary nature of our relationship but also lays the foundation for their future development in the 21st century. It aims to consolidate our mutually cooperative relationship in a manner that is responsive to and serves each other's national interests through close cooperation. The Treaty will enable the fur-

ther intensification of our relations in areas such as hydropower cooperation, trade and commerce, and human resource development.

The finalization of the India-Bhutan Friendship Treaty coincides with Bhutan's transition to a Constitutional democracy and reflects the desire of both governments to put in place the framework for the future growth of our relationship as His Majesty Jigme Singye Wangchuck transfers the responsibilities of the Monarch to His Majesty Jigme Khesar Namgyel Wangchuck, the Fifth Druk Gyalpo of Bhutan.

Government have kept all the major political parties informed about the background to the revision and its benefits to both India and Bhutan.

The India-Bhutan Friendship Treaty is expected to be formally signed during the visit to India by His Majesty Jigme Khesar Namgyel Wangchuck, the Fifth Druk Gyalpo of Bhutan.

That was the statement on the revised treaty between the two countries.

**Question:** Can you be specific on the revisions that have been made?

**Official Spokesperson:** Well, I cannot go into details. The statement speaks for itself. The text itself will only be available after signature by both countries.

**Question:** When will be the agreement be signed?

**Official Spokesperson:** We will work out mutually convenient dates. These will be announced once they are finalized.

\* \* \* \*

Thank you.

**237. Statement by Official Spokesperson on the signing of the India-Bhutan Friendship Treaty.****New Delhi, February 8, 2007.**

The Governments of India and the Royal Government of Bhutan have today signed the India-Bhutan Friendship Treaty. This Treaty updates the Treaty which was signed in Darjeeling on 8th August 1949.

The signing of the India-Bhutan Friendship Treaty marks a historic moment in our relations with Bhutan. The Treaty reflects our mutual desire to enhance our relationship to an even higher level of cooperation and goodwill to meet the aspirations of our two peoples for a better life.

The updated Treaty reiterates that there shall be perpetual peace and friendship between India and Bhutan. It removes provisions which have become obsolete over time. It includes fresh provisions for consolidating and expanding economic cooperation for mutual and long-term benefit, and cooperation in the fields of culture, education, health, sports, and science and technology. It does not envisage a change in the treatment of nationals of both countries, or in the free trade regime that we have. The Treaty commits both countries to cooperate closely with each other on issues relating to their national interests, and not allow the use of their territories for activities harmful to the national security and interest of the other.

Over several decades, India's relations with Bhutan have been an enduring element of our foreign policy. These relations, based on the foundation of shared interests and mutually beneficial cooperation, have become an exemplary model of good-neighbourly relations. They symbolize our belief that the people of South Asia share a common destiny. India-Bhutan relations are today characterised by maturity, trust, respect and understanding, and joint endeavours in ever-expanding areas of activity.

The Government of India deeply values the contribution made by the Fourth Druk Gyalpo of Bhutan, His Majesty Jigme Singye Wangchuck, to the consolidation of India-Bhutan relations. The signing of the India-Bhutan Friendship Treaty today opens a new era in the further deepening and strengthening of this unique and special relationship under the reign of the Fifth Druk Gyalpo of Bhutan, His Majesty Jigme Khesar Namgyel Wangchuck.

**238. Treaty of Friendship between the Government of the Republic of India and the Royal Government of Bhutan.**

**New Delhi, February 8, 2007.**

**The Government of the Republic of India and the Government of the Kingdom of Bhutan:**

**Reaffirming** their respect for each other's independence, sovereignty and territorial integrity;

**Recalling** the historical relations that have existed between our two countries;

**Recognizing** with deep satisfaction the manner in which these relations have evolved and matured over the years into a model of good neighbourly relations;

**Being** fully committed to further strengthening this enduring and mutually beneficial relationship based on genuine goodwill and friendship, shared interests, and close understanding and cooperation;

**Desiring** to clearly reflect this exemplary relationship as it stands today;

**And having** decided, through mutual consent, to update the 1949 Treaty relating to the promotion of, and fostering the relations of friendship and neighbourliness between India and Bhutan;

**Have** agreed as follows:

**Article 1**

There shall be perpetual peace and friendship between India and Bhutan.

**Article 2**

In keeping with the abiding ties of close friendship and cooperation between Bhutan and India, the Government of the Kingdom of Bhutan and the Government of the Republic of India shall cooperate closely with each other on issues relating to their national interests. Neither Government shall allow the use of its territory for activities harmful to the national security and interest of the other.

**Article 3**

There shall, as heretofore, be free trade and commerce between the

territories of the Government of Bhutan and the Government of India. Both the Governments shall provide full cooperation and assistance to each other in the matter of trade and commerce.

#### **Article 4**

The Government of India agrees that the Government of Bhutan shall be free to import, from or through India into Bhutan, whatever arms, ammunition, machinery, warlike material or stores as may be required or desired for the strength and welfare of Bhutan, and that this arrangement shall hold good for all time as long as the Government of India is satisfied that the intentions of the Government of Bhutan are friendly and that there is no danger to India from such importations. The Government of Bhutan agrees that there shall be no export of such arms, ammunition and materials outside Bhutan either by the Government of Bhutan or by private individuals.

#### **Article 5**

The Government of Bhutan and the Government of India agree that Bhutanese subjects residing in Indian territories shall have equal justice with Indian subjects, and that Indian subjects residing in Bhutan shall have equal justice with the subjects of the Government of Bhutan.

#### **Article 6**

The extradition of persons wanted by either state for crimes and for unlawful activities affecting their security shall be in keeping with the extradition agreements between the two countries.

#### **Article 7**

The Government of Bhutan and the Government of India agree to promote cultural exchanges and cooperation between the two countries. These shall be extended to such areas as education, health, sports, science and technology.

#### **Article 8**

The Government of Bhutan and the Government of India agree to continue to consolidate and expand their economic cooperation for mutual and long term benefit.

#### **Article 9**

Any differences and disputes arising in the interpretation and application of

this Treaty shall be settled bilaterally by negotiations in a spirit of trust and understanding in consonance with the historically close ties of friendship and mutually beneficial cooperation that form the bedrock of Bhutan-India relations.

#### Article 10

This Treaty shall come into force upon the exchange of Instruments of Ratification by the two Governments which shall take place in Thimphu within one month of the signing of this Treaty<sup>1</sup>.

The Treaty shall continue in force in perpetuity unless terminated or modified by mutual consent.

**In witness whereof**, the undersigned being duly authorized thereto by their respective Governments, have signed this Treaty.

**Done** at New Delhi on the Eighth Day of February Two Thousand and Seven, in two originals each in Hindi, Dzongkha and English languages, each text being equally authentic. However, in case of difference, the English text shall prevail.

**For the Government of  
The Republic of India**

**For the Government of  
the Kingdom of Bhutan**

**Sd/-**

**Sd/-**

**(Pranab Mukherjee)  
Minister of External Affairs**

**(H.R.H.Trongsa Penlop  
Jigme Khesar Namgyel Wangchuck)  
The Crown Prince of Bhutan**

1. A press release issued by the Ministry of External Affairs on March 5 said that the Instruments of Ratification having been exchanged on March 2, the Treaty had come into force with immediate effect.

**239. Joint Press Statement issued after the official visit of the King of Bhutan His Majesty Jigme Khesar Namgyel Wangchuck.**

**New Delhi, February 11, 2007.**

His Majesty Jigme Khesar Namgyel Wangchuck, the King of Bhutan, paid an official visit to India from February 7 to 12, 2007. His Excellency Lyonpo Khandu Wangchuk, Prime Minister and Foreign Minister, and senior officials of the Royal Government of Bhutan accompanied His Majesty the King.

During the visit, His Majesty Jigme Khesar Namgyel Wangchuck called on the President, Dr. A.P.J. Abdul Kalam. The King of Bhutan held talks with the Prime Minister, Dr. Manmohan Singh, and met the Chairperson of the UPA, Smt. Sonia Gandhi. Prime Minister hosted a dinner in honour of the King of Bhutan. The Minister for External Affairs Shri Pranab Mukherjee, Home Minister Shri Shivraj Patil, Deputy Chairman of the Planning Commission, Shri Montek Singh Ahluwalia, Defence Minister Shri A. K. Antony, Finance Minister Shri P. Chidambaram, Leader of the Opposition Shri L.K. Advani, and other senior government officials called on the King of Bhutan.

The leaders of India appreciated that the first visit abroad by the Fifth Druk Gyalpo of Bhutan is to India. This was a manifestation of the deep bonds of friendship and historical ties that bind the two countries. Both sides were confident that under the reign of the Fifth Druk Gyalpo, these ties would further deepen and strengthen. The Government of India paid warm tribute to the leadership of the Fourth Druk Gyalpo, His Majesty Jigme Singye Wangchuck, in making Indo-Bhutan relations an exemplary model of good-neighbourly relations.

The visit was marked by the signing of the historic India-Bhutan Friendship Treaty. The Treaty, which is an update of the Treaty signed by the two countries in 1949, reflects the contemporary nature of Indo-Bhutan relations, and lays the firm foundation for their further development in the 21st century. The Treaty creates a framework for continued mutually beneficial cooperation in a manner that is responsive to and serves each other's national interests. The Treaty will enable the further intensification of our relations in areas such as trade and economic cooperation, hydropower, human resource development, cultural and people-to-people exchanges.

The visit of the King of Bhutan continued the tradition of periodic exchange of visits at the highest levels between the two countries. During the visit both sides held a cordial exchange of views and discussions on bilateral issues as well as regional and international issues. They expressed their satisfaction at the excellent state of friendly relations and cooperation. They agreed that the destinies of their two countries were closely linked and that there was immense potential for further strengthening mutually beneficial cooperation in all areas. In this context, they expressed deep satisfaction at the successful commencement of commercial operations of the Tala Hydroelectric Power Project in Bhutan. It was agreed to put on fast track the development of other power projects.

The Government of India reaffirmed its full support to Bhutan during its period of transition to a democratic constitutional monarchy, including for the forthcoming elections. The Government of India reiterated its commitment to provide all possible assistance within its resources to the Royal Government of Bhutan in its socio-economic development programme, including the on-going Ninth Five Year Plan and the forthcoming Tenth Five Year Plan.

The two sides agreed to upgrade their respective Liaison Offices in Phuentsholing and Kolkata to full-fledged Consulates General.

The visit by His Majesty the King of Bhutan is yet another milestone in the history of relations between India and Bhutan, and greatly contributed in further enhancing the mutual goodwill, trust, understanding and friendship between the governments, leaders and peoples of the two countries.

His Majesty Jigme Khesar invited Prime Minister Dr. Manmohan Singh to pay an official visit to Bhutan. Prime Minister graciously accepted the invitation. Dates for the visit would be decided through diplomatic channels.

**240. Speech of Prime Minister Dr. Manmohan Singh while dedicating the Tala Transmission System to the Nation, New Delhi, June 20, 2007.**

I am delighted to be associated today with the dedication to our Nation of the Tala Transmission System. The Tala Hydro electric project and the Tala Transmission System are of immense national significance. Not just because they signify availability of additional electric power but more so because they are important symbols of regional economic cooperation in South Asia. They are shining examples of what can be achieved if nations in this region work hand in hand to achieve our common development objectives.

On this happy occasion, it is my privilege to convey His Majesty the King of Bhutan and the people of Bhutan our most sincere and warm greetings and gratitude. India-Bhutan cooperation has emerged as a great symbol of good neighbourliness. Warm and close relations that the people of India and Bhutan have had for centuries have been further strengthened in recent years through extensive cooperation in many fields of development. India is privileged that it has had the opportunity to play a positive and helpful role in Bhutan's accelerated development in recent years. Our two countries are committed to promote cooperation in diverse fields to our common mutual benefit. The Tala Hydroelectric project and the Tala Transmission System symbolize our resolve to find new pathways of regional cooperation for sustainable development in our region.

We live in an increasingly interdependent world. The challenges before us are to promote a balanced and equitable management of this growing interdependence of nations. The challenges we face as nations are increasingly less amenable to purely national and autonomous solutions. Energy security, food security, environmental degradation and climate change recognize no national borders. Pandemics like HIV/AIDS, Malaria, TB or Avian Flu can only be contained or overcome through international cooperation, both regionally and globally. Regional cooperation provides unique opportunities to transform the richness of our human and natural resources into cooperative regional activities promoting development, enhancing prosperity and the well-being of our people, and ensuring our collective security in all its multifarious dimensions. Regional cooperation is a means to achieve more efficient use of regional resources, make our economies more complementary and promote the expansion of trade and development.

Today, we are linking India into a web of partnerships with the countries of the region and beyond through free trade and economic cooperation agreements. The emergence of the Indian economy over the last few years as one of the fastest growing economies in the world offers opportunities of expanding markets, investments, technology and entrepreneurial resources for the countries in our region. Some successful examples already exist such as India's FTAs with Sri Lanka and Nepal, cooperation with Bhutan in tapping the huge hydropower potential and trade creating investments in Nepal. The growing purchasing power of Indians has helped boost tourism into Maldives, Nepal and Sri Lanka. Much more can be done, and we look forward to working with our neighbours for our common mutual benefit. I know that the potential for regional cooperation in South Asia is immense and we have not even scratched the surface. I believe that the best is yet to come and we must all work towards realizing this ambitious objective.

This transmission system is also a symbol of national integration. This system will enable us to evacuate power from Bhutan and supply it to the eastern and northern regions of our country. This will augment the capacity of the national power grid and make it easier for us to balance the supply and demand equation in power.

A large sub-continental economy like ours, with a diverse portfolio of natural resources and physical endowments, must walk on two legs in addressing the growing demand for power. On the one hand, we must invest in local and small-scale sources of power generation and transmission; and, on the other hand, we must continue to invest in large thermal, hydro and nuclear power systems.

The Tala project is also a symbol of the potential of hydro power. I do hope that we can replicate our highly successful, win-win model of bilateral cooperation with Bhutan in the power sector with Nepal too. Hydro power is clean and renewable. We must tap the energy in our river systems in this region more effectively and more efficiently. This can be done to the benefit of all countries in the region. It is a win-win model of cooperation.

I am of course aware that there are concerns pertaining to ecology and rehabilitation and resettlement in the case of large hydroelectric projects. I am fully cognizant of such concerns and they must be addressed. I do sincerely believe that it is possible for us to take care of our people and our environment while undertaking hydro power projects. It is precisely to address such concerns that the Ministry of Power is constituting a Task Force on Hydro Power.

I am reassured to see a national consensus emerge at the recent meeting of Chief Ministers on the need to reduce T&D losses. I had urged all Chief Ministers to launch a national campaign against thefts in their states. The Chief Ministers had agreed to set up special courts for speedy disposal of theft cases. I hope these will be operationalised soon. The Centre will provide financial assistance for upgrading transmission and distribution systems. We had agreed that as losses come down to agreed levels, we will reward performing states appropriately. As I had announced, the APDRP scheme is being revised and a National Power Project Management Board will be set up to assist State and Central utilities to ensure timely completion of all power projects.

The time has come for us to address the challenge on the energy front on a war-footing. Availability of quality power at affordable cost has emerged as the most important constraint on the pace of our development. The complacency of the past, be it with regard to conventional or non-conventional sources of power, or indeed nuclear power, must come to an end. The people of our country are not going to wait endlessly for us to sort out our administrative, political and theological problems.

With these words, I compliment all those who have been associated with the completion of the Tala Transmission System. I have great pleasure in dedicating this project to our Nation. I wish you all success in your future endeavors."

## **241. Briefing by Official Spokesperson on the visit of External Affairs Minister Pranab Mukherjee to Bhutan.**

**New Delhi, July 25, 2007.**

**Official Spokesperson:** External Affairs Minister Shri Pranab Mukherjee will be paying a three-day visit to Bhutan from 27th to 29th July at the invitation of the Royal Government of Bhutan. During the stay he is expected to receive an audience with His Majesty the King of Bhutan Jigme Kesar Namgyal Wangchuk and he will also be holding discussions with Prime Minister and Foreign Minister Lyonpo Khandu Wangchuk.

The visit is in the tradition of regular visits and exchanges at the highest level between the two countries and is expected to lead to further consolidation of the economic and political relations. Specifically, the visit is expected to result in the signing of a landmark agreement on the implementation of the 1095 MW Punatsangchhu-I hydroelectric project which is to be built in Bhutan with Indian assistance.

To give you the broader context of the relationship, as you know India and Bhutan share a uniquely warm and cordial relationship characterized by close consultations, maturity, complete trust and mutual understanding, and based on shared interests and mutually beneficial cooperation. In fact, this relationship has been known to be the exemplary model of good neighbourly relations. The Fourth King of Bhutan Jigme Singye Wangchuck was the Chief Guest at the Republic Day celebrations in January 2005, and later visited India in August 2005 and July 2006. In April 2007, the Prime Minister of Bhutan Lyonpo Khandu Wangchuk led the Bhutanese delegation for the SAARC Summit.

The present King of Bhutan visited India in February 2007 when the India-Bhutan Friendship Treaty was signed marking a historic moment of this relationship. That Treaty, as you recall, reflects a mutual desire to enhance the relationship to an even higher level of cooperation and goodwill to meet the aspirations of the two peoples for a better life. The present visit by the External Affairs Minister will be the first high-level engagement following the visit of King of Bhutan in February 2007, and EAM himself had visited Bhutan in December 2006 when he had gone to extend the invitation for the SAARC Summit.

As regards other aspects of the relationship, India is the largest trade and development partner of Bhutan. We have a free trade regime that exists

between the two countries. The bilateral agreement on trade, commerce and transit provides for continued free-trade arrangements between India and Bhutan with simplified procedures and additional facilities and sixteen entry/exit points in India for Bhutan's trade with third countries. India accounts for 98 per cent of Bhutan's total exports and 90 per cent of Bhutan's total imports. In terms of support for Bhutanese economic development as reflected in our support for the Five Year Plans, in March 2007 the Government of India approved a revised financial assistance package of Rs.2610 crore for Bhutan's Ninth Five-Year Plan.

The hydropower sector is a key element of the mutually beneficial cooperation. In July 2006, an agreement was signed on cooperation in this sector wherein India has agreed to import a minimum of 5000 MW of electricity from Bhutan by 2020. We have so far invested about Rs.5000 crore in the construction of three hydro projects - Chukkha, Kurichu and Tala. These have a combined installed capacity of about 1400 MW which supply India with power and have in the process also become symbols of Indo-Bhutanese friendship and partnership for mutual benefit. Earnings from the sale of this electricity account for a sizeable percentage of Bhutan's revenues. It is against this backdrop that the current landmark agreement on the implementation of the Punatsangchhu-I project will be signed by the External Affairs Minister with his counterpart Foreign Minister Lyonpo Khandu Wangchuk of Bhutan. This is a run of the river project and will be the largest of its kind in Bhutan to be funded by the Government of India.

Other aspects still, as you know India and Bhutan share a common boundary of about 700 kilometres. The open borders, visa-free regime, and duty-free trade could not have been sustainable without the complete understanding between the two leaderships. The military operations conducted by the Bhutanese Army in December 2003 and January 2004 against Indian insurgent groups in Bhutan were a milestone in our joint response against terrorist activities. And we look forward to continuing this cooperation by jointly upgrading border infrastructure and management including through better roads and communication links.

**Question:** On Bhutan, will the agreement on the hydroelectric project be signed or is it only expected to be signed?

**Official Spokesperson:** That is expected. The agreement is ready for signing. It is expected to be signed during the visit.

**242. Joint Press Release on the Agreement between the Government of Republic of India and the Royal Government of Bhutan regarding the Punatsangchhu-I Hydro-Electric Project.**

**Thimpu, July 28, 2007.**

Bhutan and India today signed a landmark agreement on the implementation of the Punatsangchhu-I Hydro Electric Project. The agreement was signed at Gyelyong Tshokhang, Thimphu by Mr. Pranab Mukherjee, External Affairs Minister, on behalf of the Government of the Republic of India and Lyonpo Khandu Wangchuk, Foreign Minister on behalf of the Royal Government of Bhutan.

The Punatsangchhu-I project is a run-of-the-river scheme on the Punatsangchhu river located between 8.5 KM and 18.5 downstream of Wangdue Phodrang Bridge. The project will be funded by the Government of India with 40% grant and 60% loan an interest of 10%. The estimated capital cost of the project as per the DPR is Nu. 38,148.10 million (December 2006 price level). The project envisages installed capacity of 1095 MW (6x182.50 MW) with annual average energy generation of 5377.45 GWH. The project will have 137 m high concrete gravity dam, 4 intakes, 4 underground desilting chambers, 7.50 Km long (10.3 m diameter) headrace tunnel and 2 vertical pressure shafts and an underground powerhouse. A new provision that would enable both Governments to benefit from Carbon Emission Revenue has also been introduced.

In accordance with the agreement, a Punatsangchhu Hydroelectric Project Authority will be set up for the construction of the project. The construction of the project is expected to commence in 2008 and complete by 2014. Pre-construction activities of the project have already started.

A Memorandum of Understanding (MoU) for the preparation of the Detailed Project Report (DPR) of the Punatsangchhu-I was signed between the two Governments on 15th September 2003. Accordingly the DPR was prepared by WAPCOS (India) Limited, a Government of India Undertaking and approved by both Governments in 2007.

In July 2006, an agreement on cooperation in the field of hydroelectric power was signed between the two Governments. Under this agreement, both countries have set out to achieve, inter alia, the export of a minimum of 5,000 MW of hydropower from Bhutan to India from 2020.

Cooperation between Bhutan and India has been highly successful and to the mutual benefit of both countries. Three hydroelectric power projects have already been commissioned in Bhutan with Indian assistance, namely, Chukha (336 MW), Kurichhu (60 MW) and Tala (1020 MW). Surplus power generated from the hydropower projects is exported to India.

Punatsangchhu-I will be the largest hydro power project to be undertaken in Bhutan in partnership with the Government of India and is yet another milestone in India-Bhutan cooperation in the field of hydropower.

**243. Agreement between the Government of the Republic of India and the Royal Government of Bhutan regarding the Punatsangchhu - Hydroelectric Project.**

**Thimphu, July 28, 2007.**

**The Government of the Republic of India and the Royal Government of Bhutan:**

**Bearing** in mind the friendly relations and the mutual trust existing between the two Governments and their peoples;

**Appreciating** the accomplishments achieved by cooperation in the successful commissioning of the Chukha, Kurichhu and the Tala Hydroelectric Projects;

**Recalling** the Agreement between the Government of the Republic of India and the Royal Government of Bhutan concerning cooperation in the field of hydroelectric power signed on 28th July 2006;

**And** taking note of the desire of the two Governments to develop additional hydropower potential for their mutual benefit and their willingness to cooperate in the construction and operation of hydroelectric projects to attain this objective;

**Have**, with respect to the Punatsangchhu-I Hydroelectric Project, agreed as follows:

**Article 1**

1. Water and Power Consultancy Services Ltd. (WAPCOS), a

Government of India Undertaking has prepared a Detailed Project Report on the Punatsangchhu-I Hydroelectric Project in Bhutan (hereinafter called "the Project"). The Project envisages the construction of the dam, head race tunnel, pressure shaft, power house, transmission lines, switchyard, etc. as per the approved DPR and such other works which may become necessary and are agreed upon between the two Governments.

2. The scope of the Project shall include all auxiliary, ancillary works and all activities necessary for the execution of the Project.

#### **Article 2**

The Project shall be owned solely by the Royal Government of Bhutan.

#### **Article 3**

The estimated cost of the Project arrived at on the basis of the approved DPR is Rs/Ngultrms 35,148.10 million at December 2006 Price Level, The Government of the Republic of India agrees to provide finds for the financing of the Project. For this purpose, the Government of the Republic of India will make available to the Royal Government of Bhutan:

- a) a sum of Rs/ Ngultrms 14,059.24 million equivalent to 40% of the estimated total cost of Rs/ Ngultrms 35,148.10 million as grant; and
- b) a sum of Rs/ Ngultrms 21,088.86 million equivalent to 60% of the estimated total cost of Rs/ Ngultrms 35,148.10 million as loan. The loan shall carry an interest rate of 10% per annum and be repayable in twelve equated annual installments, the first repayment commencing one year from the mean date of commercial operation;

The Government of Republic of India agrees to provide additional finds, as mutually determined, for the completion of the Project, in the same proportion and on the same terms and conditions.

#### **Article 4**

1. A "Punatsangchhu-I Hydroelectric Project Authority" (hereinafter called the Authority) shall be set up for the construction, operation and maintenance of the Project and for the evacuation of surplus power from the Project. The Authority will be constituted as an autonomous body.

It shall have a Chairperson and seven Members. The Chairperson and four Members of the Authority shall be nominated by the Royal Government of Bhutan. Three Members of the Authority shall be nominated by the Government of the Republic of India. All powers of the Authority shall be vested in the Chairperson. The Members shall assist the Chairperson in the administrative, technical, financial and organizational matters of the Project. The Authority will frame its own rules of business. With the approval of the two Governments, the Authority shall appoint a Managing Director and Joint Managing

Director of the Project. The Managing Director will function as the Secretary of the Authority.

2. The Ambassadors of Bhutan to India and Indian Ambassador to Bhutan shall be permanent invitees at the meetings of the Authority.
3. The Managing Director will be assisted by a Joint Managing Director, Technical Director and a Finance Director who shall all be permanent invitees to the meetings of the Authority. Member (Hydro.) of Central Electricity Authority and Member (D&R) of Central Water Commission of Government of India also shall be permanent invitees to the meetings of the Authority.
4. The Managing Director of the Project will be the overall in-charge of the Project under the supervision and guidance of the Authority. He will be vested with sufficient powers to enable him to function in an effective manner and implement and operate the Project as per schedule. There will be a suitable organization for the Project under the Managing Director to assist him.

#### **Article 5**

M/s Water and Power Consultancy Services Ltd. (WAPCOS), a Government of India Undertaking, will be the engineering and design consultant for the Authority. The terms of reference for the consultant shall be decided by the Authority.

#### **Article 6**

The requirement of funds for the construction of the Project will be worked out by the Authority in accordance with the programme and progress of the construction. The release of funds will be on the basis of the recommendations of the Authority and as per mutually agreed modalities between the two Governments based on the progress of work.

**Article 7**

The recruitment of labour force, technical, administrative and other personnel of the Authority or any contractor/supplier engaged on the Project will be confined to nationals of either country.

**Article 8**

1. The Authority will hand over the Project to the Royal Government of Bhutan within two years of completion of the Project, at which time, the Authority shall be dissolved.
2. After the dissolution of the Authority, the Royal Government of Bhutan will, if so required, continue to avail itself of the technical & managerial expertise of Government of the Republic of India through such arrangements as may be agreed from time to time.

**Article 9**

1. The Royal Government of Bhutan agrees that surplus power from the Project, that is, the power over and above that is required for use in Bhutan, shall be sold to the Government of the Republic of India. The Government of the Republic of India agrees to purchase all the surplus power from the Project.
2. The Government of the Republic of India shall make necessary transmission arrangements within their territory for evacuation of power from the Project.
3. The rate at which this power will be sold by Bhutan to India at the Bhutan-India border, shall be mutually determined by the two Governments at the time of commissioning of the Project. This shall be done by taking into account the cost of the Project, its financing costs, Operation and Maintenance charges, depreciation at rates applicable to similar projects in India and prevalent market conditions. To ensure predictability, this rate of power shall, thereafter, be reviewed by the two Governments, at the end of every three years, who shall be guided by the principles agreed upon for the Tala Hydroelectric Project in this regard.
4. No duty, surcharge or any other form of levy will be charged by Bhutan on the power sold by Bhutan to India.

**Article 10**

1. The Royal Government of Bhutan shall provide Government land

free of cost for the Project. In case the Project authorities require private land for this purpose, the compensation as per norms of the Royal Government of Bhutan shall be paid by the Authority.

2. The Royal Government of Bhutan shall make necessary arrangements for the acquisition of land, building, the right of way where needed and cutting trees necessary in connection with the Project and resolve administrative and other difficulties, if any. The settlement of claims or disputes arising in connection with such arrangements shall be the responsibility of the Royal Government of Bhutan, but payment of compensation if any shall be made by the Authority.
3. The Authority shall ensure that the Project complies with all statutory environmental legislations of Bhutan. Any resettlement of people and compensation will be done at the cost of the Project and as per the norms of the Royal Government of Bhutan.

#### **Article 11**

1. The Royal Government of Bhutan shall receive from the Authority royalty for timber, boulders, aggregates and other construction materials required from Bhutan for the Project.
2. The Royal Government of Bhutan shall exempt taxes, Levies, duties for plant, construction materials & equipments, machineries and services imported for direct use in, the construction of the Project until the date of commercial operation. Any procurement made under tax exemption basis shall be liable for tax payment as per the Tax Act of the Kingdom of Bhutan if disposed off in Bhutan.
3. The Royal Government of Bhutan shall not levy any income tax on any employee of the Government of India or a State owned enterprise of the Government of India employed directly or engaged in the Project. However, any other contractor, sub-contractor or consultants recruited in connection with the Project, will be liable for tax in Bhutan as per the Income Tax Act of the Kingdom of Bhutan, 2001. Further, such recruiting agency shall be responsible for deducting and remitting Tax Deducted at Source (TDS) as per the provision of the said Income Tax Act.
4. The Government of India shall exempt from central excise duty any material and equipment exported to Bhutan for the Project.

Service tax that may be applicable on services provided by Indian agencies involved in the Project shall be reimbursed by the Government of India and will not be incorporated in the overall Project cost.

#### **Article 12**

1. The Royal Government of Bhutan will ensure supply of power at domestic rates during construction of the Project from the Western Grid of Bhutan according to the requirement of the Project. The required transmission lines and sub-station will be provided by the Authority.
2. The Government of the Republic of India and the Royal Government of Bhutan will facilitate the installation of communication lines, radio communications and construction of roads and other infrastructural facilities that are required for the construction and operation of the Project at the cost of the Project.

#### **Article 13**

The Royal Government of Bhutan shall facilitate the establishment by the Authority of an appropriate school, hospital and dispensaries in the Project area for the benefit of the officers and staff of the Project. These facilities shall be managed by the Royal Government of Bhutan at the cost of the Project.

#### **Article 14**

1. The selection and appointment of technical, administrative and other personnel shall be confined to nationals of either country. The Royal Government of Bhutan shall issue identity cards/ permits, without payment of security deposits, to the concerned employees of the Authority and Government of India agencies engaged in connection with the Project and to the members of their families. However, such security deposits shall be payable for all labour and for staff appointed by other contractors.
2. The Royal Government of Bhutan shall issue/ renew identity cards on payment of prescribed fee for personnel employed for the Project.
3. The two Governments shall permit the Authority to select and appoint officers, and staff on deputation directly from the concerned departments and Public Sector Undertakings of the Royal

Government of Bhutan and from concerned departments, State Governments, State Electricity Boards and Public Sector Undertakings of the Government of the Republic of India, after inviting applications through the respective departments.

#### **Article 15**

1. The Royal Government of Bhutan shall issue on recommendations of the Authority licenses to Indian contractors engaged for the construction of the Project. Such licenses shall be valid for the duration of the contract for which the contractor or supplier has been engaged.
2. Bhutanese & Indian firms or contractors, possessing the necessary competence, shall be eligible to bid for works and supplies of equipment and materials. Other considerations being equal, preference shall be given to Bhutanese firms in the allocation of works.

#### **Article 16**

The two Governments shall provide facilities to ensure free movement of men, materials and transportation of machinery & equipment required for the Project through their respective territories.

#### **Article 17**

The personnel of the Authority and the executing agency shall, at all times, respect the laws of the land. However, no suit, prosecution or legal proceedings shall be instituted against any person in the employment of the Authority or executing agency for anything which is done in good faith, or purported to be done in good faith for the Project.

#### **Article 18**

Both Governments shall develop the Punatsangchhu-I Hydroelectric Project under the Clean Development Mechanism (CDM) to generate carbon credits, in accordance with the provisions of Article 8 of the Agreement between the Royal Government of Bhutan and the Government of the Republic of India concerning cooperation in the field of hydroelectric power signed on 28th July 2006, which would be shared by the two governments.

#### **Article 19**

Any difference regarding the interpretation or application of any provisions

of this Agreement shall be resolved by mutual consultations between the two Governments.

#### **Article 20**

This Agreement shall enter into force upon signature and shall remain in effect until the two Governments, through a new agreement, adopt a decision that they deem convenient.

**In witness whereof**, We, the undersigned being duly authorized by our respective Governments, have signed the Agreement.

**Signed** in Thimphu on the Twenty Eighth Day of July Two Thousand and Seven, in two originals in English.

**For the Government of  
the Republic of India**

**For the Royal Government of  
of Bhutan**

**(Pranab Mukherjee)  
Minister of External Affairs**

**(Lyonpo Khandu Wangchuk)  
Minister of Foreign Affairs.**

#### **244. Statement by External Affairs Minister Pranab Mukherjee after Signature Ceremony for the Punatsangchhu Hydroelectric Project.**

**Thimphu, July 28, 2007.**

Thank you Excellency Prime Minister and Foreign Minister, Khandu Wangchuk, distinguished members of the delegation of the Royal Government of Bhutan, my colleagues and members of my delegation, ladies and gentlemen.

At the very outset, I would like to express my gratitude to Your Excellency and the Royal Government of Bhutan for warm hospitality extended to me and to the members of my delegation since my arrival yesterday and as Your Excellency has pointed out, Bhutan is not new to me. I had the privilege of visiting Bhutan on earlier occasions too and had a hurried visit before the SAARC Summit and had the opportunity of sharing our common perception with Your Excellency. I recall with the pride and great satisfaction Your Excellency's visit to India during the first part of this year, once on the Centenary celebrations of Gandhiji's Satyagraha Movement followed by

the visit of His Majesty the 5th King immediately after assuming the responsibility of ruling this country and on the third occasion during the 14th SAARC Summit, a successful one and I would like to assure Your Excellency that it would be our endeavour to fulfill our commitments adopted as the Chair of the 14th SAARC Summit.

I am delighted to have signed the Agreement on the Punatsangchhu-I Hydroelectric Project just now. This is a historic occasion, which carries our mutually beneficial economic cooperation to even greater heights. For me, the signing is of significance for another reason. I also had the privilege of signing the Agreement for the Tala Project 11 years ago in March 1996. That Project has recently been successfully commissioned. I am glad to share with this distinguished gathering that the capacity utilization is almost 100%.

Punatsangchhu-I will be the largest ever Project to be built in Bhutan with Indian assistance. It will become the symbol of our highly successful cooperation in the hydropower sector - cooperation that is rooted in the principles of mutual benefit and mutual prosperity.

So far, we have successfully completed Chukha, Kurichhu and Tala hydel projects with a generating capacity of over 1400 MW, at a cost of Rs. 5,000 Crore. All these projects are supplying valuable power to India, and generating revenue for Bhutan. Apart from Punatsangchhu-I, work on the preparation of DPRs for two more mega hydel projects, Punatsangchhu-II and Mangdechhu is at an advanced stage. I have no doubt that with such a rich menu of projects, and the complete understanding between our two Governments, we will be able to achieve the target of import of 5000 MW of electricity from Bhutan into India by the year 2020 as agreed under the Agreement on Cooperation in Hydroelectric Power signed in July 2006. Once again Excellency I take this opportunity to place on record our high appreciation of the warm hospitality which you have extended and the cooperation which our two Governments are having for the betterment of peoples of Bhutan and India.

### **245. Opening Remarks by External Affairs Minister Pranab Mukherjee at the media interaction.**

**Thimphu, July 28, 2007.**

I am very happy to be here once again after my visit in December 2006 before the SAARC Summit. Today I had the honour of receiving an audience with His Majesty Jigme Khesar Namgyel Wangchuck. His Majesty's visit to India in February 2007 was historic and has laid the foundation for the future intensification of our relations. I took the opportunity to convey to His Majesty the greetings of the Prime Minister of India and good wishes of the people of India. We exchanged views on the entire gamut of our bilateral relations, our expanding economic cooperation and other matters of mutual interest.

I also had a meeting with Lyonpo Khandu Wangchuk, Prime Minister and Foreign Minister of Bhutan. We are fully satisfied at the excellent state of our relations. We reaffirmed our strong mutual desire and commitment to further strengthen these relations and our mutually beneficial cooperation.

India and Bhutan enjoy exceptionally close and friendly relations. We have been engaged in bilateral economic cooperation since the inception of planned development in Bhutan since 1961. Over the years, this continued economic cooperation has been diversified and today encompasses almost all spheres of socio-economic development in Bhutan.

I am delighted to share with you that today we have signed the Agreement on implementation of the Punatsangchhu-I Hydroelectric Project. This will be the largest ever project to be built in Bhutan with Indian assistance. I am sure it will become another symbol of our highly successful cooperation in the hydropower sector – a cooperation that is rooted in the principles of mutual benefit and mutual prosperity. The construction of this Project will build upon the success of the Chukha, Kurichhu and Tala projects. I would like to mention here that preparation of DPRs for two other mega Hydel projects – the Punatsangchhu-II and Mangdechhu are at an advanced stage. With such rapid progress in implementation of hydro-power projects, I am sure we will be able to achieve the target of import of 5000 MW from Bhutan by 2020 as agreed under the Agreement on cooperation in Hydro power sector. I believe our cooperation with Bhutan is an example of effective South-South cooperation, and a model worthy of emulation.

Bhutan is at the threshold of transition to a Democratic Constitutional

Monarchy. We are confident that under His Majesty's visionary guidance, this transition will be smooth and successful. We wish the people and the Royal Government of Bhutan all the success in their endeavours. As a close friend and well-wisher of Bhutan, India would be happy to extend any possible assistance that the Royal Government of Bhutan may require.

## MALDIVES

### **246. Press Release of the Ministry of Home Affairs on the visit of Home Secretary V. K. Duggal to Maldives.**

**New Delhi, January 18, 2007.**

India and Maldives have agreed to increase bilateral co-operation in the fields of prevention of drug trafficking, coastal security, disaster management, and control of organized crimes including terrorist activities. Although they have been closely co-operating in these fields, the two countries will work together to evolve an institutionalised mechanism soon for this purpose. The understanding was reached during the recent two-day visit of the Union Home Secretary, Shri V.K.Duggal to Maldives.

The Indian side assured Maldives of continued support in capacity-building of their civilian police, particularly in areas of scientific investigation of crime and setting up of forensic facilities. In this connection, a team of forensic experts will visit Maldives next month.

While in Male, Shri Duggal held discussions with the Maldives Home Minister, Mohd. Thasmeen Ali, Defence Minister, Mr. Ismail Shafeeu and the Minister of Foreign Affairs, Dr. Ahmed Shaheed. He also called on President Maumoon Abdul Gayoom.

The Union Home Secretary who led a four-member delegation to Maldives returned to New Delhi yesterday.

**247. Response of Official Spokesperson to a question on the bombing incident in Male.**

**New Delhi, October 1, 2007.**

In response to a question on the bombing incident in Male, the Official Spokesperson said:

"Government of India condemns the bombing incident that occurred in Male on September 29, 2007 in which a number of visiting tourists were injured.

This incident seems designed to disturb the traditional peace and tranquility of the country and impair the economic livelihood of the people. Government of India stands ready to offer all assistance in investigation as well as medical assistance to the Government and the people of Maldives.<sup>1</sup>"

---

1. The Spokesperson was referring to bomb blast in the Maldivian capital Male for which the Maldives President Maumoon Abdul Gayoom blamed disgruntled political elements in his country and vowed to bring to book the culprits behind the incident. The blast on September 30 came weeks after Mr. Gayoom won a referendum to maintain the presidential system of government. The opposition parties, however had accused the government of rigging the referendum.

**248. Press Release of the Ministry of Defence on the training of twenty five soldiers of the Maldivian National Defence Force at the Counter Insurgency and Jungle Warfare School.**

**New Delhi, November 13, 2007.**

Twenty five soldiers from the Maldives National Defence Forces (MNDF) have arrived at the Indian Army's elite Counter Insurgency and Jungle Warfare School (CIJWS) Vairengte, Mizoram being commanded by Brig RM Painuly, to undergo an intense four week course in Counter Insurgency and Counter Terrorist Operations.

As the Commandant says, "Low Intensity Conflict are becoming global in scope. It is widely believed that terrorism is becoming less territorially defined, global in reach and more decentralized. Indeed, terrorism has now truly become a global phenomenon. They are not longer bound by limits of geography. Modern militancy has become a complex phenomenon. The globalised world is now matched by a globalised militant ideology. We need to tackle the menace of terrorism globally and hence joint training is a step in global war on terrorism".

The Maldives National Defence Forces (MNDF) are keen to learn from Indian Army's experience in combating insurgency for the last 50 years. And one can't think of a better staging ground for this exchange of expertise between the two forces than the Indian Army's unique Counter Insurgency and Jungle Warfare (CIJW) School, located in Mizoram. The motto of the School is 'Fight the Guerrilla Like a Guerrilla'. The School has been recognized as a "Centre of Excellence for Counter Insurgency". The School trains all ranks of the Indian Armed Forces, Indian Air Force, Indian Navy, Para Military Forces and Central Police Organisations.

Going global, the School is providing training to Officers and Personnel Below Officers Rank (PBOR) of various friendly countries including Afghanistan, Bhutan, Botswana, Bangladesh, Nepal, Ghana, Iraq, Kenya, Mauritius, Singapore, Seychelles, Sri Lanka, South Africa, Myanmar, Kyzgystan, Mongolia, Uzbekistan and Nigeria. Training facilities provided by the School are greatly appreciated by the subscribing countries. Many other countries have elicited interest in the training being imparted here and the demand is on the increase.

## NEPAL

### 249. Reaction of Official Spokesperson to developments in Nepal.

**New Delhi, January 16, 2007.**

The Government of India welcomes the promulgation of the Interim Constitution<sup>1</sup> and the formation of the Interim Legislature in Nepal. These are significant milestones in Nepal's progress towards a new political era which we hope will be characterized by peace, stability and economic development.

We also note that United Nations monitors have begun to arrive in Nepal to commence the process of arms management. This process must be credible and complete, before the formation of the Interim Government.

The Government of India remains committed to provide all the support it can to assist the people and the political parties of Nepal as they move forward on the peace process.

---

1. On January 15 the Nepalese Cabinet endorsed the Interim Constitution agreed to between the Maoists and the seven-party alliance paving the way for the Maoists to join the interim parliament and the government. The Constitution was formally promulgated by the Nepalese Parliament. The new constitution virtually gave all the powers of the head of the state to the prime minister. The Maoists have 83 seats in the 330-member parliament. The Nepalese Congress has 85 and the Nepalese Communist Party (UML) 83. The Interim Parliament would function until June when the elections to the new Constituent Assembly are expected to be held.

## **250. Statement by Official Spokesperson on the Nepalese Prime Minister's Address to the Nation.**

**New Delhi, February 9, 2007.**

We welcome Prime Minister Girija Prasad Koirala's address to the Nepalese nation on Wednesday, 7 February 2007, addressing the demands of the Madheshi population of the country, and the fact that the address reflects a consensus among the eight political parties<sup>1</sup>.

We are saddened by the loss of lives and violence in the Terai in the last few weeks. It is our hope that the Government and friendly people of Nepal will continue to resolve such issues through dialogue and peaceful negotiations. Significant milestones have been achieved in the process of democratic transition in Nepal by the political leadership in Nepal. As always, India stands ready to extend its full support to the efforts of the government and people of Nepal in this process.

---

1. After three weeks of violent protests, a major Madheshi group on February 8 suspended for 10 days its agitation that paralysed Nepal's Terai region. It said it was ready for talks with the Government. "We call our cadres and the Terai people to halt their transport strike and bandh programmes for 10 days beginning on Thursday," said Upendra Yadav, convener of the Madheshi People's Rights Forum (MPRF), spearheading the stir. The agitation had claimed 27 lives in southern plains. Welcoming Prime Minister G P Koirala's address where he assured Madheshi people that their demands would be met and invited the agitating groups for talks, Mr. Yadav said the agitation has been put off to facilitate dialogue. Madheshis, who reside in Terai region and account for over 30 per cent of Nepal's population, were pressing for greater political representation, a federal structure and greater autonomy.

**251. Advice tendered by External Affairs Minister Pranab Mukherjee to the Minister of Oil and Natural Gas Murli Deora against any cut in the oil supplies to Nepal.**

**New Delhi, 8 March 2007.**

Citing Indian Oil Corporation's monopoly status with Nepal Oil Corp (NOC) since 1974, External Affairs Minister Pranab Mukherjee requested Petroleum Minister Murli Deora to reconsider IOC's cut in supplies to NOC worth Rs 20 crore per month.

"Except for the last two years, this arrangement (between IOC and NOC) has worked well and has brought commercial benefits to IOC. I believe that before taking any decision it would only be fair to keep this broader background in mind," he wrote to Deora on March 8.

Beginning November, IOC has started cutting supplies to NOC by 20 per cent to recover Rs 339 crore NOC owed for bills from April 2005. In January, IOC ratified a decision to cut supplies up to 30 per cent if NOC failed to pay an additional Rs 15 crore each month. The outstanding until February was Rs 298 crore.

Mukherjee's renewed plea notes Deora's concern for IOC but points out that "Nepal is going through an extraordinary political situation". His letter assures that the Nepal government had conveyed that it was "committed to NOC honouring its payment obligations to IOC in full".

## **252. Statement by Official Spokesperson on constitution of the Interim Government in Nepal.**

**New Delhi, April 1, 2007.**

The Government of India welcomes the constitution of the interim Government<sup>1</sup> in Nepal under the leadership of Prime Minister G.P. Koirala.

The formation of the interim Government marks another step forward in the implementation of the peace process, and towards the creation of conditions in which the people of Nepal can determine their future through free and fair elections to the Constituent Assembly.

While continuing our support to the people and political parties in Nepal to carry forward the peace process, the Government of India looks forward to working with the interim government to further strengthen India's traditionally close and mutually beneficial relations with Nepal.

---

1. The formation of the Interim Government was not without hiccups. The announcement which was to be made the previous day (March 31) could not be made because of the last minute differences between Prime Minister Girija Prasad Koirala's Nepali Congress and the Communist Party of Nepal (UML). The two major coalition partners could not agree on who should be the senior-most Cabinet member after the Prime Minister. The UML claimed that its leader, Sahana Pradhan, who was to lead the UML team in the interim Government, should be number two in the Cabinet. But the Nepali Congress said its general secretary and former Speaker, Ram Chandra Poudel, should hold the position. The number two position in the Cabinet assumed significance in the current scheme of things due to Mr. Koirala's age and growing health concerns. Mr. Koirala, 85-year, suffered from chronic lung and chest problems. It was for this very reason that the Nepali Congress wanted its leader to succeed the Prime Minister in the Cabinet in case of any eventuality. The UML finally agreed to give up its claim for the number two position in the Cabinet. The interim Government was therefore announced the next day (April 1). G. P. Koirala took a fresh oath of office as the interim government's head and administered the oath of office to 22 Ministers. A meeting of the top leaders of the Seven Party Alliance and the CPN (Maoists) also took a key decision to hold the elections to the Constituent Assembly on June 20. It decided to amend the interim Constitution to give powers to the interim legislature to abolish monarchy by a two-third majority.

**253. Question in the Lok Sabha: "Talks with Bangladesh and Nepal on anti-India activities."**

**New Delhi, May, 9, 2007.**

Please see Document No. 223.

**254. Response of Official Spokesperson to questions on recent developments at the Mechi bridge on the India-Nepal border.**

**New Delhi, May 31, 2007.**

In response to questions on recent developments<sup>1</sup> at the Mechi bridge on the India-Nepal border, the Official Spokesperson said:

"The issue of refugees living in Nepal is a bilateral matter between Nepal and Bhutan. It is our hope that both our friends Nepal and Bhutan would be able to pursue their dialogue to find an early solution to this humanitarian problem. As regards specific incident on May 30, 2007 at the Mechi bridge on the India-Nepal border, Indian authorities have taken necessary steps to ensure security and to maintain law and order along the India-Nepal border, and we are in touch with the Government of Nepal."

---

1. A group of Bhutanese refugees of Nepali origin, residing in the UNHCR administered camps inside Nepal on May 29 tried to force their way into India to enter Bhutan and clashed with the Indian security forces at Panitanki check-post in Darjeeling district on the West Bengal - Nepal border. According to media reports the security forces, comprising the police and the Sashastra Seema Bal (SSB) fired several rounds in the air after a baton-charge failed to disperse them. The refugees attacked the police personnel with stones and tried to set ablaze a Customs office in order to break the security cordon. More than 40 security personnel were injured in the clashes.

**255. Response of Official Spokesperson to a question on the date for elections in Nepal.****New Delhi, June 25, 2007.**

In response to a question regarding date of elections in Nepal, the Official Spokesperson said: "The announcement of the date<sup>1</sup> for elections to the Constituent Assembly is an important step forward in the institutionalization of democracy, peace and development in Nepal. We wish the Government of Nepal all success in the holding of these elections in a manner that the people of Nepal can freely and fairly determine the future of their country. As a close friend and neighbour of Nepal, India stands ready to render whatever support is required to achieve these key objectives".

**256. Remarks by Foreign Secretary Shivshankar Menon at Press Conference during his visit to Nepal.****Kathmandu, September 16, 2007.**

Friends from media, ladies and gentleman,

Good Afternoon.

I am delighted to be in this beautiful city, the capital of our friendly and close neighbour Nepal, once again. I have fond memories of my previous visits to Kathmandu, most recently in December and July 2006. This is my second visit to Nepal in my present official capacity.

During this visit, which began yesterday, I was privileged to be received by Prime Minister Koirala, Speaker of Legislature-Parliament Mr. Nembang, Minister for Peace and Reconstruction Mr. Poudel, Foreign Minister Mrs. Pradhan and Home Minister Mr. Sitaula. I also met the Chief Election Commissioner Mr. Bhoj Raj Pokharel and senior leaders of political parties, including President of Nepali Congress (Democratic) Mr. Sher Bahadur Deuba, General Secretary of CPN (UML) Mr. Madhav Kumar Nepal, Chairman of CPN (Maoist) Mr. Pushpa Kumar Dahal, President of Rashtriya

---

1. On June 24 the Nepalese Government confirmed November 22, 2007 as the date for a key election that will choose an assembly to draft a new constitution and decide on the fate of the monarchy.

Janshakti Party Mr. Surya Bahadur Thapa, and President of Rashtriya Prajatantra Party Mr. Pashupati S.J.B. Rana.

In these meetings and discussions, I had free and frank exchange of views on bilateral relations and ways and means of further expanding and strengthening the close, friendly and wide-ranging relations between India and Nepal. I reiterated that these relations remain of the highest priority for us.

I conveyed on behalf of the Government and the people of India the deepest condolences on the loss of life, limb and property in the recent blasts in Kathmandu and our strong condemnation of the cowardly act of targeting innocent citizens. I must mention here our appreciation for the resilience and determination shown by the people of Nepal in not allowing this act of senseless violence to adversely affect the peace process and the elections to the Constituent Assembly scheduled for 22 November 2007.

The leaders of Government and political parties of Nepal also informed me of the present political situation in Nepal, and the forthcoming Constituent Assembly elections. All of them spoke of the critical importance of the elections to the Constituent Assembly, as scheduled and in an environment free of fear and intimidation. India has consistently believed that these elections will allow the people of Nepal to choose the manner in which they wish their country to be governed by giving to themselves a new constitution. India will support and assist the transition to a democratic, inclusive, stable and prosperous Nepal. My consultations over the past two days in Nepal strengthened my conviction that the people of Nepal will successfully address the challenging tasks of democratic nation-building which lies ahead.

Thank you.

**257. Statement by External Affairs Minister Pranab Mukherjee  
in response to questions on developments in Nepal.**

**New Delhi, September 18, 2007.**

These are internal issues of Nepal, to be resolved by Nepal itself. We would hope that all concerned will implement previous understandings, that underpin Nepal's peaceful transition, and that differences will be resolved democratically<sup>1</sup>. The common goal must remain to enable the people of Nepal to choose their own future and the manner of their governance.

- 
1. The External Affairs Minister was referring to the resignation of four Maoist Ministers from the five-month-old coalition government on September 18, dealing a huge blow to the nascent peace process. They decided to quit after Prime Minister Girija Prasad Koirala refused to bow to their demand to declare Nepal a republic through the interim-legislature. Though the Maoists walked away from the government, they apparently did not dump the peace process since they insisted they were not picking up arms again. "We will focus on peaceful agitation to fulfil our demands," Krishna Bahadur Mahara, Maoist politburo member, told reporters after submission of resignation. Earlier addressing a mass meeting organised by Maoists at the open-air theatre in the capital after the failed negotiation, the Maoist second-in-command, Babu Ram Bhattra, said: "The Constituent Assembly election cannot be held so long as the monarchy exists. Now our party will bring a republic through street agitation." He added that the election programme announced by the Election Commission was not acceptable to his party any more. "The election code of conduct announced by the Election Commission is not acceptable to us," he explained. Interestingly, CPN (Maoist) chairman Prachanda, who was also supposed to address the mass meeting, did not show up at the eleventh hour, citing health reasons. The general secretary of Communist Party of Nepal (UML) said that the top leaders of the eight-party alliance, including the Maoists, have agreed to sit for dialogue on the 19th September morning. "The Maoists have left the government, but they haven't walked out of the peace process. We are still hopeful of an agreement," he said. The Minister for Peace and Reconstruction, Ram Chandra Poudel, also expressed confidence that the latest political development would not derail the peace process. "We are still hopeful that the Maoists would come back to the negotiating table and we will reach consensus." He also said the government was ready to fulfil 20 of the 22 demands submitted by the Maoists.

## **258. Response of Official Spokesperson to questions on developments in Nepal.**

**New Delhi, October 5, 2007.**

In response to questions on developments in Nepal, the Official Spokesperson said:

"We are disappointed at the postponement<sup>1</sup> of the elections in Nepal, which has occurred for the third time. The repeated postponement of elections erodes credibility and affects the process of democratic transformation and legitimization in Nepal. We hope that the special session of the Interim Parliament will address all relevant issues democratically, to enable the people of Nepal, who have sacrificed so much, to choose at the earliest their own future and the manner of their governance, through a free and fair election process."

- 
1. On October 5 after the coalition government decided to suspend the Constituent Assembly elections scheduled for November 22, owing to irreconcilable differences among partners of the ruling combine, the Election Commission suspended all election programmes. The Communist Party of Nepal (UML) and two other Left parties wrote a note of dissent, expressing their displeasure over the postponement of the poll. This was the second time that the Constituent Assembly poll had been postponed by the government. The coalition government ran into trouble after the Communist Party of Nepal (Maoists) demanded that Nepal be declared a republic before the elections and a fully proportional system of election be adopted for the poll. The Interim Constitution of Nepal however said the first meeting of the Constituent Assembly would decide the fate of the monarchy and the Assembly would be formed through a mixed system of election - half of the members would be elected on the basis of the first-past-the-post system and the other half would be elected through a fully proportional system. Maoist Chairman Prachanda issued a statement saying his party was not in favour of deferring the poll but agreed to it "so as to save the Seven-Party unity and the peace process". The UML took out a rally and held a public meeting in Kathmandu to protest the poll postponement. The leaders however, issued a joint statement expressing their commitment to the peace process and said they would soon declare the next date for the elections.

**259. Press Release of the Ministry of External Affairs on the visit of Special Envoy of the Prime Minister Shyam Saran to Kathmandu.**

**New Delhi, October 12, 2007.**

The Special Envoy of the Prime Minister of India, Shri Shyam Saran paid a visit to Kathmandu from 10-12 October 2007.

The Special Envoy was received by the Rt. Hon'ble Prime Minister of Nepal Mr. Girija Prasad Koirala, Minister for Peace and Reconstruction Mr. R. C. Poudel, and Home Minister Mr. K. P. Sitaula. Shri Saran also met the Chief Election Commissioner Mr. Bhoj Raj Pokharel and political leaders, including Senior Leader of Nepali Congress Mr. Sher Bahadur Deuba, General Secretary of CPN (UML) Mr. Madhav Kumar Nepal, Chairman of CPN (Maoist) Mr. Pushpa Kamal Dahal, President of Rashtriya Janshakti Party Mr. Surya Bahadur Thapa and President of Rashtriya Prajatantra Party Mr. Pashupati S.J.B. Rana.

The meetings of the Special Envoy provided an opportunity to discuss the current state of the peace process in Nepal. During the discussions, the Nepali leaders stressed that efforts were being made by them to hold Constituent Assembly elections on the basis of understanding among political parties.

The Special Envoy emphasized that India regards holding free and fair Constituent Assembly elections of central importance for ensuring lasting peace and multi-party democracy in Nepal. He expressed the hope that the people of Nepal will effectively address any challenges in this regard through democratic means, including through implementation of all relevant agreements and understandings. That remains, in India's view, the only way to ensure that the people of Nepal will be able to exercise their democratic rights to choose their future, including the manner in which they want to be governed.

The Special Envoy conveyed that India remained committed to help the peace process in every way possible to achieve the goal of a democratic, stable and prosperous Nepal<sup>1</sup>.

---

1. Addressing a press conference before leaving for New Delhi, Mr. Saran said, "India is quite disappointed by repeated postponement of Constituent Assembly elections." Further

## 260. Reaction of Official Spokesperson to questions on developments in Nepal.

**New Delhi, December 24, 2007.**

We have learnt of the 23 Point Agreement<sup>1</sup> reached among the seven parties to hold Constituent Assembly elections by mid-April 2008. This is an encouraging development in the right direction. We also note that the Agreement has given CA elections central importance. The exercise of the people's right to elect a Constituent Assembly in a free, fair and fearless manner is the best way to enable the people of Nepal to choose their own future. We hope that all concerned will work towards maintaining the new deadline for CA elections. As always, India stands ready to assist in every possible way, Nepal's transition to a democratic, stable, peaceful and prosperous State.

---

delay in holding elections would raise questions of legitimacy of the government. "The peace process and the electoral process are crucially linked together. We don't think the peace process can proceed independently without the electoral process," he said. He told the journalists that all the leaders with whom he held consultations agreed with India on the need to hold the elections at the earliest. He also stressed that people's mandate was necessary to decide the future of monarchy. "We have consistently taken the position that it is up to the people of Nepal to choose how they wish to be governed. But what is the best way to do it? The best way is to have a fresh mandate," Mr. Saran said.

1. The Spokesman was referring to the seven-party alliance signing on December 23 a 22-point agreement under which the Maoists agreed to join the government and the country would be declared a republic through a parliamentary amendment subject to ratification by the first meeting of the Constituent Assembly. It would be recalled the Maoists had moved out of the government in September on the question of abolition of the monarchy. The parties also agreed that if the King was found to be conspiring against the Constituent Assembly elections, the interim parliament would be able to abolish the monarchy by passing a resolution with two-thirds majority. The agreement provided for allocation of seats in the parliament by first-past-the-post system and proportional representation. On December 24 the Government tabled the bill in the Nepalese Parliament to amend the Constitution to declare Nepal a Federal Democratic Republic, which was adopted on December 28. The amendment in Article 159 (a) of the interim Constitution said: "Nepal will be a Federal Democratic Republic." After the amendment, the King has no constitutionally sanctioned role and the Prime Minister would now function as the head of state until the decision was finally endorsed by the elected Constituent Assembly. [This was the third amendment in the interim Constitution since it was promulgated a year ago after the success of the April Movement in 2006.] The amendment also proposed change in the composition of the members of the Constituent Assembly to be elected on the proportional basis and through the first-past-

the-post system. According to the amendment the Constituent Assembly would now comprise 601 members, of which 240 will be elected on the basis of the first-past-the-post system and 335 nominated by the parties in proportion to the popular votes garnered by them. The Prime Minister will nominate the rest 26. Maoist Chairman Prachanda on December 24 said his party would now rejoin the government following which the party formally joined it on December 30.

## PAKISTAN

### **261. Press Release of the Ministry of External Affairs on exchange of lists of Nuclear Installations and Facilities between India and Pakistan.**

**New Delhi, January 1, 2007.**

India and Pakistan today (1 January 2007), through diplomatic channels simultaneously at New Delhi and Islamabad, exchanged lists of nuclear installations and facilities covered under the Agreement on the Prohibition of Attack against Nuclear Installations and Facilities between India and Pakistan. This agreement was signed on December 31, 1988 and entered into force on 27 January 1991.

Under the Agreement, the two countries, on first January of every calendar year are to inform each other of Nuclear Installations and Facilities to be covered by the Agreement. The First such exchange of lists took place on 1st January 1992. This is the sixteenth consecutive time that both countries have exchanged such a list.

### **262. Interview of External Affairs Minister Pranab Mukherjee with the Mumbai based *Daily News Analysis*.**

**New Delhi, January 6, 2007.**

[External Affairs Minister Pranab Mukherjee is an old hand at diplomacy and not many were surprised when he was shifted to this important ministry by Manmohan Singh. Since he took over, he has been circumspect in talking to the media, saying he wanted to study all the issues first. Next week, he takes off for Islamabad on a visit that will be closely monitored for atmospherics and substance. His discussions with the Pakistani leadership are expected to prepare the ground for a trip by Singh later this year. In his first ever interview to the print media since taking over, Mukherjee talked to Arati R Jerath and Seema Guha on the state of relations with Pakistan and the hope for a resolution of the vexed Jammu and Kashmir issue. Editorial note.]

**Question:** One of the biggest challenges for an Indian foreign minister is

the relationship with Pakistan. You will be going to Islamabad on January 13. What will be your agenda?

**Answer:** Whenever a visit like this is undertaken, there are expectations of an improvement in the situation. The limited purpose of my visit is to extend invitations to Musharaff for the SAARC Summit and other meetings scheduled to be held in New Delhi in April. But as I will be there and as this is my first visit to Pakistan, naturally I will take the opportunity to have discussions on issues of mutual interest. I hope that they will be good.

**Question:** Manmohan Singh had said that there have been extensive discussions with Pakistan over the past two years on all issues, including Jammu and Kashmir. Are we anywhere near a resolution of the J&K issue?

**Answer:** There is a substantial improvement as a result of the discussions. The composite dialogue with Pakistan has a chequered history. It has started and broken many times. Keeping this in mind, I would say that a positive atmosphere has now been created. On the J&K issue, there has been progress. We have not arrived at a final solution yet. But if we continue this step-by-step approach, at some point of time we will possibly have the final solution that Musharraf talks of.

**Question:** Any solution would involve public opinion and a domestic consensus. Are we doing that?

**Answer:** In a world where television channels and newspapers report every single move of the government, everything is known to the people. The public is well aware of what is happening. Political parties ought to formulate their positions also.

**Question:** When you were appointed foreign minister, it was felt that with your experience, you would bring political direction to foreign policy and help to rebuild the traditional national consensus that has been ruptured in recent years. Are you any closer to those expectations?

**Answer:** I would not say it has been repaired but surely we have made efforts to build up a consensus. If we keep people informed, if we have regular discussions in Parliament, there should be no problem. Apart from our Left colleagues, with whom we are in regular touch, we will try to carry other people. It is easy to create consensus on foreign policy.

**Question:** Why do you say it is easy?

**Answer:** All the ongoing processes began during the NDA period. The

dialogue process with Pakistan was restarted in 1998 when Vajpayee was the Prime Minister. And we are carrying it on. The dialogue with China and the appointment of special representatives to discuss the boundary question were done by the NDA government. In fact, the process with China is a continuation of the agreement made in 1995 - when I was the external affairs minister - to open two border trade points. So there is a continuity in foreign policy.

**Question:** There is a feeling that your government is defensive about what the BJP says. You pulled out of the bilateral talks with Pakistan when the BJP accused the government of being soft on terror after the Mumbai blasts.

**Answer:** We did not pull out of the talks. We simply postponed them. There is no question of being defensive. We took note when police said there was prima facie evidence of linkages to Pakistan in the Mumbai bomb blasts. Our Prime Minister said when innocent people are targetted, the government has to be sensitive to public anger. No sensitive government can carry on talks. The BJP government did the same thing after the attack on Parliament. But unlike them, our reaction was measured. We have had serious concerns about terrorists using Bangladesh as a base, but the response from Dhaka has been unsatisfactory.

**Question:** The response has not been very positive. But if a sovereign government denies it, what can we do?

**Answer:** There are close cultural ties between Bengal and Bangladesh. But culture failed to help bond the two countries better. It is the same with Pakistan. After all, it was once one country and it is now divided. But we don't have adverse relations with Bangladesh. Our trade, economic and political relations are improving. **Question:** Are you optimistic about SAARC? **Answer:** Once SAFTA becomes operational, it will gather momentum. We have some problems with Pakistan. But I am optimistic.

**263. Address of Prime Minister Dr. Manmohan Singh to the Federation of Indian Chambers of Commerce and Industry Annual General Meeting.**

**New Delhi, January 8, 2007**

Wish you all a very happy and prosperous new year! I am happy to be here once again at your Annual General Meeting. I compliment Shri SK Poddar and Dr. Amit Mitra for their energetic leadership of FICCI during the past year. I wish Dr. Habib Khorakiwala a very active and productive year ahead. I am impressed by the quiet efficiency with which Dr Mitra has re-energised FICCI over the past decade. I must thank him and FICCI for the support that has been extended for the many initiatives of our Government.

Organisations like yours, with your extensive contacts, have played a constructive role in facilitating greater political consensus in favour of economic policies that will take our country forward. There is, however, an unfinished agenda that is yet to be completed. You have, therefore, much more work to do in shaping policy in the year ahead!

Ladies and Gentlemen,

We meet at a very opportune moment in our recent history. There is an air of optimism about our economic prospects. The manufacturing sector is buoyant and both old and new industries find new markets emerging. The services sector continues to drive growth and generate employment. For the first time ever the annual inflow of foreign direct investment, measured in billion dollars, will go into double digits.

From being demand-constrained in the past, economic growth now appears to be supply-constrained. Be it power, be it port capacity, be it supply of skilled manpower - a variety of supply bottlenecks are holding the growth rate back. A major responsibility for us in government is to help relax this supply constraint. If a youthful population is our asset, we need to make them skilled and capable of securing gainful employment. This requires a huge expansion in vocational education and this is certainly on the anvil. We have started work on a Vocational Education Mission and I hope to see tangible steps being taken in this direction in the coming few months.

The Government and our macro-economic authorities also have the responsibility of ensuring that fiscal discipline is maintained even as we

work to promote growth with equity. Our tax regime should be liberal, but equitable. It should be transparent and not subject to administrative discretion. I have great faith in the inherent honesty of our people, and we must respect that. When there is transgression it must be visited upon by predictable action. The introduction of VAT in most states of the country has been a matter of satisfaction. We will now move towards a common GST and better harmonization of VAT rates as well. In the long run, our tax regime should not have too many exemptions which make tax administration an unnecessarily complex exercise vulnerable to misuse.

It is also incumbent upon us to ensure transparent functioning and regulation of markets. Even the most open market economy requires regulatory supervision. In hopeful and optimistic times such as these, we must guard against irrational exuberance and ensure stability of markets.

One of the areas of successful reform in the past decade has been that of the financial sector. India's standards and regulatory institutions are world class. We have to preserve the integrity of this system and ensure that financial discipline is maintained. Our monetary authorities have the responsibility to ensure stability in the financial, foreign exchange and money markets while sustaining the growth process. As we gradually integrate India into the global financial system and as we gain confidence in our economy's abilities, we will gradually move into a less restrictive forex regime. The recommendations of the Tarapore Committee are a step in this direction, mixing caution with optimism.

Ladies and Gentlemen,

I must draw your attention to the fact that our sense of optimism must be balanced by realism about the problems at hand and the hurdles we still need to cross. Even as the optimism about our prospects makes us hold our head high, realism about the challenges we face ensures that our feet are firmly on the ground. A realistic appreciation of what needs to be done is necessary.

Amidst all the hype about accelerating growth and a buoyant market, we must not lose sight of the fact that we have to sustain a much higher rate of investment, keep inflation under control, generate more employment, impart a new element of dynamism to our agriculture and wage a decisive war against poverty, ignorance and disease.

To win this war, however, we need more productive investment. We have to create more jobs in the non-farm sector, both in rural and urban areas.

The revitalization of our agriculture is an opportunity and a challenge - both for the government and the private sector. If we have to bridge the rural-urban divide and the regional economic divide, we need to transform the agriculture and allied sectors. The problems are well known. We need to look at efficient and effective solutions. As I see many business houses entering into mass retailing, I hope the supply chains being built reach out directly to farmers, ensuring more remunerative prices. The Integrated Food Law has been passed by Parliament and we will be operationalising this in the next few months. This will impart new dynamism to agro-processing. We have to invest more and invest efficiently in better infrastructure - both the physical infrastructure which Mr. Poddar referred to and the social infrastructure of health and education. This we are committed to doing.

Ladies and Gentlemen,

I do believe that in the past two years our Government has succeeded in altering the state of expectations in the economy. Apart from the higher rate of investment, which is now at an all-time peak of 31% of GDP, what has sustained the above 8% annual rate of growth of the economy is the altered state of expectations. New opportunities are being created to promote public private partnerships for the expansion and modernization of infrastructure sectors. Not only do we have a goal of investing over US\$ 320 billion in our infrastructure sectors, we have also created the necessary institutional structures and tangible investment opportunities to enable this investment to actually happen.

In fact, the turnaround and the revitalization of Indian railways is a classic example of what good governance with a focus on basics can achieve in a short period of time. The unparalleled growth taking place here and the public private partnerships happening in the dedicated freight corridor, the operation of container trains and the management of railway stations is an example for all other infrastructure sectors. Even the road sector has an extensive plan for rolling out top class highways in every nook and corner of the country through a BOT model. As Mr. Poddar has mentioned, the Ultra Mega Power Projects have demonstrated the possibility of producing power at extremely competitive rates through private investment. However, we still need to clean up the act in this critical sector and the meeting of Chief Ministers which has been called in February will address the bottlenecks constraining this sector, particularly the viability of distribution companies. It is my solemn assurance that the power sector will secure the priority attention of our government this year.

Ladies and Gentlemen,

Like Lord Keynes, I do sincerely believe that in a world of uncertainty, risk-taking and enterprise are deeply influenced by the state of expectations. When investors worry about the present and are uncertain about the future, investment activity is undoubtedly dampened. However, when investors are reassured by the present and reasonably optimistic about the future, they invest in it. Today the state of expectations of investors is positive. They feel reassured by the various steps we have taken and by the new dynamism exhibited by Indian enterprise and professionals in recent years.

However, to sustain this positive state of expectations we need able political and economic management. We need farsighted leadership at all levels. We need, above all, greater political consensus in favour of forward-looking policies. Policies that attract new investment, create new jobs, create new capabilities and skills. Policies that empower our producers, our workers, our farmers, our artisans, our engineers and scientists and all productive sections of society.

I am aware that there is much we have to do to further accelerate the growth rate and make growth more inclusive. The Approach Paper to the Eleventh Five Year Plan sets out in detail the constraints facing the economy and the policies we must adopt to step up the rate of growth of savings, revenues, investment, income and employment. I am confident that our economy now has the steam and the energy to move to a higher growth trajectory. Our Government will take all necessary steps to sustain the buoyancy in the economy and the optimism of investors. I notice that not all proposals for investment in large projects materialize owing to various hurdles and bottlenecks. Many of these require inter-ministerial action or close coordination between the center and the states. I will ask the Finance Ministry and the Investment commission to suggest an institutional mechanism whereby large scale projects in the public and private sectors are facilitated so that they take off as planned.

Ladies and Gentlemen,

It is our responsibility in Government to create an environment conducive to improved economic performance. Equally, it is the responsibility of business to ensure that our firms become more globally competitive. Our economy has to be more closely integrated with that of our immediate and distant neighbours. FICCI has played an active role in promoting the idea of regional economic cooperation both in the context of South Asia and South-east Asia.

Later this week I will be participating in the East Asian Summit. We remain committed to increased economic interaction between India and the economies of East and South-East Asia. We would also like to be a member of the wider Asian Economic Community. This requires greater openness on our part. Indian industry must be prepared for this. We have laid out a timetable for tariff reduction and we must adhere to it. Indian industry can no longer seek excessive protection through tariffs and must prepare for the brave new world of global integration.

Indian business must also be prepared for a more fast-track economic integration in South Asia. As the region's largest economy, we must be more open to our neighbours. I must compliment FICCI for the initiative it had taken nearly a decade ago to strengthen business-to-business relations between India and Pakistan. I recall that a FICCI delegation had gone to Pakistan in 1995 to promote closer economic relations. Thanks to FICCI's efforts, the India-Pakistan Chamber of Commerce and Industries was set up. I hope Indian and Pakistani business leaders, as indeed business leaders from the region as a whole, will strengthen the hands of the political leadership in promoting peace, security and friendship in our region.

I sincerely believe, as I have said so often, that the destiny of the people of South Asia is interlinked. It is not just our past that links us, but our future too. India cannot be a prosperous, dynamic economy and a stable polity if our neighbourhood as a whole is also not economically prosperous and politically stable. Similarly, our neighbours cannot prosper if India does not do so as well. There are enormous opportunities for promoting mutually beneficial cooperation in South Asia. To exploit these opportunities, the nations of South Asia have to work sincerely to control the scourge of terrorism and extremism.

Recently, at a public meeting in Amritsar, I spoke of how I envision relations with Pakistan. I earnestly hope that the relations between our two countries become so friendly, and that we generate such an atmosphere of trust between each other, that the two nations would be able to agree on a Treaty of Peace, Security and Friendship. In the increasingly globalised and integrated world we live in, political borders are no longer economic and social barriers. I dream of a day when, while retaining our respective national identities, one can have breakfast in Amritsar, lunch in Lahore and dinner in Kabul. That is how my forefathers lived. That is how I want our grandchildren to live.

Ladies and Gentlemen,

These are good times for Indian business. But with greater opportunity comes greater responsibility. You must pay due attention to improved corporate governance. You must be sensitive to the urgent need to protect our environment and to prevent degradation of our land, water and air resources. You must ensure that the interests of your shareholders and stakeholders are best served. Even as you demand a more hospitable environment for business, you must become more socially responsible. There is no reason why the spread of industrialization should be a contentious process. Issues such as land acquisition and displacement of people and their rehabilitation and resettlement should be transparently addressed. We will be finalizing a new Rehabilitation Policy in three months and this will be more progressive, humane and conducive to the long term welfare of all stakeholders. Indian industry must be sensitive to the need to empower the weaker sections of society, particularly the scheduled castes, scheduled tribes and minorities, so that they can benefit equitably from processes of economic and social development. Industrial development is not a zero sum game. It can be a win-win process for all sections of society.

If we act wisely and with the best interests of the country at heart, we can transform our economy and society. I believe we are on the threshold of a new era of knowledge-based development. The country requires long-term and strategic thinking. As captains of Indian industry you can play a proactive and constructive role in this regard.

In a democracy politicians will perforce take a short-term view. After all, one has to be in office to make a difference! A politician has to think of the next election, even if he speaks for the next generation! You might perhaps say that your horizon is even more limited. That you have to think about the next quarter's balance sheet results! That is fair enough. However, it is incumbent upon all of us to think of our country's future, and the need to build a progressive and equitable polity and society. It is with this sense of patriotism and forward looking thinking that FICCI came into being. I urge you to continue to work with that spirit of your founders and stay faithful to their grand vision and aspirations. I wish your Annual Meeting all success.

Thank you.

**264. Interview of External Affairs Minister Pranab Mukherjee with the weekly *India Today*.**

**New Delhi, January 12, 2007.**

[The quintessential politician and a veteran of many a political battle, Pranab Mukherjee, as external affairs minister, is typically in the thick of things. Not only does he continue to head a dozen important government committees but is now on a hectic tour of India's neighbours including Pakistan and the ASEAN summit at Cebu to promote India's foreign relations. Before he left, he sat down for an hour-long interview with INDIA TODAY Editor Prabhu Chawla and Associate Editor Saurabh Shukla in the executive drawing room of South Block. Excerpts from the interview:]

**Question:** As part of your tour of India's neighbours you would also be making your first visit to Pakistan as foreign minister. What is your agenda?

**Answer:** I am going to Pakistan, firstly, to extend an invitation to President Musharraf to attend the 14th SAARC Summit. That is the official purpose. And surely we will not discuss the weather, we will discuss issues which are there. We will discuss SAFT with all other SAARC countries, tariff reduction has been finalised. But with Pakistan this has to be done still. Similarly, we would also like to review at the foreign ministers' level the third round of Composite Dialogue that just got over.

**Question:** The biggest impediment to the peace process is the issue of terrorism. Will you be seeking an assurance from General Pervez Musharraf that all terrorist acts against India will stop?

**Answer:** The assurance was obtained by Atal Bihari Vajpayee on January 6, 2004. President Musharraf assured him that Pakistani territory or Pakistani-dominated territory will not be allowed to be used by terrorists. The question is not of assurance; the question is how these assurances are actually implemented.

**Question:** You said General Musharraf's promises on terrorist camps are not being implemented. You used the word "unconvincing".

**Answer:** What I stated is that infrastructure of launching terrorists has not been dismantled. His (Musharraf's) pledges have not been implemented.

**Question:** But do you think that the peace process will be affected if terrorism continues from across the border?

**Answer:** That is the issue which has been flagged at the foreign secretary-level meeting. We will flag it again.

**Question:** Do you think we can trust Musharraf now?

**Answer:** We have to deal with the head of a state. The basic presumption would be that we would trust each other.

**Question:** What about Jammu & Kashmir? Do you have any package solution?

**Answer:** I don't have any readymade solution.

**Question:** But are we discussing a Kashmir solution on the lines of the four-point formula that General Musharraf has been suggesting?

**Answer:** We are trying to resolve the issue of Kashmir in the context of Shimla Agreement, Lahore Declaration, and the series of talks which have taken place; we are having a composite dialogue of which resolution of the Jammu and Kashmir issue is a part. In that context we are going to discuss it. These are the issues that have been raised from time to time and the responses are there; you have heard the response of the prime minister in Amritsar.

**Question:** Are your allies constraining you on foreign policy choices, be it Sri Lanka, the US or Iran? Your allies are dictating foreign policy choices now.

**Answer:** No, not at all.

**Question:** But you have to do a lot of explaining to them.

**Answer:** Yes, as I have explained to my Left allies, I have equally explained it to the BJP leaders. Because parliamentary democracy demands that when there is a broad consensus in respect of foreign policy we should try to maintain that consensus. Keeping that in view, we apprised them of the developments which took place in our neighbourhood.

**Question:** There have been reservations over the Indo-US nuclear deal. Even the scientists have opposed the deal.

**Answer:** No, only a section of scientists have opposed it. They have expressed their concerns. But these concerns will not be ignored.

**Question:** So are you saying that you will go for 123 agreement only if

those concerns are taken care of?

**Answer:** Of course, that is the commitment we have made.

**Question:** Are you also saying that in the current form the deal will not go through, unless your concerns are sorted out?

**Answer:** Unless certain issues are taken care of, certain concerns are addressed, it would not be possible for us to go with it.

**Question:** The Congress is heading a coalition for the first time since Independence. So is handling coalition conflicts a major problem?

**Answer:** Of course, running a coalition government in a country like India is a difficult task. More so when Congress leads the coalition, since most of the political parties were anti-Congress. To have a coalition, to run a coalition government, you require a lot of adjustments, a lot of flexibility. But the success of the coalition Government to a great extent is the contribution of UPA Chairperson and Congress President Sonia Gandhi and Prime Minister Manmohan Singh.

**Question:** You could have done better if it was only a Congress-led government?

**Answer:** That would be a value judgement right now because we do not have the majority.

**Question:** But have you also compromised on your ideology?

**Answer:** Sometimes compromise is not bad. Sometimes absolute power creates problems. There is an old saying that power corrupts and absolute power corrupts absolutely.

**Question:** Don't you think that most national political parties are getting marginalised? Rather, people are looking up to industrialists and entrepreneurs.

**Answer:** I would not put this as marginalisation of politicians or political system. I would put it as the recognition of other sections. Earlier it was monopolised by politicians only. Now there are other sections of the society-industry, sports, academics, judiciary-which are important too. They too have roles to play.

**Question:** Your 1991-96 economic policies and the present ones are almost the same. But you lost the election then.

**Answer:** Compare my Budget of 1982 with Manmohan Singh's Budget of

1991. The policies which I proposed were almost the same but Indian industry strongly resisted my proposal for NRI portfolio investment. In 1991 it was welcomed because conditions had changed.

**Question:** In the reforms process, you have not been able to fulfill certain things like FDI in telecom and insurance. Labour reforms are also stuck. Is it because of coalition compulsions?

**Answer:** We have done whatever was possible through the administrative route. But where you require legislative support, you need the backing of others.

**Question:** Has the Left been more of a hindrance than an asset for you?

**Answer:** No, not at all. We are getting the support of all their 60 members solidly.

**Question:** But you are paying a price for it.

**Answer:** For everything, you have to pay a price. You are not running a single-party government.

**Question:** You have always been the number one minister. Weren't you upset when Manmohan Singh, whom you once appointed as RBI governor, became prime minister?

**Answer:** I am neither number one nor number two. I am just one of them.

**Question:** Don't you have prime ministerial ambitions?

**Answer:** Thank you for coming.

**265. Statement of External Affairs Minister Pranab Mukherjee on arrival in Islamabad.**

**Islamabad, January 13, 2007.**

I am happy to be here and this is my first visit to Islamabad. I am carrying the letter from Prime Minister Manmohan Singh inviting H.E Prime Minister Shaukat Aziz to attend the 14th SAARC Summit scheduled to be held in Delhi on 3rd and 4th April of this year. I would also extend invitation to H.E Foreign Minister Kasuri to attend the 28th SAARC Council of Ministers Meeting which would be preceding the Summit. I would also like to take the opportunity of calling on H.E President, Prime Minister and I will have discussions with my colleague H.E Foreign Minister of Pakistan. Naturally, matters of mutual interest and our bilateral relations will be discussed. We have made reasonable progress in three rounds of composite dialogue which is going on between India and Pakistan at the level of the Foreign Secretary, the last in November. The review of the third round of composite dialogue took place and it ended on a positive note. During my visit, I would also like to share the perception of the leaders of Pakistan on these issues. One point that I would like to emphasise, and would like to ensure, is that we are seeking the cooperation of all SAARC partner countries that the 14th Summit of SAARC should give a clear signal for removing the barriers and improving the connectivity in the subcontinent to ensure free flow of trade, commerce, goods, people and ideas. I strongly believe that this region has tremendous potential in building up its economy and if we can effectively operationalise SAFTA, it would be beneficial to each member country belonging to SAARC which is now an extended family, in the sense, that Afghanistan would be joining the Summit as the 8th member and, in addition, there will be Observers from Japan, USA and UK.

Thank you for the time.

**266. Joint Press Interaction of External Affairs Minister Pranab Mukherjee with Foreign Minister of Pakistan Khurshid Mahmood Kasuri during his visit to Islamabad.**

**Islamabad, January 14, 2007.**

**Mr. Khurshid Mahmood Kasuri:** It gives me great pleasure to welcome the Indian Foreign Minister Pranab Mukherjee and giving me an opportunity to reciprocate the hospitality that he showed to me and my wife during my private visit to Delhi. Today, we had a long and productive session; first we had a one to one; then we had informal delegation level discussion and a short formal session in which the Excellency handed over to me an invitation.

It is great pleasure to receive Mr. Pranab Mukherjee in Pakistan. We had useful exchange of views in cordial and constructive atmosphere. H.E Mr. Pranab Mukherjee's visit has provided a good opportunity to review the status of our bilateral relations. It is matter of satisfaction to note the overall improvement in relations between the two countries. Mr. Pranab Mukherjee called on the President and the Prime Minister of Pakistan. He also delivered letters to the Prime Minister and myself to attended the 14th SAARC Summit to be held in New Delhi. We reviewed the progress on all issues on the agenda of composite dialogue framework. We also took certain decisions. I would request H.E Mr. Pranab Mukherjee to read out these decisions for you.

**Mr. Pranab Mukherjee:** I would like to express my gratitude for extending very warm hospitality to me and to the members of my delegation. I would also like to apologize to all of you ladies and gentlemen for keeping you waiting for quite some time but this speaks that we had engaged in discussions. I had the privilege of calling on the President and the Prime Minister. I handed over the letter of our Prime Minister Dr Manmohan Singh to Prime Minister Shaukat Aziz, inviting him to attend the 14th SAARC Summit scheduled to be held in Delhi on 3rd and 4th April. I also had the opportunity of handing over invitation to H.E Foreign Minister Kasuri to attend the SAARC Council of Ministers meeting as it will be 14th SAARC Summit meeting and it would be 28th SAARC Council of Ministers meeting scheduled to be held one day before the Summit begins. We had a very fruitful and useful discussion. It was held in the most cordial atmosphere. We exchanged our views freely and frankly. As I have told you of having the privilege of calling on the President and the Prime Minister. Both of them received me very warmly. Since my arrival in Islamabad, though it is

my first visit, I never had the feeling that I was outside of my atmosphere or place, the hospitality is such. As he mentioned that we had the privilege of reviewing the Composite Dialogue. The review took place in Delhi last year when the two Foreign Secretaries met in last November. We also had detailed review and after detailed discussion on certain issues, we have come to certain decisions which I am reading for you:

- U I have invited the Foreign Minister to come to Delhi in connection with the meeting of Joint Commission which will be held in New Delhi in February 2007. Foreign Minister has kindly accepted my invitation. This is not related to SAARC.
- U We agreed to establish a committee on prisoners comprising retired judges of the superior judiciary to visit jails in the two countries and propose steps to ensure humane treatment and expedite release of prisoners who have complete their prison terms.
- U We have agreed to expedite the Liberalization of the Visa Regime and agreed to complete the work in February 2007.
- U Several agreements which are near or close to finalization will be concluded during the February visit of Foreign Minister Kasuri. These will include: a) The Agreement on Reducing the Risk from Accidents relating to Nuclear Weapons etc., b) Speedy return of inadvertent Line Crossers, c) Prevention of incidents at Sea.
- U On Siachen, we discussed the issue and decided that the officials will meet at an early date to address the issue.
- U We agreed to facilitate movement of diplomats to Noida and Gurgaun in India and Taxila and Hasan Abdal in Pakistan. Procedures for this will be worked out.
- U We agreed that the first meeting of the Joint Anti-terrorism Mechanism takes place before end of March 2007.
- U Regarding Sir Creek, the officials concerned will be directed to expedite their work. The joint survey of Sir Creek will begin on 15th January 2007.
- U We have decided to launch the Fourth Round of Composite Dialogue (and that) would be held on 13-14 March, 2007.

Once again, I take this opportunity for thanking Kasuri for extending hospitality to me and the members of delegation.

**Question:** Will India fulfill its commitment in handing over Jinnah House to Pakistan? How close you are after today's discussion on an agreement on Siachen?

**Mr. Pranab Mukherjee:** I am fully aware of the sentiments of the people of Pakistan in regard to Jinnah House. I respect the sentiments. We are fully aware of the issue and we will resolve the issue as expeditiously as possible. In response to your second question, we have discussed this issue several times, discussions have taken place. It would be difficult for me to give you the exact time frame but we have decided to instruct the official concerned to expedite the process.

**Question:** There is a general perception that if there is forward movement on Joint Mechanism on Terror, this will facilitate Premier Manmohan Singh to visit your country? How optimistic are you? If there is no support of the people, it becomes difficult to take it forward.

**Mr. Khurshid Kasuri:** I disagree with you. If the people did not support the peace process, it would have finished long ago. If there have been bomb blasts in India and Pakistan, accusing fingers have been pointed at each other. My own impression is that there is a strong support for the peace process notwithstanding the reservation the people in both countries have regarding each other. And that is the reason why we are going to launch the Fourth round of Pak-India composite dialogue. Regarding the anti-terror mechanism, this is in the interest of both the countries; Pakistan and India have suffered at the hands of terrorists. India has been voicing its concerns regarding certain people. We have also been voicing our concerns regarding certain regions and the people. We do not wish to queer the pitch or the atmosphere by going into the details. It is to say, we recognize India's sensitivities and hopefully India recognizes our sensitivities. If we are not serious, the President of Pakistan and the Prime Minister of India would not have agreed to the creation of Joint anti-terror mechanism in Havana. And if we were not serious, we would not have fixed the date for first meeting of anti-terror mechanism meeting.

**Mr. Pranab Mukherjee:** I will start from what my friend H.E. Foreign Minister has said that the very establishment of anti-terror mechanism is the outcome of the joint statement issued by Prime Minister Dr Manmohan Singh and the President Musharraf at Havana. Thereafter at the Foreign Secretary

level meeting in Delhi in November, the actual composition and the institution was worked out. Now we have decided and giving them a date by which they have to meet. Surely, when they will meet, they will work out the mechanism and we have decided to make this experiment fruitful so that this become an effective instrument to combat terrorism. Terrorism is friend of nobody and it is the biggest menace in the post- Cold War era and most of the countries recognize that it requires strong determination to combat terrorism and concerted efforts of the international community as a whole. Prime Minister has accepted the invitation and a suitable date will be fixed mutually through the diplomatic channels.

**Question:** Prime Minister desired friendship with Pakistan. Do you think without solution of Kashmir, there can be lasting friendship between the two countries?

**Mr. Pranab Mukherjee:** To have enduring peace and friendship between Pakistan and India is absolutely necessary. Of course, there are issues which ought to be resolved. And serious efforts are to be made to resolve these issues. The composite dialogue is leading towards resolving the issues. I do not think these two ideas are contradictory to each other rather they are complementary to each other. Problem resolution and institutional arrangements of ensuring peace are the two sides of the same coin and we are trying to attempt that<sup>1</sup>.

**Question:** Time frame for Kashmir problem.... Musharraf proposals....?

1. On January 14 External Affairs Minister met some leaders of Pakistan for an informal breakfast meeting where he told them that the borders were not up for negotiations. But India was prepared to discuss all ideas towards the resolution of the Kashmir issue. He said India and Pakistan must learn from Europe that had set aside differences to forge a successful economic union. The Pakistani leaders expressed support for the peace process but wanted speedier progress on the resolution of the Kashmir dispute. Mr. Mukherjee's response was that if Europe could have put the bitterness of war behind for economic and trade cooperation in the European Union, he was hopeful that India and Pakistan would also resolve their differences for an enduring peace. He emphasized that India was in favour of a step-by-step approach to the resolution of the longstanding issues including Kashmir. EAM also gave the example of cooperation between the two countries in the aftermath of the 2005 earthquake and said that such cooperation should become routine. Responding to the question on the Musharraf proposals on Kashmir Mr. Mukherjee reiterated Prime Minister Manmohan Singh's statement that India was ready to consider all ideas but there would be no change in the borders. Those present at the meeting were: President of the ruling Muslim League (Quaid) Chaudhary Shujaat Hussain, Leader of the Opposition and head of the Jamaat-e-Ulema Islami Maulana Fazlur Rehman, Parliamentary leader of the Pakistan People's Party Makhudum Amin Fahim, President of the Awami National Party Asfandyar Wali Khan, and deputy convener of the Muttahida Qaumi Movement Farooq Sattar.

**Mr. Pranab Mukherjee:** You have answered your own questions when you referred that problem is existing for the last 60 years. In these 60 years, several attempts have been made starting from Simla agreement in 1972 to latest Havana declaration by the statesmen of the two countries. Unfortunately, we have not been able to resolve this issue. It is difficult to give a time frame because talks are going on. In respect of the proposals of President Musharraf, you have read the response given by the Prime Minister Dr Manmohan Singh that all these issues should be discussed and we are ready to consider each and every idea to find a solution.

**Mr. Khurshid Kasuri:** In addition to what H.E. has said, we have never in the past 60 years, have such a sustained discussion on Jammu and Kashmir as we have this time. And it is no secret that it is being discussed at various levels. The very fact that the Prime Minister of India made those positive statements should be a reflection the way this matter is progressing.

**Question:** Musharraf said there should be joint control. What is India's reaction? Mr Kasuri, can you give us more details about your discussion on Siachen?

**Mr. Pranab Mukherjee:** So far my response to first question is concerned; I have already mentioned that the Prime Minister has given his views in Amritsar. Any idea of resolving the issues could be considered, examined and an attempt to be made to find a solution.

**Mr. Khurshid Kasuri:** On Siachen, let me say here although I was accused by media both in India and Pakistan of being overly enthusiastic, I will repeat what I have said there. Given the political will, it can be resolved in days. Lot of work has been done. H.E. Mukherjee and I are aware what work has been done. Today, we had a discussion and we agreed that the officials meet early. Some things are there I cannot go into details publicly. I told him that if the intention was to find where the troops were, we could find means and ways to meet India's concerns. But we have to go and let the officials meet. Their meeting is necessary for a comprehensive plan (that) Foreign Secretary of Pakistan handed over to India during his last visit. That is a package. It does meet the concerns of the two sides. Package in our opinion takes into consideration the concerns of the two sides. Today, we reviewed that. If India's concerns are where the troops are, means and ways can be found.

**Question:** ISI sponsoring the insurgency...?

**Mr. Pranab Mukherjee:** It is the responsibility of any government to take

appropriate steps to prevent insurgency and the government of India is doing the same. So far the involvement of certain agencies are concerned, we are aware of it and we have brought it to the notice of appropriate authorities.

**267. Press Release of the Ministry of External Affairs on the award of the neutral expert Prof. Raymond Lafitte on the design of the Baglihar Dam.**

**New Delhi, February 12, 2007.**

1. The overall design of the Baglihar dam being built by India on the Chenab as a run-of-river plant has been upheld by Prof. Raymond Lafitte, the Neutral Expert (NE) appointed by the World Bank to consider Pakistan's objections to the Baglihar project, in his decision delivered today in Berne to the representatives of India and Pakistan.
2. The NE has emphasized the need to incorporate state of the art technology for projects built under the Indus Waters Treaty for reasons of safety and optimum utilization of the waters. He declares that "the general rules of treaty interpretation allow him to have recourse to rules of science and technology and the state of the art practices, in his assessment of the concept and design of the Baglihar Dam and Hydro Electric Plant".
3. The decision of the NE recognizes India's right to utilize the waters of the Western Rivers more effectively, within the ambit of the Treaty, for power generation.
4. This is the first time since the signing of the Indus Waters Treaty 1960 that a Neutral Expert has been appointed. Pakistan's request made on 15th January, 2005 raised a number of Points of Difference for Expert Determination in respect of the design of the Project on the basis that certain features of the design did not conform to criteria specified in the Treaty. Pakistan contended, inter alia, that conditions at the Baglihar site did not require a gated spillway; that the spillway gates were not at the highest level; Indian calculations of the design flood and the height of the dam (Freeboard) were excessive; India's calculation of the required Pondage of 37. 5. MCM was also too high as the correct Pondage

should be 6.22 MCM; and that the level of intakes for the Power Plant were not at the highest level as required by the Treaty.

5. After consulting the Governments of India and Pakistan, the World Bank appointed Mr. Raymond Lafitte, Professor at the Federal Institute of Technology of Lausanne, Switzerland as the Neutral Expert (NE) on 10th May, 2005.
6. During the 18 months period after his appointment, the NE held 5 meetings - in Paris, Geneva, London, Paris & Washington and also visited the Baglihar site and its hydraulic model at Roorkee. The Parties made written and oral submissions during the course of the Expert Determination.
7. The NE after a detailed analysis of a data base of about 13000 dams from the International Commission on Large Dams (ICOLD)'s World Register of Dams to analyse the type of spillway, gated or ungated, and a historical review of construction of large orifice outlets as well as a consideration of ICOLD guidelines, held that the site conditions at Baglihar require a gated spillway, and also held that in view of the high flood discharges and heavy silt loads, India's design of gated spillways - both chute (surface) spillway and sluice spillways, as well as the number, size and location of their gates for the Baglihar dam complies with the design criteria set out in Annexure D of the Indus Waters Treaty.
8. This important element in the NE's Determination will deeply influence all future interpretations of the Indus Waters Treaty. The NE has observed that the present day state of scientific and technical knowledge with advances in technology in dam design, not known or developed in 1960, can and should be utilized in dealing with problems such as those posed by heavy sediment which shorten the effective life of a plant. He is of the view that the reference in the Treaty to conceptual notions such as the need to ensure "satisfactory construction and operation", "sound and economical design" and "customary and accepted practice of design" clearly not only permit but require use of latest technology. The NE has adopted the principle of effective interpretation which gives full effect to the rights and obligations provided by the Treaty, taking into account its object and purpose set out in the Preamble which is "attaining the most complete and satisfactory utilization of the waters of the Indus System of rivers".

9. The NE accepts and regards as prudent India's calculation of the design flood of 16,500 cumec (as against Pakistan's figure of 14,900 cumec) in view of the uncertainties of flood analysis, possibilities of climate change etc.
10. The NE observes that the designer of a spillway is not only faced with the problem of flood control but also with that of sediment control and cites the "ICOLD" to note that the state of the art is today that "Bottom outlets may be used for under sluicing of floods, emptying of reservoirs, sluicing of sediments and preventing sediment from entering intakes etc."
11. Accordingly, India's design of sluice spillway at Baglihar with five outlets is regarded as appropriate and permissible under the Treaty for sediment control of the reservoir and evacuation of a large part of the design flood and being in conformity with the international practice and the state of the art. This decision will help India to deal more effectively with the problems of sedimentation in its future projects as the NE has confirmed India's design of large bottom outlets (sluice spillway) as the most important technique to be employed in managing the high volumes of sediment which characterise the Himalayan Rivers. Incidentally, this had been an element of strenuous objection and India, in the course of the Expert Determination, constantly maintained that India's design to deal with sedimentation problems by modern methods does not in any way interfere with the flow of waters of the Chenab River into Pakistan as required by the Treaty.
12. Based on the guidelines of ICOLD, the NE considers that the freeboard could be reduced by 1.5 metres. In this context, it is to be noted that India, in the spirit of good neighbourly relations, had offered possible reduction of freeboard to Pakistan even before the process of Expert Determination had started.
13. According to the NE, the first objective of "Pondage" is to regulate the flow of the river to meet the consumer demand. He considers that "Pondage" volume should be calculated taking into account only the variations in the load thus confirming the methodology adopted by India for calculation of Pondage. He disagrees with Pakistan's method of determination of "Pondage" i.e. with the objective of operating the plant at constant power and regulating the fluctuations in the river flow. The NE has recognized the uncertainties in

projecting future load variations. He has arrived at a slightly lower value of 32.56 Million Cubic Metre (MCM) of maximum permissible "Pondage" as against India's design of 37.50 MCM. The NE has arrived at the lower value as he adopted a daily pattern of power generation which is slightly different from that adopted by India. As a result, there will be a minor change in the schedule of peak power generation. However, the number of hours of power generation per week would remain at about 49 hours as designed by India. According to Pakistan's calculations, the maximum "Pondage" allowed was 6.22 MCM.

14. Another Point of Difference raised by Pakistan was regarding the elevation of Intakes for the Turbines for the Plant. The Treaty requires these to be located at the highest level, consistent with satisfactory and economical construction and operation of the Plant and with customary and accepted practice of design for the designated range of the Plant's operation. Pakistan had suggested that provision of anti-vortex devices could raise the intake levels by about 7 metres from that designed by India. According to the NE, the normal practice is to go in for an appropriate arrangement of the intake structure. In particular cases where this is not possible for technical or economic reasons, then recourse could be taken to anti-vortex devices. The NE has also observed that the intakes should be so located as to avoid asymmetrical flow of water towards them. From his application of well known semi-empirical formulae, the NE considers that it is necessary to raise the power intakes by 2 metres and an additional 1 metre to allow for the slight reduction in "Pondage". While the Indian designers of the project do not agree with the NE's approach, as it reduces the water seal by 2 metres, no difficulty is expected in incorporating this change in the design of the Baglihar Plant.
15. The three elements of design which require marginal changes, i.e. reductions in freeboard and Pondage and increase in the height of the Intakes, all arise from calculations and not from basic principles.
16. The NE's Final Determination confirms that India's design has been compliant with the basic principles of the Indus Waters Treaty.

## **268. Briefing by Official Spokesperson on the blasts in Delhi-Attari Express train.**

**New Delhi, February 19, 2007.**

**Official Spokesperson:** Good afternoon everybody. We have a statement, some of which has already been conveyed to you earlier on during the day, but to put it all together...

"Government of India strongly condemns the blasts in Train No. 4001 Delhi-Attari Express (link train of Samjhauta Express) at around mid-night of 18-19 February 2007. Two of the 16 coaches caught fire. At least 64 people were killed in the fire and several others injured. The cause of the fire is being investigated. Our immediate priority is to deal with the humanitarian consequences of the tragedy. The injured have been taken to hospitals in Panipat and in Delhi. The dead include a number of Pakistanis, many of them burnt beyond recognition. They are being identified with the help of the Pakistani authorities. A team of officials from Pakistan High Commission in New Delhi is on its way, and possibly already there now in Panipat.

The passport numbers of the passengers in the unreserved coaches affected by the explosions have been sent to Pakistani authorities for assistance in identification of the dead.

Visas will be issued to relatives of the dead and injured by the High Commission of India in Islamabad, which will set up a visa camp in Lahore for this purpose. We will also arrange for their travel from Attari/Wagah to Panipat and to Delhi. Two officials from Pakistan Railways are also expected to come to Attari to assist the passengers who have by now reached Attari.

We convey our heartfelt condolences to the victims of this gruesome tragedy. Government will make every effort to bring to justice the perpetrators of this heinous act."

As you can see this is a developing situation and we may have updates later, which we will keep giving you. I am not really in a position to take too many questions after what I have said.

**Question:** Are you seeing it as a terrorist attack? Are you calling it a terrorist attack?

**Official Spokesperson:** Well there has been an explosion and it has resulted in a gruesome tragedy. I think you do not need any more classifications.

**Question:** How many of them are Pakistani nationals?

**Official Spokesperson:** Unfortunately, we do not have that break up. It is very difficult to ascertain, the entire process is being carried out in cooperation with Pakistani authorities. We have supplied the passport numbers of the passengers who were in the affected bogies. There are attempts to try and identify the bodies.

**Question:** Were both bogies unreserved?

**Official Spokesperson:** So I understand, but I am subject to correction. You might like to also check with Railway authorities.

**Question:** Has there been any change in schedule as far as Mr. Kasuri's visit is concerned?

**Official Spokesperson:** Well for that we are putting up a separate press release. I can tell you that the visit takes place from 20 to 23 February 2007 for the fifth meeting of the India-Pakistan Joint Commission which will be held on the 21st February 2007. As far as the Joint Commission is concerned, six of the eight technical-level Joint Working Groups have already met on 2006. The remaining two, Education and Information, will meet on 20 February 2007. An Agreement on "Reducing the Risk from Accidents relating to Nuclear Weapons" will also be signed between the two countries on 21 February 2007.

**Question:** Have there been any contacts with the Pakistani authorities? Has Mr. Menon spoken to his counterpart?

**Official Spokesperson:** I am not aware of any such contact. I do know that at the operational level, Pakistani High Commission officials were facilitated in travelling to Panipat.

**Question:** How many of them travelled?

**Official Spokesperson:** Four, I understand, from your own channels.

**Question:** Mr. Sarna, the Pakistani Foreign Office spokesperson Tasnim

Aslam has said that it was up to Indian authorities to provide security on this train to their passengers. Any response to that<sup>1</sup>?

**Official Spokesperson:** I do not think this is the time for searching for headlines and I am not even sure as to whether your quotation is quite correct. It is a tremendous humanitarian tragedy. Let us keep our eye on that, let us try and bring succour to those who are injured and to the kin of those who are dead.  
Thank you.

**269. Press Release of the Ministry of External Affairs on the phone call received by Prime Minister Dr. Manmohan Singh from Pakistani Prime Minister Shaukat Aziz on the bomb blast on the Samjhauta Express train.**

**New Delhi, February 19, 2007.**

The Prime Minister received a phone call from Prime Minister Shaukat Aziz of Pakistan this evening in connection with the bomb blast on the Samjhauta Express late last night soon after it left Delhi. The Prime Minister declared India's abhorrence for this heinous terrorist act and reaffirmed our commitment to doing everything possible to ensure that its perpetrators are punished. The focus at this time is on the humanitarian aspect; the Prime Minister conveyed his condolences for the Pakistani victims of this tragedy, and indicated the steps taken to provide all possible assistance for the injured and bereaved<sup>1</sup>.

---

1. While India promised Pakistan full investigations into the incident and even offered to share the findings with Pakistan, the Pakistan National Assembly passed a resolution asking for a joint investigation. External Affairs Minister Pranab Mukherjee on February 21 ruled out a joint investigation. Addressing a joint press conference with Pakistan Foreign Minister Khursheed Mehmood Kasuri, he said, "as per the law of the land, the probe will be conducted by India and the results shared with Pakistan." Reiterating India's promise that the Sunday carnage perpetrators would be brought to book, he said the "basic objective" of the anti-terror mechanism, scheduled to meet in Islamabad on March 6, was to both share and act on the information passed on between the two nations. He hoped that meeting would be "meaningful." Describing the blasts as a "horrendous tragedy," Mr. Kasuri said the incident underlined the need for cooperation between Islamabad and New Delhi. He confirmed that the results of the Indian probe into the Samjhauta Express attack would be shared with Pakistan on March 6.

**270. Press Release of the Ministry of External Affairs on the Areas identified for cooperation by Joint Working Groups of the India-Pakistan Joint Commission.**

**New Delhi, February 21, 2007.**

- U The working group on Environment has discussed the decline in Vulture population; conservation of Migratory Water Birds; Clean Development Mechanism; cooperation in establishing Botanical Gardens in Pakistan; sharing of experience in Desert Afforestation; Environment Protection and conservation & efficient use of energy resources.
- U The working group on Science & Technology discussed the subjects of medicinal plants, herbal medicines, Biotechnology, Renewable Sources of Energy and popularization of science. Probable ways of cooperation agreed included Joint workshops, seminars, exploratory visits, training and collaborative research.
- U Under Tourism possible areas for cooperation identified are Human Resource development in tourism sector, exchange of statistics/promotional material, familiarization tours by travel agents & tour operators and the role of public-private partnership.
- U The working group on Agriculture discussed the subjects of production of quality seeds, agricultural research and quarantine issues concerning trade in livestock/meat.
- U Discussions in the working group on Health covered the areas of Control of polio, management of Avian Influenza, public-private partnership in healthcare and family welfare, health related Intellectual Property Rights, Capacity Building in health sector, administrative structures relating to drugs and pharmaceuticals in the two countries and traditional systems of medicine.
- U Possible areas for cooperation identified by the group on IT & Telecommunications included Telecom policy, e-governance, IT education & training, telemedicine and IT-enabled services.
- U The issues discussed by the working group on Education included cooperation in higher education sector in various fields, institutional linkages between University Grants Commission and HEC of Pakistan, exchange of printed material relating to educational

development, sharing of experiences by NCERT & National Book Trust of India and National Book Foundation of Pakistan and exchange of expertise in the field of elementary, secondary and adult education.

- U The working group on Information discussed issues concerning participation in seminars by journalists, media coverage of historical and religious events in the two countries, combating piracy of films, music and channel contents and exchange of radio, television programmes and films.

**271. Joint Press Interaction by External Affairs Minister Pranab Mukherjee and Minister of Foreign Affairs of Pakistan Khurshid Mehmood Kasuri.**

**New Delhi, February 21, 2007.**

**External Affairs Minister (Shri Pranab Mukherjee) :** Good afternoon. I would like to once again welcome His Excellency the Minister of Foreign Affairs of Pakistan and his distinguished delegation who are visiting India for the 5th meeting of the India-Pakistan Joint Commission, which concluded a little while ago. As you know, this meeting took place two days after a gruesome tragedy that struck the Delhi-Attari express that links up with the Samjhauta Express. We strongly condemn the blasts in which at least 68 innocent lives were lost and several other persons were injured. We convey our heartfelt condolences to the victims. All efforts are being made to identify the dead bodies and to give succour to the bereaved families. Government of India will make every effort to bring to justice the perpetrators of this heinous act.

The holding of the Joint Commission meeting as scheduled is a reaffirmation of the commitment of both India and Pakistan to the dialogue process. At its 4th meeting in October 2005, the Joint Commission had constituted 8 technical level Joint Working Groups on Agriculture, Health, Science & Technology, Information, Environment, Tourism, Education, and I.T. & Telecommunications. Six of these Working Groups had met in 2006 and the remaining two, on Education and Information, met yesterday. We complimented the leaders of the Working Groups from both sides for their commendable effort in identifying areas of cooperation. Their reports were

presented at the Joint Commission and discussed. A summary of the deliberations of the Working Groups is being circulated separately. I am confident that the Joint Commission's deliberations will lead to greater bilateral cooperation and provide a structural basis for improving the relations between our two countries.

In addition to discussions under the Joint Commission, you have also witnessed the signing this morning of the Agreement between India and Pakistan on "Reducing the Risk from Accidents Relating to Nuclear Weapons".

In my meeting with the Foreign Minister of Pakistan, we also reviewed the progress in our bilateral relations since we last met in Islamabad on 13 January 2007. We are happy to note that the joint survey of Sir Creek is progressing smoothly and that the Thar Express resumed service on 17 February. We hope that the meeting of the Joint Anti-Terror Mechanism in Islamabad on 6 March will be meaningful and the fourth round of the Composite Dialogue to be launched by the Foreign Secretaries in Islamabad on 13-14 March will promote bilateral relations further.

Today, I have also handed over to my distinguished guest, the Pakistan Foreign Minister, a list of the relatives of Indian Prisoners of War who would like to visit Pakistan in April 2007. You would recall that Pakistan had agreed to receive them during my visit to Islamabad last month.

May I now invite my distinguished guest, Foreign Minister Kasuri, to make a brief statement after which we can take a few questions. Thank you, ladies and gentlemen.

**Minister of Foreign Affairs of Pakistan (Shri Khurshid Mehmood Kausri):** Thank you, Excellency.

First of all, I would like to thank my colleague His Excellency the External Affairs Minister and also the Government of India for the hospitality that my delegation and I have received since our arrival here. Unfortunately, our arrival and the meeting of the Joint Commission were preceded by that horrendous tragedy that struck passengers who were traveling from Delhi to Attari on their way to Lahore. There are no words strong enough to condemn this act of heinous crime. Of course, it has underlined the need for cooperation further more. I have no doubt that the meeting of the anti-terror mechanism which is supposed to meet in Islamabad will take cognizance of this. The Prime Minister of India in a telephone call to the

Prime Minister of Pakistan had said that he would share the results of the investigations and I am sure that when the anti-terror mechanism meets in Islamabad, this will be a very high item on their agenda. Our hearts go out to those who suffered and the relatives of those who died.

I would like to take this opportunity to place on record our appreciation for the services of the doctors. I personally visited the hospital yesterday and the doctors were really taking very good care of the patients. Unfortunately, one of those people died yesterday and another one is in a very critical condition. I would simply say that the Government of Pakistan has made all the arrangements for the relatives to travel here and the Government of India has promised and is extending support to those who would like to come here to either identify the dead bodies or to meet with those who are injured. The Government of Pakistan has also arranged for those people who have been grievously injured – actually some people have 40 per cent burns on their bodies – and we made arrangements for those who can travel to be taken to Pakistan.

As you know, the purpose of this meeting was to attend this Joint Commission – this is the fifth one. This is another sign of increasing cooperation between Pakistan and India. We examined the possibilities of cooperation in the areas of Education, Information, IT and Telecom, Health, Agriculture, Tourism, Science and Technology, and Environment. I am happy to say that the co-chairs of these various groups were able to identify areas of cooperation. I suggested that for the next meeting of the Commission, these meetings should have taken place much earlier so that when my colleague and I meet we can witness greater progress. Considering the devotion of the co-chairs and other members, I feel that that will be the case.

I did utilize this opportunity to discuss other matters with my distinguished colleague. You remember that when we were in Islamabad we had agreed to various measures. One of those was regarding the conditions of prisoners. We tried to rise above our partisan considerations today purely from the point of view of human right because it really is very important that we address the issue of human rights. Last time, when His Excellency Mr. Pranab Mukherjee was in Islamabad I had suggested, in fact he had agreed, that we would nominate retired judges of supreme judiciary so that they have the capacity and the training to rise above all considerations and only think in humanitarian terms. I have handed over the names of four judges from Pakistan to my distinguished colleague today, who also has some

names in his mind. In fact he was telling me that it is only a matter of a few days, he has been working on it the way I was working on this.

Once this is done by both the sides, I think, that will be one major step by Pakistan and India to think at a higher level. Regardless of whether the prisoner is a Pakistani or an Indian, in the first instance he is a human being. There are certain norms to which all human beings are entitled and I think the bringing in of the judges of the higher judiciary in both Pakistan and India will definitely provide relief to prisoners, whether they are undertrials, because the judges will be allowed to visit prisons in each other's country or to help facilitate the early release of those who have completed their sentences.

We discussed many other matters when we were alone. The purpose is to further the peace process. Thank you very much for providing me with this opportunity. I look forward to the interaction with you<sup>1</sup>. Thank you.

**Indian Media (Ms. Nidhi Razdan, NDTV):** Mr. Kasuri, yesterday the Pakistan National Assembly passed a resolution asking for a joint

---

1. The Pakistan Foreign Office issued the following press release on the statement of Mr. Kasuri:

"The Foreign Minister thanked the Minister for External Affairs for the warm hospitality given to his delegation during their visit to India . He also reciprocated the External Affairs Minister's comments on the Samjhauta Express blast calling it a heinous crime in which both Pakistanis and Indians were victims. The Foreign Minister stated that the Samjhauta Express terrorist attack would be on the agenda of the Joint Anti-Terror Meeting scheduled to be held in Islamabad on 6 March. The Foreign Minister appreciated the assistance provided by the Indian Government in facilitating the relatives of the victims of the terrorist attacks to visit India in order to identify the bodies as well as to be with the injured. He also placed on record the appreciation of the Government of Pakistan for the services provided by the doctors in the Indian hospitals where Pakistani victims were being treated for extensive burns and injuries. Referring to the Fifth Joint Commission meeting, the Foreign Minister stated that it was evident of the increasing cooperation between Pakistan and India. He said the co-chairs of the eight sub-Groups of the Joint Commission were able to identify areas of cooperation in the fields of agriculture, environment, education, health, information technology, information, science and technology, and tourism. The Foreign Minister pointed out that the subsequent meetings of the sub-Groups should take place well before the next Joint Commission meeting as back-to-back meetings did not achieve the desired objectives. Referring to the one-to-one meeting that the two Foreign Ministers had, the Foreign Minister said that among other issues, he also discussed the release of prisoners who have completed their sentences. The Foreign Minister pointed out that this was a humanitarian issue and as had been agreed during the visit of External Affairs Minister Pranab Mukherjee to Islamabad, a committee of retired Judges would be set up. The Foreign Minister said that he had handed over names of four Judges to the External Affairs Minister and hoped that India would also reciprocate soon."

The Spokesperson of the Pakistani Foreign Office in her briefing in Islamabad on February

investigation into this blast on the train. Did you formally request India for a joint investigation today? Mr. Mukherjee, did India share whatever leads our investigators already have with the Pakistani delegation today?

**Minister of Foreign Affairs of Pakistan:** As I have already said in my opening remarks, the Prime Minister of India spoke to the Prime Minister of Pakistan and assured him that the results of the investigation will be shared. The Joint Mechanism is meeting in Islamabad on 6th March and I have no doubt that they will take cognizance of this. I think I would rest my case and let my colleague answer the rest of the question.

---

26 when asked whether India was willing to share with Pakistan any information on the Samjhota train tragedy, the Spokesperson said: "We assume that India is conducting investigations. We have been assured by the Indian Prime Minister first in his telephone call to our Prime Minister and subsequently when our Foreign Minister met him in New Delhi that he was determined to go to the bottom of this terrorist attack and that India would share the results of the investigations with Pakistan.

Addressing presspersons on February 21 Mr. Mukherjee confirmed that "various proposals" on resolving the Siachen dispute were received from Pakistan and these were being considered by New Delhi. "We are ready to discuss each and every proposal. Various suggestions will be considered." In his talks with Mr. Kasuri, Mr. Mukherjee said he reviewed the progress in bilateral relations since the two last met in Islamabad on January 13. "We are happy to note that the joint survey of Sir Creek is progressing smoothly and that the Thar Express resumed service on February 17." Mr. Mukherjee revealed that he had handed over to his Pakistani counterpart a list of relatives of Indian prisoners of war who wished to travel to Pakistan in April. "You would recall that during my visit to Islamabad last month Pakistan agreed to receive them," said EAM. On his part, Mr. Kasuri said he had provided a list of four retired judges of the Pakistani Supreme Court, which would be part of a bilateral committee to visit jails and prisoners on either side of the border. According to him, Mr. Mukherjee too was looking into the matter and would present India's list of retired Supreme Court judges soon. Mr. Kasuri said members of the higher judiciary would definitely help in providing relief to India-Pakistan prisoners, be they undertrials or convicts. "This will help facilitate the early release of those who have completed their sentences," he said, stressing that this was an issue of human rights, which required rising above partisan considerations. Mr. Kasuri said all aspects of the composite dialogue process came up for discussion with Mr. Mukherjee, which included Kashmir, Siachen and Sir Creek. To sustain the peace process, maximum protection would have to be provided to travellers between Pakistan and India. Mr. Kasuri said he had proposed to Mr. Mukherjee that railway officials of the two countries should meet to interact with each other since a majority of those who visited India and Pakistan used the train service. This, he felt, was necessary to learn from Sunday's train tragedy and prevent such incidents in either country. On introducing a new tourist visa category, Mr. Mukherjee said this issue was under discussion between the two countries. According to him, a draft agreement had been received from Pakistan and was being examined by India. "We want to liberalise the visa [regime] and encourage tourism."

Expressing satisfaction with the joint commission meeting, Mr. Mukherjee said eight technical and joint working groups on agriculture, health, science and technology, information, environment, tourism, education and information technology had met.

**External Affairs Minister:** In fact, as per the law of the land the investigation is to be carried on by India. We will carry on the investigations and, as I have mentioned in my introductory remarks, the perpetrators of this heinous crime will be brought to book. But we have established the Joint Mechanism to deal with terrorism, which is meeting on 6th of March. One of the basic objectives of establishing this institutional mechanism is to share information and to act on that information. Therefore, it is appropriate that by that time whatever information will be available in respect of this case will be shared with the Pakistani authorities as we have shared with them in respect of certain other cases too.

**Pakistani Media (Mr. Liaquat Ali, APP):** My question is addressed to the Indian Foreign Minister. As Indian Prime Minister has on many occasions expressed a desire to make Siachen region as a mountain of peace, Pakistan has given so many proposals to Indian Government, the response from Indian Government is still awaited. What are your comments on this?

**External Affairs Minister:** Various proposals have been received and as Prime Minister Dr. Manmohan Singh responded, all these proposals are being considered and we are ready to discuss each and every proposal. The resumption of dialogue under the Composite Dialogue format is going to start the fourth round of discussion. The process has begun with the Foreign Secretaries level talks last November. Therefore, the various suggestions which are coming will be considered.

**Minister of Foreign Affairs of Pakistan:** Excuse me, there is one decision we had taken last time. I would just like to say that on this issue we have both agreed that DGMOs would meet. This decision was announced in Islamabad. We have suggested certain dates and I spoke to His Excellency about that. As soon as the dates are agreed, we will be very happy for that meeting to take place.

**India Media (Mr. Amit Baruah, *The Hindu*):** My question is to both the Ministers.

One of the issues that is being discussed is to have a tourism visa. But given the scale of what has happened on Sunday, what are the steps that are going to be taken by both Governments to protect the lives of innocent passengers who are using cross-border means of transport?

My question to Mr. Kasuri is what is the occasion for the DGMOs to meet on Siachen given that the Composite Dialogue process is on? What will

the DGMOs be discussing when they talk on Siachen?

**External Affairs Minister:** So far as the question of liberalization of visa including the tourist visa is concerned, we had some discussions during my visit to Islamabad and discussions with the Minister. We have received the draft from Pakistan and we are examining it. We want to liberalize the visa and encourage tourism. The Joint Working Group also made certain recommendations.

In respect of discussions between the DGMOs, as you are aware, we had several rounds of discussions – if I remember correctly, nine rounds of discussions - on Siachen. The discussions have taken place both at the civil and military levels. One round of discussion took place at the military level. It was suggested that our officials will be meeting, and officials include both civil and military, and it was suggested that a meeting will take place between the DGMO of India and at the appropriate level of Pakistan Armed Forces. Dates will be sorted out later.

**Minister of Foreign Affairs of Pakistan:** Let me take the second part first and then I will come to the one on tourists and what we need to do about protecting tourists from each other's countries.

I did, as I said, utilize the opportunity of discussing all aspects of the Composite Dialogue because it would be a pity if we wasted an opportunity. So, we discussed Kashmir, Siachen, and Sir Creek. I do not think I have to add to what His Excellency has said about DGMOs. I think the question is answered. We had agreed to a date. I spoke to His Excellency and we are waiting for India to respond.

You asked me about steps being taken to protect tourists. I agree with you entirely - the spirit of the question is very positive – that if we wish to promote tourism, we will have to take steps to protect tourists from each other's countries. I did suggest to my worthy colleague today that since the Railways is being used as a mass means of communication and it is by far the largest means of communication, maybe we need the railway authorities also to interact with each other - Pakistani Railways and Indian Railways - to learn from this experience and prevent a tragedy of this nature occurring in either country. So, I think a meeting of the Railway officials would be useful. But I am sure that when the anti-terror mechanism meets they will also have an opportunity to look at that. In order to sustain this process, we must ensure that the safety of visitors from each other's countries is to be maximum possible safeguarded.

**Pakistani Media (Mr. Shamim Farooq, PTV):** My question is to Mr. Pranab Mukherjee. Haryana Police Chief says that Lashkar-e-Tayyiba is involved in the Samjhauta Express blast. Similar accusation was made when Bombay blasts occurred but nothing came out later on. Your comments.

**External Affairs Minister:** You know that the investigation is in process and it would not be possible to conjecture anything unless the process is complete. That is why I said that when the anti-terror mechanism meets whatever information will be available till then will be shared with Pakistani authorities.

**272. Agreement between the Islamic Republic of Pakistan and the Republic of India on reducing the risk from accidents relating to nuclear weapons.**

**New Delhi, February 21, 2007.**

**The Government of Islamic Republic of Pakistan and the Government of Republic of India** hereinafter referred to as the Parties:

**Recalling** the Memorandum of Understanding signed at Lahore on 21 February 1999 between the two countries;

**Recognizing** that both Parties have national measures including Command and Control structures to guard against accidents related to nuclear weapons;

**Recognizing** that the nuclear dimension of the security environment of the two countries adds to their responsibility for avoidance of conflict between the two countries;

**Committed** to the objective of global and non-discriminatory nuclear disarmament;

**Conscious** of the need for adopting measures aimed at promoting a stable environment of peace and security between the two countries;

**Have** agreed as follows:-

**Article-1**

Each Party shall maintain and improve, as it deems necessary, existing

national measures including organizational and technical arrangements, to guard against accidents related to nuclear weapons under its control.

#### **Article-2**

The Parties shall notify each other immediately in the event of any accident relating to nuclear weapons, under their respective jurisdiction or control, which could create the risk of a radioactive fallout, with adverse consequences for both sides, or create the risk of an outbreak of a nuclear war between the two countries. In the event of such an accident the Party within whose jurisdiction or control the accident has taken place will immediately take necessary measures to minimize the radiological consequences of such an accident.

The obligation of a Party to notify shall be in respect of only such accidents which may result in an international transboundary release that could be of radiological safety significance or have security implication for the other Party.

#### **Article-3**

In the event of occurrence of an accident of the type referred to in Article-2 of this Agreement:

- (i) Each Party shall act in such a manner as to reduce the possibilities of its actions being misinterpreted by the other Party;
- (ii) In case of likely impact of the accident on the other party, the first Party shall inform the other Party forthwith with relevant information.

#### **Article-4**

The Parties shall make use of the hotline links between the two Foreign Secretaries and DGMOs or any other appropriate communication link as mutually agreed upon between their Governments for transmission of, or request for, urgent information in situations relating to the implementation of this Agreement. The Parties may also make use of any other communication channels, including diplomatic channels depending upon the urgency of the situation.

#### **Article-5**

Information obtained by a Party pursuant to this Agreement shall not

be disclosed to a third Party without the prior consent of the other Party except where it concerns environment, public health or safety.

**Article-6**

This Agreement shall not affect the rights and obligations of the Parties under existing international agreements to which they are a Party.

**Article-7**

The Parties may hold consultations, as mutually agreed upon, to review the implementation of the provisions of this Agreement as well as to consider possible amendments aimed at furthering the objectives of this Agreement. Amendments shall enter into force in accordance with procedures that shall be agreed upon.

**Article-8**

This Agreement shall remain in force for a period of five years. Upon agreement by the Parties, the Agreement may be extended for successive periods of five years at a time. A Party may withdraw from this Agreement by giving six months written notice to the other indicating its intention to terminate the Agreement.

**In witness whereof** the undersigned being duly authorized thereto by their respective Governments, have signed this Agreement.

**Done** at New Delhi on February 21, 2007 in two originals, in English language, each text being equally authentic.

**273. Statement by Official Spokesperson on media reports regarding delayed return of the Pakistan Air Force C-130 aircraft to pick up the Pakistani injured in the Samjhauta Express train bomb blast.**

**New Delhi, February 23, 2007.**

We have seen reports in the media speculating on the reasons for the delay on the return of the Pakistan Air Force C-130 aircraft, which had come to New Delhi on 22 February 2007 to take back the injured Pakistanis. Clearance for this aircraft to come to India and evacuate the 10 injured in Safdarjung Hospital had been conveyed in the forenoon the same day.

2. The aircraft which had 14 crew members and a 15-member medical team reached New Delhi at 1505 hrs. 7 of the injured Pakistanis were taken from Safdarjung Hospital in ambulances to Palam Airport. They reached there at 1730 hrs and their boarding was completed by 1800 hrs. However, the aircraft could not take off because it developed a technical glitch. One of its engines developed a problem and had to be repaired by the ground staff of the airport. The aircraft finally took off at 2115 hrs.
3. We have seen the reports in the media that the delay took place because the aircraft was waiting for the remaining three injured Pakistanis. These were Mr. Rana Shoukat Ali, Mrs. Rukhsana, w/o Rana Shoukat Ali and their one year old daughter, Miss Aqsa. Rana Shoukat Ali, who had lost five other children in the blasts, had expressed a desire to go to Panipat to identify the bodies of his children. Pakistan High Commission was informed that these three persons would not be going to Pakistan in the special aircraft. Rana Shoukat Ali and his family were taken to Panipat where they were able to identify all the five bodies of their children. Rana Shoukat Ali and his family will return to Pakistan via Wagah.
4. Some media reports suggest that the aircraft was delayed because India wanted an "undertaking" from Pakistani authorities for access to the evacuated Pakistani passengers for interrogation. This request had been made to Pakistani authorities while conveying the clearance for the aircraft. We drew the attention of the Pakistani authorities to the fact that the terrorist attack on the train is being investigated by

Indian police who may wish to take their statements at a later date. However, the release of the injured passengers was not linked to this nor their evacuation delayed because of it. It is our hope that the Government of Pakistan will facilitate this in the interest of the investigations. It may be mentioned that 528 passengers of the train had left for Pakistan on the day of the blast itself.

**274. Media Briefing by Official Spokesperson on the first meeting of the India-Pakistan Anti- Terrorism Mechanism.**

**Islamabad, March 7, 2007.**

**Official Spokesperson:** Good afternoon everyone. You may have seen the Joint Statement that has been issued in Islamabad. I will read it out to you.

"In pursuance of the decision taken during meeting between the President of Pakistan and the Prime Minister of India in Havana, Cuba on 16 September, 2006, the first meeting of the Anti- Terrorism Mechanism was held in Islamabad on 6th March, 2007. The Pakistan delegation was led by Mr. Tariq Osman Hyder, Additional Secretary (UN&EC), Ministry of Foreign Affairs. The Indian delegation was headed by Mr. K.C. Singh, Additional Secretary (IO), Ministry of External Affairs of India.

The two sides discussed the parameters of the Anti-Terrorism Mechanism and agreed that specific information will be exchanged through the Mechanism for (i) Helping investigations on either side related to terrorist acts and (ii) Prevention of violence and terrorist acts in the two countries.

It was also agreed that while the Anti-Terrorism Mechanism would meet on a quarterly basis, any information which is required to be conveyed on priority basis would be immediately conveyed through the respective Heads of the Mechanism."

So this is essentially it. The meeting spilled over from the sixth (of March) and carried on for part of the seventh. This is the result.

**Question:** How do you plan to prevent violence?

**Official Spokesperson:** The essential idea behind is to exchange information which leads to a mechanism which can jointly end terrorism. So that is the purpose of talking of prevention of violence and terrorist acts in the two countries by tightening the net.

**Question:** There have been a lot of reports in Pakistani papers that Pakistan has presented evidence on the alleged Indian role in Balochistan and also the operation of Indian Consulates in Afghanistan. Would you like to comment?

**Official Spokesperson:** Well, I would not like to comment on what has been presented because that we have not seen. We will certainly see what they have presented. I am glad you used the word 'alleged' because India has nothing to do with the developments in Balochistan. As far as the Indian Consulates in Afghanistan are concerned, they have nothing to do with the developments in Balochistan. They are working in very close cooperation with the government and people of Afghanistan to help in the reconstruction of Afghanistan and complete the other bilateral work which is wholly and completely supported and appreciated by the people of Afghanistan.

**Question:** I understand that five or six names of people who have red corner notices against them were handed over to the Pakistani side. Could you elaborate?

**Official Spokesperson:** I cannot go into details of what has been exchanged. Yes, information has been shared before these talks, evidence has been shared, for instance, during the last Foreign Secretaries meeting, evidence has been shared yesterday on some issues. I cannot go into details. That would not be in keeping with the purpose of this exercise. Ultimately, we will see what happens.

**Question:** Are you at liberty to talk of any of the evidence that has been presented?

**Official Spokesperson:** I am not at liberty to talk and I do not think it helps much to talk. Ultimately, this is really about doing. So we will see what is done.

**Question:** There are PTI reports that the Indian side presented some photographs of the Pakistani suspects involved in some of the blasts. Would you like to comment?

**Official Spokesperson:** As I said I am not going to get into details based on media reports. I am telling you that evidence was shared.

**Question:** How cooperative has the Pakistani side been?

**Official Spokesperson:** This is not a question of characterizing anybody's cooperation or lack of cooperation on the basis of one meeting. This is a meeting between delegations of two countries, both the delegations have done what they had to do, there is an agreed joint statement, now let us see where it goes. As far as we are concerned we will naturally judge the cooperation and efficacy by the results we achieve.

**Question:** In the recent Attari Express blasts, they (Pakistan) wanted a joint investigation. Any comments?

**Official Spokesperson:** Well, that question was sufficiently answered by the External Affairs Minister during the joint press interaction with Mr. Kasuri.

**Question:** Is there any terrorist outfit which is not within the mandate of the joint anti-terrorism mechanism?

**Official Spokesperson:** I do not see any such exceptions. I think the mandate of the group is very clear as laid out in the joint press statement in Havana.

**Question:** Is there any territory in India or Pakistan which is outside the mandate...?

**Official Spokesperson:** You know the mandate is in plain English. It has no exceptions.

Thank you.

**275. Question in the Lok Sabha: "Visit of External Affairs Minister to Pakistan".**

**New Delhi, March 7, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether he visited Pakistan recently;
- (b) if so, the details of the talks held on issues like Siachen, Terrorism, Prisoners of War, Economic and Trade Co-operation, Nuclear Risk Reduction and Group tourism and the outcome thereof;
- (c) whether Pakistan has agreed to release prisoners of war languishing in their jails;
- (d) if so, whether Pakistan has agreed to permit the relatives of the Indian prisoners of war in Pakistan jails to enable their identification; and
- (e) the extent to which the said visit is likely to further improve the cordial relations between the two countries?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a) - (e) A statement is placed on the Table of the House.

**STATEMENT**

- (a) and (b) Yes. The External Affairs Minister visited Pakistan on January 13-14, 2007 to convey the invitation of Prime Minister Dr. Manmohan Singh to Pakistan Prime Minister Shaukat Aziz to attend the 14th SAARC Summit to be held in New Delhi in April 2007. During his visit, EAM held bilateral talks with Pakistan President Pervez Musharraf, Pakistan Prime Minister Shaukat Aziz and Pakistan Foreign Minister Khurshid Mahmood Kasuri. Both sides agreed to establish a committee on prisoners comprising retired judges of the superior judiciary to visit jails in the two countries and propose steps to ensure humane treatment and expedite release of prisoners who have completed their prison terms; to expedite the liberalisation of the visa regime and agreed to complete the work in February 2007; that several agreements which are close to finalisation including the Agreement on a) Reducing the Risk from Accidents relating to Nuclear Weapons b) Speedy return of inadvertent Line Crossers and c) Prevention of incidents at Sea will be concluded during the February

2007 visit of Foreign Minister Kasuri to India. On Siachen, both sides discussed the issue and decided that the officials would meet at an early date to address the issue. Both sides also agreed to facilitate movement of diplomats to Noida and Gurgaon in India and Taxila and Hasan Abdal in Pakistan. Procedures for this will be worked out. They also agreed that the first meeting of joint anti-terrorism mechanism would take place before the end of March 2007. Regarding Sir Creek, the officials concerned will be directed to expedite their work. The joint survey of Sir Creek has begun on 15th January 2007. Both sides also decided to launch the Fourth Round of Composite Dialogue with the Foreign Secretary talks on 13-14 March 2007.

- (c) - (e) According to available information there are 74 Indian PoWs in Pakistani Jails. However, Pakistan does not accept the presence of any Indian PoW in its jails. During EAM's visit to Pakistan in January 2007, the matter was taken up with the Pakistani authorities and they have accepted to allow a delegation of families of PoWs to visit various Pakistani jails. We have proposed April 2007 for the above visit.

***Replying to a supplementary EAM said:***

**Shri Pranab Mukherjee:** In the Statement, I have already stated the number of areas which we covered during my discussion with the leaders of Pakistan. Primarily, the objective of the visit was to extend the invitation to Pakistani Prime Minister on behalf of our Prime Minister to attend the 14<sup>th</sup> SAARC Summit scheduled to be held in New Delhi. Naturally, I took the opportunity of having discussions on bilateral issues with President Musharraf, the Prime Minister Mr. Shaukat Aziz and my counterpart the Foreign Minister Mr. Kasuri. All these issues have been taken up.

So far as the Prisoners of Wars are concerned, I would submit that the consistent stand that Pakistan has taken is that there is no Prisoner of War in any Pakistani jail. This is not for the first time but several times, several Foreign Ministers have taken up this position. Now, it has been decided. I suggested to President Musharraf that the family members want to satisfy themselves. So, if an opportunity is being provided to them, a delegation of the family members would come. If the Pakistan Administration facilitates the visit to different jails in Pakistan, they themselves can go and it has been agreed. Some time in April, the delegations will be sent.

In respect of Siachen, 10 rounds of discussions have taken place including three which are now being conducted under the Composite Dialogue Process. It was decided that the official level discussions will begin once again. In respect of certain other areas like Sir Creek, as the joint survey has started from 15<sup>th</sup> January, it was decided to expedite it. A number of Confidence Building Measures were discussed by the leaders of Pakistan with me and those Confidence Building Measures are being pursued.

***In response to another supplementary the Speaker observed that it had already replied but EAM observed:*** "Sir, I have already mentioned that Pakistan does not agree that there is any Prisoner of War in any Pakistan jail. Then, we insisted that we are receiving complaints from the family members of missing persons and so it would be desirable if you allow those family members to go and visit Pakistan.

**Shri J. M. Aaron Rashid:** Mr. Speaker, Sir, many persons who left from India to Pakistan have gone missing there. Does the Government have any list of such missing persons and will the Government allow their relatives to go to Pakistan and search for them whether they are in any jail there or in hospital or whether they have died? Does the Government have any statistics about such missing persons?

**Shri Pranab Mukherjee:** Sir, whenever Indian citizens go to any part of the world, naturally they report to our Missions there and our Missions keep track on them. But if some persons are missing and we come to know of it, definitely we try to ascertain about them and almost everyday I receive a number of letters from various Members of Parliament that such and such persons went to such and such country and there is no trace of them. In that case, through our Missions we try to locate them.

***Answering another supplementary the External Affairs Minister observed:*** "Sir, there is no confusion anywhere. So far as the establishment of the Joint Anti-Terror Mechanism is concerned, it was decided during the meeting between President Musharraf and our Prime Minister at Havana in the margin of Non-Aligned Summit that efforts should be made to confront terrorism and to ensure that terrorist activities are completely neutralized. This exercise is going on. Successive Governments have undertaken this exercise and it is nothing new. The commitment of President Musharraf in this regard was reflected in the Joint Statement issued by the then Prime Minister Shri Atal Bihari Vajpayee and President Musharraf on 6<sup>th</sup> January, 2004. At that time, it was agreed upon by President Musharraf that he would not allow Pakistan territory to be used by terrorists.

Therefore, we are insisting and we are talking that you fulfill your commitment. These talks are going on. Therefore, the entire issue is being discussed.

So far as Siachien is concerned, as I have told in reply to the earlier question, as many as 10 rounds of discussions have taken place between India and Pakistan on Siachien and some of these discussions took place during the earlier regime itself. This is an issue which we are trying to resolve through dialogue and discussion, but no decision has been taken so far. Therefore, there is no scope of confusion."

**Md. Salim:** Sir, the development in the relations between India and Pakistan is taking a welcome route. Although, there are some minor irritants, I am not going to make a speech, I intend to ask the hon. Minister of External Affairs that for the SAARC Summit XI, he was supposed to go and invite the President of Pakistan, what happened in between that instead of inviting the President of Pakistan, he went to invite the Prime Minister of Pakistan. We are constantly engaged in a composite dialogue process and there are some good developments which are welcome. But in between these are the irritants. The hon. House has to be apprised of the facts as to what happened behind the scene because there are some conflicting and contradictory reports appearing in the newspapers on this count.

**Shri Pranab Mukherjee:** There are no conflicting or contradictory reports. So far as SAARC Summit is concerned, it is the practice that either the Head of the Government or the Head of the State attends. For instance, in Sri Lanka, there is a Prime Minister, but normally the SAARC Summit is attended by the Sri Lankan President.

So far as Pakistan is concerned, even the Summit which took place at Islamabad, there also Pakistan was represented not by the President but by the Prime Minister and it is President Musharraf who indicated that we should extend an invitation to the Prime Minister. Therefore, I carried the invitation to the Prime Minister to invite him to attend the SAARC Summit.

**Mr. Speaker:** I am sure he will be a very honoured Guest here.

**Shri P.C. Thomas:** Sir, it has been recently reported that a young pilot from India, Shri Muralitharan, took an IAF plane in 1971 War to Pakistan and his aircraft was shot down near Peshawar. He got down through a parachute, but he was caught by the Pakistan Army and jailed. For the last 36 years, he is in the jail. His family members got letters from the Ministry

regarding this that the enquiry is going on. I have brought it to the notice of the Ministry through letters.

**Mr. Speaker:** You cannot raise it just under any Question.

**Shri P.C. Thomas :** Sir, this is a very serious matter.

**Mr. Speaker:** Certainly a serious matter, but I do not know whether the hon. Minister has the information.

**Shri P. C. Thomas:** Sir, he has been in jail for the last 36 years. Sir, I have just now talked to the hon. Prime Minister also about this.

**Mr. Speaker:** You need not repeat it.

**Shri P. C. Thomas:** Sir, I would humbly request and seek information from the hon. Minister of External Affairs whether an immediate enquiry will be made in this matter and whether every effort will be made to bring him back to India.

**Mr. Speaker:** It is a serious matter, but I do not know whether the hon. Minister can reply to that.

**Shri Pranab Mukherjee:** Sir, so far as these issues are concerned, I have already replied that we have given a list of 74 persons as Prisoners of Wars, including the list of 54 persons who are missing since the War of 1971. The names are there and the incidents which the hon. Member has referred to have also been pointed out. Even during my visit I carried a book and a letter from the Chief of the Air Staff. I am fully aware of the agony of the relations and the family members because till today they are not aware of the exact facts. But it has been the persistent stand of Pakistan authorities to deny that anybody as Prisoner of War exists in any jail of Pakistan. That is why, the mechanism which I referred to in the earlier question is being thought of and let us try once again.

**276. Question in the Rajya Sabha: “Meeting of Indo-Pak Foreign Ministers”.****New Delhi, March 8, 2007.****Will the Minister of External Affairs be pleased to state:**

- (a) whether India and Pakistan’s Foreign Ministers met in Islamabad on the 13th January, 2007 and also at New Delhi and discussed a number of issues and signed a number of agreements;
- (b) if so, the issues that were discussed;
- (c) the number of agreements that have been signed;
- (d) whether most of the outstanding issues of trade and visa were reached and finalized;
- (e) if so, to what extent the meeting has been successful; and
- (f) whether ground work for Prime Minister’s visit to Pakistan has also been finalized ?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a) to (f) A statement is placed on the Table of the House.

**STATEMENT**

- (a-b) Yes. The External Affairs Minister visited Pakistan on January 13-14, 2007 to convey the invitation of Prime Minister Dr. Manmohan Singh to Pakistan Prime Minister Shaukat Aziz to attend the 14th SAARC Summit to be held in New Delhi in April 2007. During his visit, EAM held bilateral talks with President Pervez Musharraf, Prime Minister Shaukat Aziz and Foreign Minister Khurshid Mahmood Kasuri. Both sides agreed to establish a committee on prisoners comprising retired judges of the superior judiciary to visit jails in the two countries and propose steps to ensure humane treatment and expedite release of prisoners who have completed their prison terms; to expedite the liberalisation of the visa regime and agreed to complete the work in February 2007; to conclude agreements which are close to finalisation including the Agreement on a) Reducing the Risk from Accidents relating to Nuclear Weapons; b) Speedy return of inadvertent Line Crossers; and c) Prevention of incidents at Sea. On Siachen, both

sides discussed the issue and decided that the officials would meet at an early date to address the issue. Both sides also agreed to facilitate movement of diplomats to Noida and Gurgaon in India and Taxila and Hasan Abdal in Pakistan. They also agreed that the first meeting of joint anti-terrorism mechanism would take place before the end of March 2007. Regarding Sir Creek, the officials concerned would be directed to expedite their work and the joint survey of Sir Creek would begin on 15th January 2007. Both sides also decided to launch the Fourth Round of Composite Dialogue with the Foreign Secretary talks on 13-14 March 2007. Both Ministers again met in New Delhi on February 21, 2007 as co-chairmen of India-Pak Joint Commission and reviewed the progress made by the eight Technical Level Working Committees on eight areas namely Agriculture, Health, Science & Technology, Information, Education, IT & Telecommunications, Environment and Tourism.

- (c-e) The Agreement on Reducing the Risk from Accidents relating to Nuclear Weapons was signed on February 21, 2007. Government have conveyed names of Indian judges for the Committee on Prisoners. Government have proposed the visit of a delegation of family members of missing defence personnel in April 2007. The Visa agreement, Agreement on Speedy return of inadvertent Line Crossers and Agreement on Prevention of incidents at Sea are being examined by Government. The Joint Survey of Sir Creek started on January 15, 2007 and its report is expected by the end of March 2007.
- (f) The Prime Minister has accepted President Musharraf's invitation to visit Pakistan.

**Shrimati Shobhana Bhartia:** Sir, terrorism, and particularly Pakistan's role in fostering terrorist outfits, has been an area of tremendous concern. Recently, the U.S. Vice-President, Mr. Dick Cheney, visited Islamabad, and issued a stern warning to President Musharraf on dismantling the terrorist outfits and also Musharraf's support for the Taliban. In view of our extensive interest in Afghanistan, I want to ask the hon. Minister as to how this would impact us and whether the U.S. shared any of these intelligence reports with us.

**Shri Pranab Mukherjee:** Sir, so far as terrorism is concerned, as the hon. Member and the whole House is aware, this is a very important issue and this, in fact, stands in the way of normalisation of relationship between our

two countries and exploitation of the full potentialities which exist in this sub-continent. Therefore, we are trying to resolve this issue, and this is a continuing process. Sir, last September, when our Prime Minister met President Musharraf on the eve of the Non-Aligned Summit, it was decided to set up an Anti-terror Mechanism. Thereafter, the composite dialogue, which was suspended, as a sequence to the Mumbai blasts, resumed. So far as the information of the hon. Member is concerned, it is true that certain other countries are exercising their influences over Pakistan to ensure that terrorist outfits, which are located there, should be dismantled, and this is also our demand. As early as 6<sup>th</sup> January, 2004, in the Joint Statement issued by the then Prime Minister, Shri Atal Bihari Vajpayee, and President Musharraf, President Musharraf made a firm commitment that the land of Pakistan will not be allowed to be used by the terrorists. So far as the Talibans are concerned, there is no two opinion on it that the Talibans should be contained, and they produce nothing but hatred and terror. Therefore, efforts should be made to contain them.

**Shrimati Shobhana Bhartia:** Before putting my second supplementary, I asked the hon. Minister as to whether the U.S. has shared any information with us.

**Shri Pranab Mukherjee:** Sir, certain information cannot be shared with the hon. Members. She is fully aware of it.

**Shrimati Shobhana Bhartia:** Sir, my second supplementary is this. On liberalisation of visa regime, have any proposals been made about 'group tourist visas' that are being considered? Also, I would like to know whether both Governments are looking at multi-entry visas for business travellers to encourage trade and commerce.

**Shri Pranab Mukherjee:** In fact, this issue also came up during my visit, and while having discussions, I requested my counterpart that Pakistan's response to our visa applications should be expedited. Thereafter, we got a response from Pakistan. But, I am afraid, instead of liberalising it, it is going to be more constricted. Therefore, we have suggested that particularly for businessmen, professionals, students, journalists and certain other categories, this should be liberalised. And, we are carrying on the negotiations with them.

**Shri Yashwant Sinha:** Sir, my question relates to trade. As we are aware, the South Asia Free Trade Agreement came into force on 1<sup>st</sup> January this year. And, despite the coming into force of SAFTA, Pakistan has not thought

it fit to liberalise its trade with India, especially, Indian exports to Pakistan. Unlike the understanding reached in the past, they still go by the Positive List rather than by the Negative List. They have not extended the Most Favoured Nation treatment to India. And the statements which emanate from Pakistan, from responsible quarters like the Pakistani Commerce Minister, suggest that Pakistan is not prepared to adhere to the terms of SAFTA as far as India is concerned and that Pakistan would continue to insist that India should remove its non-tariff restrictions first.

Now, my question to the hon. External Affairs Minister is: what are the non-tariff restrictions that India has, specifically for Pakistan exports to India and did he take up this issue during his visit to Islamabad and, if he did, then, what was the Pakistani response to the implementation of the provisions of SAFTA?

**Shri Pranab Mukherjee:** Sir, so far as Pakistani response is concerned, it is almost known to everybody. They also do not hesitate to articulate it. Take, for example, the non-extension of the Most Favoured Nation treatment, which every country under the WTO, or, even under the old GATT, is obliged to extend to those who are members of the old GATT or the WTO. But it has not been extended; it is a fact.

So far as operationalisation of SAFTA is concerned, there have been several rounds of discussion. It was discussed in last August at SAARC Council of Ministers' meeting. At the fringe of the General Assembly Session, I myself took it up with the SAARC Ministers. Thereafter, on 26<sup>th</sup> February, at the SAARC Ministerial Meeting, our Commerce Minister participated and tried to resolve this issue but, unfortunately, it has not been possible to resolve it.

Currently, Pakistan is engaged in trade with India on the basis of a Positive List. But there has been one positive development too; they have expanded the number of categories within this List, from 717 to additional 300. So, a large number of items have come within the Positive List itself. But, so far as tariff reduction is concerned, there has not been any movement. And the Joint Statement which has been issued after the Ministerial Meeting, is known; the Positive List still remains; now, it is for us to decide whether we take certain action unilaterally or not.

So far as non-tariff restrictions are concerned, I would like to assure the hon. Member — and he is fully aware of it because he dealt with the Finance Ministry for a pretty long time — that there is no Pakistan-specific non-tariff barrier, so far as India is concerned.

**Shri Amar Singh:** *Sir, The External Affairs Minister just mentioned about trade and commerce. The Experts Committee of the World Bank had in its report approved the construction of Baglihar Hydro Electric project on the river Chenab in Jammu and Kashmir. The meeting of Foreign Ministers that took place in Islamabad in January 2007, was there any discussion about this and if yes; what was the outcome and what is the stage of its implementation?*

**Shri Pranab Mukherjee:** Sir, we are encouraging trade between the two parts of Jammu and Kashmir and we have suggested that, specially, the local products should be allowed to be traded between the two parts without any restriction.

**Shri Amar Singh:** I am asking about the Baglihar power project, Sir.

**Shri Pranab Mukherjee:** I did not discuss that with them.

**Prof. P. J. Kurien:** Sir, my question is about Indian prisoners languishing in Pakistani jails. In his reply, the hon. Minister has said that a committee of judges is being appointed to find out whether humane treatment is being meted out to prisoners there.....Recently, I read a newspaper report about an Indian pilot, Muralidharan. According to the Indian Army reports, he is dead. But that Indian pilot who fought the war in 1971 is alive in Pakistan jail. This report came in newspapers. I don't know whether it has come to the notice of the hon. Minister. If it has come to his notice, then I would like to know his reaction. Sir, this leads me to put a question. Is it that the Government is not having the list of Indians languishing in Pakistan jails? If you have the list, if you have the correct list, have you got the details of them? If you have the details, what steps you have taken and you are taking to see that these prisoners who are in Pakistan are released?

**Shri Pranab Mukherjee:** Sir, so far as the PoW is concerned, we have given to Pakistan authorities from time to time, over a number of years, about 74 persons' list. But Pakistan has flatly denied on each occasion that there is not a single prisoner of war in any of the jails of Pakistan. Even during my talk with President Musharraf, this time on 13-14 January, this issue was raised. The hon. Members have confused between two issues. These two are separate. So far as the PoW is concerned, Pakistan has denied this time and on earlier occasions that there is no PoW there. Therefore, we suggested that there is a persistent demand from the relations of these families that they would like to go and visit the Pakistan jails and satisfy themselves. President Musharraf has agreed to receive a small

delegation of Indian families. So, we have decided to send a group sometimes in April. Pakistan Government has agreed to provide facilities. They can go; they can themselves verify it.

So far as appointment of the Judges' Committee is concerned, sometimes it happens and it happens on both sides, India and Pakistan, that somebody when they inadvertently cross the border, they are detained. Sometimes, even after completing the jail sentence, the prisoners are not released in time. It is applicable to a large number of fishermen who are normally detained because of their crossing to the other side in the water. So, it was decided that both sides will agree to appoint a committee consisting of the retired superior judges. This decision was taken on 13-14 January when we held our talks. We have to identify the person. The Committee has just been appointed, and surely, it will take some time to work. They will visit the jails of both Pakistan and India; will make recommendations to the Government concerned to improve the jail conditions and will also examine whether there is unusual delay in releasing the prisoners who have completed their jail sentence.

**Prof. P.J. Kurien:** Have you got any information on that particular issue?

**Shri Pranab Mukherjee:** So far as Muralidharan is concerned, this has been debated, at least, half-a-dozen times.

**Prof. P.J. Kurien:** I want to know about Muralidharan's case.

**Shri Pranab Mukherjee:** I am talking of Mr. Muralidharan. Even yesterday, I replied to another Member's question in Lok Sabha. He was one of those 74 persons who are listed there, but Pakistan Government has flatly denied it.

**Kumari Nirmala Deshpande:** Sir, it is common knowledge that terrorism has its victims not only in India but in Pakistan also, and Pakistan's President, General Musharraf was also attacked thrice by the terrorists. So, what is being done to fight this menace of terrorism jointly? ...(Interruptions)...

**Shri Pranab Mukherjee:** Sir, as I mentioned, we have established a Joint Anti-Terror Mechanism headed by Additional Secretary of the Ministry of External Affairs in both countries. The first meeting has taken place yesterday and the day before. They have decided about the parameters of the functioning of this Joint Anti-Terror Mechanism.

It has also been decided that they would meet quarterly, exchange information, and on the basis of the information what action is being taken

by the countries concerned will also be reviewed. This is an initiative which we have taken just now and let us see how does it act and what the outcome of it is.

**Shrimati Shushma Swaraj:** *Thank you, Mr. Chairman, I want to know from the Hon'ble Minister whether during these talks Pakistan blamed India for militancy in Balochistan? Is this not an attempt to divert attention from Pakistan's own sponsored terrorist activities in Jammu and Kashmir? Was Pakistan satisfied with the Indian reply or it would continue to raise this issue at the international fora?*

**Shri Pranab Mukherjee:** Sir, this type of allegations are being brought by Pakistan from time to time. Even when we set up some consulates in Afghanistan, they say that there is no adequate business between India and Afghanistan, so why they are having consulates. We clearly pointed out to them and it is known to the international community that India is engaged heavily in the construction activities in Afghanistan by construction of roads, construction of Parliament building, construction of power projects and some of these consulates look after these construction activities and they are not engaged in meddling with what is happening on the other side of the border between India and Afghanistan. So far as involvement of Indian agencies in Baluchistan is concerned, yesterday itself it was denied and today also I am going to categorically deny this allegation that neither any Indian agency nor any Indian consulate is involved in any type of activities against Pakistan.

*(Text in italics is unofficial translation from Hindi)*

**277. Press Release issued by the Ministry of External Affairs on India's nominations for the Committee on Prisoners to ensure a humane treatment of them.**

**New Delhi, March 8, 2007.**

During EAM's visit to Islamabad on 13-14 January 2007, it was agreed to establish a committee on prisoners comprising retired judges of the superior judiciary to propose steps to ensure humane treatment and expedite release of prisoners who have completed their prison terms. In this connection, the following names of retired judges from India have been communicated to Pakistan as India's nominations for the committee on prisoners:

1. Shri Justice K. R. Vyas (former CJ, Bombay High Court)
2. Shri Justice Amarjit Choudhary (former judge from Punjab & Haryana High Court)
3. Shri Justice A. S. Gill (former judge from Punjab & Haryana High Court)
4. Shri Justice M. A. Khan (former judge from Delhi High Court)

**278. Joint Press Release issued on the decisions taken at the conclusion of the Fourth Round of the Composite Dialogue between the Foreign Secretaries of India and Pakistan.**

**Islamabad, March 14, 2007.**

**Peace and Security**

- U Expedite negotiations to conclude an Agreement on Prevention of Incidents at Sea.
- U To fully observe the ceasefire.
- U Conclude and sign an Agreement on Modalities for the Conduct of Quarterly Flag meetings at the Sectors to be agreed upon.
- U Conclude and sign a Framework Agreement on Speedy Return of Inadvertent Line Crossers.
- U Conclude an agreement on No Development of New Posts and Defence Works along the LOC.
- U Proposed drafts for new border control guidelines along the International Border.

**Nuclear CBMs**

- U Hold discussions on security doctrines.

**Jammu and Kashmir**

- U Ensure implementation of the already agreed Jammu and Kashmir related CBMs
- U Ensure operationalization of Truck service
- U Ensure operationalization/rationalization of the five crossing points

**Siachen**

- U Defence Secretaries of the two countries assisted by respective Directors General (Military Operations) to meet to hold talks.

**People to People Contacts**

- U Conclude during the Fourth round bilateral Visa Agreement, Agreement

on Consular Access, and revise the Protocol on Visits to Religious Places.

- U The Committee on Prisoners composed of four judges from each side to ensure humane treatment and expeditious release of prisoners on both sides.

**279. Media Briefing by Foreign Secretary Shivshankar Menon at the conclusion of the Foreign Secretary level talks.**

**Islamabad, March 14, 2007.**

**Foreign Secretary Mr. Menon:** Thank you very much. Foreign Secretary Riaz Mohammad Khan has narrated points of agreement. I will confine myself to a few general points. Yesterday, I had the privilege of calling on H.E. Shaukat Aziz, the Prime Minister of Pakistan and Foreign Minister Kasuri. In those meeting, I found that there was clear political will on both sides to make all round progress in the composite dialogue and to the process forward towards establishing normal, friendly and good neighbourly relations between our two countries. Both leaders emphasized their commitment to this process. With Foreign Secretary Riaz Mohammad Khan as he mentioned, we had two good rounds of talks; one yesterday and one today. When we reviewed the third round of talks and where it has brought us, we noted the significant improvement brought in our relations by the dialogue process especially in promoting people to people relations qualitatively better than they have been for a very very long time and that the composite dialogue has proven record of success. The dialogue process has seen implementation of a number of confidence building measures, narrowing of the divergences and the improvements in the understanding of each other positions on the issues which divide us.

We regard CBMs as an integral part of the process of resolving issues and differences and this is our intent to try and resolve all issues that divide us including the issue of Jammu and Kashmir. When we reviewed the third round of talks and we also decided to launch the fourth round, we discussed also the two subjects on the Foreign Secretary level that we cover; peace and security including CBMs and the issue of Jammu and Kashmir. We agreed that in the fourth round, we anticipate that considerable progress can be made in all these aspects. During the discussion, I reiterated the

emphasis for maintaining an atmosphere free from violence and terror to sustain popular support in India for the dialogue process. We both noted the importance of joint anti-terror mechanism which met last week in Islamabad and reiterated the importance of implementation of the commitments in this regard. On J & K, India and Pakistan are engaged in the most sustained and intensive dialogue that they have ever had. We seek the settlement of all outstanding issues including J & K. With Foreign Secretary Riaz Mohammad Khan, I also discussed the implementation of the existing CBMs and new cross LoC CBMs. We raised the Kargil Skardu route for a bus service and Pakistan side agreed to consider it. We now start looking at the logistics and modalities of operationalizing this. We also discussed trade across the Loc.

As the Foreign Secretary mentioned, we have proposed dates for different meetings for the fourth round of composite dialogue between April and July 2007 and this include early meetings on Siachen and Sir Creek. There is one point I would like mention on the Samjhauta Express tragedy which many of our Pakistani friends have mentioned to me in the last two days. Today, we shared with the Pakistani side a list of passport numbers of which the holders remain unidentified. As you know, even today 19 of those who perished remain unidentified and we will be working jointly with the Pakistan side to look through the list of passports numbers and identify who are the holders of the passport numbers. We also would like to make it clear that we have kept the DNA sample of the 19 persons victims of the tragedy who remain unidentified and if there are any relatives or any body who is interested in Pakistan who feels he has information and likes to check, we would like them to contact our High Commission in Islamabad. We have already issued visas to the relatives who wish to visit India. That would help us. We have had fruitful and positive discussion over the last two days which I think has set a stage for a successful fourth round of the composite dialogue. I am grateful to Foreign Secretary for his hospitality and kindness as a host. Pakistan's high reputation of treating guests has been maintained.

**Question:** Secretary Menon, you have said that Pakistan and India discussed J & K. India has already discarded one of the four points suggested i.e. the joint management. Would you take us into confidence on counter proposal if at all India has suggested to Pakistan on this question. Secondly, any modus operandi were discussed about the anti-terror mechanism?

**Foreign Secretary Mr. Menon:** I am surprised. I think the mandate of the

mechanism which was laid down clearly by the leaders of both our countries in Havana was very clear. It said they decided to put in place India - Pakistan institutional mechanism to identify and implement counter terrorism initiatives and investigations. The meeting of the joint anti-terror mechanism last week also issued a joint statement which also said that they agreed that specific information will be exchanged through the mechanism for helping investigation on either side relating to terrorist acts and prevention of violence and terrorist acts in the two countries. So I am not quite sure why there is any doubt. This is joint mechanism and terrorism is an enemy for both us all. I hope that we can make this mechanism productive and enable to implement its mandate. There can be nothing more authoritative than our leaders have said. On the larger question that you have raised about discussion on J & K, I do not think this is a place to reiterate all the ideas that are on the table, I think the important things is that we are engaged in intensive dialogue and this is our intention to bring this dialogue to successful conclusion. To get into detail of this proposal of that or this idea or that, I do not think that contribute to that end<sup>1</sup>.

**Question:** Question to both of you. Could you confirm if India has given

1. Before the start off the talks, the Pakistan Foreign Ministry had expected the fourth round of the composite dialogue to make progress on the resolution of the Jammu and Kashmir issue. The Spokesperson of the Pakistan Foreign Ministry had said on 12th March that it was waiting for India's response to President Pervez Musharraf's "ideas" on the resolution of the Kashmir issue. "On Jammu and Kashmir, it is important that we now move from confidence-building measures to dispute resolution," Pakistani spokesperson Tasnim Aslam said. She recalled the statement by Prime Minister Manmohan Singh welcoming Gen. Musharraf's proposals and saying that they should be discussed with an "open mind." The spokesperson too expected discussions on Pakistan's earlier proposal of a "strategic restraint regime" - this included mutual force reduction and freezing of missile programmes by both. Media reports quoted Pakistan Foreign Secretary Riaz Mohammed as describing the year 2007 as a "watershed" year for bilateral relations, and suggesting that there was "a need to seize the opportunity" arising from the quality and scope of talks and the international environment, to move from conflict management to resolution. Media said that Pakistan made several proposals for building confidence. These are Kashmir-specific measures, and include a helicopter service between Srinagar and Muzaffarabad, holding of sports events and a postal service across the Line of Control. Pakistan appears to have shed its earlier reluctance on starting a bus service between Kargil in Kashmir and Skardu. The two sides discussed the possibility of cross-LoC trade. They agreed to implement the Kashmir-related CBMs already decided upon. A truck service across the LoC has been hanging in the balance since April 2006, and the Foreign Secretaries agreed that this should be operationalised soon. It was also decided that the five agreed-upon crossing points on the LoC be opened. Mr. Khan said demilitarisation was important for "raising the comfort level of Kashmiris" and that it was Pakistan's expectation that "this, or something related to it" should be part of any "final shape" whenever that point was reached. Both Foreign Secretaries said there had never been such "focussed" and "sustained" discussions on the issue of Kashmir, and that discussions on the issue were taking place at various levels. An issue over which the two sides

---

appeared somewhat at odds was on questions relating to the mandate of the joint anti-terror mechanism. Asked about reports that Pakistan did not want acts of violence in Kashmir included in the work of mechanism, Mr. Khan said the mandate of the mechanism, as finalised at its first meeting last week, was "clear." According to him, the "emphasis" of the mandate was on preventing future acts of terrorism, while including exchange of specific information to help investigations in both countries. "As regards Kashmir, the Kashmir issue is a dispute between the two countries. That's a separate issue," he said. Mr. Menon felt the mechanism's mandate had been "laid down quite clearly by both our leaders" and it was to identify and implement counter-terrorism initiatives, including the sharing of specific information for investigation and prevention of terrorist acts in both countries. On the Samjhauta incident, India gave Pakistan a list of passport numbers against which tickets were issued for travelling in the two compartments that were bombed, to identify 19 victims of the attack. The practice then, since changed, was to issue tickets for the unreserved compartment against passport numbers but without taking down the names. Mr. Menon put to rest speculation that India was considering handing over the Jinnah House in Mumbai to Pakistan, by saying that its future had to be decided keeping in mind "the sentiments of the people of the entire sub-continent." "Jinnah was a citizen of the sub-continent, and I think we would like to find a solution that works for all of us," said Mr. Menon. Before the start of the talks in Islamabad on March 13, at the Pakistan Foreign Ministry, Foreign Secretary Shiv Shankar Menon expressed the hope that the talks would be "constructive," while his Pakistani counterpart Riaz Muhammed Khan said he was looking forward to "fruitful" talks. He said he perceived a "clear expression of political will, on both sides" to take the process forward and to "move our relationship into a phase where we will truly be able to say that we enjoy good neighbourly relations." Mr. Menon, later called on Prime Minister Shaukat Aziz and Foreign Minister Khurshid Mahmud Kasuri. Mr. Aziz told Mr. Menon that his Government was "firmly committed" to the process of the composite dialogue, emphasising the need to make it "more meaningful and result-oriented." Pakistan was keen to settle all disputes with India, including the issue of Kashmir, he said. Mr. Aziz also acknowledged the role of confidence-building measures as "instrumental in improving the ambience and relationship between the two countries." Mr. Menon said the Pakistan Prime Minister was "good enough" to acknowledge the economic potential of the two countries, but reiterated the Pakistan position that the resolution of disputes would make economic cooperation easier. Describing the composite dialogue as a process that "walks on three legs," Mr. Menon said confidence-building measures, resolution of conflicts, including the issue of Kashmir, and establishing links between the peoples to build "mutual stakes" had to progress together. "Frankly, I think the reason this process has moved forward for the last almost three years is because we have done all three things together and we have avoided getting into saying do one first, if you do this, then we can do that. We have moved forward wherever we can and I think we are satisfied with the results of that," he told journalists. On the question of progress on the Iran-Pakistan-India gas pipeline, Mr. Menon said was for India a "stand-alone project" that New Delhi was still examining for its technical and economic feasibility. "We don't see that project as being linked to the general political situation in the region," he said to a question. India would like to see the stand off over Iran's nuclear programme resolved peacefully, through diplomacy. "We think that this is possible," he said. Mr. Menon also discussed with Mr. Kasuri the April 3-4 SAARC summit in New Delhi, aside from issues concerning the composite dialogue process. "Both agreed that we would like to make SAARC a more effective instrument. We agreed that we would work together to achieve this goal," he said. Indian officials said the issue of the implementation of SAFTA, on which India and Pakistan have differences, did not come up for specific mention although it figured in the broad range of SAARC-related issues that the two sides discussed.

any material on violence in Kashmir in the talks last week here in the anti-terror meeting? There are reports that both sides are close to some agreement on Kashmir?

**Foreign Secretary Mr. Menon:** I think discussion should remain confidential by the nature of what we are trying to do. What we are dealing in here is not which is some thing done in the public. Its mandate is quite clear (anti-terror mechanism).

**Question:** What solution is there on the issue of Siachen. Secondly, when your Minister was here in January, he promised that the issue of Jinnah House will be decided very soon. Has there been any decision on that issue?

**Foreign Secretary Mr. Menon:** We are looking at a set of ideas for some time - set of ideas some of which we brought to the table, some of the ideas Pakistan brought to the table. And what we would like to do is, to hold a meeting of the defence secretaries and the DGMOs together as early as possible to try and clarify and to see whether we can come to an agreement on Siachen. I think this is an issue which has eluded solution for a very long time. But we are now talking about common set of ideas which we have both brought to the table. But as I said I do not want to say we have accepted they have accepted because ultimately both of us have to agree to a solution. It has to be a our common solution to the problem. We would hold meeting and we have proposed dates and Pakistan side is also keen to hold meeting so let us see. We are hopeful.

We are in the process of locating suitable premises for Pakistan Consulate General in Mumbai. We have located some land on which we think that the Consulate General can be built and which would meet the requirements. Separately, we are looking for housing for them while they build. We have shown some properties but they have not met the needs of the Consulate General. We hope to find the solution to the problem. Jinnah House itself, I think as if now there are other issues related to it. We would like to make use of the House which takes into account the sentiments of all the people of the sub-continent because he was the citizen of sub-continent too. So I think we will find a solution which works for all of us and that is what the Minister meant.

**Question:** The question for both the Secretaries. There are reports that India has rejected demilitarization. What is your count on that?

**Foreign Secretary Mr. Menon:** Demilitarization in generic sense is an idea which many people feel is a good idea. But from the Government of India point of view, it is the function of the situation on the ground, on the level of threats and violence that exist there. And that is where we as a Government with the responsibility to protect the lives and property of the people, that is angle through which we would approach it.

**Question:** We keep on receiving complaints of being too slow. Yesterday the meeting was only for three hours and today only for about one hour?

**Foreign Secretary Mr. Menon:** (to Foreign Secretary Mr. Riaz Mohammad Khan...would you defend the bureaucracy...) I would only say judge us by the results. Three years ago, nobody would have said that we would stand up and speak about our relationship that has come so far. So I think that rather to defend ourselves against this charge, you should congratulate the bureaucracy for having done this. If the bureaucracy have managed this, this is because we have been given clear leadership. And there is clear political will in the leadership on both sides to break out of the pattern of the past. That is not an easy thing. As we have been locked into a relationship for sixty years with issues we are dealing with here. So for me, it is not question of are you too slow to travel. There will be people no matter what you do, will say (that) you are too slow.

**Question:** There is a disappointment that the committee of jurists on prisoners have not been operationalized today. Secondly, both of you claim of having sustained dialogue in the history on Kashmir. When you are coming up with a solution.

**Foreign Secretary Mr. Menon:** On the prisoners, we have exchanged the names of the jurists. Pakistan has given us the names of the retired judges and we have done the same. Within next few months, the committee can meet and start doing its work. Because we are determined to solve this problem because it is a humanitarian problem. And we do not think this is a problem we should be carrying on. This is in our interest to solve this problem as quickly as possible. This determination came in our talks. You have noticed that this is the problem we have addressed every time we have met. We have made some progress in terms of releases, improvement of conditions. There is more to be done and thats why we are very keen that the committee should meet quickly. You mentioned the visit to Prime Minister Manmohan Singh visit to Pakistan. He is looking forward to the visit. He has accepted the invitation. We still have to set dates for the visit. From our point of view, we would like very much that it be a productive

visit. That have meaningful outcome and move relationship forward. When will we solve the issues that divide us, as soon as possible. That we want and that is what we are trying to do. But I cannot give you the dates. When we have a solution, we will certainly come and tell you.

**Question:** When are you implementing the verdict of World Bank neutral expert on Baglihar dam?

**Foreign Secretary Mr. Menon:** We are going ahead with the implementation of the project on the basis of verdict. That is continuing now.

**280. Question in the Lok Sabha: "Sir Creek dispute".**

**New Delhi, March 21, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether the Government has conducted any joint survey to solve the Sir Creek dispute with Pakistan;
- (b) if so, the details of the disputed area and the modalities worked out therefor;
- (c) the outcome of the joint survey; and
- (d) if not, the reasons therefor?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a)-(d) A joint survey of the pillars in the horizontal segment of the boundary in the Sir Creek area was carried out in January 2005. The survey computed the position of 38 existing pillars out of the total 67 pillars erected in 1925. On 15 January 2007, the two sides started a joint survey of the creek and adjoining areas. The joint survey is currently underway.

## **281. Press Release of the Prime Minister's Office on the meeting between Prime Minister Dr. Manmohan Singh and Pakistan Prime Minister Shaukat Aziz.**

**New Delhi, April 4, 2007.**

Pakistan Prime Minister, Mr. Shaukat Aziz called on the Prime Minister, Dr. Manmohan Singh, here today. The two leaders discussed a wide range of bilateral issues including trade, energy, banking, air connectivity and other issues<sup>1</sup>.

Prime Minister Aziz assured Dr. Singh that Pakistan would take early action to return fishing boats seized from Indian fishermen to their owners. The two leaders also agreed to review the status of each other's citizens held prisoners in the two countries. They agreed to increase air connectivity between India and Pakistan. They also agreed to continue the ongoing discussions on the Iran-Pakistan-India gas pipeline. Mr. Aziz said Pakistan is ready to export cement to India taking advantage of the duty reduction announced by the Government. Mr. Aziz also informed the Prime Minister that Pakistan was issuing more visas to Sikh Yatris coming from across the world to visit Sikh shrines in Pakistan.

- 
1. At the press conference held by EAM on April 4 at the end of the SAARC Summit the journalists asked Mr. Mukherjee about the meeting between PM and Shaukat Aziz: QUESTION: I want to ask you about the meeting between the Prime Minister and Shaukat Aziz, Prime Minister of Pakistan. Did Mr. Shaukat Aziz say anything about the Kashmir issue? And also, was there any discussion on Siachen issue and what is India's response to both?
- EXTERNAL AFFAIRS MINISTER: In fact, when the two leaders discussed among themselves, they covered a large number of their bilateral relations. Not merely bilateral relations, they shared their perceptions about the regional and international issues also. So far as Kashmir is concerned, as I mentioned to you, we are having regular dialogue within the framework of the Composite Dialogue. This is the institutional arrangement continuing for quite some time. In respect of Siachen, Defence Secretary level talks are going to take place in a couple of days, I think on 6th or 7th of April it will take place and that will be the 11th round of the talks. So, talks are going on.
- A Pakistani press release on the meeting said that "India and Pakistan will press ahead with a proposed gas pipeline from Iran". "They (India and Pakistan) expressed satisfaction over the progress made so far in the technical-level talks among the three sides," said the press release. The two leaders "agreed on granting permission to their respective banks to open branches and increasing air links between the countries," the Pakistani release said. They are said to have reviewed the status of the composite dialogue and discussed the issues of Jammu and Kashmir, Siachin, and Sir Creek. The Pakistan Prime Minister underscored the importance of resolving Kashmir for durable peace..."

Prime Minister Aziz thanked Dr. Singh for the financial support given to the families of the victims of the Samjhauta train incident. He complimented Prime Minister Singh for the successful and efficient conduct of the SAARC summit. He also expressed satisfaction at the content of the discussions at the summit.

**282. Joint Press Statement issued at the end of India-Pakistan Defence Secretary level talks on Siachen.**

**Islamabad, April 7, 2007.**

The Defence Secretary level talks between Pakistan and India on the Siachen issue within the framework of the Composite Dialogue were held in Rawalpindi on April 6-7, 2007. The Pakistan delegation was led by Mr Kamran Rasool, Defence Secretary while the Indian delegation was led by Mr Shekar Dutt, Defence Secretary.

2. The discussions were held in a candid and constructive atmosphere. The two sides reaffirmed their commitment to the November 2003 ceasefire between the two countries which is holding successfully.
3. The Indian Defence Secretary also called on Rao Sikandar Iqbal , Senior Minister for Defence.
4. The Defence Secretary agreed to continue the discussions to resolve the Siachen Dispute in a peaceful manner<sup>1</sup>.

---

1. A report in the Pakistani paper *Daily Times* said that Pakistan had softened its position on the question of authentication of maps indicating the present troops position on the ground as suggested by India. The report said Pakistan had offered a package deal under which it had agreed to the Indian suggestion for authentication "but asked for time-bound withdrawal of troops to the pre-conflict position as a quid pro quo", the paper reported. "Pakistan would also like India not to use authentication for any sort of legal claims in future," the paper quoted its sources as saying. Earlier the leader of the Indian delegation Defence Secretary Shekhar Dutt on arrival in Islamabad for the talks had said "I am sure we are heading for a resolution." Meanwhile Defence Minister A. K. Antony on May 5 during his visit to Siachen reiterated that India was in no hurry to vacate unfriendly heights of the Siachen glacier and Saltoro Ridge saying there was no question of troops withdrawal until Pakistan agreed to authentication of the 110-km Actual Ground Position

---

Line (AGPL). He said: "I can't say if a solution is in sight ... Before any forward movement, we must authenticate relative troop positions on sides of the AGPL." However there was no change in the Pakistan position. India in the face of Pakistani reluctance could too make no further move. When Defence Minister was asked by journalists on June 18 whether India and Pakistan were closed to resolving the Siachen dispute, Defence Minister Mr. Antony pointed out that India had "stated very clearly" that any forward movement would depend on Pakistan agreeing to authenticate the Actual Ground Position Line (AGPL) and troops position. The Pakistani Spokesperson responded to Defence Minister's observations and said in Islamabad on June 20th "Repetition of a rigid position that Pakistan has already rejected is not going to be of any help and will lead to nowhere." It may be relevant to recall that Prime Minister Dr. Manmohan Singh had proposed two years ago that the icy heights of Siachen in Jammu and Kashmir be demilitarised and converted into a "mountain of peace". However, before undertaking demilitarisation, New Delhi has been insisting on "iron-clad" authentication by Islamabad of the present troop positions of the two countries as it is wary of repetition of Kargil experience when Pakistani troops captured mountain heights vacated by India in winter. Pakistan's reluctance to authenticate has prevented any forward movement in talks over the issue.

**283. Speech of Foreign Secretary Shivshankar Menon at Jamia Millia Islamia: "India-Pakistan: Understanding the Conflict Dynamics".**

**New Delhi, April 11, 2007.**

Vice Chancellor

Murshirul Hasan,

Prof. Rashmi Doraiswamy,

Faculty and the Researchers of the Academy of Third World Studies,

International participants,

Students, and Friends

Thank you for asking me to speak to your seminar on 'India-Pakistan: Understanding the conflict dynamics'. From the abstract of the papers and the agenda that I have seen, you would have had a stimulating discussion over the last two days. Perhaps I can offer you the limited view of a practitioner, of someone who tries to practice what you analyze.

2. Let me begin with the fundamental premise that India seeks a peaceful and prosperous periphery. We do so in our own self-interest. Without a peaceful and prosperous neighborhood, we cannot concentrate upon the urgent task of improving the lives of our people through continued and rapid social and economic development. It therefore follows that good-neighborly relations with Pakistan, or at least normalized relations and a modus vivendi, are in India's interest as a part of durable peace and stability in the sub-continent.
3. In seeking this goal, we have indeed moved forward considerably in the last three years, making progress through high level visits, the composite dialogue and other institutional mechanisms such as the Joint Commission. As a result trade and travel have been partially normalized, a ceasefire is in place and holding since November 2003, and, for the first time in sixty years over four thousand people have been permitted to travel across the LOC. Our formal bilateral trade has increased to just over one billion dollars last year and possibly three times that amount informally. Differences and issues between

the two countries, including Jammu and Kashmir, are being discussed by both countries in a dialogue that is unprecedented in its depth and quality.

4. And yet, as we all know, India's relations with Pakistan at present are not normal, let alone good neighborly. We have yet to achieve our objective of durable peace and stability.
5. I would therefore like to examine why India-Pakistan relations have been so unsatisfactory for so long, and what we might do about them. To clarify my standpoint at the outset, I believe that thanks to the peace process we stand at a moment of opportunity to remake our relations fundamentally, breaking out of past patterns, and that we need not repeat the past if we learn from it.
6. While both India and Pakistan feel that India-Pakistan relations are unsatisfactory, each of our societies has its own received wisdom on why they are so. To an outside observer these ideas might appear as self-reinforcing and self-perpetuating myths, or self-fulfilling prophecies.
7. In Pakistan, for instance, I have heard three kinds of arguments that seek to explain the unsatisfactory nature of our relations:

U One might be called the foundation myth. This believes that India wants to undo Partition, is inveterately hostile to Pakistan, and attempts through hegemonic behavior to destroy Pakistan. I am afraid that this argument flies in the face of the reality of the last sixty years and of India's evident self-interest. No political party or responsible or influential person in India wishes to undo Pakistan. Just thinking through the political, demographic, and other consequences of any such attempt proves that it would be against India's self-interest.

India has quite enough to do trying to develop herself and to transform her own society without adding a complicated attempt to re-integrate portions of the sub-continent that were separated sixty years ago. Instead, India needs a stable, prospering Pakistan, at peace with herself, on India's periphery. India sincerely believes that a stable, prosperous and moderate Pakistan is in the interest of India and the sub-continent. When our neighbors live in peace, we live in peace. I would assume that the same is true of Pakistan. A stable, prospering India could actively assist Pakistan's quest to develop herself.

- U The second argument might be called the national security myth. This argues that the asymmetry in size, power and development between the two countries makes India-Pakistan hostility inevitable. This is a rather strange argument since no two states in the world are evenly matched or identical. In fact it is the differences between them that create the complementarities that allow them to work, live and trade together. Nor do much greater asymmetries with Pakistan's other partners like the US and Western Europe and China prevent Pakistan from working with them. If, however, despite the possession of nuclear weapons and India's no-first-use policy there are feelings of insecurity in Pakistan, India is ready to discuss these issues in a dialogue on nuclear doctrines, military-to-military contacts, and military CBMs, both conventional and nuclear, either officially or through think tanks and other less official means. A small beginning has been made in the last two years, but we would be ready to build on this rapidly if Pakistan wishes to.
- U Thirdly, the Kashmir issue is sometimes used to argue that India-Pakistan hostility is inevitable. Kashmir is sometimes even described as the unfinished business of Partition, or as a reflection of a fundamental religious divide between two communities that cannot live together. This is patently false, as over thirteen centuries of Islam in the sub-continent prove. The social practice of religion in the subcontinent is in no way mutually antagonistic, whether it is Islam or Hinduism or Christianity or Buddhism or any of the myriad religions that have coexisted peacefully in India for centuries. It is the mixture of politics in the sphere of religion that has made differences over issues like Kashmir incendiary.
8. This is not to say that no inaccuracies are purveyed in India about Pakistan.
- U One of them is that Pakistan has a fundamental identity problem and can therefore only define herself in anti-Indian terms. This is clearly not the case in reality. There are several instances which one can cite which show that at the popular level there is no instinctive hostility or revulsion towards each other in either Indian or Pakistani society. This suggests that there is no real identity problem in the populace, whatever some intellectuals may like to think. In fact what one sees when Indians and Pakistanis are together is a common and spontaneous celebration of cultural affinities formed by a common history and geography rather than fear of the other.

- U The other argument that one hears in India questions the role of Pakistan Army, arguing that the Pakistan Army needs hostility towards India in order to justify its hold on power in Pakistan. To me this too does not seem a sufficient explanation. The Pakistan Army's dominance over Pakistan's internal political space has now lasted for so many years, and is so complete, that it seems no longer to need an external threat to justify its rule. The leaders of Pakistan themselves acknowledge today that Pakistan does not face external threats and that the real threats to Pakistan are internal.
- U As in Pakistan, there are also some in India who present India-Pakistan hostility as somehow a reflection of the communalism versus secularism paradigm. As I said before, this ignores the social reality of the sub-continent, the history of religious tolerance, and the current reality where it is a small handful of organizations and people who attempt to communalize politics and the situation in each of our countries.
9. I have gone through this in some detail in order to show that none of these purported reasons is a wholly satisfactory explanation for a sixty year long unhappy relationship. It is therefore necessary for us to dig deeper and perhaps to think a little more seriously about the causes of this situation. I would be very happy to hear your views on this. To start off a discussion, I would like to suggest four aspects that seem relevant to me.
10. Though India and Pakistan differ in how we make foreign policy in our countries, it is clear to me that our national goals and grand strategies need not necessarily be in conflict. There is, however, an asymmetry that operates here, or what might be called a vision deficit in the relationship. India has been relatively clear and open since the forties in enunciating a grand strategy for her foreign policy that attempts primarily to develop her own society and economy and seeks to use foreign policy to maximize this welfare function, creating strategic autonomy. When it comes to Pakistan, it has also been the Indian practice to attempt to outline a broader vision of the relationship and to describe the sort of relationship that India would like to enjoy with Pakistan. The most recent examples are a series of speeches and statements by Prime Minister Manmohan Singh, particularly that in Amritsar on March 24 2006, when he outlined his vision of a cooperative relationship between India and Pakistan which would benefit both

countries and the region. I am not aware of a similar description of Pakistan's larger or longer-term vision for a relationship with India apart from Jinnah's wish that Pakistan should be to India as Canada is to the USA. Does this vision deficit matter? It matters because even the issues that divide us would be easier to solve if one had a common goal or purpose or vision of the sort of relationship that we wish to build in the future. In theory, one can envisage several futures for India and Pakistan, ranging from a cold peace to active cooperation to regional economic integration. It would certainly be useful if we had a shared vision of where we wish to be on that spectrum of choices.

11. Real peace is more than an absence of violence. And to be secure, peace must be based on shared interests and common prosperity. I think that we already have some common interests, even in what now divides us. Unfortunately much more remains to be done by Pakistan to curb cross-border terrorism, which continues, despite some fluctuations and variations over time. In fact, the tragic earthquake in 2005 saw the rehabilitation and increasing public prominence of terrorist organizations in Pakistan and J&K. Even on the river waters that we spend so much time arguing about, the Indus Waters Treaty itself envisages a cooperative future of joint development of the river basin by both countries.
12. It therefore seems to me that we already have common interests. We could also have common prosperity if we chose to make that our goal. As Prime Minister Manmohan Singh has said, instead of looking at each other as adversaries, we must have the courage to see each other as supporting the other for the realization of a better tomorrow.
13. Secondly, the vision for India-Pakistan relations that I speak of enjoys consensus across the broad political spectrum in India. Hence the surprise that is often expressed in Pakistan when opposition politicians from India sound like members of the government. This occurs not just because of the opposition's expectation, which is reasonable in the Indian system, that they may form the government one day. It is due to the consensual basis of foreign policy that we work to create and maintain in India. The point I am trying to make is that India's domestic politics do not make India-Pakistan hostility inevitable. (One cannot say the same for Pakistan.) This requires that India-Pakistan relations should not become a subject of intra-party dispute or grandstanding in domestic political competition in

either country. That is only possible if, as I said, there is an overarching vision of the sort of a relationship that one seeks with the other. It also requires strict non-interference in each other's internal affairs.

14. Thirdly, each of us has a tendency to project upon the other our own political experience and attitudes. For instance, I have often heard Pakistani leaders speaking about Indian intelligence agencies in terms of respect and awe that no Indian would use. We need to learn to recognize the differences in our systems and in the way we work, and the effect that this has upon our ability to handle the relationship. Otherwise, these projections become self-perpetuating. Over the last sixty years we have had very little experience of working together successfully to solve problems. This needs to be built up and can only be done if we are willing to accept the differences in our approaches while building on our commonalities. For instance, we have heard a great deal from Pakistani commentators recently of some form of India-Pakistan competition in Afghanistan, using outdated nineteenth century notions from the Great Game. These reflexive reactions fail to reflect today's reality. India's commitment to the peaceful reconstruction of Afghanistan is considerable, extending to a US \$ 750 million cooperation programme. India, Afghanistan and Pakistan have a common interest and should actually be working together to bring peace and defeat extremism in our periphery. And we have an opportunity to do so together now that Afghanistan is also a member of SAARC.
15. Lastly, it seems to me that for too long a limited military strategist's view of the relationship has prevailed, which reduces it to a zero-sum game. National sovereignty and territory have always been the hardest terms in which to resolve issues. To deal successfully with our issues involves changing the terms in which we think and approaching them flexibly, or thinking outside the box. We have begun doing so. Over the last two years both leaders have started a process of dialogue and contact which has led to widespread debate in both our countries on a solution to the Kashmir issue. Contact across the LOC has resumed. Opening a new bus route between Poonch and Rawalakot, beginning truck traffic between Srinagar and Muzaffarabad, and for meeting points on the LOC are being implemented. India is also ready to open the Gilgit-Skardu bus route.

16. If we define our own security in the broader terms of people's welfare rather than the hard power of the state, many of the issues that divide India and Pakistan would be much easier to resolve. This is a lesson that India, China and other states have come to through experience over time, which we can see being implemented in our neighborhood. Every successful experience of overcoming differences and resolving problems in the rest of the world suggests that issues are easier to resolve when a cooperative atmosphere exists between the parties. If we were to grasp the opportunity that rapid economic growth in both our countries has created, opening up trade and transit, we would be enlarging constituencies for peace.

The experience of the last three years suggests that the people of India and Pakistan are actually ahead of their establishments, and have provided the driving force for the peace process. People-to-people contacts and CBMs should continue unconditionally and wholeheartedly if the harder issues are to be resolved. Let us move step by step, doing much more to create an environment in which we can move forward. As the old saying goes, "A road is made by walking."

17. You would notice that I have made no mention of the rest of the world in looking at India-Pakistan relations. You might find this strange from a diplomat. The reason is simple. Even as we are more integrated with a globalised world, our dependency on the world is less today than before. Today India and Pakistan have more independent agency in the world system than ever before. I hope and expect that this will grow in the future. The outside environment, regional and global, is supportive to our attempt to remake India-Pakistan relations, to an unprecedented extent. But in the final analysis, it is for India and Pakistan to take responsibility for our own relationship and our future.
18. I have raised these issues honestly with you because I do believe that those who do not learn from history are condemned to repeat it. There would be nothing worse for India and Pakistan than to repeat in the future the sterile pattern of hostility of the last sixty years. Thanks to the peace process, we today have an opportunity to break out of this pattern. I do hope that we will take it.

**284. Statement by Official Spokesperson on the terrorist attack in Pakistan.****New Delhi, April 29, 2007.**

India condemns the terrorist attack<sup>1</sup> and loss of life in Pakistan. The Union Home Minister has written to Mr. Aftab Ahmed Khan Sherpao, the Interior Minister of Pakistan strongly condemning the terrorist attack in Peshawar yesterday and extending condolences for the loss of life.

**285. Statement by Official Spokesperson on the comments on Jammu & Kashmir by the Islamic Conference of Foreign Ministers.****New Delhi, May 17, 2007.**

We note with regret that the Islamic Conference of Foreign Ministers has once again chosen to comment upon Jammu & Kashmir in the Islamabad Declaration adopted by the ICFM. Jammu & Kashmir is an integral part of India and the OIC has no locus standi in matters concerning India's internal affairs. We reject all such references / resolutions on Jammu & Kashmir<sup>2</sup>.

- 
1. The Spokesperson was referring to an apparent suicide bomb attack on Pakistani Interior Minister Aftab Ahmad Khan Sherpao on April 28 in which at least 28 people were killed and over 40 others injured. Mr. Sherpao survived the attack but sustained injuries on his legs from flying shrapnel and pellets. Police investigators said the suicide bomber was less than 10 feet from the interior minister when he detonated the explosive strapped around his body. The attack occurred at Station Koroona in Chrsadda town about 28 km northeast of Peshawar, in the Northwest Frontier Province.
  2. The OIC in its communiqué issued in Islamabad *inter alia* said: "On Jammu and Kashmir, the foreign ministers reaffirmed their support to the Kashmiris' right to self-determination in accordance with the relevant UN Security Council resolutions. They called for respect of human rights of the Kashmiri people and agreed to provide all possible political and diplomatic support to representatives of the Kashmiri people in their struggle against foreign occupation. They hoped that the composite dialogue between Pakistan and India would lead to a resolution of the Kashmir dispute and usher in lasting peace in South Asia."

**286. Joint Press Statement issued after India-Pakistan talks on Sir Creek under the Fourth Round of the Composite Dialogue.**

**Rawalpindi, May 18, 2007.**

India-Pakistan talks on Sir Creek under the Fourth Round of the Composite Dialogue were held at Rawalpindi from May 17-18, 2007. The Indian delegation was headed by Maj.Gen.M.Gopal Rao, Surveyor General of India and the Pakistan delegation was led by Rear Admiral Tanveer Faiz, Additional Secretary, Ministry of Defence

2. The talks were held in a cordial and friendly atmosphere.
3. The two sides expressed satisfaction at the successful completion of the joint survey of Sir Creek and adjoining areas.
4. The two sides discussed the delimitation of the maritime boundary as well as the delineation of the boundary in the Sir Creek in the light of the results of the joint survey. They exchanged maps/charts showing their respective positions on the delineation of the boundary in the Sir Creek and delimitation of the maritime boundary.
5. The two sides agreed to continue discussions for amicable settlement of the issue.
6. The Indian delegation also called on Mr. Kamran Rasool, Secretary Defence.

**287. Press Release of the Ministry of External Affairs on Government of India's decision to repatriate 40 Pakistani prisoners.**

**New Delhi, June 29, 2007.**

The Government of India has decided to repatriate 40 Pakistani prisoners including 10 fishermen. They will be handed over to Pakistani authorities at the Attari border on 30 June 2007.<sup>2</sup> We are awaiting nationality confirmation of 48 other fishermen and they will be repatriated immediately thereafter. We are committed to early release and repatriation of all those Pakistani nationals who have completed their prison sentence.

**288. Joint Press Statement on the Secretary-level talks on Promotion of Friendly Exchanges in Various Fields under the Fourth Round of the Pakistan-India Composite Dialogue.**

**Islamabad, June 29, 2007.**

The Secretary-level talks on Promotion of Friendly Exchanges in Various Fields under the Fourth Round of the Pakistan-India Composite Dialogue was held in Islamabad on 28 - 29 June 2007. The Pakistan delegation was led by Mr. Salim Gul Sheikh, Ministry of Culture and the Indian delegation was headed by Mr. Badal K. Das, Secretary, Department of Culture, Ministry of Tourism & Culture.

2. The talks were held in a friendly and cordial atmosphere. The two delegations reviewed the implementation of various proposals exchanged during the Third Round of talks in New Delhi in 2006.
3. The two sides also made a number of proposals for promoting cooperation in the fields of Art and Culture, Archeology, Sports, Youth Affairs, Traditional Systems of Medicine, Education, Information and Media, Tourism and Visits to Religious Shrines.
4. The two sides discussed a Programme of Friendly Exchanges between the two countries for the period 2007-2009, and agreed to work towards its expeditious implementation.
5. The India delegation also called on Dr. G.G. Jamal, Minister for Culture.

**289. Joint Statement issued at the end of 4th round of India-Pakistan talks at the level of Home Secretaries to combat terrorism.**

**New Delhi, July 3, 2007**

The fourth round of Home/Interior Secretary Level Talks between India and Pakistan on Terrorism and Drugs Trafficking, as a part of the continuing Composite Dialogue process between the two countries, was held in New Delhi on July 3, 2007. The Indian delegation was led by Shri Madhukar Gupta, Union Home Secretary while the Pakistan delegation was headed by Syed Kamal Shah, Secretary, Ministry of Interior.

2. Frank and candid discussions were held in a constructive and friendly atmosphere.
3. Both sides strongly condemned all acts of terrorism and underlined the imperative need for effective and sustained measures against terrorist activities.
4. The two sides recognized that terrorists and criminals in either country need to be given swift and effective punishment.
5. Both sides welcomed the release of prisoners and fishermen by each other on the eve of these Talks as a gesture of goodwill and on humane considerations.
6. They also agreed to release by August 14-15, 2007, those prisoners who have been granted consular access, whose national status has been verified and who have completed their prison sentences. To this end, they agreed that immediate steps will be taken by either side to reconcile their numbers to facilitate their early release on completion of necessary formalities.
7. The two sides also agreed to release by August 14-15, 2007 the remaining fishermen in each other's custody on completion of due process. They further decided to take immediate steps to release the fishing boats, excluding trawlers, in each other's custody.
8. Both sides agreed that the recently formed Committee on Prisoners, comprising eminent retired judges from the two countries, is a useful instrument to facilitate release and repatriation of prisoners who have

served their prison sentences. It was agreed that action would be initiated to hold two meetings, one in India and the other in Pakistan, within a period of 3 months by which time the necessary reconciliation of numbers of prisoners on both sides would have been completed.

9. Separate working groups discussed in detail the drafts of the revised Visa and Consular Access Agreements aimed at liberalizing and making existing provisions more effective. The text of the Agreement on Consular Access has been finalised. Also, they made considerable progress towards early finalisation and signing of the Visa Agreement.
10. Both sides assessed as positive the existing cooperation and information sharing between the Narcotics Control Bureau of India and the Anti Narcotics Force of Pakistan and agreed that both Agencies would enhance mutual cooperation in terms of effective and sustained steps to control drugs trafficking. They also agreed that a Memorandum of Understanding (MoU) between the two drug control agencies will be signed at the earliest possible.
11. Both sides appreciated the continuing interaction between the Central Bureau of Investigation of India and the Federal Investigation Agency of Pakistan in the areas of human trafficking, illegal immigration and counterfeit currency, and underlined the need to further intensify it.

The nodal points in both Agencies will meet periodically to facilitate early disposal of Interpol related cases.

12. It was agreed to continue the discussions within the framework of the Composite Dialogue.

**290. Press Release issued by the Ministry of Home Affairs on the India - Pakistan talks to combat terrorism.**

**New Delhi, July 4, 2007**

In the Home Secretary Level talks between India and Pakistan on Terrorism and Drug Trafficking, held yesterday, the following main points emerged and the decisions taken :-

- (i) India raised its concerns relating to terrorism and fugitives. It was agreed that effective and sustained measures would be taken to combat the menace of terrorism.
  - (ii) It was agreed that terrorists and criminals in either country would be effectively dealt with.
  - (iii) It was agreed to enhance the cooperation between CBI and FIA in the areas of human trafficking, illegal immigration and counterfeit currency. The nodal points in both the agencies will meet periodically to facilitate early action on Interpol related cases.
  - (iv) It was agreed that all fishermen will be released by August 14-15, 2007. It was also agreed that fishing boats in each other's custody will also be released.
  - (v) Efforts will be made by both sides to reconcile the number and identities of prisoners in each other's jails.
  - (vi) All those prisoners who have completed their sentences will also be released by both sides by August 14-15, 2007.
  - (vii) A protocol on Consular Access was discussed in detail and was finalized.
  - (viii) Detailed discussions took place on the draft Visa Agreement. Considerable progress was made in finalizing some of the provisions.
  - (ix) After detailed discussions, it was agreed that an MoU on Narcotics Control between the two agencies could be signed in the near future.
2. The discussions were held in a candid and cordial atmosphere.

## **291. Joint Statement on the Fourth Round of India-Pakistan talks on Economic and Commercial Cooperation.**

**New Delhi, August 1, 2008.**

The Fourth Round of India-Pakistan talks on Economic and Commercial Cooperation within the framework of the Composite Dialogue was held on 31 July-1 August 2007 in New Delhi.

The Indian delegation was led by Commerce Secretary, Shri G.K.Pillai and the Pakistani delegation was led by Syed Asif Shah, Secretary, Ministry of Commerce.

The talks were held in a cordial and constructive atmosphere. The two sides recognized the satisfactory progress on the initiatives agreed during the Third Round of the talks held in Islamabad on 28-31 March 2006. The two sides agreed on the following:-

- U Both sides emphasized the importance of having bank branches in either country to facilitate trade. Both sides agreed to finalise the processing of the applications for the two bank branches in either country within six months of the receipt of applications or by 31st December 2007 whichever is later.
- U To facilitate import of cement from Pakistan, the Indian side informed that India will complete all statutory certification related formalities on a fast track. The Indian side informed that it is also in the process of making appropriate policy changes to accept third party certification.
- U To facilitate import of tea from India it was agreed to facilitate and encourage the trading of tea through rail. Pakistan side noted the request for providing duty concessions on import of Indian tea,
- U Pakistan will nominate representatives to the Joint Working Group to discuss the issues relating to joint registration of Basmati rice as GI and the first meeting of the Group will be held at an early date. The Pakistan side raised the issue of Notification issued by India declaring 'Super Basmati rice' as an approved variety for export. India agreed to look into this issue.
- U The Indian delegation handed over a list of 484 tariff lines for inclusion in the Positive List of items importable from India. The Pakistan side agreed to examine the request in consultation with stakeholders.

- U The Indian side informed that a Task Force comprising of representatives from various ministries and departments of Government of India has been constituted to address the issues of Non-Tariff Barriers (NTBs) and para-tariffs. The Task Force will make recommendations in a time bound manner for removing these barriers to provide greater market access to all members of SAARC.
- U In order to address the issue of imbalance in bilateral trade, the Indian side invited the Pakistan side to identify twenty products of its export interest so that India could inform Pakistan about the detailed import regime on these products with a view to facilitating their import into India.
- U Both sides will facilitate holding of trade exhibitions in each other's country. The Indian side invited Pakistan to organize a "Made in Pakistan" Trade Fair in India.
- U A delegation from Pakistan was invited to visit India to see some of the IT-enabled tele-medicine facilities, with the objective of exploring avenues of cooperation in this field.
- U The Indian side agreed to convey a response by 30th September 2007 to the draft MOU on Assistance of Mutual Cooperation in Capital Markets conveyed by Security and Exchange Commission of Pakistan (SECP) to Security Exchange Board of India (SEBI).
- U Both sides noted with satisfaction the progress made on laying of the optical fibre link and agreed to establish connectivity at an early date.
- U The Export Credit Guarantee Corporation of India Limited (ECGC) will provide detailed proposals for capacity development in the field of export insurance cooperation for consideration by Pakistan by 30th September 2007.
- U The Pakistan side raised the issue of amounts outstanding against the Indian Post Office. The Indian side handed over an aide memoire to the Pakistan side. Both sides agreed to discuss the matter further for settling the issue.
- U The Indian side made a presentation on the state of development of Integrated Check-post (ICP) planned to be developed at Wagah/Attari Border at the Indian side. The Pakistan side also briefed on the state of

infrastructure and proposed plan for development on its side. Both sides agreed to continue the exchange of information on the development of ICPs on either side.

- U Both sides noted with satisfaction the initiative to allow cross border movement of trucks, up to designated points at Wagah/Attari, for unloading/reloading of cargo. It was decided that the first technical level meeting to work out modalities would be held on 20th August 2007 at the Wagah border on the Pakistan side<sup>1</sup>.
- U To facilitate movement of cargo it was decided that Technical Teams from Pakistan and Indian Railways will meet to decide the modalities for inter change of air braked stock and containers.
- U Indian side also proposed that in order to reduce pressure on Attari-Lahore Rail route and to improve trade, the Munabao-Khokrapar route should be opened for freight movement. Pakistan side noted the proposal.
- U Both sides agreed to constitute a Joint Group headed by Joint Secretaries of Commerce of both countries to monitor and coordinate the decisions taken during the Fourth Round of talks on economic and commercial cooperation within the framework of Composite Dialogue.

- 
1. During his visit to New Delhi the leader of the Pakistani delegation Syed Asif Shah had a meeting with the Minister of State for Commerce Jairam Ramesh who later told the media that Pakistan moving further in enhancing trade relations and giving an impetus to the peace initiative as well, expressed its willingness to allow trade through the Line of Control (LoC) in Jammu and Kashmir in a limited number of goods. "In my discussions with Mr. Shah, I raised the issue of whether trade can be done through LoC, to which Pakistan's Commerce Secretary's replied that Pakistan was in favour of duty-free movement of goods through this route for a limited number of items," Mr. Ramesh said. Interestingly Pakistan's willingness for free trade through Jammu and Kashmir came barely a fortnight after Prime Minister Manmohan Singh stated that the 'Line of Control' could become a line of peace with a free flow of ideas, goods, services and people. When asked whether the trade on the LOC could begin this year, Mr. Shah told Mr. Ramesh certain infrastructure needed to be rebuilt since many bridges had collapsed in the devastating earthquake in October 2005. Mr. Shah also told Mr. Ramesh that there was a feeling of openness in trade and "we need to take it forward." Mr. Shah said that he would take back home India's proposal on investment along with trade in merchandise. Mr. Ramesh suggested to the Pakistani Commerce Secretary that the trade point in Jammu and Kashmir could start operating on the lines of the Nathu La Pass in Sikkim. "If we can open Nathu La for trade with China, there is no reason [why] we cannot do it in Jammu and Kashmir," Mr. Ramesh said.

**292. Joint Statement on the Third Meeting of India-Pakistan Joint Study Group (JSG) at Commerce Secretary - level.**

**New Delhi, August 3, 2007.**

The Third Meeting of India-Pakistan Joint Study Group (JSG) at Commerce Secretary -Level was held in New Delhi on 2 August 2007, co-chaired by Mr. G. K. Pillai, Commerce Secretary, Government of India, and Syed Asif Shah, Secretary, Ministry of Commerce, Government of Pakistan.

2. Commerce Secretary, Government of India, welcomed the visiting delegation of Pakistan and underscored the need for the JSG to prepare their recommendations in a time bound manner. The JSG report should aim at developing a policy framework to maximize benefits of geographical proximity, identifying opportunities for enhancing economic cooperation and create a framework for facilitation of trade in goods including elements such as customs cooperation, standards, certification system etc.
3. Commerce Secretary, Government of Pakistan, while agreeing with the need to facilitate trade, said that in the spirit of the Article XXIV of GATT, India should consider creating special provision for giving more market access to Pakistan. India noted the request. He proposed that the Sub Groups on Customs Cooperation and Trade Facilitation Measures, SPS & TBT Measures, and Standards & Conformance should meet every six months in order to ensure speedy implementation of the recommendations of the JSG, which was agreed to by Commerce Secretary, Government of India.
4. The Pakistan side proposed to set up a sub group to address the issue of market access arising out of subsidies extended to the agriculture sector in India; the Indian side noted the proposal.
5. The Sub-groups and Working groups on Custom Cooperation and Trade Facilitation Measures; Standards and Conformance and Sanitary and Phyto-sanitary measures, after their deliberations, prepared their respective Records of Discussion.
6. The Sub Group on Customs Cooperation and Trade Facilitation Measures reached consensus on the following issues:

- a) To work towards a bilateral agreement on Customs Cooperation on specific bilateral issues;
  - b) To constitute a Customs Border Liaison Committee at Attari-Wagah border to meet once in two months to resolve the operational issues at the field level;
  - c) To work towards electronic exchange of information, including to verify the adherence to the Rules of Origin;
  - d) To meet at six monthly interval alternatively in India and Pakistan.
7. The Sub Group on Sanitary and Phyto-Sanitary Measures reached consensus on the following issues:
- a) It was agreed to exchange a list of 20 products of export interest to both sides by 31 August 2007 and prepare a Compendium of procedures for their trade facilitation. Though this would be a continuous process, efforts would be made to complete the exercise and place it on their respective websites by 31 December 2007.
  - b) The Non Tariff (SPS & TBT) issues associated with the identified commodities or any other product would be exchanged by 30 September 2007 and the same would be resolved in the working group meeting scheduled for November 2007.
  - c) Two country level workshops, one in each country, would be organized, the first to be held in the first week of November 2007 in Pakistan and the second in India in the first week of January 2008.
  - d) It was agreed to mutually extend technical assistance in capacity building and to identify the areas in which the same can be extended.
  - e) Both sides agreed to forge consultative mechanisms for taking common positions in international standard setting fora. As a first step it was agreed that international meetings under Codex, IPPC, OIE, that are of interest to both sides would be identified for the next six months and the possibility

of exchange of views prior to these meetings would be explored. This will be done by 30 September 2007.

- f) It was decided to finalize an agreement on SPS & TBT for acceptance of each other's inspection and certification systems. The first draft in this respect would be exchanged by 31 December 2007.
  - g) On the specific issue of testing of azo-dyes in textile products imported from Pakistan, India will consider for acceptance, certification by a laboratory duly accredited, as per international norms. The Pakistan side will send the details of such laboratories, including the details of the accreditation body, to the Indian side by 31st August, 2007
8. The Sub Group on Standards and Conformance reached consensus on the following issues:
- a) Comments on draft MOU between BIS and PSQCA, if any would be sent by Pakistan by the end of August 2007. India would reciprocate with the final draft by the 30 September 2007.
  - b) In reference to Mutual Recognition Agreement (MRA), Pakistan side assured that the said document would be sent by the 30 September 2007. India would respond on these comments by the 30 November 2007.
  - c) To facilitate export of cement from Pakistan to India, BIS agreed to finalize the process of certification of the three Pakistani cement factories, from which samples have already been taken, by 15 September 2007. It was further agreed to put other applications by Pakistani cement manufacturers for BIS registration/certification on a fast track.
  - d) Both sides agreed that initially the list of products under mandatory certification in both countries would be considered for examination for trade facilitation. The information on testing facilities for such items would be exchanged between both countries within a period of one month.

- e) For the purpose of harmonization of standards it was mutually agreed that initially standards for Cement may be taken as pilot project, to be extended to other products of mutual interest.
9. Both sides agreed on the timelines for various activities recommended by the sub-group and the working groups.
10. Commerce Secretary of Pakistan expressed his appreciation and thanks for the excellent arrangement made for the meeting and the hospitality extended by the Government of India to the Pakistan delegation.

**293. Briefing by Official Spokesperson on the release of Pakistani nationals by India, and Indian fishermen and prisoners by Pakistan.**

**New Delhi, August 13, 2007.**

...On the release of prisoners, let me share with you that Government of India is releasing 72 Pakistani nationals including 48 fishermen and 24 prisoners on 14 August 2007 in accordance with the decision taken at the meeting of Home Secretaries of both countries in New Delhi last month.

We have noted that the Government of Pakistan has announced the release of 100 Indian fishermen and 35 prisoners on 13 August 2007. We had hoped that in accordance with the decisions announced during the Home Secretary level talks, all fishermen in custody in Pakistan as also the boats would have been released.

We will continue with our efforts with the Government of Pakistan to ensure the early repatriation of all Indian national in custody in Pakistan. We also look forward to the release of 327 Indian boats detained by Pakistan.

**Question:** How many fishermen and other Indian prisoners are now left in Pakistan?

**Official Spokesperson:** After this release, 296 Indian fishermen and 327 boats are in Pakistani custody. A total of 156 Indian prisoners are stated to be in Pakistani custody of which the nationality status of 47 has been

confirmed. So after the release of 35 prisoners as announced by Pakistan, a total of 121 prisoners are remaining in Pakistani custody. So that is 296 fishermen and 121 prisoners.

**Question:** How many Pakistani prisoners are left in India?

**Official Spokesperson:** In India after the release of 24 prisoners has been announced, 155 confirmed Pakistani prisoners remain in India and are serving their sentences. After the release of 48 fishermen by India all those whose consular access has been completed and National Status confirmed have been repatriated to Pakistan. Only 8 Pakistani fishermen who were arrested on 17 July 2007 remain and they will be produced for consular access shortly.

Thank you.

## **294. Joint Statement issued at the conclusion of the India and Pakistan trade facilitation talks.**

### **Wagah border, August 20, 2007.**

The technical-level meeting between Pakistan and India to work out the modalities to allow cross border movement of trucks, up to designated points at Wagah/Attari, for unloading/reloading of cargo was held at Wagah on August 20, 2007. The Pakistan side was led by Mr. Ali Salman Abbasi, Collector of Customs, Lahore and the Indian side was led by Shri S. K. Swami, Director (BM), Ministry of Home Affairs.

2. The talks were held in a cordial and constructive atmosphere. Recognizing the importance of trade facilitation measures, the two sides agreed on the following:
  - i) trucks from one side would be allowed to go to designated points on the other side at the Wagah/Attari border for unloading of cargo;
  - ii) a hotline would be established between the two Customs authorities at the Wagah/Attari border;
  - iii) to obviate the need for passports, visas and international driving license, a system of computerized single entry permits

would be introduced. These permits, which would be issued in triplicate by the respective Customs authorities, would contain a picture ID of the driver, his name, address, license number and details of the vehicle;

- iv) initially, trucks of up to the size of ten-wheelers would be allowed to cross over to the other side;
- v) the drivers of these trucks would wear bright yellow jackets/ vests with "Driver-Pakistan" inscribed on the back of the Pakistani drivers and "Driver-India" inscribed on the back of the Indian drivers;
- vi) the operation of trucks shall take place between 0700-1400 hours PST and 0730-1430 hours IST;
- vii) in case of force majeure, the Customs authorities of the two sides at Wagah/Attari border shall establish hotline contact to work out the modalities of further action;
- viii) the Customs authorities of the two sides may also consult each other to resolve local issues as and when required;
- ix) to operationalize the system by October 1,2007;
- x) to further facilitate this procedure, the two sides shall open a dedicated cargo gate towards South-East of the existing Pakistan Customs House and South-West of the existing Indian Customs House at the Wagah/Attari border. A fenced path shall connect the two Customs Houses through this gate; and
- xi) upon completion of this dedicated cargo gate, all cargo traffic shall pass through it.

**295. Joint Statement on Composite Dialogue between India and Pakistan, on the Tulbul Navigation Project/Wullar Barrage.**

**New Delhi, August 31, 2007.**

As part of the Composite Dialogue between India and Pakistan, the delegations of the two countries met in New Delhi on 30-31 August 2007 for discussions on the Tulbul Navigation Project/Wullar Barrage. The Indian delegation was led by Mrs. Gauri Chatterji, Secretary, Ministry of Water Resources, Government of India and the Pakistan delegation was led by Mr. Muhammad Ismail Qureshi, Secretary, Ministry of Water and Power, Government of Pakistan.

2. The talks were held in a cordial and constructive atmosphere. The two sides further discussed their respective positions on the project and had a better appreciation of each other's views. They reaffirmed their commitment to the Indus Waters Treaty of 1960.
3. The two sides emphasized the need for an early and amicable resolution of the issue in accordance with the provisions of the Indus Waters Treaty of 1960 for the socio-economic development of the peoples of the two countries. The Secretaries agreed to hold discussions including at technical-level on mutually acceptable dates. Both sides looked forward to the next round of talks under the Composite Dialogue with a view to resolving the issue at an early date.
4. The Pakistan delegation also called on H.E. Prof. Saifuddin Soz, Minister for Water Resources, Government of India<sup>1</sup>.

---

1. According to a report in the Chennai based paper *the Hindu* on September 5, "India and Pakistan have agreed to set up a technical-level mechanism to take forward their talks on the Tulbul Navigation Project in the Baramullah district of Jammu and Kashmir. This is the first time that the two sides have agreed on a mechanism. India says the project is a "navigation lock" on river Jhelum, while Pakistan maintains it is a "barrage." Mr. Qureshi, Leader of the Pakistani delegation who called on Water Resources Minister Saifuddin Soz, told media persons that the talks held as part of the Composite Dialogue were "cordial." Describing the talks as a "step in the forward direction," Mr Soz said India was not violating any aspect of the Indus Water Treaty with Pakistan. Navigation was permissible under the treaty. "No irrigation potential is being created and no dam or barrage is being built. The Pakistan team visited the Wullar lake area in March. On their request, India allowed it as a goodwill gesture. We are confident that the issue will be settled amicably," he said. The Tulbul Navigation Project was started by India in 1984 and was halted in 1986 after Pakistan raised objections."

## **296. Reaction of the External Affairs Minister Pranab Mukherjee to the bomb blasts in Rawalpindi.**

**New Delhi, September 4, 2007.**

External Affairs Minister Pranab Mukherjee said on September 4: "It is very unfortunate<sup>1</sup>. We have sympathy for the victims," He was speaking on the sidelines of a conference of Editors from India, Brazil and South Africa in New Delhi.

"During the Home Secretary-level meeting, we suggested to them and we have given some particulars as we normally give to them about those who are indulging in all sorts of activities like insurgency and other terrorist activity," said the Minister.

"We seek their cooperation."

---

1. The External Affairs Minister was referring to the two suicide bomb attacks on two localities in the high-security zone in the garrison city of Rawalpindi on September 4, killing 27 people and injuring more than 80 others. Most of the people killed or injured in the blasts belonged to defence services, four of them officers, though several civilian passers-by and schoolchildren were among the victims. Authorities described the two blasts as a coordinated move to hit high-profile targets in the military garrison. Military spokesman and Director-General of Inter-Services Public Relations Maj-Gen Waheed Arshad said the attacks were suicide bombings aimed at hitting personnel of the security forces and other people. Later, briefing journalists in Islamabad, interior ministry spokesman Brig (retd) Javed Iqbal Cheema said the authorities had reasons to believe that the latest attacks were the work of the same group that had earlier carried out the attacks in Islamabad and some other parts of the country.

**297. Question in the Lok Sabha: "Statement on Kashmir Issue".**

**New Delhi, September 5, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether attention of the Government has been drawn towards the statement of Parliamentary Secretary for Defence of Pakistan in which he has spoken about solving the Kashmir issue through Jihad; and
- (b) if so, the details thereof and the reaction of the government thereto?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a)&(b) Government are aware of the press reports on a statement by Pakistan Parliamentary Secretary for Defence Major (Retd.) Sayed Tanvir Hussain in the National Assembly of Pakistan during a debate on Pakistan's Foreign Policy advocating jihad for the "freedom" of Kashmir. The Indian High Commission in Islamabad has protested to the Government of Pakistan at this gratuitous attack on India.

**298. Question in the Lok Sabha: "Talks between India and Pakistan".**

**New Delhi, September 5, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether any talks were held between India and Pakistan on the various issues of bilateral relations including Kashmir during the last six months;
- (b) if so, the details and the outcome thereof;
- (c) whether any treaties and agreements were signed between the two countries;
- (d) if so, the details thereof;
- (e) whether the issues relating to confidence building measures were discussed in the recent past;

- (f) if so, the details and outcome thereof;
- (g) whether any specific offer has been made by some other countries in the recent past to mediate in the process negotiations between India and Pakistan; and
- (h) if so, the details thereof ?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

(a)&(b) The Foreign Secretaries met in Islamabad on March 13-14, 2007 to initiate the fourth round of the Composite Dialogue and to review the third round. Other talks held within the framework of the Composite Dialogue during the last six months include: (i) The Defence Secretary level talks on Siachen on April 6-7, 2007 in Rawalpindi, (ii) Sir Creek talks on May 17-18, 2007 in Rawalpindi, (iii) Secretary (Culture) talks on June 28-29, 2007 in Islamabad, (iv) The Home Secretary-level talks on July 3-4, 2007 in New Delhi, (v) The Commerce Secretary talks on July 31-Aug 2, 2007 in New Delhi, (vi) The Secretary Water Resources-level talks on Tulbul Navigation Project on August 30-31, 2007 in New Delhi. The Foreign Secretaries discussed Peace & Security, including CBMs and Jammu & Kashmir. On CBMs the two sides agreed: (i) to expedite negotiations to conclude an Agreement on Prevention of Incidents at Sea, (ii) to fully observe the ceasefire on the IB, LOC and AGPL, (iii) to conclude and sign an Agreement on Modalities for the Conduct of Quarterly Flag meetings at Sectors to be agreed upon, (iv) conclude and sign a Framework Agreement on Speedy Return of Inadvertent Line Crossers, (v) to conclude an agreement on No Development of New Posts and Defence Works along the LOC and (vi) to propose drafts for new border control guidelines along the International Border. On the issue of Jammu and Kashmir, the two sides agreed (i) to ensure implementation of the already agreed Jammu and Kashmir related CBMs, (ii) to ensure operationalisation of Truck service, (iii) to ensure operationalisation/rationalisation of the five crossing points. To enhance People-to-People Contacts both sides agreed to conclude (i) Bilateral Visa Agreement, (ii) Agreement on Consular Access, (iii) to revise the Protocol on Visits to Religious Places and (iv) that the Judicial Committee on Prisoners would be composed of four judges from each side to ensure humane treatment and expeditious release of prisoners on both sides. On Nuclear CBMs, the two sides decided to hold discussions on security doctrines.

- (c) & (d) An Agreement on Reducing the Risk from Accidents Relating to Nuclear Weapons was signed on February 21, 2007 in New Delhi.
- (e) & (f) Yes. Details as at Paragraph (b) above.
- (g) All issues of mutual concern are being discussed bilaterally between India and Pakistan.
- (h) Does not arise.

**299. Reported apprehensions of External Affairs Minister Pranab Mukherjee regarding use of arms supplied by the United States to Pakistan.**

**New Delhi, September 7, 2007.**

India is apprehensive that U.S. weapons being supplied to Pakistan could be used against it in the event of a war.

Citing a study conducted by a Washington based think tank, External Affairs Minister Pranab Mukherjee said, "This assistance (in weapons) is often justified as playing a critical role in the war on terrorism, whereas, in reality, the weapons systems are often 'prestige items' to help Pakistan in the event of a war with India. "The study emphasises that few of these weapons are likely to provide much help in rooting out the Al-Qaeda or the Taliban."

Mr. Mukherjee said that of the \$10-billion assistance provided by the U.S. to Pakistan over the past five-plus years, roughly 18 per cent or \$1.8 billions had gone towards security assistance. This assistance was often justified as playing a critical role in the war with Pakistan but India did not subscribe to this view, he said.

"The Government of India's position in this regard is well known. We are against an arms race in the region. [The] government's concerns have been expressed to the U.S. and other nations. [The] government will take all necessary steps to safeguard India's security," said the Minister.

While expressing doubts over the efficacy of the U.S.-supplied defence platforms in the fight against terrorism, Mr. Mukherjee said the aid was tied to Islamabad's performance in the fight against terrorism.

The 'Implementing Recommendations of the 9/11 Commission Act of 2007' signed into law by U.S. President George Bush last month has prescribed limitations on security assistance to Pakistan for fiscal 2008.

Funds for the subsequent years will depend on Pakistan showing progress in "preventing Al-Qaeda and other terrorist organisations from operating in the territory of Pakistan, including eliminating terrorist camps or facilities, arresting members and leaders of terrorist organisations and countering recruitment efforts."

**300. Extract from External Affairs Minister Pranab Mukherjee's interview on Charlie Rose show.**

\* \* \* \* \*

**Charlie Rose:** Do you worry about the stability of the Pakistan government?

**Pranab Mukherjee:** For the individuals concerned, I cannot give any guarantee that a certain individual A or B will continue. But what we want, what my desire, I can tell you, my desire with respect to Pakistan, is that there be stability and prosperity in Pakistan. It's helpful to me for my own stability, for my own development for my own prosperity.

And insofar as the current problems are concerned, I hope in the whole subcontinent which was part of larger India before 60 years, it has its own way of self-correcting the crisis that it is (ph) to face. And Pakistan is no exception.

Therefore, if Pakistan finds its own way of correcting the present problem, I will not be surprised. It may be possible, because at one point of time, it appeared that the judiciary is in total confrontation position with -- but it is not so. Therefore, in relationships between different organs (ph), between different countries, sometimes it may appear that it's going to be insurmountable, but in course of time, it gets it corrected.

**301. Joint Statement on 4th Round of India-Pakistan Expert Level Dialogue on Conventional Confidence Building Measures.**

**New Delhi, October 18, 2007.**

The fourth round of India -Pakistan Expert Level Dialogue on Conventional Confidence Building Measures (CBMs) was held in New Delhi on October 18, 2007. The Indian delegation was led by Mr. T.C.A Raghavan, Joint Secretary, Ministry of External Affairs while Mr. Aizaz Ahmad Choudhary, Director General (SA), Ministry of Foreign Affairs, led the Pakistan delegation to the talks.

2. Discussions were held in a cordial and constructive atmosphere.
3. As mandated by the respective Foreign Secretaries, the two sides reviewed the implementation of the existing CBMs.
4. Consultations continued with the aim of strengthening the ongoing process of confidence building in the conventional field.
5. The two sides reiterated their commitment to uphold the ceasefire.
6. They also agreed to report the progress made in the present round of talks to the respective Foreign Secretaries.

**302. Briefing points by Official Spokesperson on External Affairs Minister's telephonic conversation with Mrs. Benazir Bhutto.****New Delhi, October 19, 2007.**

- U EAM spoke to Mrs. Benazir Bhutto late this evening. He expressed his sorrow at the dastardly act and was thankful that she had escaped unhurt.
- U He also expressed condolences for those who had lost their lives<sup>1</sup>.

**303. Briefing Points by Official Spokesperson on developments in Pakistan.****New Delhi, October 19, 2007.**

- U Prime Minister Dr. Manmohan Singh is sending a letter to President Musharraf expressing his deep concern on the dastardly act in Karachi. The Prime Minister, in his message, reiterates that such acts of violence and terrorism are totally unacceptable in any civilized society and are to be strongly condemned.
- U Prime Minister Dr. Manmohan Singh and External Affairs Minister Shri Pranab Mukherjee have conveyed their personal concerns and sympathies to Ms. Benazir Bhutto through the High Commissioner of India Shri Satyabrata Pal who spoke to Ms. Benazir Bhutto this afternoon. Prime Minister and External Affairs Minister also conveyed their deep sympathies and condolences to the families of those who lost their lives in the Karachi blast. Ms. Bhutto thanked the PM, EAM and Government and people of India for their concern and prayers.

---

1. The Government of India also conveyed a separate message to Benazir Bhutto through its High Commissioner which read: "We are horrified by the loss of innocent life caused by the terrorist attack on your convoy and the injuries to some of your senior colleagues. We are relieved that you yourself are unhurt. Terrorism is a common challenge to all of us in South Asia. We look forward to working with you to defeat terrorism in all its forms." On the same day the Spokesperson of the MEA also issued a short statement which said: "We strongly condemn the terrorist attack in Karachi yesterday. It is reprehensible that senior political figures are targeted in this way with such loss of innocent life. The spectre of terrorism confronting our region requires strong and determined action by all our Governments."

**304. Joint Statement on India-Pakistan expert-level dialogue on Nuclear Confidence Building Measures (CBMs).**

**New Delhi, October 19, 2007.**

The fifth round of India-Pakistan expert-level talks on nuclear and missiles related CBMs, begun in June 2004 as part of the Composite Dialogue process, was held in New Delhi on 19 October 2007. Shri K. C. Singh, Additional Secretary (International Organizations), Ministry of External Affairs led the Indian side while the Pakistan delegation was led by Mr. Khalid Aziz Babar, Additional Secretary (UN&EC), Ministry of Foreign Affairs. Discussions focused on a review of the implementation of existing agreements on CBMs and on disarmament and non-proliferation related issues of mutual interest in multilateral forums as provided for in the Lahore Memorandum of Understanding (MoU) of 1999. They were held in a cordial and constructive atmosphere. The two sides agreed to meet in Islamabad next to carry forward the dialogue and the process of confidence-building in the nuclear and missile area.

**305. Joint Statement issued on the Second Meeting of India Pakistan Joint Anti Terrorism Mechanism.**

**New Delhi, October 22, 2007.**

In pursuance of the decision of the President of Pakistan and the Prime Minister of India in Havana, Cuba on 16th September 2006, the second meeting of the Anti-Terrorism Mechanism was held in New Delhi on 22nd October 2007. The Indian delegation was headed by Mr. K.C. Singh, Additional Secretary (IO), Ministry of External Affairs of India. The Pakistan delegation was led by Mr. Khalid Aziz Babar, Additional Secretary (UN&EC), Ministry of Foreign Affairs of Pakistan.

2. The two sides reviewed the follow up steps taken on the information shared during the first meeting of the Joint Anti Terrorism Mechanism held in Islamabad on 6th March 2007 and in the intervening period.
3. Both sides shared new information on terrorist incidents including those which have occurred since the last meeting. They agreed to

continue to work to identify measures, exchange specific information and assist in investigations.

4. The next meeting of the Mechanism will be held in Islamabad according to the schedule already agreed upon<sup>1</sup>.

- 
1. The Indian Express story on the meeting of the Joint Anti Terrorism Mechanism makes an interesting reading: "The Pakistani link to the recent terror strikes in Hyderabad, Ajmer and Ludhiana came to the fore on Monday as India sought Pakistan's help in tracking down suspects who are believed to have cross-border links. India is learnt to have referred to Harkat-ul-Jihadi-Islami (HuJI) and its commander Shahid Bilal, who is alleged to have masterminded nearly all the recent terror strikes in the country. The recent terror strikes figured in the second meeting of the Joint Anti-Terrorism Mechanism between India and Pakistan held here on Monday," a senior official said. The meeting also came days after the Ludhiana blast and amid Indian concern over attempts in Pakistan to build up a radical Sikh environment. Investigators feel the Mecca Masjid attack and the Ajmer blast were carried out by the same group - HuJI Bangladesh - due to similarities in the modus operandi. Both used a mobile phone trigger and unexploded devices were found after both strikes. According to security agencies, Bilal fled India after the attack on the STF headquarters in Hyderabad in 2005 and took refuge in Karachi. Bilal, who was drafted into militancy by Rasool Khan Party, developed a terror network in and around Hyderabad, initially using modules of Lashkar-e-Toiba and subsequently drawing in HuJI cadre who came in from Bangladesh. India also asked Pakistan about action taken on information it had shared on the Samjhauta Express attack, the Malegaon strike and the Mumbai blasts at the first meeting in Islamabad in March. No arrests have been made yet in the Hyderabad blasts (Mecca Masjid and the twin blasts), the Ajmer strike or the Ludhiana blast. On its part, Pakistan is learnt to have raised terror attacks in the country and sought India's assistance in working out some recent cases. The two sides reviewed follow-up action on information shared at the first meeting of the mechanism in Islamabad in March this year. At the first meeting, the two sides discussed the framework that needed to be put in place to share information related to terrorism. The second meeting was delayed after Pakistan sought time since its pointsman for the talks had retired. The feeling here, however, was that the delay had to do with the volatile internal situation in Pakistan." (The mechanism was set up following an agreement between Prime Minister Manmohan Singh and President Pervez Musharraf in Havana in September 2006.)

**306. Response of Official Spokesperson to a question on the mandate of the Anti-Terrorism Mechanism.**

**New Delhi, October 30, 2007.**

Information relating to all terrorist attacks was discussed and exchanged in the context of Pakistan's assurance of 6 January 2004 of not permitting territory in its control to be used to support terrorism in any form. The mandate of the Mechanism is helping investigations on either side related to terrorist acts and prevention of violence and terrorist acts in the two countries<sup>1</sup>.

---

1. The Spokesperson was responding to the Pakistan Foreign Office Spokesman's denial of October 29 to the New Delhi daily *Indian Express* story of the same day on the meeting of India-Pakistan Anti-Terrorism Mechanism (held in New Delhi on October 22), which said that "for first time Pak accepts Indian dossier on terror in J&K". The Pakistani Spokesman described the *Indian Express* story as baseless and said: "The purview of talks under the Joint Anti Terrorism Mechanism does not cover Jammu and Kashmir , which is a disputed territory, and is being discussed under the Composite Dialogue process. The scope of discussions under the Mechanism relates to the terrorist incidents in India and Pakistan."

### 307. Statement by Official Spokesperson on developments in Pakistan.

**New Delhi, November 3, 2007.**

We regret the difficult times that Pakistan is passing through. We trust that conditions of normalcy will soon return permitting Pakistan's transition to stability and democracy to continue<sup>U</sup>.

---

<sup>U</sup> The Spokesman's statement came after the Prime Minister Manmohan Singh held an unscheduled meeting with External Affairs Minister Pranab Mukherjee in the evening of November 3 to take stock of the developments in Pakistan. It may be recalled that that day President Musharraf had declared a State of Emergency in Pakistan, suspended the Constitution and issued a Provisional Constitution Order. The Chief Justice of the Supreme Court was removed from his post and all other judges were asked to take a fresh oath of office. The emergency was justified on account of threat to the State from Islamic militancy. Talking to *The Hindu* after the meeting at the Prime Minister's residence, National Security Adviser M.K. Narayanan said: "We are treating it as an internal problem of Pakistan, but we are watchful and on the alert." The Congress party's media in charge Veerappa Moily said: "We have been anxious for democracy to emerge in Pakistan." BJP leader Yashwant Sinha said the situation was a much stronger case for international concern than Myanmar. On November 6 with developments in Pakistan unfolding at a fast pace, External Affairs Minister Pranab Mukherjee expressed the hope that the democratic process would soon begin in the neighbouring country, where Emergency was imposed last weekend. He said New Delhi wanted peace, prosperity and stability to prevail in Pakistan. "We are watching the situation closely," the External Minister told newsmen after inaugurating the first India-Africa Hydrocarbon Conference. "We do hope the process of democratisation in Pakistan to begin soon and the people of Pakistan will get an opportunity to have their government as per their Constitution."

On November 12 the Defence Minister A. K. Antony said in Kozhikode (Kerala) that "India is closely monitoring the situation in Pakistan and taking adequate security measures along the borders with that country." He told presspersons that the developments in Pakistan warranted taking several precautionary measures. "All steps have been taken to protect our borders as well as the Line of Control. As of now the situation is peaceful," he maintained. Barring occasional attempts of infiltration by Pakistan extremist forces, the border had not witnessed any exchange of fire in the last three years. India hoped that the peaceful atmosphere would continue, Mr. Antony said. The Union Minister termed the recent incidents in Pakistan as unfortunate. "We wish that normality would return and democracy restored in that country soon," he said. He said that India did not want to do anything that would disturb the existing bilateral relationship with Pakistan. The recent developments in that country were its internal matter, the Defence Minister said.

**308. Press Release of the Ministry of External Affairs regarding protest lodged with the Pakistan Government on the break-in at the residence of Indian High Commissioner in Islamabad.**

**New Delhi, November 14, 2007.**

The Residence of the High Commissioner of India in Islamabad was broken into on the night of 12th November 2007. A strong protest has been lodged with the Government of Pakistan in Islamabad and with the High Commission of Pakistan in New Delhi<sup>1</sup>.

---

1. The break-in had occurred in the intervening night of November 12 and 13 when the High Commissioner was in residence. Since the residence was located in the high security area and was under the surveillance of the Pakistani security agencies, New Delhi suspected involvement of some state agencies and hence the protest. In New Delhi the Ministry had summoned the Deputy High Commissioner of Pakistan Afrasiab to South Block to lodge the protest.

**309. Reaction of Official Spokesperson on Commonwealth's decision to suspend Pakistan from its membership.****Kampala (Uganda), November 23, 2007.**

We have noted the decision of the CMAG. Our hope remains that Pakistan will return to stability and democracy as soon as possible<sup>1</sup>.

---

1. On November 23<sup>rd</sup> India joined other Commonwealth countries in endorsing the decision of the Commonwealth Ministerial Action Group consisting of Foreign Ministers among others of Lesotho, Sri Lanka, England, Canada, Tanzania to suspend Pakistan from the association, "pending the restoration of democracy and the rule of law" in that country. (India is not a member of the Group) The decision was taken the previous night. The CMAG decision was endorsed by the Heads of Delegation meeting in the first executive session, soon after Queen Elizabeth II addressed the formal Commonwealth Heads of Government Summit, 2007. Foreign Secretary Shivshankar Menon distanced himself from a suggestion that Pakistan was creating instability in the region. "We know Pakistani territory is used by groups which engage in all sorts of activities — terrorism, drug trafficking... There are groups in Pakistan which export various forms of instability... It is different than saying Pakistan is doing it." On November 20 while traveling from New Delhi to Singapore for the India-ASEAN Summit, the Prime Minister told the accompanying media that he sincerely hoped that Pakistan would find "pragmatic, practical and effective means" to overcome the "difficulties", through which the country is passing. "I have said on more than one occasion that destinies of our two countries are very closely interlinked. A strong, prosperous, stable, peaceful and democratic Pakistan is in our interest,"

**310. T. V. Interview of National Security Advisor M. K. Narayanan with Karan Thapar for the CNN-IBN channel.**

**New Delhi, December 16, 2007.**

[National Security Advisor M K Narayanan says new Pak army chief won't try "adventurist" action against India. How does the Government regard the situation in Pakistan and what might be the implications for India? Those are the issues that Karan Thapar raised with National Security Advisor M K Narayanan on *Devil's Advocate*.]

**Karan Thapar:** *Mr Narayanan, let me start with the obvious question. How do you view Pervez Musharraf today?*

**M K Narayanan:** I think as of now, he is an elected President but the legitimacy of his presidency will probably have to be declared only after the Pakistan Parliament approves of it with a two-third majority. As things stand right now, it does seem possible that he would be elected with that majority. If that happens and he is the legitimate President of Pakistan, I think we'll do business with him. We've done business with him in the past, and I think we will continue to do business with him.

**Karan Thapar:** *So, he remains in your eyes, a credible interlocutor for India?*

**M K Narayanan:** Yes, by and large, he remains a credible interlocutor for India to an extent because we will do business, as I said with, whoever has the stamp of approval in Pakistan.

**Karan Thapar:** *Now that he has retired as the Army Chief, how much of his power and influence has he lost with his uniform?*

**M K Narayanan:** That's a difficult question to answer because, first and foremost, if you accept that the army is the arbiter of destiny in Pakistan, whoever doffs his uniform necessarily loses a certain amount of his sheen. However, what he has now is the chief of army who is a close comrade of President Musharraf. The chief of army is well acknowledged to be a professional soldier and it is therefore likely that the relationship between the civilian President and the military chief would remain cordial.

How long—is a matter which could remain for all time, but let's look at the entire scenario: how does a civilian President play out in Pakistan where the army is the most dominant force? I think this is something that the

people really have to look at closely. Next, you're going to have possibly a new Prime Minister of Pakistan. Who that person is going to be is still in the realm of speculation. Therefore you're going to have three centres of authority or power — a civilian President, who was at one time the President and Army Chief, the current Army Chief and a civilian Prime Minister. Therefore, you have three elements now as against one single unified element in the past. Quite clearly this is going to make a difference to the way it matters our.....

**Karan Thapar:** *Are you also going to suggest that adjusting to a triumvirate, from a previous position where he was the omnipotent power of the country, might be a difficult transition for Musharraf?*

**M K Narayanan:** I should think so. I mean, all things considered and granting that he would still have all his previous strength, it is going to be difficult. Whoever is the civilian Prime Minister, is certainly not going to accept a position where he is truly a subordinate to the President in that sense of the term. I am told today, for instance, who heads the Nuclear Command Authority or National Command Authority? Musharraf has said that he will. Now, I would presume that it would be the head of the government because it was originally supposed to be the head of the government. But the question in this case is who the head of the government here is? Is it the civilian Prime Minister or the civilian President? I mean, these are the kind of ticklish issues which would need to be sorted out.

**Karan Thapar:** *In fact, these are the incipient clashes that are likely to happen post January.*

**M K Narayanan:** Yes, but I must say that there is a certain amount of grudging respect for the manner in which President Musharraf has managed to overcome some of his previous trouble. He has moved from being a military President to a civilian President. He has seen that there is no boycott of the election to the assembly.

**Karan Thapar:** *And so you think he can also manage these key incipient contradictions?*

**M K Narayanan:** I think, in the short term, it should be possible. If he manages to do that in the long term then, of course, he is really a very able person.

**Karan Thapar:** *If I correctly read what you said, in the long term his future or maybe his survival depends on that critical relation with the Army Chief.*

*It is the loyalty of the new Army Chief to President Musharraf that will ensure President Musharraf's survival for the full five years of his term?*

**M K Narayanan:** I think if the army remains united, and I am not referring to Army Chief alone. I think what President Musharraf achieved—in the years that he served as Army Chief and subsequently as Army Chief plus President—is that he has put all his loyalists in the key positions.

So if the army remains united, the army doesn't have fractious groups coming up within the system, and with a professional army chief in General Ashfaq Kayani, then the united army—which has a lot to continue to have by virtue of privileges and perks—may be willing to pay back to the civilian President.

Now, if you look around in West Asia, I don't wish to name the countries, there are other countries which have seen similar kinds of transitions. They have army men or air force person taking over as the President or whatever is the chief executing authority. They are still surviving and some have survived for nearly two decades. It is not an improbable situation. A lot depends on what the possibilities are.

**Karan Thapar:** *A lot depends on, as you said, the army staying united and not getting divided by fractions or factions. So do you see the army staying united in Pakistan?*

**M K Narayanan:** At the moment I don't see any signs of any cracks in the system. If you take the core commanders and various elements into consideration, they are all, in a sense, on the same wavelength. It may become different when ambitions start becoming important. You can speculate anyway, but at the moment, I am looking at it in a practical sense and from the point of view of an Indian National Security Advisor. Maybe strategic thinkers will excoriate me again like they did the last time for saying what I am saying. But as of now I don't see any major cracks in the system.

**Karan Thapar:** *Ambitions are in check. They may be there but they are in check?*

**M K Narayanan:** Yes.

**Karan Thapar:** *In that case, the other challenge that Musharraf faces is the strategy he launched to change the character of the Supreme Court to replace the old Chief Justice, and put in the place, pliant men of his own choice. Has he got away with that?*

**M K Narayanan:** I don't think he has got away with that. But the groups could not manage to rouse public sentiments against the issue. Finally they couldn't bring people out onto the streets. I think there is angst both in the civil society as well as amongst the judiciary, etc.

Now there will be simmering concern, I presume for those of us who believe in democracy—but President Musharraf is on record saying that they have their version of democracy. I think he is not the first man to say that. Others have also said it before him. So the point is, whether he has got away with that—I don't know. Some of these issues have a long gestation period, but as of now, I think, he seems to have papered over these problems.

**Karan Thapar:** *So simmering resentment there may be, even angst, but he has papered over the resentments for now?*

**M K Narayanan:** Looks like it, at least to the extent that I can see.

**Karan Thapar:** *Let's talk a little about the new Army Chief General Ashfaq Kayani. During 2002 and the stand-off between India and Pakistan in that year, he was the Director General of Military Operations of his country, and in that capacity he was in fairly regular contact with senior Indian officials. Does that mean that India has a fairly good idea of what sort of a man he is, or does he remain a stranger to you?*

**M K Narayanan:** No, I don't think he is a stranger. If I remember correctly, I wasn't around at that time, but I think he was the ADGMO at that time. I don't think he was the DGMO of Pakistan military.

**Karan Thapar:** *Forgive me, in 2002 he was, in fact, the full fledged DGMO.*

**M K Narayanan:** Oh yes, sorry my mistake. I think there have been contacts, but by nature the impression about him is that he is a professional soldier. He is not a man with great political ambitions.

**Karan Thapar:** *He is not a Napoleon?*

**M K Narayanan:** He is not a Napoleon. That is too much to say. I think the soldiers who know him, think of him as a professional soldier. They also think that he is a loyal individual and that is what makes people think that the relationship between the civilian President Musharraf and the Army Chief will be reasonably smooth, at least in the short term.

**Karan Thapar:** *From 2004 until very recently, General Kayani was also the Director General of the ISI. In that capacity, was he responsible for*

*much of the terrorism that India has faced or do you subscribe to the view that under him Pakistan took meaningful and perhaps even credible steps to contain and curb terrorism?*

**M K Narayanan:** Well, I don't think we have that much of intelligence. Even if we did, I don't think I should answer that question on candid camera but let me try and give you an answer which will meet half way.

I think the trouble with the ISI is that the leaders are sometimes persons who come in from outside. They don't remain there long enough to get a total grip over the organisation. Other professionals, who have their own ideas and mandates, remain within the organisation. I don't think the ISI changed under Kayani one way or the other. There was possibly, some kind of a tactical restraint, imposed from the outside—possibly by President Musharraf or by whatever the establishment was then.

But I think that applied only up to a certain point. In terms of the larger issues of mentoring Lashkar-e-Toiba and, to some extent, the Jaish-e-Mohammed etc, I don't think there was any fundamental change in the attitude.

Quite often, there are elements in the system that do things which are not fully and totally known to you. But the point I am trying to make here is that General Kayani was certainly not the Hamid Gul, if that would answer the question for those of us who know Hamid Gul.

**Karan Thapar:** *Hamid Gul being a hardliner, Hamid Gul being a man who is almost dedicated to pushing terrorism.*

**M K Narayanan:** ... and a great author of the belief —bleed India through a thousand cuts.

**Karan Thapar:** *Do you have serious qualms about Kayani or are you reasonably satisfied with Kayani as the new Army Chief?*

**M K Narayanan:** Well, it is not for us to decide. If the question is —will General Kayani indulge in an adventurist action against India—I think the answer would be no, because I think he is too professional a soldier to attempt it. I think it will be very foolish for anyone from any country today to try any adventurist action or hope that they catch India in what we will call a complacent mode at any moment.

**Karan Thapar:** *Mr Narayanan, in three weeks Pakistan will go to the polls*

*and the major parties have announced that they will be participating. What sort of outcome are you anticipating?*

**M K Narayanan:** You are asking me to cast the political horoscope of Pakistan three weeks down the road. Here I have to go by what is called the conventional wisdom. The conventional wisdom seems to say that no single party is going to get a majority. What of course is significant is that there is no major boycott. Almost all political parties have come in to participate. There are smaller parties who are not involved but the PPP is participating, the PML-N is participating and the PML-Q is participating. So by and large there is enough credibility as far as these elections are concerned. But the fact is that if the PML-Q and the PML-N are engaged in a conflict, then I think the beneficiary is certainly going to be the PPP. However, even with all of this, the PPP may not get a majority. It is something that I would say President Musharraf wouldn't like to happen.

**Karan Thapar:** *In recent weeks and months, Benazir Bhutto, in interviews that she has given, in articles that she has written, has repeatedly committed herself to ending all terrorist camps in Pakistan and to curbing all private militias. She has even talked about the possibility of extraditing Daewood Ibrahim, perhaps even giving India access to men like Hafiz Mohammad and Sayed Mahmood Azar. If she were to become the Prime Minister of Pakistan in January, would you welcome it?*

**M K Narayanan:** If she lives up to her promises, most certainly.

**Karan Thapar:** *What if she will?*

**M K Narayanan:** It is difficult to believe. One has to go by what she did in the nineties. One is always a little sceptical. It is possible, but her track record is not necessarily something which will make us believe that she would follow to the letter of what she has said—I think even if she wishes to do so. As I mentioned earlier, the single most important entity in Pakistan remains the army and along with that ISI. I find it extremely difficult to believe that the Prime Minister Benazir Bhutto, if she becomes that, will have a free hand in doing all the things that she wishes to do.

I know that in 1988 when she met with Prime Minister Rajiv Gandhi she made a number of promises. We know almost certainly that she was sort of curbed by the military at that point but whether she will have success now is difficult to believe and it would be very optimistic to expect that she can fulfil whatever she says but we hope that she will do her best.

**Karan Thapar:** *Now Musharraf, as you yourself indicated earlier, is hoping that the new assembly will not only ratify his election as President but more importantly indemnify the Emergency that he declared and the steps that he has taken under that Emergency. But if Benazir Bhutto and Nawaz Sharif as you have already named were to end up with 50 per cent or more of the seats in the national assembly, which very easily they could, could Musharraf be in danger?*

**M K Narayanan:** I think the Attorney General has just mentioned that before the Emergency is lifted they are going to put in place a whole series of measures.

**Karan Thapar:** *And won't those need to be indemnified by the new assembly?*

**M K Narayanan:** It is going to be ticklish issue but I think the point is that if there are measures to indemnify the President or President's actions, then overturning them, even by an assembly unless it an overwhelming majority, is going to be difficult. I think one should read real horoscope and not the political horoscope I am talking of because if they do legally put in some measures it is not going to be easy for even an elected parliament unless it has a four-fifth of a...

**Karan Thapar:** *Assuming President Musharraf does continues, he overcomes the obstacles that he is facing and establishes a good relationship with the Army Chief, are you confident that by some time around the middle of 2008 he can pick up on the peace process with India and take it forward?*

**M K Narayanan:** That's what we are hoping. I think there are things which are in the pipeline, or which are still cooking or half cooked or three quarter cooked which we would like to take forward. The point really is that it is not really taking it forward. Would he be able to convince the other power structures that have come up in addition to him that this is best thing for Pakistan? That is a question mark. But we are hopeful that if by that time he has overcome all the obstacles, he would have a degree of credibility and acceptance which would make it easier for him to do so.

**Karan Thapar:** *So in a word, he remains, despite all the problems associated, India's best bet at the moment?*

**M K Narayanan:** I think even in your previous interview you had mentioned this.

Mr Thapar, the point is that we will deal with whoever is in place in Pakistan because we are quite conscious. We cannot pick and choose whom we deal with. If the people of Pakistan— with whatever measure, or mechanism they have chosen to make him the President—we will deal with it. We have dealt with him in the past and that experience, as our Prime Minister has said, has not been something which we are uncomfortable with and so we will go forward with it.

### **311. Condolences from the Indian leaders on the assassination of Pakistani leader Benazir Bhutto.**

**December 27, 2007.**

#### **Message of President Mrs. Pratibha Devisingh Patil:**

The President of India, Smt. Pratibha Devisingh Patil, has expressed her deep shock and grief on hearing the tragic news of assassination of Mrs. Benazir Bhutto. The President has further said, “it is a tragedy for the people of Pakistan to lose a leader of her stature in her prime. This tragedy underscores the menace that terrorism poses to us and to the stability of our societies. The assassination of Mrs. Benazir Bhutto is a tragedy not just for Pakistan but for our entire region. We stand with the people of Pakistan in this hour of grief and tragedy”.

---

#### **Message of Prime Minister Dr. Manmohan Singh issued from Goa.**

I was deeply shocked and horrified to hear of the heinous assassination of Mrs. Benazir Bhutto. Mrs. Bhutto was no ordinary political leader, but one who left a deep imprint on her time and age. Her contributions to a previous moment of hope in India Pakistan relations, and her intent to break India Pakistan relations out of the sterile patterns of the past, were exemplary. In her death, the sub continent has lost an outstanding leader who worked for democracy and reconciliation in her country. The manner of her going is a reminder of the common dangers that our region faces from cowardly acts of terrorism and of the need to eradicate this dangerous threat. My heartfelt condolences go to her family and the people of Pakistan who have suffered a grievous blow.

**Sentiments expressed by Prime Minister in the Condolence Book of the Pakistan High Commission.**

*"It was with the deepest sense of horror and sorrow that I have learnt of the tragic demise of Madam Benazir Bhutto. In her sad and untimely demise, Pakistan and South Asia have lost an outstanding political leader, who was passionately committed to the cause of moderation, democracy and peace and friendship between our two countries".*

*"I convey my heartfelt condolences to the members of the bereaved family and the people of Pakistan".*

Dr. Manmohan Singh

Prime Minister of India

28.12.2007

---

**Message of External Affairs Minister Pranab Mukherjee.**

I heard with shock and horror of the death of Mrs. Benazir Bhutto. Mrs. Bhutto was a brave and outstanding woman leader of the sub-continent. That she should fall to a barbarous terrorist attack is particularly tragic, and should strengthen our resolve to fight this scourge.

Mrs. Bhutto's contributions to democracy, to the improvement of India-Pakistan relations, and to the restoration of normalcy within Pakistan will be an inspiration.

My heart-felt condolences go to her immediate family, members of her party and the people of Pakistan. Our hopes and prayers are with them in this hour of loss.

---

**All Party meeting condoled the death of Ms. Benazir Bhutto:**

A resolution passed at an all-party meeting, convened to discuss the situation in the region in the wake of Ms. Benazir's killing, conveyed its heartfelt sympathies to the members of her family and the people of Pakistan. The leaders, who were briefed by National Security Adviser M.K. Narayanan, described Benazir as an outstanding leader of South Asia and the voice of moderation and democracy in Pakistan.

The all-party meet was attended by External Affairs Minister Pranab Mukherjee, Defence Minister A.K. Antony, Home Minister Shivraj Patil and Mr. Narayanan. The Bharatiya Janata Party was represented by the Leader of the Opposition in the Lok Sabha, L.K. Advani, and the former External Affairs Minister, Jaswant Singh, Sitaram Yechury (Communist Party of India - Marxist), A.B. Bardhan (Communist Party of India), Raghuvansh Prasad Singh (Rashtriya Janata Dal), Shahid Siddiqui (Samajwadi Party), Satish Mishra (Bahujan Samaj Party), Sharad Yadav (Janata Dal- United) and T.R. Baalu (DMK).

[Just before the all-party meeting, Prime Minister Manmohan Singh chaired a meeting of the Cabinet Committee on Security that reviewed the situation in the region and domestically, and discussed the steps by India to deal with the situation.]

The Prime Minister who was in Goa when the ghastly act took place speaking in that city to the media reiterated his deep shock and horror at the assassination of the former Pakistan Prime Minister, Benazir Bhutto and described her as “one of the outstanding leaders of our sub-continent, who always looked for reconciliation between India and Pakistan.” He said: “Ms. Bhutto always expressed her feelings that relations between the two countries should be warm.”

Lamenting that “in her loss we have lost an outstanding personality and an outstanding champion of democracy,” Dr. Singh said she left a “deep impression on our time and the age she lived through. She always wanted South Asia to become a prosperous region in the world.” Dr. Singh underlined the need for a joint fight against terror, which lurked as a threat to the prosperity of the region. Extending his condolences to her family and to Pakistan, he said: “We all have to pledge to work together to deal with this menace which threatens the people of the civilised world.”

The Congress Working Committee (CWC) on December 28 said the assassination of the former Pakistan Prime Minister, Benazir Bhutto, was “yet another reminder of the grave challenge posed by the forces of terror and violence.”

Congress president Sonia Gandhi, who chaired the specially convened CWC, expressed the party’s shock and grief at the assassination. “Her death is equally a loss for the entire region of South Asia,” she said. She later visited the Pakistan High Commission and signed the book of condolence.

“Knowing fully well the risk involved in the task of restoring the democratic process in Pakistan, she did not hesitate to risk her life in pursuing this objective with courage, commitment and dedication. Her supreme sacrifice to the cause of democracy in Pakistan will continue to be a source of inspiration to those who have firm faith in the spirit of democracy.” Ms. Gandhi said the loss of such a popular and charismatic leader, especially at this critical juncture, was a colossal tragedy for the people of Pakistan. “The reprehensible and cowardly act, which has brutally cut short a life full of promise and potential, deserves to be strongly condemned by civilised society.”

“The CWC deeply mourns her untimely death and conveys its heartfelt condolences to the members of her bereaved family, the Pakistan People’s Party and the People of Pakistan in their moment of grief.”

Other Political parties across the spectrum too reacted almost in one voice of shock and dismay and concern about the political process in Pakistan as news about the assassination of former Pakistan Prime Minister and Pakistan People’s Party leader Benazir Bhutto reached New Delhi on December 27.

The Polit Bureau of the Communist Party of India (Marxist) said there were “forces [in Pakistan] which are seeking to destabilise Pakistan and not allowing the transition to democracy to succeed ... These forces must be thwarted.”

The Bharatiya Janata Party condemned the assassination and expressed concern not only about how the incident would affect Pakistan but also India in its immediate neighbourhood.

Former Prime Minister Atal Bihari Vajpayee described the killing as “big challenge for democracy and peace” and added that the challenge was not only for Pakistan: “We have to fight it out together.”

Leader of Opposition L. K. Advani said “the Talibanisation of Pakistan” was a threat to India.

“Indian democracy abhors the cult of violence. This is negation of democracy itself. She was a charismatic leader whose unrealised potential has been cruelly cut short,” said All India Congress Committee spokesperson Abhishek Singhvi.

He said instability and violence could not be good for Pakistan, as indeed for the subcontinent.

“We hope and trust that the appropriate agencies of Pakistan will get to the root of this most unfortunate incident,” he said.

Conveying its heartfelt condolences to Ms. Bhutto’s family and to the people of Pakistan, the CPI (M) expressed its “shock and outrage” at the “dastardly assassination” while CPI national secretary D. Raja feared that the assassination would complicate matters in Pakistan where elections were due to be held. He said there were clearly forces which did not want any form of democracy in Pakistan.

BJP president Rajnath Singh expressed his sympathy and offered condolences to Ms. Bhutto’s family, especially mentioning her children, while former External Affairs Minister Jaswant Singh spoke admiringly of Ms. Bhutto’s courage and determination to participate in the democratic process although she was aware of grave threat to her life. “She had come back to participate in the democratic process in Pakistan despite resistance from the establishment,” he noted. Mr. Rajnath Singh was worried about the impact of instability in Pakistan on India.

In a statement, Lok Sabha Speaker Somnath Chatterjee expressed “profound” shock over the assassination. He hoped that the sub-continent would be rid off such attacks on democratic processes, and the people of Pakistan would reject such methods of terror and strengthen democracy.

## **SRI LANKA**

### **312. Question in the Lok Sabha on the visit of External Affairs Minister Pranab Mukherjee to Sri Lanka.**

**New Delhi, 14 March 2007.**

**Will the Minister of EXTERNAL AFFAIRS be pleased to state:**

- (a) whether the External Affairs Minister had visited Sri Lanka recently to hold talks on the progress of the peace process in Sri Lanka;(b) if so, the details of the discussions held and the outcome thereof; and(c) the extent to which the talks are likely to be useful in strengthening the peace process in Sri Lanka?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a) Minister of External Affairs visited Sri Lanka on January 9-10, 2007 to extend an invitation from our Prime Minister to Sri Lankan President Mahinda Rajapakse for the 14th SAARC Summit to be held in New Delhi in April 2007. During meetings with the Sri Lankan leadership, bilateral relations, the peace process in Sri Lanka and SAARC issues were discussed.
- (b) & (c) Both sides reiterated the high priority that they attach to expansion of bilateral cooperation in all spheres. While reaffirming India's commitment to the unity, sovereignty and territorial integrity of Sri Lanka, Government of India have emphasised to the Government of Sri Lanka that the only solution to the ethnic problem is a negotiated, political settlement that is acceptable to all communities in Sri Lanka and stressed the need to make all possible efforts to revive the political dialogue in order to move the peace process forward.

**313. Report on the Indian reaction to the LTTE air attack on Sri Lanka's air force base in Colombo.****New Delhi, March 28, 2007.**

In the wake of the Tamil Tigers using air power for the first time in Sri Lanka, India voiced serious concern over the escalation of violence there and said it would encourage Sri Lankans to find a political solution to the "tragic" conflict themselves.

Foreign Secretary Shivshankar Menon said that New Delhi would be talking to all concerned in Sri Lanka over the next week or so in this regard.

"We are very concerned at the escalation of violence recently and LTTE air strike is one example in this escalation of violence," he said, referring to the Tigers using aircraft to bomb an airbase near Colombo on March 26.

Menon said Indian government remained engaged with everyone in Sri Lanka, including the government, to see what it can do for resolution of the problem there.

New Delhi also wants to see what it can do to ameliorate the condition of Sri Lankans caused by the conflict. "The main issue is to get a solution to the conflict. Picking an individual incident of violence does not help us to address the root cause of problem. The root cause of problem is the conflict, which is escalating," Menon said.

The escalation of violence has had humanitarian consequences, like internal displacement of over one lakh people, he said, adding, this was a worrying development.

"We join our voice with all those in Sri Lanka and abroad who hope violence comes to an end soon," he said, noting that Colombo would be raising the issue of escalation of violence at the SAARC Summit to be held here on April 3-4.

**314. Extracts from the Press Conference of Foreign Secretary on Sri Lanka held to brief the media on the SAARC Summit.**

**New Delhi, March 28, 2007.**

**QUESTION:** You talked about terrorism being one of the agenda items in the SAARC Summit. In the light of recent developments in Sri Lanka this week, how have we reacted to the development of air power by LTTE<sup>1</sup>? What does it mean for other terrorist groups in the subcontinent?

**FOREIGN SECRETARY:** I think we are very concerned at the escalation of violence in Sri Lanka in the last few weeks. The incident you mentioned is one of a part of a pattern of escalating violence we have seen. The humanitarian consequences of that really worry us, when we see internally displaced people, over 100,000 of them. We would join our voice with that of all those in Sri Lanka and abroad. We would hope that the violence will come to an end soon and that they can find a solution to this conflict which enables all the communities of Sri Lanka to live together in peace. I think that is really the main thing, to get a solution to the conflict. To pick on individual incidents of violence, I do not think helps to solve the root cause of the problem. The cause of the problem is the conflict which has escalated terribly in the last few weeks and that does cause us great concern.

**QUESTION:** *According to the news emanating from Sri Lanka the radar provided by India to Sri Lanka recently failed to perform.<sup>2</sup> Are the*

1. The reference was to the first ever use of aerial bombing operation by the LTTE on March 26 in which it targeted the main military base of the Sri Lankan Air Force on the outskirts of Colombo killing three air force personnel and injuring 16 others. The LTTE aircraft was able to sneak all the way from the jungles of Wani in the North right into the middle of airport and return without being challenged. The aircraft would have flown at least 600 km to and from the base and would have been in the air for nearly two hours. Though India had not reacted officially to the incident, media quoted official sources to suggest Indian concern in the matter. The sources said that attack showed that the Tigers had the ability to take their military prowess to a new level. It displayed a capability the LTTE so far did not possess, the official sources in New Delhi maintained.
2. The reference was to Colombo media reports quoting unnamed official sources to suggest that the radar provided by India failed to perform at the crucial moment and hence the success of the LTTE. The reports suggested that though Colombo was keen on a Chinese radar and was reportedly negotiating one with Beijing, India insisted on providing one in preference to the Chinese. However on April 1 when asked by a journalist about the veracity of the report Island's Foreign Minister after meeting with the Indian External Affairs Minister in New Delhi described the reports "speculative". Mr. Bogollagama said Sri Lanka President Mahinda Rajapaksa had appointed a commission of inquiry to probe the attack and he would wait for its results. The attack was a sign of desperation on the part of the LTTE. However, the incident could not be taken "lying down" and Colombo had decided to strengthen its air defence capabilities.

*Government of India aware of this? What is GOI reaction to such news?*

**Foreign Secretary:** *As far as we are concerned there is no question of its failing.*

**QUESTION:** Another terrorism question. After the LTTE air strikes, have you spoken to Sri Lanka? Have you expressed concern and assured any kind of help? Also with Bangladesh, India has concerns vis-à-vis terrorism and insurgent camps in Bangladesh? Has Bangladesh said anything to us ever since this new caretaker government has taken over looking at our concerns on terrorism?

**FOREIGN SECRETARY:** With Sri Lanka, as I said, we have made it clear to everyone concerned. As I just said to the earlier question, we are very concerned at the escalation of violence. The air strike is one example of that escalation of violence in the Sri Lankan conflict. Certainly, we will remain engaged with everyone, Sri Lankan government and everyone, to see what we can do not just to ameliorate the conditions that have been created by this and the humanitarian effects of this escalation of violence, but also to see what we can do to help towards a solution of this issue, to encourage the Sri Lankans themselves to find a solution to this issue.

On Bangladesh, this is an ongoing conversation. We will have an opportunity in our bilateral discussions this time to discuss the entire range of our relationship with Bangladesh. Obviously, this is one of the issues which is very important. There are other issues also which we look forward to discussing with the government in Bangladesh.

**QUESTION:** Do you think the time has come for India to play a more direct role in Sri Lanka's negotiations?

**FOREIGN SECRETARY:** I think we hope to use our conversations over the next week or so, as I said earlier, to encourage the Sri Lankans themselves to find solutions to this tragic conflict<sup>3</sup>.

---

3. Sri Lanka has been keen to seek Indian cooperation in the coordinated patrolling of the Palk Strait. On April 1 after talking to External Affairs Minister Pranab Mukherjee, Sri Lanka Foreign Minister Rohitha Bogollagama said that New Delhi was receptive to the idea. Talking to *The Hindu*, he, however, said it was up to India to articulate its position on Colombo's proposal presented to it on March 19. According to Mr. Bogollagama, his 40-minute meeting with Mr. Mukherjee went off well and the Indian side was positive on the issues raised by him. There were "no major hiccups," he said. Calling for greater

---

vigilance by the Indian and Sri Lankan navies to prevent the LTTE from ferrying arms, he said Colombo wanted a strong statement from the SAARC summit on terrorism. "Our responsibility is to meet the [terrorist] challenge by making united efforts," he told the Chennai based *Hindu* in an interview. On the recent killing of Tamil Nadu fishermen, he said it was established that these persons were in Indian waters, but pointed to Indian Navy Chief Sureesh Mehta's statement that he could not rule out the LTTE's involvement. "None of our boats were there [in the area]," he added. (Later on the Tamilnadu Police confirmed that the attack on the Indian fishermen was by the LTTE)

Later meeting Sri Lanka Foreign Minister on the sidelines of the Asian Security Conference in Singapore on June 2 the Defence Minister A. K. Antony told his counterpart that the "rise of the Liberation Tigers of Tamil Eelam (LTTE) air power in Sri Lanka is of concern to India also." Emphasising this, he said that India "will give Sri Lanka reasonable support for that." Commenting on his talks with Sri Lankan Foreign Minister Rohitha Bogollagama, Mr. Antony said he had conveyed India's willingness to extend "whatever possible help." He said the message to Sri Lanka was that "we are with you" on the issues of sovereignty, territorial integrity, and unity of the island-state. At the same time, India expressed its preference for a "political solution" in Sri Lanka. On Colombo's proposal for coordinated patrolling by the navies of the two countries along the maritime boundary in the Palk Straits, Antony said it was put across to Sri Lanka that India "will examine that." [Outlining Colombo's version of this conversation, Mr. Bogollagama noted, "Mr. Antony said they are examining it favourably."] So, it was inferred that an "agreement" had now been reached. That could be seen as something "towards" or "leading to coordinated patrolling." Mr. Antony had already affirmed that he had given "no commitment" to accept the proposal of coordinated patrolling. At the conference, Mr. Bogollagama spoke about the threat to regional maritime security from the Sea Tigers.

**315. Extract relevant to Sri Lanka from the Press Conference addressed by External Affairs Minister Pranab Mukherjee at the end of the SAARC Summit.**

**New Delhi, April 4, 2007.**

**QUESTION:** Mr. Minister, I would just like to ask you, much has been spoken of terrorism and peace, what is the threat perception from LTTE for India at the moment and what steps have been taken post the Katunayake Air Base attack?

**EXTERNAL AFFAIRS MINISTER:** In fact, we have already assured the Sri Lankan Government our full assistance<sup>1</sup> if they ask for it. But, as we believe, to resolve the problem we must also engage in the peace process which was initiated, as military solution ultimately would not yield results. Therefore, we have suggested that both sides should exercise restraint. The devolution mechanism which is contemplated and from which all-party representative Committee have made recommendations should be examined and be implemented within a time frame so that the legitimate aspirations of various ethnic groups find their reflection within the framework of Sri Lankan constitution while maintaining its territorial integrity.

**QUESTION:** What is the threat perception to India from LTTE at the moment? What is our assessment of that?

**EXTERNAL AFFAIRS MINISTER:** Look, threat perception of a country depends on various circumstances. Generally, I can point out that terrorism and terrorist activities are the biggest menace to world peace and tranquility, not merely to India but all over the world. But, apart from that, we shall have to ensure that peaceful, conducive atmosphere prevails and as far as possible, shall have to try to resolve these issues through dialogue, at the same time without letting (go of) administrative efforts.

---

1. Media quoting sources in the Defence Ministry in New Delhi said on August 6 that during the last one year India has sent some more radars to Sri Lanka to help it ward off the threat of airborne attacks by the Liberation Tigers of Tamil Eelam (LTTE). India had resumed non-lethal military aid to Sri Lanka with the supply of two indigenous radars in 2005. This year in January it sent another military radar to Sri Lanka which was followed by the despatch of a similar radar in June. The radars were sent on behalf of the Indian Air Force, the sources said. India first broke off its self-imposed embargo of nearly five

---

years when it sent two Indra-II radars on the eve of Sri Lanka President Mahinda Rajapakse's first visit in 2005. The radars, developed by the Defence Research & Development Organisation (DRDO), could detect low-flying fighter aircraft. They were produced by the public sector Bharat Electronics Limited (BEL). Media quoted Diplomatic sources to say India's supply of radars, said to be in the non-lethal category, in no way compromised its desire for a political solution to the Tamil issue. The first lot of radars were sent after Sri Lanka told the then External Affairs Minister Natwar Singh about its requirement and the willingness of other countries to supply them. In March this year, LTTE aircraft had targeted a Sri Lanka Air Force (SLAF) base near Colombo leading to speculation that the radars supplied by India were defective. However, Sri Lanka later said the reports were wrong.

**316. Extract from the Interaction of Prime Minister Dr. Manmohan Singh with the media on board the flight from Berlin to New Delhi.**

**June 9, 2007.**

“I have been sharing my anxieties about the situation with important world leaders. Let me say that the recent act to expel<sup>1</sup>, I think, citizens belonging to a particular minority in Colombo has pained me. I hope, I think, Better sense will prevail among all concerned. These are not civilized ways of dealing with them. I understand the difficulties concerned but the human rights of citizens should not be violated. But at the same time, I am told that it has been stayed by their Supreme court. I share the concern.”

---

1. The Prime Minister was referring to the order issued by the Sri Lankan government expelling from Colombo any Tamil staying in Colombo without any valid reason.

**317. Remarks of External Affairs Minister Pranab Mukherjee on India - Sri Lanka Relations.**

**Singapore, June 18, 2007.**

Voicing concern over the recent upsurge in violence in Sri Lanka, India opposed any support being given to LTTE and asked the government of the island nation to resolve the ethnic problem through dialogue.

“We are opposed to violence, no support should be given to LTTE and we are opposed to helping any terrorist outfit anywhere,” External Affairs Minister Pranab Mukherjee said at a question-answer session following his public lecture on India’s foreign policy priorities in Singapore.

He said Sri Lanka should maintain its territorial integrity and try and resolve the ethnic Tamil issue through dialogue.

“The recent developments in Sri Lanka, the violence, have been a cause of concern to all,” he said adding, the attacks by an outlawed terrorist outfit are a matter of grave concern to all those who want to fight terrorism.

When asked why Sri Lankans needed a visa to visit India while Indians could enter Sri Lanka without one, Mukherjee said the Indian government was trying to liberalise visa rules but had to be careful at the same time.

“We are trying to give it as quickly as possible,” he said adding, in some categories the visa was processed very fast.

**318. Response of Official Spokesperson to a question on the Sri Lankan announcement of the formation of India- Sri Lanka High Level Committee on Defence.**

**New Delhi, September 8, 2007.**

**Question:** There is a story that Government has said that Indo-Sri Lanka High-Level Committee on Defence has been formed.

**Official Spokesperson:** I have just seen this story. I do not have a specific comment yet on the story. But as far as I understand the visit that this story is referring to was part of the regular exchange of visits that takes place very often between India and Sri Lanka given our close neighbourly relations.

**Question:** Could you confirm that any such Committee has been formed?

**Official Spokesperson:** I said I do not have a direct comment on that story except the fact that the visit, as I understand, was part of the regular exchange of visits that takes place<sup>1</sup>.

---

1. Meanwhile Sri Lanka clarified on 9<sup>th</sup> September that the announcement it made on 6<sup>th</sup> September on the constitution of an 'Indo-Lanka High Level Committee on Defence' was the result of 'incorrect interpretation' of information about the recent visit of an official delegation to New Delhi. A statement by the Sri Lankan President's Secretariat, quoting diplomatic sources, made the claim on 6<sup>th</sup>. In the statement, the Presidential Secretariat said the three-member delegation from Sri Lanka comprising Secretary to President Lalith Weeratunga, Defence Secretary Gothabhaya Rajapaksa and Basil Rajapaksa, Senior Adviser to President, visited India for high-level discussions as part of a regular exchange. It said their discussions covered many aspects of relations, including cooperation in combating terrorism and the search for a solution to the conflict in Sri Lanka through devolution of power. "The PRIU (Policy Research and Information Unit) is informed that there was no decision among those who participated in these discussions to establish an Indo-Lanka High Level Committee on defence as stated in our report, which was based on an incorrect interpretation of information on this matter. The PRIU regrets this error and apologises to the members of the Sri Lanka delegation and the Indian officials they had discussions with, and to the media, in this regard," the statement said.

**320. Remarks of the National Security Advisor M. K. Narayanan about the activities of the Liberation Tigers of Tamil Eelam (LTTE).**

**Chennai, December 17, 2007.**

The National Security Advisor M. K. Narayanan addressing a Press Conference in Chennai on December 17 (after his meeting with the Tamil Nadu Chief Minister M. Karunanidhi) said that the Centre was “careful” about the movements of the Liberation Tigers of Tamil Eelam not only in Tamil Nadu but also elsewhere in the country.

He ruled out joint patrolling with the Sri Lankan Navy in the Indian Ocean. There was only coordinated patrolling, with India and Sri Lanka doing patrolling in their respective areas<sup>1</sup>.

1. Meanwhile media reported that a middle level official delegation from India visited Colombo in the third week of December for three-day talks on defence cooperation with Sri Lanka. Quoting knowledgeable sources the Chennai based daily *the Hindu* said on December 17 that the delegation composed of a Joint Secretary each from the Ministries of External Affairs and Defence would review the gamut of the cooperation, including the air defence system. The report said the effectiveness of the air defence system of the island nation had been a matter of focus after the LTTE demonstrated air capabilities through its nascent air wing for the first time in March and carried out three other attacks during the year. The air defence system was strengthened with the help of India after the March attack. Separately, the Sri Lankan military claimed that LTTE ‘losses continued to soar’ during the past few days, following tactical military pursuit at LTTE bunker lines and offensive positions by the security forces.

**IV (ii) SOUTH EAST AND EAST ASIA  
AND PACIFIC**

**321. Keynote Address by External Affairs Minister Pranab Mukherjee at the 9th Asian Security Conference on 'Security Dynamics in Southeast Asia: Emerging Threats & Responses' organised by Institute of Defence Studies and Analysis.**

**New Delhi, February 9, 2007.**

I am honoured to address the Inaugural Session of the 9th Asian Security Conference. I see that you have an exhaustive agenda. I am sure your discussions over today and tomorrow would be fruitful and would advance understanding and the search for cooperative solutions to Asian security dilemmas.

It is befitting that sixty years since the Asian Relations Conference was held in this city, this Conference with the theme of Southeast Asia is taking place in New Delhi. Southeast Asia is the starting point of India's Look East policy. This policy conceived in and pursued since the early 1990s was prompted by significant changes in the global politico-economic scenario and by initiation of economic reforms and liberalization in India. ASEAN's economic, political and strategic importance in the Asia-Pacific region and its potential to become a major partner of India in trade and investment were significant elements in our approach. Over time, this policy gradually evolved to include the Far Eastern and Pacific regions. It also facilitated enhanced links with China, Japan, Republic of Korea, Australia, New Zealand, Fiji, Papua New Guinea and Pacific Island States.

Today Southeast Asia and India are partners in harnessing our respective economic, technical and professional strengths. ASEAN countries and India also have a convergence in security perspectives, a common interest in peace and stability in the region and in the maintenance of security of sea lanes of communication. We now have regular, annual dialogue at my level and at the Summit level. These political level interactions are further enriched by meetings of Senior Officials as also specialized working groups in functional areas, science and technology, health, trade and investment and transport and infrastructure. The signing of the 'India-ASEAN Partnership for Peace, Progress and Shared Prosperity' at the 3rd India-ASEAN Summit in Vientiane in November 2004 was a key development in our relations. The 5th Summit in Cebu last month has given further momentum to India-ASEAN ties.

The resurgence of Asia in political and economic terms has been

accompanied by the rise of powerful economic forces unleashed by globalization and the trend towards regional economic integration. The engagement in the political and security arena has either followed or led to progressive economic integration in terms of Free Trade Agreements and Comprehensive Economic Cooperation Agreements that have either been concluded or are being negotiated with countries of the region. Since 1990, when our Look East Policy was initiated, our trade with countries of the region has grown from US \$ 8.1 billion to US \$ 67.5 billion and the share of trade with these countries in our global trade has increased from 19.4% to 28.2%.

Following the agreement reached at the Cebu Summit, we hope soon to conclude negotiations on a bilateral Free Trade Agreement with ASEAN. Our vision, as articulated by Prime Minister during the India-ASEAN Business Summit in New Delhi on October 19, 2004, is that of an 'Asian Economic Community', which would be the driver of growth and economic integration in the entire region.

The usage of the term East Asia has over time expanded from its narrow confines of North East Asia to encompass the entire region from India to Japan. The First East Asia Summit (EAS) held in Kuala Lumpur in December 2005 was a historic event that underlined this evolution. Speaking at the Summit, Prime Minister Dr. Manmohan Singh said that the long term goal of the EAS should be the creation of a harmonious and prosperous community of nations that would pool its resources to tackle common challenges. He also observed that a virtual Asian Economic Community was emerging with the Free Trade Agreements (FTAs) amongst countries of the region. However, there is a need for a wider perspective so that ongoing processes could become building blocks for a larger vision. It was in this context that we have suggested a Pan-Asian Free Trade Arrangement that could be the starting point for an Economic Community. Such a community would be the third pole of the world economy after the European Union and the North American Free Trade Area (NAFTA).

The theme of this conference 'security', cannot be looked at in isolation from these broader political and economic developments. Even in a narrower sense, a significant aspect of 'our Look East' policy has been the growing cooperation and dialogue on security issues both bilaterally with ASEAN countries as well as through multilateral institutions like the ASEAN Regional Forum (ARF), which also brings in significant non-ASEAN players in the Asian region. Our focus, including in our bilateral dialogues and cooperative activities with neighboring states in Southeast Asia and East Asia, has

been on issues like border security, maritime security, counter terrorism and energy security. I am delighted to note that your agenda broadly reflects the priorities we have chalked in our dialogue with countries of the region.

Asia's security environment is unique given its geographical expanse and the political, economic and cultural diversity of the region. Our view has been that in Asia, a pluralistic security order based on a cooperative approach to security is the answer. For one, such a polycentric security order would be accommodative of the diversity of the region. It would also be a reflection of the growing strength and confidence, manifested either individually or through organisations such as ASEAN, of the various economic and security players in the region. In today's increasingly interconnected world, each participant has an equal stake and responsibility. Only a pluralistic security order working through a network of cooperative structures can have the legitimacy as well as the wherewithal to deal with the security challenges of the 21st century. This vision has guided our approach to Asian security right from the Asian Relations Conference of 1946 to the recent initiatives including the 'Look East' policy.

Our participation in the ASEAN Regional Forum (ARF), which we value, flows from this vision, the 'look-East' policy and closer links with ASEAN as a full-dialogue partner. We consider ASEAN as the driving force of the ARF and believe that the ASEAN way of 'dialogue and consensus' should remain the ARF's guiding principle. Participation in the ARF also enables us to engage with a broader range of countries beyond the ASEAN underlining India's commitment and goal in ensuring regional peace and stability. It also underscores our belief that from India's perspective cooperative security can be looked at only in a broader context going beyond Cold War notions of sub-regions. I am happy to note that there is a greater recognition today of India's stabilising role in the region born out of our restraint, our economic dynamism and potential, the history of our civilisational engagement and our role as a firewall against destabilising ideas and influences. Encouraged by this we will continue to seek in our interaction with countries of the region greater political and economic convergence, closer people to people links through cultural cooperation and educational exchanges and meaningful security cooperation to meet common challenges.

May I conclude by wishing you success in your deliberations.

Thank you.

**322. Speech by the Minister of External Affairs Pranab Mukherjee at Seminar on 'Look East' Policy.**

**Shillong, 16 June, 2007.**

It gives me great pleasure to be here in Shillong. Meghalaya - the abode of the clouds - has always been a source-of inspiration to writers, poets, musicians and artists and I am confident it will also inspire us in our discussions today.

To me, the theme of this seminar - "geography as opportunity" -can as easily be - "geography is opportunity". There are enormous changes taking place on the domestic and external fronts, including the advent of globalization, regional economic cooperation, and new policy approaches for development. In these circumstances, all regions of India have the enormous potential to exploit their particular geographical contexts, and bring significant benefits to populations residing in those regions in a much more direct and participative manner than before. In days past, deliberations on a plan of action to address these opportunities would have been carried out through closed conferences and meetings, mostly in New Delhi. However, in order to create a greater sense of awareness and participation, I asked the Public Diplomacy Division of the Ministry of External Affairs to initiate a series of interactive conferences and meetings that would receive inputs from the regions concerned. Recognizing the pre-eminent role of our North-Eastern states in the economic and political development of India, I decided to launch the initiative from this beautiful city.

Today's event, the first of its kind, is informed by the thinking that the North-East, in particular, is one region into whose progress and development we can dovetail India's "Look East" policy. I am happy that in collaboration with ICRIER, and the Omeo Kumar Das Institute of Social Change and Development, a conference will soon be held in this region on the challenges that regional and sub-regional cooperation could pose and how to address them.

Before I go further, let me make a point about the newly created Public Diplomacy Division in the Ministry of External Affairs. Some of you have already met with representatives of this Division for a preliminary round of discussions and might be wondering what public diplomacy is. Most of us are familiar with *traditional* diplomacy where governments negotiate with governments. Globalization, however, demands a paradigm shift in the manner in which we conduct our foreign policy. The information and

communication technology revolutions have virtually shrunk the globe. Geography is no longer a buffer. Events taking place across borders, near and far, impact in a much more direct manner on us. In some cases, such developments affect our bilateral and regional relations; in other cases, they affect our economic and social fabric. To develop a robust foreign policy response, we have strongly felt the need to institute a mechanism through which the public- by which I mean civil society, NGOs, academia, business and industry, and the media - is constantly apprised of the implications of a particular foreign policy initiative and, more importantly, of the strategic rationale behind it. This is the remit of the Public Diplomacy Division. It is our hope that at the same time as it informs the public of the broader rationale behind foreign policy, it will also be able to glean from such interactions the much required inputs on public perceptions of a foreign policy decision or initiative.

More than half a century ago, Pandit Jawaharlal Nehru visualized India as being the pivot around which issues relating to economics and security in South East Asia would have to be considered. India's "Look East" Policy, which began unfolding in the early nineties, is informed by this vision. As the then Prime Minister, the late PV Narasimha Rao, had said, the "Look East" policy was not merely an external economic policy; it was also a strategic shift in India's vision of the world and India's place in the evolving global economy. Most of all, it was about reaching out to our civilizational Asian neighbours in the region who, by emerging as regional economic powerhouses, also presented us with a model worthy of emulation.

Developing ties with the Association of South East Asian Nations (ASEAN) has been a major objective of our "Look East" policy. Since 1992, our relations with this grouping have grown steadily. Beginning from a sectoral dialogue partnership, we became full dialogue partners in 1995 and were invited as Summit level partners in 2002. In 1996, we became members of the ASEAN Regional Forum. We have also signed a framework agreement for entering into a Free Trade Agreement and intensive discussions on this are continuing. In fact, earlier this year, I participated in the ministerial meetings of ASEAN in Cebu, Philippines and saw first hand the long way that our multiple relationships with this region have come since the Look East policy was initiated. Trade with ASEAN countries, for example, has risen from \$2.4 billion in 1990 to \$23 billion in 2005. We firmly believe that the ASEAN region's abundance of natural resources, significant levels of technological skills and robust economic performance provides the ideal platform for synergies and closer cooperation between India and ASEAN.

Indeed, our relationship with ASEAN should be of particular interest to this gathering since more than one state in the North East borders Myanmar, the only ASEAN member that India shares a land border with.

India is also part of the Mekong Ganga Cooperation Project, which also includes Myanmar, Thailand, Laos, Cambodia and Vietnam. The Project is primarily aimed at the development of overland trade, tourism, communication and transport linkages. In fact, at the meetings in Cebu earlier this year, India took over the chairmanship of this forum. In 2005, we also gained membership of the East Asia Summit (EAS) and, earlier this year, Prime Minister participated in its meetings in Cebu. This gives us the opportunity of further deepening economic integration with East Asia in line with the Prime Minister's vision of an Asian Economic Community that would be an integrated market, spanning the distance from the Himalayas to the Pacific Ocean, linked by efficient road, rail and shipping services.

Finally, as part of the same endeavour to strengthen our linkages with the region and reinforce our Look East policy, a sub-regional grouping, called BIST-EC, comprising Bangladesh, India, Sri Lanka and Thailand was established in 1997. With the addition of Myanmar and, in 2004, of Bhutan and Nepal, the grouping came to be known as BIMSTEC or the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation. This forum has identified six sectors for focussed cooperation: trade and investment, technology, transport and communications, energy, tourism, and fisheries. A framework agreement with the aim of establishing a Free Trade Area has also been signed and India is to host the next Summit.

Less than three months ago, India also hosted the 14<sup>th</sup> SAARC Summit and assumed the SAARC Chairmanship. This is an honour, but with it also come enormous responsibilities. We are committed to taking forward the Declaration issued by the eight Heads of State and Government that commits the region to a whole range of developmental issues and cooperation in the field of education, trade and commerce, rural development, social issues, energy and food security, environment, etc. Of particular significance in this regard is the call by the leaders for the implementation of the recommendations of the SAARC Regional Multimodal Transport Study, which is key to realizing the objective of connectivity within the region and beyond it to other neighbouring regions.

How does all this impact on the North East region? With the paradigm shift from state centralism to interdependence and global and regional cooperation, India is aware of the geo-economic potential of the North-Eastern region as a gateway to East and South-East Asia. I am convinced

that by gradually integrating this region through cross-border market access, the North Eastern states can become the bridge between the Indian economy and what is beyond doubt the fastest growing and dynamic region in the world. As I mentioned earlier, geography is opportunity and the very geographical location of the North East makes it the doorway to South East and East Asia and vice versa, a doorway for these economies into India.

Let us consider some basic facts. The North-Eastern region is cradled by five Asian countries - China, Nepal, Bhutan, Myanmar and Bangladesh. Arunachal Pradesh, Manipur, Mizoram and Nagaland share a 1643 km long border with Myanmar; Assam, Meghalaya, Tripura and Mizoram share a 1880 km border with Bangladesh; Arunachal Pradesh, Assam and Sikkim share a 468 km border with Bhutan; Arunachal Pradesh and Sikkim share a 1325 km border with the Tibet Autonomous Region of the People's Republic of China. The region's difficulties as a loss of connectivity and market access following Partition in 1947 are well known. Today, however benefiting from the new dynamic of regional cooperation, this enormous geographical proximity, along with shared culture and customs, provides the basis for considerable synergies. Let me give some examples.

We are involved in a variety of cross border development projects with Myanmar in diverse fields such as roads, railways, telecommunications, IT, science and technology, power, etc. These initiatives are aimed at improving connectivity between North-Eastern India and Western Myanmar and are expected to give an impetus to the local economies as well as bilateral trade. Probably among the most important is the Kaladan Multi-Modal Transit Transport Facility, which envisages connectivity between Indian ports on the eastern seaboard and Sittwe Port in Myanmar and then through riverine transport and by road to Mizoram, thereby providing an alternate route for transport of goods to North-East India. In fact, given the importance that Government of India attaches to this project, we have decided to fund it completely on our own. The upgradation of the 160 km Tamu-Kalewa-Kalemyo Road in Myanmar across Manipur has already been completed. Discussions are also on to start work on the Trilateral Highway Project, which proposes to connect Moreh in Manipur to Mae Sot in Thailand via Bagan in Myanmar. Efforts are also underway to improve infrastructure, particularly road links, at the second India-Myanmar border trade point at Rhi-Zowkhathar In Mizoram sector by upgradation of the Rhi-Tidim and Rhi-Falam road segments in Myanmar. Apart from developing road links, efforts are underway to have a rail link from Jiribham in Assam to Hanoi in Vietnam passing through Myanmar. We are also working on enhancing

digital connectivity with this region, in particular through an optical fibre cable link between Moreh in Manipur and Mandalay in Myanmar.

With Bangladesh, there is already an agreement to run a passenger train service from Sealdah to Joydebpur and it is hoped that the service will start in the next few months. Of course, the bus services between Kolkata and Dhaka and Agartala and Dhaka are already operational. Similarly, India's excellent relations with Bhutan and its involvement in the development and growth of Bhutan's economy also translate into direct benefits for the North-Eastern states. Recent increases in the export of raw material and agricultural produce from this region to Bhutan have meant better opportunities for agriculturists and industries in the North-East. In fact, Jaigaon has grown and become prosperous with its position as the nodal point for trade with Bhutan. Mutually beneficial development of water resources between India and Bhutan is another characteristic of this relationship and most of the hydro-electric power that is being generated as a result from projects like Chukha, Kurichu and Tala is for the use of the Eastern and North-Eastern states of India.

I hope these examples have given you a sense of the priority that the Government places on the development of the North-Eastern region, including by integrating our foreign policy ends into the process. Of course, innovative foreign policy is not enough to solve our problems of development and growth and a policy framework in the domestic context also has to be in place to fully exploit the opportunity presented by geography. The development of the North Eastern States has been a central concern of the UPA Government. Accordingly, modifications in the North East Industrial Policy 1997 with the objective of matching the aspiration levels of these States and to ensure their speedy industrial development were brought about through the North East Industrial and Investment Promotion Policy 2007 after detailed discussions in the Committee of Secretaries, Group of Ministers and in the CCEA. At every stage, the suggestions of State Governments, recognized chambers and federations and other interest groups were debated at length. The policy, which has come into effect from 1<sup>st</sup> April this year, recognizes the need for a boost in investment in the North-Eastern region and aims to provide higher incentives for Industrial development and investment promotion.

In a substantive departure from the past, the distinction between 'thrust' and 'non-thrust' industries made in 1997 has been done away with. The capital investment subsidy has been enhanced from 15% of the investment in plant and machinery to 30%, The maximum ceiling of Rs 30 lakh on the

subsidy has been done away with. The maximum limit for automatic approval of subsidy has been enhanced from Rs. 30 lakhs to Rs. 1.5 crores. Claims of subsidy above Rs 1.5 crore and upto Rs 30 crore will be decided by an Empowered Committee chaired by the Secretary, Department of Industrial Policy and Promotion. Proposals of subsidy beyond Rs.30 crore will be placed before the Union Cabinet for consideration and approval.

Since the services industry is not very well-developed in the region, incentives have also been provided to some specified sectors like hotels, adventure and leisure sports, nursing homes, vocational training institutes, etc. Considering the rich biodiversity of the region, 'biotechnology' has been brought under purview of the new Policy. Many of the existing useful provisions of NEIP 1997 like transport subsidy scheme, income tax exemption, interest subsidy, etc., have also been retained. These are all significant steps to invite larger chunks of investment into this region and I expect many more large projects to come up in this part of the country.

When we look at all these steps taken on the foreign policy and the domestic fronts, it is clear that increased economic activity will lead to robust growth and the welfare of the local population. Naturally, challenges remain to be addressed and one of the major challenges is to ease trade among geographically contiguous economies by taking further steps to reduce and remove trade and transport barriers. We need to urgently reduce transaction costs through a series of measures, including simplification of border trade procedures and further improving physical connectivity and action on these fronts, including in cooperation with our neighbours, is underway.

At the same time, I am aware that many fear that accelerated cooperation could in fact pose serious challenges. These concerns or challenge need to be listed out; we need to dwell on how they may be addressed and today's exercise is part of this effort. There is, however, considerable urgency in this. The process of regional cooperation has begun and I can only foresee acceleration in the process. It is important, therefore, that we gear up for this and not get swept aside or away in the process.

Before I end, let me say that I look forward to hearing from you what needs to be done to optimise the benefits of regional and sub-regional cooperation among our people.

I thank you.

**323. Address by the External Affairs Minister Pranab Mukherjee at a function jointly organized by the Embassy of India in Jakarta and the Indonesian Council on World Affairs on " India's Growing Engagement with East Asia".**

**Jakarta, June 18, 2007.**

Dr. Arifin M. Siregar, Chairman of the Governing Body of the Indonesian Council on World Affairs and Distinguished Guests,

It gives me great pleasure to be here today to address this distinguished and knowledgeable gathering on the topical subject of India's growing engagement with East Asia<sup>1</sup>.

---

1. Before the External Affairs Minister left for his tour of Indonesia and Singapore, the Public Diplomacy Division of the Ministry of External Affairs in pursuit of its outreach policy organized an interactive conference in Shillong in Northeastern India. The idea was to underline the geographic contiguity of the North-East India particularly with the ASEAN countries. Elaborating on the idea, the Spokesperson of the Ministry on June 14 said "This in fact is part of the MEA's public diplomacy drive which we have felt has been made necessary by the changes that are taking place in the world in terms of the more direct impact of foreign policy matters on the people of countries, people of particular regions; and the importance of the geographical context of a particular region. It is quite obvious that Look-East policy and the spinoffs of the Look-East policy would have a direct impact and could bring significant benefits to the people of the North-East." He said the Ministry was "undertaking this initiative of organizing these interactive conferences and meetings so that not only is the information disseminated but we also get inputs from the various regions concerned which can then go into policy-making." So, it is with this rationale that the External Affairs Minister will be speaking in Shillong in collaboration with ICRIER and the Omeo Kumardas Institute of Social Change and Development. Responding to a question from the media on the rationale of the Look East policy for the people of the Northeastern region of India, in the context of the overall foreign policy of the country, Spokesperson said: "The Look-East Policy was started in an international context. We have been very actively pursuing our relations with the countries to the East both bilaterally as well as in the multilateral fora that exist. For instance, we have gone from being outside the ASEAN to being Summit partners. We have a very intensive interaction with the ASEAN including attending the last East-Asia Summit. The focus of this initiative is not particularly restricted to the North-East. But let us say it is a general progression of our mindset that foreign policy has to be not only undertaken with other countries but that foreign policy has to be explained to our own people, and naturally given the globalised nature of our world today, whether you are talking of the economic impact, political impact, the socio-cultural impact. For instance, our policy in the Gulf has an absolutely direct impact on the situation in Kerala, whether you talk of the polity, you talk of the social impact, the economy because so many people are going there. So, naturally anything that happens in the Gulf in our foreign policy impacts directly on that region. Similarly what happens in Sri Lanka impacts directly on Tamil Nadu. So, the fact is that if you have to carry the people behind your foreign policy, then you have to explain it to them, you have to see what their inputs are and whether you can take them on board. Yes, Look-East policy may not yet have brought direct impact. But, the ASEAN

I have chosen to speak on this topic for a number of reasons. As many of you would be aware, India has undergone significant changes over the last decade and a half. During the same period, the international order has seen a profound structural transformation. Consequently, the foreign policy of India has had to re-formulate its priorities.

Among the major changes, the economic story is well known. India has achieved an average growth rate of 9% in the last three years and hopes to push it even further. Driven so significantly by domestic consumption, we have had to create our own model of growth. There is perhaps no precedent for change taking place on such a scale within a democratic framework. An era of 10% growth, which appears within sight, clearly calls for a different approach, given that closer integration with the global economy is a *sine qua non* for most developing countries. Expanding foreign trade and attracting greater foreign investment flows requires recalibration and reallocation of our energies. We have also taken note of the shift in the economic centre of gravity of the global economy towards the Asia Pacific region. Amidst this scenario, energy cooperation, with particular emphasis on supply and distribution in the long term, is among the subjects acquiring greater salience in our thinking.

In this context, East and South-East Asia have come to assume an important place in our policy priorities. Talking about this region, one of its unique, yet universally recognized features is the importance we attach to mutual respect and peaceful coexistence between nations. Within the nations themselves, the importance given to family values, culture and traditions

---

Car Rally for instance which we had in 2005, certainly focused attention on the economic and tourism potential of our North-East, and the possibilities that it could multiply, if you manage to build the highways and other infrastructural projects. So, yes, it may be still in the future but it is never too early to begin. Again elaborating on the relations with ASEAN in the context of Look East policy the Spokesman on June 15 added that "developing our ties with the ten member-countries of ASEAN has been a principle objective of our Look-East policy which was conceived in the 90s and has been pursued consistently and actively for the last decade and a half. Multi-faceted relationships have been developed with the countries of the ASEAN region, both in the bilateral context as well as in the multilateral context. India is a full dialogue partner of ASEAN since 1996 and an annual summit partner since 2002. India has participated in the East-Asia Summits held in Kuala Lumpur and Cebu in December 2005 and January 2007. Total volume of India's trade with the sixteen East-Asia Summit countries is now US\$ 80.1 billion as per the 2006 figures. Besides, of course, the ASEAN multilateral fora and their internal multilateral fora like the ARF, we also engage with the countries of the region as part of the Mekong-Ganga Cooperation and the BIMSTEC Forum. The Mekong-Ganga Cooperation comprises of six countries - that is India and five ASEAN countries Cambodia, Lao PDR, Myanmar, Thailand and Vietnam. BIMSTEC has India, Bangladesh, Bhutan, Nepal, Sri Lanka, Myanmar and Thailand.

needs no elaboration. When we talk about a family or comity of nations, it is understood in the right perspective. The freedom of expression which we espouse finds reflection in the strong democratic system that prevails in our countries. An inclusive government, responsive to the concerns of our peoples, gives us the needed energy to deal with the diverse and pluralistic societies our countries represent. Our shared historical traditions give us yet another reason for working together.

India's policy towards ASEAN nations and the nations of the Pacific was conceived in the context of various factors, including national interest, security concerns and economic imperatives. This policy was prompted by significant changes in the global political and economic scenario and by our own adoption of economic reforms and liberalization. ASEAN's economic, political and strategic importance in the Asia Pacific region and its potential to become a major partner of India in trade and investment were significant elements in our approach to the region. India's "Look East" policy can thus be described as the search for political and economic convergence with this most dynamic region of Asia which, through its emergence as an economic powerhouse of the world economy, provided India with a model worthy of emulation.

India has pursued its "Look East" policy and developed multi-faceted relationships with countries of the ASEAN region and the South Pacific within a multilateral as well as a bilateral context. We have been actively engaged with the ARF and as a Full Dialogue Partner of the ASEAN since 1996 and have been having annual summits since 2002. India also participated in the East Asia Summits held in Kuala Lumpur and Cebu in December, 2005 and January, 2007 respectively. We signed the "India-ASEAN Partnership for Peace, Progress and Shared Prosperity" at the 3rd India-ASEAN Summit in Vientiane in November, 2004. The Agreement envisages strengthening cooperation in the UN and the multilateral fora, including the WTO, combating international terrorism, transnational crimes, human trafficking, cyber and economic crimes, sea piracy and cooperation in capacity building. It lays stress on the development of regional infrastructure and intra-regional communication links to facilitate greater movement of goods and people cooperation in science and technology.

The resurgence of Asia in political and economic terms has been accompanied by the rise of powerful economic forces unleashed by globalization and the trend towards regional economic integration. Our

engagement with East and Southeast Asia in the political and security arena has been accompanied by progressive economic integration in terms of Free Trade Agreements and Comprehensive Economic Cooperation Agreements with countries of the region. A Framework Agreement on the FTA between India and Thailand was signed in 2003 and the Early Harvest Programme is being implemented since 1st September, 2004. A Framework Agreement for an FTA with the ASEAN was concluded in 2003. India concluded a Comprehensive Economic Cooperation Agreement with Singapore in June, 2005 and has established a Joint Study Group for examining the feasibility of a similar agreement with Malaysia. With Indonesia too, we have signed an MoU on the Establishment of a Joint Study Group to examine the feasibility of a similar arrangement. A Regional Trading Arrangement is currently under negotiation With China and negotiations are underway on bilateral Comprehensive Economic Partnership Agreements with Japan and the Republic of Korea.

India also participated in the first East Asia Summit (EAS) held in Kuala Lumpur in December, 2005. The Summit was a historic event which marked the beginning of a process that could define the future architecture of the region. India believes that the long term goal of the EAS should be the creation of a prosperous community of nations built on shared values and interests. At the Second East Asia Summit held in Cebu in January, 2007, the agenda of the forum was widened to include a number of areas including regional collaboration on poverty eradication, energy security, education, natural disaster mitigation, working together on the Doha Development Agenda, furthering economic development and regional integration and cooperation in ensuring regional security.

As a consequence of India's increasing economic engagement and integration with the Southeast Asian and East Asian region, the share of East Asia Summit countries in India's total trade increased from 18% to 26% between 1991 and 2006. The total volume of India's trade with the 16 East Asia Summit countries amounted to US \$80.1 billion in 2006. These developments should also be viewed in the context of the vision articulated by Prime Minister Dr. Manmohan Singh during the India-ASEAN Business Summit in New Delhi in October, 2004, envisaging the establishment of an "Asian Economic Community", which would be the driver of growth and economic integration in the entire region.

A significant aspect of the cooperation, both bilateral and through multilateral institutions like the ASEAN Regional Forum (ARF), has been the growing

cooperation on security issues fostered through dialogue and practical measures, as well as through the establishment of legal frameworks. The ARF is the only political and security dialogue forum in the region. It helps us engage with a broader range of countries and work towards the goal of ensuring regional peace and stability. For its part, India has, for many years, consistently urged the ARF to take up discussions on international terrorism. We have also engaged countries of the ASEAN, the Far East and the Pacific bilaterally on this issue that remains one of the principal security challenges of our times.

Our security cooperation has focused notably on maritime security, which is a vital issue of common concern to all of us. India has entered into bilateral arrangements with Thailand and Indonesia for joint coordinated patrols by the three navies in the Bay of Bengal at the mouth of the Malacca Straits. We are also ready to contribute to capacity building of littoral states in the area of maritime security. The participation of the navies of Southeast Asian countries in the bi-annual MILAN exercises has also fostered closer regional cooperation on maritime security issues. India also signed the Treaty of Amity and Cooperation at the Bali Summit in October, 2003.

Apart from the main ASEAN forum, India engages with various ASEAN countries in different frameworks. There is the context of our membership of Mekong-Ganga Cooperation and then the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation (BIMSTEC). The MGC focuses on cooperation in culture, tourism, human resource development, education, transport and communication. BIMSTEC has chosen to focus on trade and investment, technology, transport and communication, energy, tourism and fisheries. It plays the role of bridging countries of South and South East Asia, with the North East region of our country as the centre of this bridge. We see great value in pursuing cooperation through all these forums.

Let me also take this opportunity to make brief observations about our ties with Indonesia and individual East Asian countries.

India and Indonesia are large pluralistic democracies in Asia with a mutual stake in each other's progress and prosperity. Our relationship is endowed with unique characteristics. Perhaps there is no other country with which India shares so much in common in terms of geography, size, diversity, historical and civilizational ties as it does with Indonesia. Indeed, soon after we attained independence, our two countries worked together to spread the message of freedom amongst the oppressed peoples of the world.

Together, we wrote the concluding chapter of colonialism. Based on a similar world view, we have crafted an enduring friendship founded on mutual respect and cooperation. I particularly wish to congratulate the leadership of Indonesia for the immense strides that have been made by this country in building democratic institutions and placing the economy firmly on the road to recovery and growth.

In November 2005, H.E. President Susilo Bambang Yudhoyono and Prime Minister Dr. Manmohan Singh opened a new chapter in our bilateral relations by establishing a New Strategic Partnership and identifying a range of areas for enhancing cooperation for the mutual benefit of our two countries. Indonesia is today also India's third largest trading partner in the ASEAN. Our bilateral trade reached US \$4.79 billion in 2006, representing a growth of 22% over the trade figures for the previous year. More than trade, however, Indonesia has been crucial for India in developing ties with the ten members of the Association of South East Asian Nations (ASEAN). This is important because building ties with ASEAN has been a principal objective of our "Look East" policy, conceived in the early 1990s.

As India's largest neighbour and a key emerging player in the international arena, China remains an important priority of India's foreign policy. The rapidly growing trade and economic exchanges between the two countries are pointers to the fact that India and China are now constantly engaged in mutually rewarding pursuits on the basis of a wide array of complementarities. Frequent high level visits have further contributed to developing mutual trust and understanding. While we remain fully conscious of our outstanding differences with China, including on the boundary question, the basic paradigm of our approach is to seek an all-round development of ties, without allowing these differences to define the agenda of the relationship. At the same time, we remain committed to proactively address these differences through peaceful dialogue on an equal footing.

While some degree of healthy competition between the two countries is inevitable, particularly in the area of trade and commerce, we believe that there is enough space and opportunity in the region and beyond for both India and China to grow together. In our view, the India-China partnership is an important determinant for regional and global peace and development, and for Asia's emergence as the political and economic centre of the new international order. It is with this realization of the long term, global and strategic character of India-China relations that the leaders of the two countries decided to establish a "Strategic and Cooperative Partnership

for Peace and Prosperity" during the visit of the Chinese Premier H.E. Mr. Wen Jiabao to India in 2005.

India also attaches high priority to strengthening relations with Japan and there has been a visible transformation in the political ambience of the relationship on both sides. Our bilateral relations reflect a new found dynamism propelled by the landmark visit of Prime Minister Koizumi to India in April, 2005 and the visit of Prime Minister Dr. Manmohan Singh to Japan in 2006. Japan is increasingly looking at its relations with India from a strategic perspective. Both our countries are now engaged in the process of deepening our Global Partnership in the 21st Century through high level visits, expanding economic relations and growing mutually beneficial exchanges in energy, science and technology, defence, cultural and academic fields.

The main emphasis of our relations with the Republic of Korea is to consolidate and intensify the present positive trends in our engagement and reiterate that India remains committed to pursuing a long term cooperative partnership for peace and prosperity. We seek to impart greater substance to our economic partnership through enhanced trade and investment flows, and also encourage Korean investments in various sectors, including infrastructure, steel, shipbuilding, hydrocarbon energy resources, biotech, pharmaceuticals, etc.

Singapore was one of the earliest of our partners in the ASEAN to realise the implications of the economic reforms India began a decade and a half ago. Our partnership has greatly encouraged India's stronger participation in Southeast Asian and East Asian structures since then. At the bilateral level, a Comprehensive Economic Cooperation Agreement was concluded in 2005 which has had a significant positive impact on our trade and investment relations. Today, Singapore is our largest trading partner in the ASEAN with a bilateral trade volume of US \$13 billion in 2006.

India and Malaysia have been linked together by historical and cultural ties that go back centuries. Both countries effectively symbolise "Unity in Diversity". Malaysia is our second largest trading partner in the ASEAN with a bilateral trade volume of US \$6.58 billion. Malaysian companies are active in India's infrastructure sector and Malaysia is also home to the largest Indian community in Southeast Asia.

Our relations with Thailand have moved beyond traditional areas of culture and commercial interaction to cooperation in security, defence, science

and technology, and a movement towards free trade. Thailand was the first country in the ASEAN with which India signed an FTA Framework Agreement in 2003 and it is today our fourth largest trading partner in the ASEAN.

Vietnam is a key partner of India in the ASEAN. We have always enjoyed close and cordial relations, the foundations of which were laid by Prime Minister Jawaharlal Nehru and President Ho Chi Minh more than fifty years ago. Our bilateral relationship is founded on genuine goodwill and mutual respect. India is committed to assisting Vietnam, along with Laos and Cambodia, in the spirit of South-South cooperation, both bilaterally and in the context of the 'Initiative for ASEAN Integration', which seeks to narrow the development gap among the members of the ASEAN.

We are committed to building a multifaceted relationship with the Philippines, encompassing a broad-based development of relations in the political, economic and security fields. The Philippines could emerge as an important partner for trade and investment and a number of Indian IT companies have established a presence there.

In conclusion, let me state that India remains committed to further intensifying its relations with this region. The pursuit of regional economic integration, emphasis on South-South cooperation, promotion of societal links through cultural cooperation and educational exchanges, as well as an increased focus on security cooperation and countering threats to national security will remain important pillars of our engagement with East Asia.

I thank you all for providing me this opportunity for sharing India's latest perspectives on its Look East policy. I am happy that I have been able to do this here in Indonesia, a country with which our relations go well back in time and where an active future beckons us all to build further on time-tested foundations.

I thank you.

**324. Press Release of the Ministry of Railways on the signing of the Inter-Governmental Agreement on Trans-Asian Railway.**

**New Delhi, June 30, 2007.**

In line with the Government's "Look East Policy" that requires strengthening of rail linkages in the region especially with our South East Asian neighbours, the Government of India has signed the Inter-Governmental Agreement on Trans-Asian Railway. The Agreement was signed by Shri J.P.Batra, Chairman Railway Board, Indian Railways, on behalf of Government of India on 29th June 2007 at UN Headquarters, New York. Earlier, 18 countries had signed the agreement at Busan, Republic of Korea in November 2006. Now with India and Bangladesh signing the agreement, a total number of 20 countries have become signatories of this agreement.

The total Trans-Asian Railway Network as finalised by the agreement has 80,900 Kms. of Railway line in 28 countries including 22,600 Kms. in South Asia, Islamic Republic of Iran and Turkey. The Southern Corridor of the network as decided in an expert group meeting held in Dhaka in 1999, commences from Kunming in China and Bangkok in Thailand and ends in Kapikule in Bulgaria. The total length of this route between Bangkok and Kapikule is 11,460 Kms. and it provides trans continental rail connectivity to the countries of China, Thailand, Myanmar, Bangladesh, Pakistan, India, Iran and Turkey. The route as proposed will enter India at Tamu, bordering Myanmar, entering Bangladesh at Mahisasan/Shabajpur and again enter India from Bangladesh at Gede. On the west side, the route is proposed to enter Pakistan at Attari. This route has a missing link of 315 Kms. between India and Myanmar of which 180 Kms alone is in India between Jiribam and Tamu in Manipur state.

Trans-Asian Railway Network will improve transport linkages between Asia and Europe facilitating movement of goods and containers among SAARC and ASEAN countries resulting in enhanced trade. It will also provide a unique opportunity for the Government to strengthen our ties with South East Asia. The Trans-Asian Railway Network will also strengthen rail linkages in North Eastern part of the country. Indian Railways has the largest and most developed rail network in the region. A multi-lateral agreement in the region will harmonize different standards and technologies adopted by different countries benefiting Indian Railways.

Tran-Asian Railways Project of UN-ESCAP aims for promoting infrastructure development in the ESCAP region. An Inter-Governmental agreement to formalize the Trans-Asian Railway Network was negotiated under UN-ESCAP and was adopted by the ESCAP at its 62nd session at Jakarta in April 2006.

**325. Keynote Address by External Affairs Minister Pranab Mukherjee at the Institute for Security and International Studies (ISIS), Chulalongkorn University on "India's Look East Policy: Implications for Thailand and South East Asia".**

**Bangkok, September 14, 2007.**

Dr. Thitinan Pongsudhirak, Director of the Institute of Security and International Studies,

Faculty and Students,

Distinguished Guests,

It gives me great pleasure to be here today to address this distinguished and knowledgeable gathering on "India's Look East Policy and its implications for Thailand and South East Asia". I am particularly happy to be doing so during the 60th Anniversary year of the establishment of diplomatic relations between India and Thailand. The Anniversary is, indeed, an opportune moment to share with each other our respective priorities and plans for the future. By doing so, I believe, we can craft a shared vision that would form the basis for cooperative action leading to progress and stability for the entire region.

I would, at the outset, like to congratulate the Institute for Security and International Studies for their work in conducting independent research and disseminating knowledge on international issues. I am also happy that issues relating to this region and to Asia are of priority for the Institute. This is particularly important as our countries have too often in the past looked at each other through the eyes of others. As the 21st century begins and as Asian nations rise to take their proper place at the table of global affairs, we need a better understanding of each other, both at the level of states

and of civil society. I, therefore, commend the ISIS for the work that they are doing to foster closer understanding in the region.

I would, at the beginning, also like to say a few words about India and Thailand. Our two countries are no strangers to each other. The architecture, sculpture and mythology of both countries reflect our shared cultural and civilizational linkages. India and Thailand are also maritime neighbours. It is, perhaps, not so well known that India's Andaman & Nicobar Islands are much closer to Thailand's coast than to the Indian mainland. History and geography make our two countries natural partners and it, therefore, follows that Thailand occupies a central place in India's "Look East" policy.

I have chosen to speak on this topic for a number of reasons. As many of you would be aware, India has undergone significant changes over the last decade and a half. During the same period, the international order has seen a profound structural transformation. Consequently, the foreign policy of India has had to re-formulate its priorities.

When our "Look East" policy was initiated in 1991, it marked a strategic shift in our perspective of the world. It coincided with the beginning of our economic reform process and provided an opportunity for significantly enlarging our economic engagement. At the same time, it also encouraged a renewal of linkages with our civilizational neighbours in South East and East Asia.

From sectoral dialogue partners in 1992, we became full dialogue partners in 1996 and, since 2002, we have annual Summits with ASEAN. India-ASEAN cooperation now covers a wide field, including trade and investment, science & technology, tourism, human resource development, transportation & infrastructure and health & pharmaceuticals. At the Third India-ASEAN Summit held in Vientiane in November 2004, we signed the "India-ASEAN Partnership for Peace, Progress and Shared Prosperity". The document contained a Plan of Action providing for enhanced political, economic, social and cultural cooperation, which is being implemented in a phased manner. In October 2003, India also signed the Treaty of Amity and Cooperation.

A significant aspect of the cooperation, both bilateral and through multilateral institutions like the ASEAN Regional Forum (ARF), has been the growing collaboration on security issues fostered through dialogue and practical measures as well as through the establishment of legal frameworks. This cooperation has focused on many areas, notably maritime security and counter-terrorism, which are of vital interest to the security of States as

well as commerce through the sea-lanes of communication in this region. On maritime security especially, India has entered into bilateral arrangements, including MoUs signed with Thailand and Indonesia, for joint coordinated patrols by the Navies of India, Indonesia and Thailand in the Bay of Bengal at the mouth of the Malacca Straits. We have also offered to contribute to capacity building of littoral states in this area. The participation of navies of Southeast Asian countries in the bi-annual MILAN exercises has also fostered closer regional cooperation on maritime security issues.

India has also, for many years, consistently urged the ARF to take up discussions on international terrorism. Since 2003, an Inter-Sessional Meeting on Counter Terrorism and Transnational Crime has been established. Four meetings have been held, in which recent developments in regional terrorism, counter terrorism strategies and capacity building were discussed. India has also engaged countries of the ASEAN, the Far East and the Pacific bilaterally on cooperation to combat terrorism.

The India-ASEAN FTA lies at the heart of our engagement with ASEAN. Though the implementation of the FTA was to begin on 1 January 2006, the negotiating process has proved difficult. The challenge has been to harmonize the positions of two partners who are both willing, but have different characteristics. However, there have been positive developments in recent meetings of Senior Officials and there are now proposals on the table that provide us with the possibility of concluding the negotiations at an early date. I am hopeful that we will see a breakthrough in the coming months. While all sides may not get a solution that meets all their objectives, the time has come for us to be pragmatic and find an outcome that is a win-win for both sides<sup>1</sup>.

---

1. It may be recalled that in August Mr Kosit Panpiemras, Deputy Prime Minister and Minister of Industry of Thailand had visited New Delhi and welcoming him on August 31, Kamal Nath, Indian Minister of Commerce and Industry, had expressed hope that the bilateral trade between India and Thailand would take a growth trajectory that would take trade relations between the two countries to a new height. He had hoped that the FTA negotiations that are underway covering trade in goods, services and investments, including issues such as Rules of Origin, trade facilitation, Anti-dumping and safeguard measures, Dispute Settlement Mechanism would benefit the two countries. The Trade between India and Thailand has grown significantly during 1992 to 1997 from a level of US\$ 399.8 million in 1992 to US\$ 896.4 million in 1997. Bilateral trade crossed the US\$ 1 billion mark during the year 2000 (US\$ 1,122.6 million), a significant increase of 40.2% compared to 1999 (US\$ 800.2). The Bilateral trade has shown an impressive growth rate in the last few years. Bilateral trade volume increased by 29% over previous year, to touch US\$ 2,286 million in 2005-06 (exports US\$ 1,075 million; imports US\$ 1,211 million)

Besides the India-ASEAN dialogue, there are other frameworks too that form the architecture of our Look East Policy and lend substance to our engagement with South-East Asia. BIMSTEC, or the Bay of Bengal Initiative for Multi-Sectoral Technical & Economic Cooperation, was established right here in Bangkok on 6 June 1997. Focusing on trade and investment, technology, transport and communications, energy, tourism and fisheries, the objective of the grouping is to serve as a bridge between South & South East Asia. Though formed in 1997, BIMSTEC only became active after the first Summit that was held in Thailand in July 2004. India will be hosting the second Summit sometime in early 2008. We hope that this will impart further momentum to the grouping.

The MGC or Mekong Ganga Cooperation is another building block of our Look East policy. As you can probably guess, it too has a Thailand angle. The idea of bringing together Cambodia, India, Laos, Myanmar, Thailand and Vietnam to form the MGC came up in a conversation between the then

---

and had touched US\$ 1,509 million by September 2006. India's exports to Thailand were US\$ 1075 million in 2005-06, an increase of 19% over the previous year. In 2006-07 (April-Sept), India's exports to Thailand were US\$ 697 million. India's imports from Thailand were US\$ 1,211 million in 2005-06, a growth of about 40% over the previous year. The figure for 2006-07 (April-Sept) was US\$ 812 million. India's major exports to Thailand are Gemstones, mainly diamonds and emeralds; other metal ores, metal waste scrap and products; chemicals; iron, steel and products; vegetables and vegetable products; machinery and parts; medicinal and pharmaceutical products; yarn and fibres; vehicle parts and accessories; fresh aquatic animals, chilled, frozen and instant; fertilizer and pesticides; animal and animal products; plastic products; metal manufacturers. The Major imports of India from Thailand are Polymers of ethylene, propylene etc. in primary forms; radiobroadcast receivers, television receiver and parts thereof; iron and steel and their products; motor cars, parts and accessories; machinery and parts thereof; automatic data processing machines and parts thereof; chemical products; air-conditioning machine and parts thereof; aluminium products; plastic products. Earlier on June 26 at the India-Thailand Business Summit organized by the apex commerce chambers of the two countries, Thai Prime Minister Surayud Chulanont had said both Thailand and India would conclude a Free Trade Agreement (FTA) by 2010 that would further boost strong bilateral economic ties. "The two countries are on track to conclude an FTA in the near future with a view to establishing the FTA covering trade in goods by 2010." He had on the occasion announced the launch of India-Thailand FTA roadshow to develop business opportunities. Expressing satisfaction over the growing Indo-Thai business relations, General Chulanont said the FTA would benefit both economies as it would boost trade and investments. "We look forward to concluding regional FTAs in the frameworks of the Association of Southeast Asian Nations (ASEAN) and BIMSTEC (the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation that groups together Bangladesh, Bhutan, India, Myanmar, Nepal, Sri Lanka and Thailand) that would benefit regional economy as a whole," he added. Stressing the importance of the proposed FTA, General Chulanont said that since the elimination of tariffs on 82 items under the early harvest scheme of limited FTA in 2004, bilateral trade jumped to \$3.4 billion last year, while the target of \$4 billion by 2007 was likely to be achieved.

Thai Foreign Minister and his Indian counterpart in New Delhi in July 2000. Both the Ganga and the Mekong are civilizational rivers, and the MGC initiative is indicative of the shared cultural linkages among the member countries. The focus of the MGC is on promotion of tourism and on cultural and educational cooperation. Just a few days ago, we hosted 20 Buddhist pilgrims from each MGC country in India for a visit to Buddhist holy sites. Initiatives such as these will, we hope, allow us to revive the cultural, commercial and other linkages that had brought together our countries in the ancient past.

India's perspectives for the future of the region have been outlined in our vision of an Asian Economic Community. Our Prime Minister has spoken of an integrated market, spanning the distance from the Himalayas to the Pacific Ocean, linked by efficient road, rail, air and shipping services. To quote him: "This community of nations would constitute an 'arc of advantage' across which there would be large-scale movement of peoples, ideas and connectivity".

The East Asia Summit provides a forum for taking forward this vision. As a consequence of India's increasing economic engagement and integration with the Southeast Asian and East Asian region, the share of East Asia Summit countries in India's total trade increased from 18% to 26% between 1991 and 2006. The total volume of India's trade with the 16 East Asia Summit countries amounted to US\$ 80.1 billion in 2006. The coming together in this framework of increasingly interdependent countries that have transformed the region into the engine of the world economy, has the potential of redrawing equations, both within Asia and of Asia vis-à-vis the rest of the world.

At the inaugural East Asia Summit held in Kuala Lumpur in December 2005, India proposed the establishment of a robust institutional architecture that would form the basis for regional cooperation and action, and lead to engagement on a scale not seen in Asia in the past. We suggested that a Pan-Asian Free Trade Agreement could be the first building block for such a community. We are, indeed, gratified, that this suggestion has found acceptance. At the Second East Asia Summit held in Cebu in January this year, it was agreed to launch a Track II study on a Comprehensive Economic Partnership in East Asia among all East Asia Summit countries.

In my opening remarks, I had noted that shared history and geography make Thailand and India natural partners. Indeed, India's 'Look East' Policy has found a perfect complement in Thailand's 'Look West' Policy. As a

result of these new approaches, India's relations with Thailand have moved beyond the traditional areas of culture and commercial interaction to cooperation in security, defence, science and technology, as well as free trade. Thailand is our fourth largest trading partner in the ASEAN. When we signed a Framework Agreement on an FTA with Thailand in 2003, it became the first country in the ASEAN with which India had concluded such an arrangement. The Early Harvest Programme of the FTA is being implemented since 1st September 2004. We have had very constructive discussions with Thailand recently and are hopeful that it would be possible to sign the FTA on goods before the end of this year.

India's partnership with ASEAN and other regional mechanisms has naturally given our multilateral cooperation with the region a major boost. At the same time, it has also served to significantly diversify and deepen our bilateral relationships with individual ASEAN member countries. Our contacts with almost all countries of the region are now marked by enhanced economic relations, closer diplomatic coordination, intensified cultural ties and greater people to people contact. Defence and security cooperation for mutual benefit too are aspects of some of these relationships. In the coming years, through mechanisms such as free trade or comprehensive economic cooperation agreements, we hope to further promote all these individual relationships as well.

Ladies and Gentlemen,

While we focused on ASEAN when we initiated our "Look East" policy a decade and a half ago, the policy has since evolved to include East Asia and countries of the Pacific, and we have welcomed the opportunities this has provided to enhance our relationships with these countries, all of whom have important roles to play in this extended region. Let me briefly touch on three of them.

As India's largest neighbour and a key emerging player in the international arena, China remains an important priority of our foreign policy and a key component of our "Look East" policy. The rapidly growing trade and economic exchanges between the two countries are pointers to the fact that India and China are now constantly engaged in mutually rewarding pursuits on the basis of a wide array of complementarities. Frequent high level visits have further contributed to developing mutual trust and understanding.

While we remain fully conscious of our outstanding differences with China,

including on the boundary question, the basic paradigm of our approach is to seek an all-round development of ties, without allowing these differences to define the agenda of the relationship. At the same time, we remain committed to addressing proactively these differences through peaceful dialogue on an equal footing.

While some degree of healthy competition between the two countries is inevitable, particularly in the area of trade and commerce, we believe that there is enough space and opportunity in the region, and beyond, for both India and China to grow together. In our view, the India-China partnership is an important determinant for regional and global peace and development, and for Asia's emergence as the political and economic centre of the new international order. It is with this realization of the long term global and strategic character of India-China relations that the leaders of the two countries decided to establish a "Strategic and Cooperative Partnership for Peace and Prosperity" during the visit of the Chinese Premier H.E. Mr. Wen Jiabao to India in 2005.

We also attach high priority to strengthening our relations with Japan. There has been a visible transformation in the political ambience of the relationship on both sides. Our bilateral relations reflect a new found dynamism, propelled by the landmark visit of Prime Minister Koizumi to India in April, 2005, the visit of Prime Minister Dr. Manmohan Singh to Japan in 2006 and the visit of Prime Minister Shinzo Abe a few weeks ago. Japan is increasingly looking at its relations with India from a strategic perspective. Both our countries are now engaged in the process of deepening our Strategic and Global Partnership through high level visits, expanding economic relations and growing mutually beneficial exchanges in energy, science and technology, defence, cultural and academic fields.

With the Republic of Korea, where I am going day after tomorrow, the main emphasis of our relations is to consolidate and intensify the present positive trends in our engagement. India remains committed to pursuing with ROK a long term "Cooperative Partnership for Peace and Prosperity". We seek to impart greater substance to our economic partnership through enhanced trade and investment flows, and also encourage Korean investments in various sectors, including infrastructure, ICT, hardware, steel, shipbuilding, hydrocarbon energy resources, biotech, pharmaceutical industries, etc.

Distinguished Guests,

Before I conclude, let me return to the theme of India-Thailand linkages.

The colonial intervention in India in the 19th century caused a break in the trade and movement of people between our two countries, which had existed over the ages. This is an area in which work is now being done. We already have, at present, more than a hundred flights a week between our two countries. This number is fast increasing. In 2006, nearly half a million Indians visited Thailand and over 33,000 Thais traveled to India.

Much more needs to be done in the field of transportation linkages. The India-ASEAN Car Rally held in October-November 2004 demonstrated the existence of land route connectivity between our two countries. There are, however, missing links in the road that goes from Moreh in India, through Bagan in Myanmar, to Mae Sot in Thailand. A number of stretches of the road also need to be upgraded.

In April 2002, India, Myanmar and Thailand agreed to cooperate in the construction of a trilateral highway that would link the two countries. The road alignment for the highway, which that would be 1400 kms. in length, has been completed. While work has started, it could - in our view - move much faster.

The idea of a road link between India and Thailand cannot but captivate one's imagination. For India, it would mean road connectivity with all of ASEAN. For Thailand, it would mean road connectivity with a market of more than a billion people. For both countries, the trilateral highway would be a highway to greater prosperity.

The eight North Eastern States of India are often described as land locked. They are joined to the rest of India by a narrow land corridor that skirts the north of Bangladesh. This land corridor is only 21 to 40 kms in width and is known as the Chicken's Neck. This has been a serious impediment for the development of the region, which has lagged behind the rest of the country in terms of infrastructure and industrial development. In recent months, Thailand has taken some important steps to forge a closer relationship with this region of India and we in India are committed to cooperation with Thailand in this endeavour.

Our Minister for the Development of the North East Region visited Thailand in March 2007 with a large business delegation. The Thai Minister of Commerce followed this up with his valedictory address at the Third North East Summit held in New Delhi on 11 April 2007. He subsequently led a group of Thai business leaders to the North East States of India from 22-25 June 2007. This will now be followed by a North East India Investment Opportunities week in Bangkok from 1-4 October 2007.

We propose to have seminars, business-to-business meetings, an exhibition showcasing products from North East India, a food festival, cultural evenings and a fashion show during this week. All of Thailand knows India, particularly as the land of Lord Buddha. We hope that soon all of Thailand will also get to know North East India, and that our "Look East" policy, the India-Thailand relationship and the trilateral highway project will change the North East of India from being land-locked to being land-linked. While this is a long-term vision, it is also one that drives forward our bilateral relationship.

I will, in conclusion, say that India is bound by close ties of history, geography and culture to Thailand and to South East Asia. In the modern age, we jointly seek a future that fuels itself both by our shared past and our current commonalities. I believe that we are destined to be on the same side of history, as neighbours, as friends and as partners in the quest for progress. By working together, we can contribute to making the 21st century truly an Asian Century.

Thank you for doing me the honour of inviting me to speak to you and for listening so patiently.

Thank you.

**326. Address of External Affairs Minister Pranab Mukherjee at the Korean Institute of Foreign Affairs and National Security on "India's Look East Policy".**

**Seoul, September 17, 2007.**

Chancellor Lee Ju-heum of the Institute of Foreign Affairs and National Security (IFANS),

Excellencies,

Distinguished Guests

I am delighted to be here today to address this distinguished gathering on India's growing engagement with East Asia\*. Many decades back our first Prime Minister, Jawaharlal Nehru, prophesized that the "emergence of Asia in world affairs will be a powerful influence for the world peace". It has taken some time for Asia to make that journey from a colonized continent to being the world's economic power-house. The character of the economy today, its demographics and active diplomacy reveal that the balance is shifting to Asia.

2. As the international order witnesses this significant structural transformation, we are engaged in our own process of enabling change and in reformulating our external priorities. It began when India launched its "Look East Policy" in the early 1990s. That fundamental new step was not merely the outcome of economics; it was a strategic shift in India's vision of the world in the 21st century. We were aware of the achievements of our neighbours to the East who, by emerging as economic powerhouses, also provided us with a message that enriching the flower bed of enterprise fires rapid economic growth. The Republic of Korea stood tall among the achievers and it is not a coincidence that the first visit by a Prime Minister from India was in 1993.
3. It is not as if we suddenly discovered Korea in 1990. The legend of the Princess of Ayodhya who travelled to Korea in the 1st century AD to marry King Suro is symbolic of the common cultural and spiritual values that we shared as Indians and Koreans. In the darkest hour of our two nations' existence at the beginning of the 20th century, our Nobel laureate Tagore prophesized your country's re-emergence as the 'light of the east'. He wrote:

"In the Golden days of the East  
Korea was one of its lamp-bearers  
And that lamp is waiting to be lighted once again  
*For the illumination of the East.*"

4. In the early years of our independence, the Korean peninsula became the meeting ground for the world's great powers. In the aftermath of the unfortunate developments on the Korean peninsula, we recognized our responsibility as fellow-Asians and made our modest contribution to the process of building peace. The work by the 60th Indian Field Ambulance Unit of the Army Medical Corps symbolized our friendship and re-united us after centuries of separation.
5. Similarly, with other countries in East Asia, including China and Japan and the countries of south-east Asia, India has long standing civilizational bonds. In spiritual and cultural values, by name and language, through dance and art, there is a historical tradition of contact between India and East Asia. It is, therefore, against this larger backdrop that I wish to speak to this distinguished gathering about our re-engagement with the East, and with your great country.
6. The essential philosophy of our "Look East" strategy, which is now well established, is that India must find its destiny by linking itself more and more with its Asian partners and the rest of the world. We believe that India's future and our own best economic interests are served by greater integration with East Asia. This may seem unusual to the young generations in our countries who grew up when India and the countries of East Asia walked down different paths during the Cold War, but to those of my generation and for the youngest generation in our countries, this will be a rediscovery by Asian countries of their common Asian heritage. It is my belief that this shift that is taking place and the kind of interaction that is emerging amongst Asian countries has deep historical and cultural roots and, therefore, can be a very powerful force for future peace and stability on our continent.
7. Our interest in engaging with East Asia has domestic roots. We are a vibrant democracy, quickly transforming ourselves into a vibrant economy with growth on an ascending trajectory. The current economic growth is around 8 % and we hope to achieve a 10 % sustainable growth in the coming years. Our policies relating to foreign trade, foreign direct investment, taxation, banking, finance and capital

markets have evolved to make Indian industry more competitive globally. Our foreign exchange reserves currently exceed US\$ 200 billion. While we still have a long way to travel down the road to prosperity and well-being for all, there is tremendous confidence and optimism all around, about our ability to develop through democratic means, to ensure growth that is inclusive.

8. I would like to put forth before you the way India has sought to integrate with Asia in general. To begin with, we focused very much on the ASEAN. Beginning from a sectoral partner, our association with ASEAN evolved into a Full Dialogue Partner and finally to a Summit Partner. We have close relations with all countries in the region and our economic and cultural ties will get stronger by the day as travel, tourism and business reinforce regional interaction. This is but one aspect. The second aspect has been that our own relations with East Asian countries have been growing rapidly, whether it is with ROK or China or Japan.
9. Our engagement with China is broad and multifaceted. Trade and investment are the great drivers of the new relationship. We are confident that our "Strategic & Cooperative partnership" will mature and steadily develop. The leaders of both countries recognize that co-existence and cooperation is the wise course of action, and sensitivity to mutual aspirations is the underpinning for building confidence and trust. There is enough space and opportunity for both of us to grow and develop, and to bring benefit not only to us, but also for other partners in Asia.
10. We have a Strategic & Global Partnership with Japan. Economic opportunities form the core of our ties. We see a strong potential for further growth in all areas of our relationship. In the knowledge based world of the 21st century both countries possess complementary skills that can be turned to create new opportunities for the region as a whole.
11. Our "Long Term Cooperative Partnership for Peace and Prosperity" with your great country is a corner-stone of India's Look East policy. My fellow Indians and I are amazed at the rapidity with which LG, Hyundai and Samsung have become household names in India. We are now negotiating a Comprehensive Economic Partnership Agreement and our trade is out-performing the targets that have been laid down from time to time. More recently, our relations have

expanded into other areas as well, and I am of the firm belief that we need to give strategic orientation to our bilateral partnership in order to take it to the next level.

12. We see great value in pursuing economic cooperation with fellow East Asians in the pursuit of a truly integrated Asian economy that will draw on the economic potential of India and China, the technology and management expertise of Korea and Japan and the dynamism of ASEAN. There are those who speak of a two track approach for such integration, namely economic integration led by ASEAN+3 in the first phase, to be followed subsequently by expansion to other economies. In India, we choose to look at it from a different perspective. In a globalized world, it is mutually gainful opportunity and not geography that defines and drives the processes of integration. India offers such opportunity here and now and, if the BRIC Report of Goldman Sachs is to be believed, it will continue to offer larger opportunities in the foreseeable future. We do believe that ASEAN should remain in the driving seat and be the nucleus of this integrative process. But I ask the distinguished gathering whether it will serve regional interests, and Korean interests, if such processed exclude others, whose development is integral to the region as a whole. That is why I firmly believe that an Asian economic community that is open, transparent and inclusive, and provides a platform to create ever widening economic opportunities, is better for Asia and for the world, than a narrower or restrictive definition of Asian economic integration. I hope that my friends in Korea will understand and recognize that the future depends on the integration of Asia as a continent without artificial geographical sub-divisions.
13. In fact, recent studies have revealed a compelling case for a broader Asian economic community built in a phased manner. This community comprising half of the world's population would be larger than the EU in terms of output, having trade higher than NAFTA and foreign exchange reserves greater than those of EU and NAFTA put together. It has been demonstrated that economic integration could generate billions of dollars of additional output. The vision of Asian economic integration by coalescing the FTAs among member Asian countries into an Asian RTA is the pivotal step towards the integration of Asia into a common unit. It is precisely for this reason that our Prime Minister, Dr Manmohan Singh, envisaged the creation of a broader Asian Economic Community.

14. While it is very clear that economic integration trends are becoming visible in Asia, there are other important areas where wider collaboration is also necessary. If we are creating an integrated Asian economic community, then we also need to look at a realistic and positive security architecture for this part of the world. There is, of course, the ASEAN Regional Forum - which is more of a consultative process. While we do not have any preference for a particular type of institutional framework, the first step is to develop a common recognition of the challenges that we will face as an Asian economic community.
15. Both India and Korea, and many other Asian economies, are dependent on foreign sources of energy. The sea lanes of communication are therefore vital for us all, and their security must be a paramount consideration. When we consider that our trade and investment also flows along the same sea lanes, this becomes a primary issue for us all. Piracy and terrorism are common threats and information sharing a common requirement. It is, therefore, natural that countries in the region will engage in cooperation and collaboration on maritime safety and security. Such cooperation and collaboration is to heighten awareness of common challenges and ensure a degree of preparedness.
16. Natural disasters and consequent economic and environmental consequences present another common challenge. The tsunami in 2004 was a wake-up call for closer cooperation among Asian countries in the Indian Ocean. Can we look to establishing an Asian Emergency Response System? I do not know the answer to this question, but it is one that we will all have to ponder over since the impact of another natural calamity on the scale of the 2004 tsunami could have serious consequences not only for those directly affected but for all other Asian economies that are linked by trade and investment to the affected economies.
17. Asia's integration is also being driven by other factors. There are issues relating to the financial infrastructure and the need to protect ourselves from any major upheaval in the financial markets or in the stock markets in the future. We believe that the Asian financial structure, though growing very rapidly and remaining dynamic, needs to become stronger. I could put forth many other issues that we feel are important. My point is that we certainly believe that this process

of economic integration in Asia needs to be looked into with a positive frame of mind as there will be greater opportunities for us to work together in future. Asia, today, is the most dynamic and vibrant region in the world. This is the home of the major economies of the world and also to the fastest growing economies. This process of growth is irreversible and I believe that the time has come for us to come together and look at the future patterns of growth that brings prosperity to all.

18. I thank you all for providing me this opportunity for sharing India's latest perspectives on its Look East policy. I am happy that I have been able to do this here in the Republic of Korea, a country with which our relations go well back in time and where an active future beckons us all to build further on time-tested foundations.<sup>1</sup>

Thank you.

---

1. At the end of his address Mr. Mukherjee was asked several questions One of the questions from the audience related to the implications of the India-U.S. civilian nuclear energy deal "for regional stability" in East Asia and about the "concerns of some people whether that kind of rapprochement will continue." He was also asked whether he would foresee "any other kinds of constraints or issues of contention" between India and the U.S. Mr. Mukherjee responding said: "I do not visualise any constraints in our bilateral relations [with the U.S.]. It is expanding very fast. In fact, we [have] had good relations with the U.S. from the very beginning. And now, it has assumed new dimensions, new angularities. ... And, the latest ... civilian nuclear cooperation, if it is finally materialised, would be a landmark agreement for bilateral cooperation in the context of the multilateral framework. Because... the implication would be the involvement of a large number of NSG [Nuclear Suppliers Group] countries and also India-specific arrangements with the IAEA [International Atomic Energy Agency] in [the] future... In every individual relation, there may be certain areas of divergences of views on certain aspects in a particular context. But, it is not necessary that it [the divergence] stands in the way of the overall expansion of relationship with any country." Asked about the possible impact of the emerging U.S.-India equation on China's ties with New Delhi, Mr. Mukherjee said: "There is no question of cooperation between India and the U.S. to act as some sort of containment of any country, including China." "The leaders of both countries recognise that co-existence and cooperation is the wise course of action; and sensitivity to mutual aspirations is the underpinning for building confidence and trust. There is enough space and opportunity for both of us to grow and develop and to bring benefit not only to us but also for other partners in Asia." Differences, including those over the boundary question, "did not stand in the way of investment and trade." India-China trade now stood at \$30 billion, and he was confident that they would be able to surpass the \$40-billion target set for 2010.

**327. Statement by External Affairs Minister Pranab Mukherjee after the meeting on Look East Policy.**

**New Delhi, October 31, 2007.**

We have just concluded a meeting on the development of India's North Eastern Region with special emphasis on the application of India's Look East Policy to this region. The meeting was convened as a follow up to a Concept Note by my colleague Shri Mani Shankar Aiyar, the Minister for Panchayati Raj, Youth Affairs and Development of the North Eastern Region. Apart from the Chief Ministers of all the North Eastern States (except Sikkim) and Shri Aiyar, the meeting was also attended by my Cabinet colleagues, the Hon'ble Ministers of Home, Defence, Finance and Shipping, Road Transport & Highways. Also participating in the meeting were the Ministers of State in the Department of Commerce and the Department of Industrial policy & Promotion.

In my opening remarks, I underlined the importance of the subject of this meeting, especially after nearly 15 years of India's Look East Policy. While this policy has yielded many benefits, including closer and strategic contacts between India and South East Asian countries, an impressive increase in the quantum of bilateral trade and increased people-to-people interaction, we have felt for some time the need to focus the benefits of this cooperation more sharply on our North Eastern Region, which is a natural bridge between India and South East Asia.

The interventions made by the Chief Ministers of North Eastern States at the meeting focused primarily on the present state of connectivity and of infrastructure available in the North Eastern States, capacity building, future potential for export and tourism, the possibility of institutional cooperation in training and research and on-going action being taken by State Governments with a view to dovetail national development strategies with various foreign policy initiatives.

Essentially, what we are looking at here is a new paradigm of development whereby our foreign policy initiatives blend seamlessly into our national economic development. Given that we have, over 15 years of pursuing our Look East Policy, put in place certain diplomatic and political structures, there is need now to make these structures work for our North Eastern Region. Diplomatic initiatives urgently need to be converted into commercial opportunities. For this purpose, MEA will work in close cooperation with the Ministry for the Development of the North Eastern Region, the Planning

Commission, all economic ministries and the State governments.

As I mentioned earlier, physical connectivity and infrastructure emerged at the meeting as crucial issues which need our immediate attention. For this purpose, our desire to cooperate with neighbouring countries to enable more efficient transit stands firm and we would be making all efforts to ensure that our objectives are achieved as quickly as possible.

This meeting today has been a very fruitful exercise and we intend to make it a continuing affair.

Thank you.

## AUSTRALIA

### **328. Press Release of the Ministry of Commerce on the agreement on a Joint Study on Options for a bilateral Free Trade Agreement between India and Australia.**

**New Delhi, August 31, 2007.**

India and Australia have agreed to undertake a joint feasibility study into the benefits of a free trade agreement (FTA) between both countries.

Trade and investment links between Australia and India have grown rapidly in recent years. It is expected that the study would provide a timely opportunity to examine the potential for benefits which might flow from a bilateral FTA.

India is emerging as one of the key drivers for global economic growth and its economic rise will be increasingly critical to world economic development. Australia's established economic strength and competencies make it a significant trading partner for many countries, including India.

The study will examine the potential benefits of FTA for both countries. In particular, the study will focus on the impact a FTA could have on promoting economic growth in both countries, bilateral trade in goods and services, as well as investment and other commercial linkages.

The Governments will initially hold bilateral meetings to discuss the terms of reference for the FTA feasibility study. The study will commence in late 2007 and is expected to be completed in 2009.

Two-way trade in goods and services between Australia and India reached US\$ 7.76 billion in 2006-07.

## CAMBODIA

### 329. Briefing points by Official Spokesperson on the postponement of the visit of the Cambodian Prime Minister Hun Sen.

**New Delhi, July 9, 2007.**

- The Prime Minister of Cambodia H.E. Mr. Hun Sen accompanied by a high-level delegation arrived in Delhi on Sunday, July 8, 2007.
- Senior officials of the Ministry of External Affairs met with the Cambodian officials to convey the details of the programme in the light of the demise of former Prime Minister Shri Chandra Shekhar and the declaration of state mourning for a period of 7 days. Later Hon'ble External Affairs Minister Shri Pranab Mukherjee, met with Deputy Prime Minister and Foreign Minister Mr. Hor Namhong. EAM explained that the Indian side was ready to go ahead with the official programme except for the ceremonial part of the programme. It was elaborated that this could not take place owing to the regulations that governed GOI activities during a period of state mourning. It was clarified to the Cambodian side that official discussions, calls and meetings could take place as originally scheduled.
- The Cambodian side expressed their deep condolences and conveyed that as the funeral date coincided with the main engagement day, it would not be proper on their part to continue with the visit. The Cambodian Foreign Minister reiterated to EAM that they would return to Delhi as soon as mutually convenient dates are agreed upon. The Cambodian Foreign Minister specifically emphasized that Cambodia-India bilateral relations were very close and cordial. He assured that the traditionally friendly relations between the two countries would continue to be strengthened further. During the day, the Cambodian Prime Minister also sent a personal message of condolence to Prime Minister Dr. Manmohan Singh conveying deep regrets at the passing away of the former PM Chandra Shekhar.
- The Cambodian delegation headed by their Prime Minister, left for Cambodia in the early morning of Monday, July 9. Before departure, the leader conveyed his condolences again and said that they would come back soon. Fresh dates for the visit in the near future are under consideration.

**330. Memorandum of Understanding on Foreign Office Consultations between the Ministry of External Affairs of India and the Ministry of Foreign Affairs and International Cooperation of the Kingdom of Cambodia**

**New Delhi, December 8, 2007.**

**The Ministry of External Affairs of India and Ministry of Foreign Affairs and International Cooperation of the Kingdom of Cambodia**, hereinafter referred to as "the parties"

**Mindful** of traditionally friendly relations between their countries and peoples:

**Desirous** of further developing and strengthening their friendly relations, cooperation and mutual understanding;

**Considering** that their cooperation and mutual understanding would contribute further to promoting international peace and security;

**Conscious** of the usefulness of regular consultations and exchanges between the two countries at different levels on bilateral relations and international matters of common interest;

**Reaffirming** their adherence to the purposes and principles of the United Nations Charter;

**Have reached** the following understanding:

**ARTICLE 1**

The Parties shall hold regular consultations to review all aspects of their bilateral relations and to undertake exchange of views on international issues of mutual interests and interaction in the international arena.

**ARTICLE 2**

Consultations on bilateral relations shall include all areas, especially political, as well as economic, commercial, scientific, technical and cultural cooperation.

It shall include consultations by representatives of the two countries in international organizations, conferences and meetings.

**ARTICLE 3**

Consultations within the framework of this Memorandum of Understanding

will be held once a year, alternately in Phnom Penh and New Delhi at the level of Vice Minister or equivalent.

Dates, place and agenda for the consultations shall be determined mutually through diplomatic channels.

**ARTICLE 4**

The provisions of this Memorandum of Understanding shall be without prejudice to any other treaties or agreements to which both sides are parties.

**ARTICLE 5**

Any differences or disputes that may arise for the implementation of this Memorandum of Understanding shall be settled by mutual consultations between the Parties.

**ARTICLE 6**

The present Memorandum of Understanding shall enter into force on the date of its signing and shall remain in force for a period of five years, and it may be further extended for subsequent periods of five years at a time, unless either of the Parties gives to the other a written notice six months in advance of its intention to terminate it before the date of its expiry.

**Done** at New Delhi on 8th day of December, 2007 in two originals each in the Khmer, Hindi and English languages, all texts being equally authentic. In case of any divergence of interpretation, the English text shall prevail.

**For and on behalf of the  
Government of the Republic of India**

**For and on behalf of the Government  
of the Kingdom of Cambodia**

**(Pranab Mukherjee)  
Minister of External Affairs**

**( HOR Namhong)  
Deputy Prime Minister,  
Minister of Foreign Affairs and  
International Cooperation**

**331. Agreement between the Government of Republic of India and the Royal Government of Cambodia on the Transfer of Sentenced Persons.**

**New Delhi, December 8, 2007.**

**The Government of the Republic of India and the Royal Government of Cambodia** hereinafter referred to as the Contracting States;

**Desiring** to facilitate the social rehabilitation of sentenced persons into their own countries; and

**Considering** that this objective should be fulfilled by giving foreigners, who have been convicted and sentenced as a result of their commission of a criminal offence, the opportunity to serve their sentences within their own society;

**Have agreed** as follows:

**ARTICLE 1  
Definitions**

For the purpose of this Agreement:

- (a) "Judgement" means a decision or order of a court or tribunal imposing a sentence;
- (b) "receiving State" means a State to which the sentenced person may be, or has been, transferred in order to serve his sentence;
- (c) "sentence" means any punishment or measure involving deprivation of liberty ordered by a court or tribunal for a determinate period of time or for life imprisonment on account of a criminal offence;
- (d) "sentenced person" means a person undergoing a sentence of imprisonment under an order passed by a criminal court including the courts established under the law for the time being in force in the Contracting States;
- (e) "transferring State" means the State in which the sentence was imposed on the person who may be, or has been transferred.

**ARTICLE 2  
General Obligations**

1. A person sentenced in the territory of one Contracting State may be

transferred to the territory of the other Contracting State in accordance with the provisions of this Agreement in order to serve the sentence imposed on him. To that end, he may express to the transferring State or the receiving State his willingness to be transferred under this Agreement.

2. Transfer may be requested by any sentenced person who is a national of a Contracting State or by any other person who is entitled to act on his behalf in accordance with the law of the Contracting State by making an application to the Contracting State and in the manner prescribed by the Government of that Contracting State.

### **ARTICLE 3** **Conditions for transfer**

1. A sentenced person may be transferred under this Agreement only on the following conditions:
  - (a) the person is a national of the receiving State;
  - (b) the death penalty has not been imposed on the sentenced person;
  - (c) the judgment is final;
  - (d) no inquiry, trial or any other proceeding is pending against the sentenced person in the transferring State;
  - (e) at the time of receipt of the request for transfer, the sentenced person still has at least six months of the sentence to serve or is undergoing a sentence of life imprisonment or the sentence is indeterminate;
  - (f) that the acts or omissions for which that person was sentenced in the transferring State are those which are punishable as a crime in the receiving State, or would constitute a criminal offence if committed on its territory;
  - (g) the sentenced person has not been convicted for an offence under the military law;
  - (h) transfer of custody of the sentenced person to the receiving State shall not be prejudicial to the sovereignty, security or any other interest of the transferring State;

- (i) consent to the transfer is given by the sentenced person or, where in view of his age or physical or mental condition either Contracting State considers it necessary, by any other person entitled to act on his behalf in accordance with the law of the Contracting State; and
  - (j) the transferring and receiving States agree to the transfer.
2. In exceptional cases, the transferring and receiving States may agree to a transfer even if the remaining period to be served by the sentenced person is less than six months.

**ARTICLE 4**  
**Obligation to furnish information**

1. If the sentenced person has expressed an interest to the sentencing State in being transferred under this Agreement, the transferring State shall send the following information and documents to the receiving State unless either the receiving or the transferring State has already decided that it will not agree to the transfer:
- (a) the name and nationality, date and place of birth of the sentenced person;
  - (b) his address, if any, in the receiving State;
  - (c) a statement of the facts upon which the sentence was based;
  - (d) the nature, duration and date of commencement of the sentence;
  - (e) a certified copy of the judgment and a copy of the relevant provisions of the law under which the sentence has been passed against the sentenced person;
  - (f) a medical, social or any other report on the sentenced person, where it is relevant for the disposal of his application or for deciding the nature of his confinement;
  - (g) any other information which the receiving State may specify as required in all cases to enable it to consider the possibility of transfer and to enable it to inform the sentenced person of the full consequences of transfer for him under its law;
  - (h) the request of the sentenced person to be transferred or of a

- person entitled to act on his behalf in accordance with the law of the transferring State; and
- (i) a statement indicating how much of the sentence has already been served, including information on any pre-trial detention, remission, or any other factor relevant to the enforcement of the sentence,
2. For the purposes of enabling a decision to be made on a request under this Agreement, the receiving State shall send the following information and documents to the transferring State unless either the receiving or the transferring State has already decided that it will not agree to the transfer:
    - (a) a statement or document indicating that the sentenced person is a national of the receiving State;
    - (b) a copy of the relevant law of the receiving State constituting the acts or omissions, on account of which the sentence has been passed in the transferring State, as if such acts or omissions were an offence under the law of the receiving State or would constitute an offence if committed on its territory;
    - (c) a statement of the effect of any law or regulation relating to the duration and enforcement of the sentence in the receiving State after the sentenced person's transfer including, if applicable, a statement of the effect of paragraph 2 of Article 8 of this Agreement on his transfer;
    - (d) the willingness of the receiving State to accept the transfer of the sentenced person and an undertaking to administer the remaining part of the sentence of the sentenced person; and
    - (e) any other information or document which the transferring State may consider necessary.

#### **ARTICLE 5**

##### **Requests and replies**

1. Requests for transfer shall be made in writing in the prescribed proforma, if any, and addressed through the central authority of the transferring State through diplomatic channels to the central Authority of the receiving State. Replies shall be communicated through the same channels.

2. For the purpose of paragraph 1 of this Article, the Central Authority shall be, in relation to India, the Ministry of Home Affairs; and in relation to Cambodia, shall be the Ministry of Interior, Kingdom of Cambodia, Phnom Penh.
3. The receiving State shall promptly inform the transferring State of its decision whether or not to agree to the requested transfer.

#### **ARTICLE 6**

##### **Consent and its verification**

1. The transferring State shall ensure that the person required to give consent to the transfer in accordance with paragraph 1(i) of Article 3 of this Agreement, does so voluntarily and with full knowledge of the legal consequences thereof. The procedure for giving such consent shall be governed by the law of the transferring State.
2. The transferring State shall afford an opportunity to the receiving State to verify that the consent is given in accordance with the conditions set out in paragraph 1 of this Article.

#### **ARTICLE 7**

##### **Effect of transfer for the receiving State**

1. The competent authorities of the receiving State shall continue the enforcement of the sentence through a court or administrative order, as may be required under its national law, under the conditions set out in Article 8 of this Agreement.
2. Subject to the provisions of Article 10 of this Agreement, the enforcement of the sentence shall be governed by the law of the receiving State and that State alone shall be competent to take all appropriate decisions.

#### **ARTICLE 8**

##### **Continued enforcement of sentence**

1. The receiving State shall be bound by the legal nature and duration of the sentence as determined by the transferring State.
2. If, however, the sentence is by its nature or duration or both incompatible with the law of the receiving State, or its law so requires, that State may, by court or administrative order, adapt the sentence to a punishment or measure prescribed by its own law. As to its

nature and duration the punishment or measure shall, as far as possible, correspond with that imposed by the judgment of the transferring State. It shall however not aggravate, by its nature or duration, the sentence imposed in the transferring State.

#### **ARTTICLE 9**

##### **Effect of completion of sentence for the transferring State**

When the receiving State notifies the transferring State under paragraph (a) of Article 12 of this Agreement that the sentence has been completed, such notification shall have the effect of discharging that sentence in the transferring State.

#### **ARTICLE 10**

##### **Pardon, amnesty or commutation and review of judgment**

- (1) The transferring State alone shall decide on any application for the review of the judgement.
- (2) Either of the Contracting States may grant pardon, amnesty or commutation of the sentence in accordance with its Constitution or other laws.

#### **ARTICLE 11**

##### **Termination of enforcement of sentence**

The receiving State shall terminate enforcement of the sentence as soon as it is informed by the transferring State of any decision or measure as a result of which the sentence ceases to be enforceable.

#### **ARTICLE 12**

##### **Information on enforcement of sentence**

1. The receiving State shall notify the transferring State:
  - (a) when the enforcement of the sentence has been completed; or
  - (b) If the sentenced person escapes from custody before enforcement of the sentence has been completed, in such cases the receiving State shall make every effort to have the prisoner arrested so that he serves the remainder of his sentence and that the prisoner be prosecuted for committing an offence under the relevant law of the receiving State on escape of prisoner.

2. The receiving State shall furnish a special report concerning the enforcement of the sentence, if so required by the transferring State.

**ARTICLE 13**  
**Transit**

If either Contracting State enters into arrangements for the transfer of sentenced persons with any third State, the other Contracting State shall cooperate in facilitating the transit through its territory of the sentenced persons being transferred pursuant to such arrangements, except that it may refuse to grant transit to any sentenced person who is one of its own nationals. The Contracting State intending to make such a transfer shall give advance notice to the other Contracting State of such transit.

**ARTICLE 14**  
**Costs**

Any costs incurred in the application of this Agreement shall be borne by the receiving State, except costs incurred exclusively in the territory of the transferring State. The receiving State may, however, seek to recover all or part of the costs of transfer from the sentenced person or from some other source.

**ARTICLE 15**  
**TERRITORIAL APPLICATION**

1. This agreement shall apply:
  - (a) to the Republic of India, and
  - (b) to the Kingdom of Cambodiaand reference to the territory of a Contracting State shall be construed accordingly.
2. The application of this agreement to any territory, in respect of which extension has been made in accordance with paragraph 1 of this Article, may be terminated upon expiry of six months notice given by either Contracting State to the other through the diplomatic channels.

**ARTICLE 16**  
**Language**

Requests and supporting documents shall be accompanied by a translation into the language of one of the official languages of the requesting State or English.

**ARTICLE 17**  
**Scope of application**

This Agreement shall be applicable to the enforcement of sentences imposed either before or after its entry into force.

**ARTICLE 18**

**Amendments**

Any amendments or modifications to this Agreement agreed by the Contracting States shall come into effect when confirmed by an Exchange of Diplomatic Notes.

**ARTICLE 19**  
**Final provisions**

1. This Agreement shall be subject to ratification and shall enter into force on the date on which instruments of ratification are exchanged.
2. The Agreement shall continue to remain in force until six months from the date upon which either Contracting State gives written notice to the other Contracting State of its intention to terminate it.
3. Notwithstanding any termination, this Agreement shall continue to apply to the sentenced persons who have been transferred under this agreement before the date on which such termination takes effect..

**In witness whereof** the undersigned, being duly authorized thereto by their respective Governments, have signed this Agreement.

**Done** in duplicate at New Delhi on the 8<sup>th</sup> day of December, 2007 in the Hindi, Khmer and English languages, all texts being equally authentic. In case of differences in interpretation the English text shall prevail

**332. Agreement between the Government of the Republic of India and Government of Kingdom of Cambodia on Defence Cooperation.**

**New Delhi, December 8, 2007.**

**The Government of the Republic of India and the Government of the Kingdom of Cambodia** (hereinafter jointly referred to as 'the Parties' and separately as a 'Party') :

**Acknowledging** the mutual benefits inherent in defence cooperation between the Parties;

**Recognizing** that the implementation of such cooperation shall be in accordance with the policies and priorities of the respective Parties, and in accordance with conditions as mutually determined from time to time between the Parties;

**Desiring** to further strengthen the bilateral relations between the Republic of India and the Kingdom of Cambodia;

**Have agreed** as follows :-

**ARTICLE 1  
PURPOSE**

The aim of this Agreement is to enhance defence cooperation through the exchange of experience and knowledge between the Parties.

**ARTICLE 2  
IMPLEMENTATION**

The Parties entrust the implementation of this Agreement to their respective Ministries of Defence.

**ARTICLE 3  
DEFENCE COOPERATION**

1. In the field of military cooperation, the Parties may:
  - (a) exchange military training expertise and information;
  - (b) exchange military instructors/observers;
  - (c) exchange military personnel for purposes of attending military and educational courses or programmes;

- (d) exchange visits of military naval vessels, military aircraft and of their respective Armed Forces units;
  - (e) exchange intelligence and information that is mutually beneficial;
  - (f) Collaborate in other spheres of Defence Cooperation for purposes of mutual benefit.
2. On receipt of request from the Cambodian side, the Indian side will consider the following:
- (a) Upgrade maintenance and repair military equipment for the Royal Cambodian Armed Forces,
  - (b) Provide assistance of military equipment for the Royal Cambodian,
  - (c) Armed Forces on mutually agreed terms and conditions.

#### **ARTICLE 4 OTHER ACTIVITIES**

The Parties may cooperate in other defence cooperation activities not mentioned in Articles 2 and 3, including:

- (a) Reciprocal visits;
- (b) Attendance of seminars, discussions and symposia;
- (c) Cooperation in the field of defence industry and research and development wherever feasible; and
- (d) Considering and undertaking any other activity which in their opinion would promote closer cooperation between the Ministry of Defence of India and Ministry of Defence of Cambodia.

#### **ARTICLE 5 PROTECTION OF CLASSIFIED INFORMATION**

Subject to their domestic laws, the Parties shall protect classified information exchanged in the following manner:

The Parties shall not disclose any classified information obtained under this or any other agreement, other than to members of their own staff who

have been cleared to the appropriate level by their respective Governments and to whom such disclosure is essential for the purposes of giving effect to this Agreement or to any other further agreements and only after having taken all reasonable precautions to ensure that such members of staff shall at all times maintain strict secrecy. The Parties shall not use any classified information obtained during any bilateral cooperation between them to the detriment or against the interest of the other Party.

#### **ARTICLE 6 FINANCIAL ARRANGEMENT**

The financial implications in respect of cooperation in terms of this Agreement shall be dealt with on a case-by-case basis, based on the principles of mutual reciprocation.

#### **ARTICLE 7 DISPUTES**

Any dispute between the Parties arising from the interpretation or implementation of this Agreement shall be settled amicably through consultation and negotiation between the representatives of the respective Ministries of Defence. It shall not be referred to any tribunal or third party.

Pending settlement of any dispute or difference, both parties shall continue to fulfill all objectives/obligations in accordance with this understanding, except in so far as such objectives/obligations form the subject matter of the dispute or difference.

#### **ARTICLE 8 FUTURE AGREEMENTS**

In regard to any particular matter covered by the provisions of this Agreement, the Parties may enter into such further agreements of a general or a specific nature as would in their opinion promote the effective implementation of this Agreement.

#### **ARTICLE 9 AMENDMENTS**

This Agreement may be amended at any time by mutual consent of the Parties.

#### **ARTICLE 10 TERMINATION**

This Agreement shall remain in force until terminated by either Party provided

that such termination shall be in writing, subject to six (6) months' notice in advance of the intention to terminate this Agreement.

Classified information exchanged between the Parties prior to the effective date of termination shall continue to be protected under Article 5, notwithstanding the termination of this Agreement.

**ARTICLE 11  
ENTRY INTO FORCE**

The present Agreement shall enter into force on the date of its signing and shall remain in force for a period of five years, and it may be further extended for subsequent periods of five years at a time, unless either of the Parties gives to the other a written notice six months in advance of its intention to terminate it before the date of its expiry.

**DONE** at New Delhi on the Eighth day of December 2007 in two originals each in Hindi, Khmer and English languages, all texts being equally authentic. In case of any divergence of interpretation, the English text shall prevail.

### **333. Press Release of the Ministry of External Affairs on the 9th round of talks on the India-China Boundary Question.**

**New Delhi, January 18, 2007.**

The Ninth Round of talks between the Special Representatives of India and China, Shri M.K. Narayanan, National Security Adviser and Mr. Dai Bingguo, Vice Foreign Minister respectively, on the India-China Boundary Question was held in New Delhi from January 16-18, 2007. The two Special Representatives continued their discussions on a framework for the boundary settlement on the basis of the Agreement on Political Parameters and Guiding Principles. The talks were held in an open, friendly, cooperative and constructive atmosphere<sup>1</sup>.

2. Vice Foreign Minister Mr. Dai Bingguo paid courtesy calls on the Prime Minister, the External Affairs Minister and the Leader of the Opposition in Lok Sabha on January 17, 2007.
3. Both sides agreed to hold the next round of talks between the Special Representatives in China at a mutually convenient time, which will be decided through the diplomatic channel.

---

1. The talks came on the heels of the meeting between Prime Minister Dr. Manmohan Singh and the Chinese Premier Wen Jiabao in Cebu, Philippines on January 14 on the sidelines of the East Asia Summit. At this meeting the two leaders agreed that the talks should take place with "greater vigour and greater innovativeness". It may be recalled that during the visit of Chinese President to New Delhi in November 2006 China agreed that an early settlement of the boundary would advance the basic interests of the two countries and therefore be pursued as a "strategic objective". "The Special Representatives shall complete at an early date the task of finalizing an appropriate framework for a final package settlement on the India - China boundary. Pending the resolution of the boundary question, both sides shall maintain peace and tranquility in the border areas in accordance with the agreements of 1993, 1996 and 2005," the November 21, 2006 Joint Declaration issued during the visit of Hu Jintao said. The eighth round of talks was held in Beijing in June 2006.

**334. Remarks by External Affairs Minister Pranab Mukherjee at the inauguration of the "India-China Year of Friendship Through Tourism - 2007".**

**New Delhi, February 14, 2007.**

Your Excellency, Mr. Li Zhaoxing,  
Minister of Foreign Affairs of the People's Republic of China,  
Smt. Ambika Soni, Minister of Tourism and Culture,  
Distinguished Guests,  
Ladies and Gentlemen.

It is matter of great pleasure for me to be here today at the launch of the "India-China Year of Friendship Through Tourism-2007."

India and China are two great civilizations and friendly neighbours with more than two thousand years of shared contacts. Over the centuries, and across the seas and deserts, our forefathers charted the legendary Silk Route between our two countries. Our two civilizations discovered each other through the tireless efforts of monks and scholars like Xuan Zang, whose memory we have just celebrated at the ceremonial opening of the Hall dedicated to his name in Nalanda in Bihar - a ceremony that was graced by the presence of my distinguished friend and colleague, His Excellency Foreign Minister Li who is here with us today. Taking inspiration from the early travelers who criss-crossed the distances between our two countries in ancient times, today we seek to recreate that pioneering spirit that brought India and China close together through the fostering of our friendship through tourism.

In recent years the all round progress made in India-China relations has been a source of satisfaction. Even while addressing outstanding issues, our decision to promote ties in all other areas of mutual benefit has been paying positive dividends. India and China today share a strategic and cooperative partnership. Our bilateral relations have a significance which is global. We are on course to achieve unprecedented developmental gains and the world is avidly following the unfolding saga of our growth. Both our countries acknowledge and welcome the progress and growth of the other and consider that their respective development will make positive contributions to Asia and the world. Our leadership has affirmed that

opportunities for development are vast for both countries and there is enough room for accommodation of both our growth trajectories. As good neighbours and partners in development, we must grow together while remaining sensitive to each other's concerns and aspirations.

The leadership of India and China has begun regular summit-level meetings and we have intensified high-level exchanges. Our desire to take our bilateral ties to a new level and to engage with each other in a more comprehensive manner is reflected in the Joint Declaration signed recently during the visit of President Hu Jintao to India in November 2006. We have established institutional mechanisms for cooperation in the areas of agriculture, finance, trade, defence, science and technology, energy and education. Soon we are going to increase the diplomatic presence in each other's countries by opening consulates in Guangzhou and Kolkata. Rapidly expanding trade and deepening economic ties are one of the positives of the improving India-China relationship. Bilateral trade reached US\$ 25 billion last year and is well on course to surpass the target of US\$ 40 billion by 2010.

Ladies and gentlemen, as two ancient and neighbouring civilizations, the people of India and China are not strangers to each other. Yet, I will not be wrong in saying that today, apart from a small academic and media community in both countries, who have occasions to travel to each other's country, there is a yawning gap in information about each other in both our countries. We have, so far, fallen short of fostering closer contacts between our peoples, contacts that could enhance mutual understanding and also increase the comfort level between the two sides. This is a challenge our policy makers must address with urgency, clarity and focus.

The decision of our two governments, to strengthen ties through tourism, taken during the visit of President Hu Jintao could not have come at a more opportune time. The Great Wall of China and our Taj Mahal, which are both represented in the Joint Logo that commemorates our Friendship Through Tourism Year, are among the most easily recognizable symbols of travel and tourism the world over. Yet not many from our two countries have seen both. The need of the hour then is to create awareness in our peoples about the two countries as tourist destinations. To this end, a detailed programme of activities has been drawn up jointly to celebrate 2007 as the "Friendship through Tourism Year". Preparations are already underway to open the China National Tourist Office in India. An Indian Tourist Office is also likely to be operational in China soon. I am confident that these two offices will contribute to strengthening tourism contacts

between the two sides. India is truly an incredible and unique tourist destination and we hope that through information dissemination and effective promotional activity we would be able to attract more and more Chinese travelers to India.

With the rise in living standards, both India and China have become impressive sources for outbound tourist traffic. It should be the endeavour of both our governments to encourage our citizens to visit each other's country. Increased tourist traffic between our two countries will help us rediscover our shared cultural heritage and bring to the fore the instinctive warmth and friendship the people of India and China feel for each other.

It is my sincere hope that this year will see India and China come even closer to each other on the wings of tourism. May the achievements of this year act as a building block and contribute significantly to further strengthening of the ties between two of the world's greatest tourist destinations. I would like to extend my very best wishes for the resounding success of the Friendship through Tourism Year.

Thank you.

**335. Briefing by Official Spokesperson Navtej Sarna and the Indian Ambassador in China Mrs. Nirupama Rao on the visit of the Chinese Foreign Minister and the Trilateral Meeting between the Foreign Ministers of India, Russia and China.**

**New Delhi, February 13, 2007.**

**Official Spokesperson:** Good evening everybody. Apologies for the delay. Before we come to the Chinese visit, briefly let me just tell you that tomorrow there will be the Trilateral Meeting between the Foreign Ministers of India, Russia and China. From our side, the External Affairs Minister Shri Pranab Mukherjee will be leading the Indian delegation. The Minister of Foreign Affairs of the Russian Federation Mr Sergei Lavrov and Minister of Foreign Affairs of the People's Republic of China Mr Li Zhaoxing will be leading their respective delegations. This will be the second stand-alone meeting of its nature. Earlier one was held in Vladivostok on June 2, 2005. The other Trilateral Foreign Ministers Meetings have taken place on the sidelines of the UNGA in New York in September 2002, September 2003 and September 2005 and on the sidelines of the Almaty Conference in October 2004. The Summit Meeting among the leaders of India, Russia and China took place on July 17, 2006 in St. Petersburg on the sidelines of the meetings among G-8 and outreach countries. So tomorrow, these talks will take place at eleven, there will be lunch followed by a Joint Press Interaction, approximately at two o' clock, in Hyderabad House.

The Foreign Minister of China is currently on an official visit to India at the invitation of the External Affairs Minister. He is accompanied by a high-level delegation. He arrived day before yesterday, that is February 11, in Patna and participated in the inaugural function of the Hieun Tsang Memorial Hall at Nalanda on the twelfth (of February). Today, the Chinese Foreign Minister and External Affairs Minister had a restricted meeting which I understand went on for forty-five minutes. This was followed by delegation level talks and a working lunch was hosted by the External Affairs Minister in honour of the Chinese Foreign Minister and his delegation. The total interaction lasted about two and a half hours. Tomorrow, the Chinese Foreign Minister will call on the Prime Minister and, of course, will also participate in the Trilateral Meeting, the details of which I have already given you. He will also participate in the launch of the India-China Friendship through Tourism Year, that is 2007 which has been designated for this purpose, alongwith the External Affairs Minister and the Minister of Tourism and Culture. Now I have with me

as you can see, first of all someone who is already well known to you, Ambassador to China Mrs. Nirupama Rao and Mr. Ashok Kantha, Head of our East Asia Division and I can do no better than to leave this matter in your hands. I would request Ambassador to brief you on the discussions.

**Ambassador Nirupama Rao:** Thank you, Navtej. Let me just give you an overview of today's discussions. I will briefly dwell on the topics discussed and then we could take a few questions. The discussions between our External Affairs Minister and the Chinese Foreign Minister earlier today were extensive and wide ranging covering bilateral, regional and global issues. Let me share with you some highlights of their discussions: The two Ministers made a positive assessment of the present status of bilateral relations and noted with satisfaction that the strategic and cooperative partnership, established during the visit of the Chinese Premier to India in 2005, was developing smoothly. In this context, they shared the view that the landmark visit of President Hu Jintao to India last November and the ten-pronged strategy agreed upon during the visit to further substantiate the India-China Strategic Partnership, had raised relations to a new level. Both sides expressed their determination to go ahead and strengthen friendship in all areas, increase mutual political trust and further develop their strategic partnership.

On the subject of high level visits, Foreign Minister Li renewed the invitation extended by the Chinese leadership to our Prime Minister to visit China during this year. Our External Affairs Minister responded to state that our Prime Minister looks forward to visiting China. Both sides will make earnest preparations for the visit.

On the subject of the boundary question, the two Ministers noted with satisfaction the progress made in the dialogue between the two Special Representatives on the boundary question. They reiterated the decision taken by the leaders of the two countries that the Special Representatives should further intensify their efforts in order to reach a political settlement of the boundary question on the basis of the political parameters and the guiding principles agreed upon in April 2005.

The two Ministers also expressed satisfaction over the growth in bilateral trade volume which as you may be aware touched US \$ 25 billion in 2006 and they hoped it would surpass the target of US \$ 40 billion by 2010. As you know this target was set during the visit of the Chinese President to India last November. They called upon the Joint Task Force of the officials of the two countries to work actively and complete the feasibility study on Regional Trading Arrangements before the end of October this year.

The two countries have a system of dialogue mechanisms and on this subject it was agreed that the Protocol on Cooperation between the Ministry of External Affairs of India and the Ministry of Foreign Affairs of China, signed during the Chinese President's visit last November will be able to institutionalize the dialogue mechanisms between the two Foreign Offices. The two Ministers agreed that meetings of these dialogue mechanisms, including Strategic Dialogue, Joint Working Group, Policy Planning Dialogue, Security Dialogue, Dialogue on Counter Terrorism and Foreign Office Consultations, will take place during this year. The calendar of meetings is presently being firmed up.

The subject of the hotline will, of course, interest all of you. You may recall that during the Chinese President's visit, it was agreed to set up a hotline between the two Foreign Ministers. The modalities in this regard have been worked out and the hotline is now in place.

You will also recall that during the Chinese President's visit, it was agreed to establish new Consulates General at Guangzhou and Kolkata in order to further strengthen institutional links. The two Ministers have agreed and directed that the new Consulates be set up within the year 2007.

India and China are celebrating and commemorating a Friendship Year through Tourism, this particular calendar year - 2007. And the two Ministers expressed the hope that cooperation in tourism and people-to-people exchanges would be intensified during the India-China Friendship Through Tourism Year 2007. Both sides will work to ensure the setting up of their respective tourism offices in each other's countries during 2007. As you also may be aware, that the Friendship Year will officially be launched tomorrow in the presence of the Chinese Foreign Minister, our External Affairs Minister and the Tourism Minister.

The liberalisation of Visa Procedures was another subject that was touched upon and there will be talks at an early date between the concerned officials of the two sides to further liberalise visa procedures to facilitate travel for tourism, business and other purposes.

People-to-people relationships is the other issue of focus and in order to further reinforce these contacts, a 100 member strong Indian youth delegation, which will be headed by Minister of Youth Affairs and Sports, will visit China in June this year, and while we receive a 100-strong Chinese youth delegation, also headed at the Ministerial-level in October.

There was also discussion on the operationalisation of the expert-level

mechanism to discuss cooperation in issues pertaining to trans-border rivers. The Indian side has already conveyed to the Chinese side the constitution of its expert team. Foreign Minister Li said that the Chinese side was also ready to establish its expert group so that cooperation in this field can be expanded.

Foreign Minister Li also conveyed to us that in order to provide greater facilitation for Indian pilgrims traveling to Kailash and Mansarovar, the Chinese side was stepping up its efforts to improve transport and medical facilities for Indian visitors. External Affairs Minister expressed his appreciation of these initiatives and also reiterated our request that an additional pilgrim route be opened up through Demchok.

As part of the BCIM (Bangladesh-China-India-Myanmar) initiative, a car rally is planned from Kunming to Kolkata and the two Ministers noted with satisfaction that this car rally will be held in the last quarter of 2007. It will take place from Kunming to Kolkata as I mentioned, via Myanmar and Bangladesh.

It is important to note that Foreign Minister Li announced his Government's support for India's bid to host the 2014 Asian Games and he also expressed China's willingness to exchange experiences with India on the holding of large sporting events. He thanked External Affairs Minister for India's support for China's hosting of the Beijing Olympics in 2008.

On regional and international issues, Foreign Minister Li expressed China's readiness to enhance communication and coordination with India on UN related issues - the SCO (Shanghai Cooperation Organisation), the East Asia Summit, the Asia-Europe Meeting, Asian Cooperation Dialogue, SAARC and other regional and international organizations related issues. He said that China will send a high-level delegation to participate in the 14th SAARC Summit in New Delhi in April this year as an observer.

Both Ministers also had a detailed exchange of views on the Six Party Talks on denuclearisation of the Korean Peninsula, Iran, the Middle East Peace Process and Afghanistan. There was a convergence of views on issues discussed and it was agreed that the two sides will maintain close consultations on the developing situation.

**Question:** Do you have a reaction to the breakthrough in the Six Party talks with North Korea apparently agreeing to ... (inaudible)?

**Mr. Ashok Kantha:** Earlier today, the Chinese Foreign Minister informed us

in advance about the likely breakthrough. As you know we also support the denuclearisation of the Korean peninsula, but at this stage we are not in a position to give a detailed response.

**Question:** Did we raise the issue of Anti-Satellite test by China or do we plan to raise it tomorrow?

**Ambassador Nirupama Rao:** Yes, I have something for you on that. Well, the Chinese side provided us with a suo-moto briefing on the recent ASAT test conducted by them. And in fact they stressed that China was against weaponisation and militarization of outer space. The test conducted, according to them, was of a purely technological and scientific nature. They added that it was not directed against any country. Our Minister emphasised India's principled opposition to the weaponisation of space and noted that it was essential to develop a broad international understanding on preserving outer space as a sanctuary from weaponisation and to guard it as the common peaceful heritage of mankind.

**Question:** My question relates to the opening up of trade through Nathu La. Was that discussed and are there plans to add to the number of items? And during President Hu's visit, there was some suggestion to open up trade through Arunachal Pradesh also. Can you give us some kind of update on that?

**Ambassador Nirupama Rao:** This is an ongoing discussion between the two governments. And the idea is, of course, to foster cross border trade and trans-border connectivity is a very important constituent of this process. This is a subject of ongoing discussions between the two sides.

**Question:** Has the Chinese Foreign Minister asked to open more border points apart from Nathu La?

**Ambassador Nirupama Rao:** There was no specific discussion related to that.

**Question:** Has the hotline been operationalised?

**Ambassador Nirupama Rao:** It is already in place. It will be used at any point of time from now.

**Question:** As you said that the two Ministers discussed the issue of UN reforms. Has there been a movement in China's position or any subtle modification in China's position on India's claim for a permanent seat in the UN Security Council?

**Ambassador Nirupama Rao:** The two sides have agreed to maintain very close consultation and contact on this issue through our Permanent Representatives at the United Nations and through our Foreign Office. The Chinese side have told us that they are well aware of our legitimate aspirations for permanent seat of the UN Security Council. They have reaffirmed yet again that they understand and support our aspirations to play a greater role in the United Nations - that is all I can tell you at the moment.

**Question:** Are we reassured about Chinese assurances about outer space?

**Ambassador Nirupama Rao:** As I said this is an ongoing consultation. We have to keep in close touch with each other. This is a process that is going to take obviously more consultation, more coordination, more contact. That is all I can say at this moment.

**Question:** Do you have any updates on the boundary talks after... (inaudible)?

**Ambassador Nirupama Rao:** As I conveyed to you in the earlier part of this briefing, this was touched upon. That is all I have to say at the moment.

**Question:** Are there any indications of change in the Chinese position in the Nuclear Suppliers Group discussions...(inaudible)?

**Ambassador Nirupama Rao:** As it happened during President Hu Jintao's visit, I would say, for both countries, that an expansion of the civilian nuclear energy programme is regarded as an essential and important component of their national energy plan, in order to secure energy security. And both sides have agreed as they did before, to promote cooperation in the field of nuclear energy consistent with their respective international commitments. If you recall during the visit of President Hu Jintao last year, in the Joint Declaration, it was clearly stated that both countries feel that international civilian nuclear cooperation should be advanced through innovative and forward looking approaches, while safeguarding the effectiveness of international non-proliferation principles. That is where we stand on this issue.

**Question:** The reason why I ask this question because recently when Mr. Nicholas Burns was in Beijing, he said that he raised this issue with the Chinese leadership. So I was wondering since so many cross currents are going on, if there is something that we can report on...(inaudible)?

**Ambassador Nirupama Rao:** For the moment this is what I have to convey to you on this issue. But the contact is ongoing, and this is work in progress.

**Question:** Is there any update on whether India and China will be joint bidders for energy resources in third countries?

**Ambassador Nirupama Rao:** Not as far as this visit is concerned. I cannot give you an update because we did not talk about joint bidding for energy projects, not in the context of this particular visit. But as you know that Mr. Murlidhar Deora, Minister for Petroleum and Natural Gas was in China recently. We have signed an MOU which talks of joint cooperation in bidding, exploration etc. Internationally, India and China are coming together in that field. So there is an institutional framework that is available today.

**Mr. Ashok Kantha:** As Ambassador mentioned, there is an institutional framework for that. Indian and Chinese companies are already cooperating including in third countries. They have already entered successful joint bids in third countries and this process will carry on.

**Question:** India had security concerns on Chinese investments here. Did Chinese Foreign Minister raise this issue during the discussions?

**Ambassador Nirupama Rao:** No. It did not come up in the discussions.

**Official Spokesperson:** We have told you before that we do not have country specific policy on this.

**Question:** Was there any categorical assurance from the Chinese side that they would not conduct any such tests in the future?

**Ambassador Nirupama Rao:** I told you that they provided that suo-moto briefing where they elaborated on their position. And we conveyed our views on the same issue quite clearly to them. That is where the issue stands at the moment. You are obviously looking at it in the context of giving and getting assurances. I really do not think that diplomatic relations are conducted that way. This is a relation between two governments, a sustained dialogue that we conduct on many of these issues, it is a multi-faceted relationship. So what you see unfolding before you is a very mature dialogue taking place between two equal partners.

Thank you.

**336. Question in the Lok Sabha: "MoUs between India and China".**

**New Delhi, March 21, 2007.**

**Will the Minister of EXTERNAL AFFAIRS be pleased to state:**

- (a) whether India has signed any Memorandum of Understandings (MoUs) with China during the last five years;
- (b) if so, the details of the MoUs signed; and
- (c) the benefits accrued to India as a result thereof?

**The Minister of External Affairs (Shri Pranab Mukherjee)**

- (a)-(b) The list of MOUs signed between India and China since 2002 are enclosed at Annexure.
- (c) In recent years, India-China relations have witnessed all-round progress. During the State visit of Chinese President Hu Jintao to India from November 21 to 23, 2006, the two sides issued a Joint Declaration that spelt out a ten-pronged strategy to upgrade India-China relations to a qualitatively new level, and to further substantiate and reinforce their Strategic and Cooperative Partnership. Both sides believe that comprehensive economic and commercial engagement is a core component of their Strategic and Cooperative Partnership. The broadbasing of the relationship through enhanced cultural, scientific, educational, tourism and people-to-people contacts is being actively pursued. In this context, the two sides have signed a number of bilateral documents in a wide variety of spheres. These documents which are at various stages of implementation have helped to consolidate and diversify India-China bilateral relations.

**ANNEXURE**

	<b>Year</b>	<b>Subject Matter of MOU/Agreement</b>
1.	2002	MOU on the Application of Phytosanitary Measures between the Ministry of Agriculture of India and the State General Administration of the People's Republic of China for Quality Supervision and Inspection and Quarantine.

45. 2006 Agreement on Preventing Theft, Clandestine Excavation and Illicit Import and Export of Cultural Property
46. 2006 MOU on undertaking joint exploration and production and acquisition of oil and natural gas resources

**337. Joint Ministerial Statement issued after the meeting between the Commerce Minister Kamal Nath and Chinese Commerce Minister Bo Xilai.**

**Beijing, April 16, 2007.**

1. The Minister of Commerce of the People's Republic of China, H.E. Mr. BO XILAI and the Minister of Commerce and Industry of the Republic of India, H.E. Mr. KAMAL NATH met in Beijing on the 16th April 2007 to compare notes and exchange views in order to review the progress of negotiations on the Doha Development Agenda (DDA) of the WTO and to safeguard the common interests of developing country Members in the future course of negotiations. Mr. Kamal Nath briefed Minister Bo Xilai about the discussions in the G-4/G-6 meetings in Delhi on April 12, 2007.
2. The two Ministers emphasised that the economic and trade relationship between India and China, the two biggest countries in the world, is of global and strategic significance and the strategic and cooperative partnership between the two countries is consistent with their roles as two major developing countries. An increased participation and a constructive role of the two countries in all key issues, including issues of international trade, can further strengthen

their partnership for international efforts to deal with global challenges and threats.

3. The two Ministers recalled the commitment of the two countries expressed in the Joint Declaration issued during the state visit of His Excellency the President of the People's Republic of China to India in November 2006 to strengthen the cooperation of the two countries in the WTO and safeguard the legitimate rights and interests of the developing countries. Reaffirming their support for an open, fair, equitable, transparent and rule-based multilateral trading system and their determination to coordinate with other members of the WTO, especially the developing countries, in order to ensure placing the development dimension at the heart of this Round, the two Ministers expressed their sincere hope for achieving an expeditious conclusion of the Doha Development Round based on full realization of the development goals as mandated in the Doha Declaration, the Framework Agreement of July 2004 and the Hong Kong Declaration.
4. Assessing the progress of negotiations in the Doha Round at this critical juncture, the two Ministers agreed that the major issue holding back and impeding the progress in Round is the lack of movement by the developed countries in terms of early removal of distortions, caused by huge subsidies and significant market access barriers in developed countries. They were categorical that unless the outcome of the negotiations upholds the proposals of developing countries resulting in real and effective reduction of trade distorting domestic support coupled with meaningful disciplines, substantial improvement in market access by developed countries and eliminations of all form of export subsidies the aspirations of the developing countries, as built in the mandate, will not be fulfilled.
5. The two Ministers identified the other core development concerns of the developing countries that are vital to delivering the development imperatives in these negotiations and reiterated that special products (SPs) and the special safeguard mechanism (SSM) play a vital role in addressing the food security, rural development and livelihood concerns of developing countries and the outcome of Doha negotiations for these flexibilities can be sustainable only if it enables the developing countries to meet their development objectives. They rejected any renegotiation of the principles and elements embodied in the Doha mandate and any proposals on these crucial development instruments which could have the effect of undermining the ability of

developing countries to meet their food security, livelihood security and rural development needs.

6. They urged the developed member countries, in particular the major trading countries, to realize that they bear a special and specific responsibility for the outcome of the Round. They must show their readiness to implement measures that remove trade distortions and significantly open their markets. Their current positions do not provide an adequate basis for leading the agriculture negotiations to a successful conclusion. They must, therefore, significantly improve their proposals especially in the two crucial areas of domestic support and agriculture market access as well as be prepared to deliver on the development dimension of the DDA.
7. The two Ministers agreed to remain in close touch and continue the coordination between the two countries for the future WTO negotiations in order to ensure that the development interests of developing countries are secured in accordance with the mandate of the Doha Development Round.

**338. Press Release of the Ministry of External Affairs on the Tenth Round of talks between the Special Representatives of India and China on the Boundary Question.**

**Coonoor, April 23, 2007.**

The Tenth Round of talks between the Special Representatives of India and China, Shri M.K. Narayanan, National Security Adviser and Mr. Dai Bingguo, Vice Foreign Minister respectively, on the India-China Boundary Question was held in New Delhi and Coonoor from April 20-22, 2007. The two Special Representatives continued their discussions on a framework for the boundary settlement on the basis of the Agreement on Political Parameters and Guiding Principles. The talks were held in an open, friendly, cooperative and constructive atmosphere.

2. Vice Foreign Minister Mr. Dai Bingguo paid courtesy calls on the Prime Minister and the External Affairs Minister on April 20, 2007.<sup>3</sup> Both sides agreed to hold the next round of talks between the Special Representatives in China at a mutually convenient time, which will be decided through diplomatic channels.

---

1. On the eve of the talks the Chinese Foreign Ministry expressed the hope that the coming boundary talks with India would be constructive and some "positive results" could emerge out of the exercise in view of a joint decision to expedite the negotiation process. The Chinese Foreign Ministry spokesman Liu Jianchao said. "We hope that the meeting would continue in a constructive way and reach consensus." There were altogether three rounds of talks on the boundary question between the two countries during the year. The first round had taken place in January and the third round took place in September. Please see Documents No. 333 and 344.

**339. Extract from Prime Minister's interaction with the Indian media accompanying him on the flight from Berlin to New Delhi.**

**June 9, 2007**

\* \* \* \*

As far as my meeting with Hu Jintao is concerned, it was a very warm meeting. We have discussed issues. I did raise the issue of border, cooperation in the management of inter state rivers, exchange of data, flood warning. Hu Jintao responded quite positively that they will sit down. they will nominate their representatives on these groups. And he also agreed that both our Special Representatives dealing with the border issue must move forward and both of us expressed that is the direction we will give to our Special Representatives. It was a very cordial meeting and President Hu was very complimentary on what has been done in recent years to bring our two countries closer to each other. So this is the sum and substance of my meetings.

\* \* \* \*

**Answering a question from the media, the Prime Minister said:**

President Hu Jintao quoted to me twice before using a statement which I made when I became Prime Minister, I said I do not buy this argument that India and China are in competition with each other. Both of us, if we develop in a strong way, will be a source of dynamism in the world economy and the world is large enough to satisfy the development needs of both our countries. So we have every incentive to work together in diverse ways that we can.

**340. Question in the Lok Sabha: "Construction of Road to Mt. Everest by China".**

**New Delhi, August 29, 2007.**

**Will the Minister of EXTERNAL AFFAIRS be pleased to state:**

- (a) whether China is considering to connect its base camp located near 'Mount Everest' with road
- (b) if so, whether international environmentalists have expressed their concern over its adverse impact on the environment;
- (c) whether the Government has taken note of the progress made by China in this regard;
- (d) if so, whether the Government has raised any objection in this regard; and
- (e) if so, the details thereof?

**The Minister of External Affairs (Shri Pranab Mukherjee)**

- (a)-(e) Government have seen media reports stating that China plans to construct a highway on Mount Everest, which is located on the border between Nepal and the Tibet Autonomous Region of the People's Republic of China. According to these reports, construction is likely to be completed in four months (Years) at an estimated cost of US\$ 19.7 million. According to media reports, the Chinese side has said that they would be mindful of environmental concerns while doing so. Government keep a constant watch on all developments having a bearing on India's national interests and take all necessary measures to safeguard these interests.

### **341. Report on the 6th meeting of the Eminent Persons Group to promote India-China cooperation.**

**Beijing, August 31, 2007.**

The sixth meeting of the India-China Eminent Persons Group (EPG) concluded in Beijing on 31st August. Comprising a cross-section of experts, including academics, media professionals, former government officials and scientists, the EPG's mandate is to make recommendations to the government on ways in which bilateral ties can be given added depth. The Indian side was led by the former Ambassador to China, C.V. Ranganathan, while the Chinese delegation was headed by the former Vice Foreign Minister, Liu Shuqing.

"The strong message that came out of our talks was that while some problems between the two countries may persist both sides attach great importance to ties with each other," said Mr. Ranganathan, leader of the Indian delegation. The EPG met Chinese Foreign Minister Yang Jiechi in what Mr. Ranganathan described as a highlight of the visit.

Replying to a question by N. Ram, Editor in Chief of *The Hindu* and a member of the EPG, on China's stance on the India-U.S. nuclear deal, Mr. Yang said it was ready to "explore cooperation with all countries for the peaceful use of nuclear energy in accordance with the rules of the IAEA [International Atomic Energy Agency].

"Mr. Yang said both countries should "not close their eyes to the reality" that some quarters within their respective governments had "their eyes trained to the West at the European continent and East to the United States." However, "I believe opportunities are right here in front of us in Asia, China and India."

The Foreign Minister said, "India's development in every aspect is in the interest of China and vice versa," stressing that the ties between the two countries should transcend the bilateral aspect and extend to having "regional and international impact."

The two-day EPG discussions covered a gamut of topics. On the political front, the Chinese side flagged concerns over the proposed quadrilateral exercises in the Bay of Bengal involving the Navies of India, the United States, Japan and Australia.

The Indian delegation reassured the Chinese that the initiative was not aimed against China or any other country and emphasised the importance of de-

hyphenating India-U.S. or India-Japan relationship with that of India-China<sup>1</sup>.

On the economic front, it raised the issue of India's growing trade deficit with China as well as highlighted the need for a more diversified basket of Indian exports. The concern over the Chinese using non-tariff barriers against Indian agricultural exports was also flagged. The Chinese delegation recommended that India give China full Market Economy Status (MES). Both sides, however, expressed satisfaction at the pace of growth of bilateral trade. During the EPG's meeting with Mr. Yang, he said he was confident that bilateral trade would cross the \$30-billion mark by the year-end.

In addition, a variety of proposals was put forth by both sides to enhance cooperation in the education, cultural and scientific fields. A proposal to establish a joint study on climate change was made. At the end of the talks, Mr. Ranganathan emphasised that making the proposals alone was not enough to ensure forward momentum in ties even if they were accepted and found a place in high level accords.

1. When Prime Minister Manmohan Singh and President Hu met in Berlin on the sidelines of the G-8 Conference in June the latter praised Dr. Singh for his vision, insight and positive attitude that had contributed to a better understanding between the two nations. In response, Dr. Singh had said, "Our Government and I speak for all people regardless of their political affiliation, [and] want the strongest relationship with China. China is our greatest neighbour, and it has been the constant endeavour of my Government to do everything in our power to cement this relationship." Briefing the media on the substance of the half-hour talks, Foreign Secretary Shiv Shankar Menon said the two leaders expressed satisfaction at the developments since they last met in November 2006 in New Delhi. Trade had grown 56.8 per cent in the first four months of 2007, and had crossed \$11.4 billion. "We are well on track to doubling trade to \$40 billion a year by 2010." Mr. Menon said the two leaders exchanged views on subjects such as climate change. "There was an identity of views on most of the issues," he said, although in response to a question whether the Arunachal Pradesh issue was discussed, he said neither side had raised the subject. Mr. Hu renewed his invitation to Dr. Singh to visit China, which was accepted. Since the May 24-25 Manila meeting of the US, Australia, Japan and India, New Delhi was quite conscious of Chinese apprehensions that it was ganging up against Beijing. Prime Minister anxious to clear the misunderstanding, explained to President Hu in Berlin "that there was no question of grouping up (against China)" and added "we (the quadripartite) met to exchange views on developments from our experiences as democracies...there was no security implication in the quadripartite group." Prime Minister felt that President Hu was satisfied with what he said. This piece of information was disclosed by Prime Minister himself on June 25 after releasing a book at his Race Course Road residence. The genesis of the quadrilateral meeting may be found in the discussions that Prime Minister had with the Japanese Prime Minister Abe during his visit to Tokyo in December 2006. The latter had proposed a quadrilateral meeting and Prime Minister seemed open to the idea. The Joint Communiqué issued at the end of his visit to Tokyo inter alia suggested: "The two leaders share the view of the usefulness of having dialogue among India, Japan and like-minded countries in the Asia-Pacific region on themes of mutual interests. The two Governments will consult on the modalities."

**342. Extract from the Speech of External Affairs Minister Pranab Mukherjee at the Korean Institute of International Affairs and National Security in Seoul on the theme of "India's Look East Policy".**

**Seoul, September 17, 2007.**

Our engagement with China is broad and multifaceted. Trade and investment are the great drivers of the new relationship. We are confident that our "Strategic & Cooperative partnership" will mature and steadily develop. The leaders of both countries recognize that co-existence and cooperation is the wise course of action, and sensitivity to mutual aspirations is the underpinning for building confidence and trust. There is enough space and opportunity for both of us to grow and develop, and to bring benefit not only to us, but also for other partners in Asia<sup>1</sup>.

- 
1. Answering question at the end of the talk, External Affairs Minister said he did "not visualise any constraints" on the development of "bilateral relations" between India and the U.S. in the present context. At the same time, India was "confident" that its "Strategic and Cooperative Partnership" with China "will mature and steadily develop." Asked about the possible impact of the emerging U.S.-India equation on China's ties with New Delhi, Mr. Mukherjee said: "There is no question of cooperation between India and the U.S. to act as some sort of containment of any country, including China." Trade and investment "are the great drivers of the new relationship" between India and China. "The leaders of both countries recognise that co-existence and cooperation is the wise course of action; and sensitivity to mutual aspirations is the underpinning for building confidence and trust. There is enough space and opportunity for both of us to grow and develop and to bring benefit not only to us but also for other partners in Asia." Differences, including those over the boundary question, "did not stand in the way of investment and trade." India-China trade now stood at \$30 billion, and he was confident that they would be able to surpass the \$40-billion target set for 2010.

**343. Press Release of the Ministry of External Affairs on the visit of Foreign Secretary Shivshankar Menon to China.**

**New Delhi, September 18, 2007.**

Indian Foreign Secretary (FS) Shri Shivshankar Menon is in China for discussions with the Chinese Government on issues of mutual interest to India and China as they seek to consolidate their Strategic and Cooperative Partnership. Today Foreign Secretary called on State Councillor Tang Jiaxuan, Foreign Minister Yang Jiechi and held discussions with Assistant Foreign Minister He Yafei. The discussions covered further steps to improve and consolidate their bilateral relations, regional and international issues. The discussions were positive, constructive and fruitful.

### **344. Press Release on the 11th Round of the Special Representative Talks on India-China Boundary question.**

**Beijing, September 26, 2007.**

The 11th Round of the Special Representatives Talks on India-China boundary question was held in Beijing from September 24-26, 2007. The Special Representatives of the two countries, Mr. M.K. Narayanan, National Security Adviser, and Mr. Dai Bingguo, Vice Foreign Minister, held useful and positive discussions on the framework for the settlement of the India-China boundary question. The two sides agreed that the next round of talks would be held in Beijing. The specific dates would be decided through diplomatic channels.

1. Days before the third round of talks, the Chinese Premier Wen Jiabao in an interview to the Press Trust of India in Beijing on August 29 expressed confidence that the two countries can find a solution to the border problem. This was the third meeting of the Special Representatives in the current year. "Undeniably there are some outstanding issues between China and India but we have established guiding principles to seek solutions to these issues," Premier Wen said and added "I believe that as long as the two sides demonstrate sincerity and patience and uphold the principles of mutual respect, mutual benefit and mutual understanding, we are bound to find solutions to this issue. Both China and India value universal love and harmony." The Chinese leader said that both he and Prime Minister Manmohan Singh had repeated on many occasions that the development of the two countries was "each others' opportunity rather than a threat". It may be recalled that External Affairs Minister Pranab Mukherjee had on June 16 in Shillong responding to questions from journalists on Chinese claim to Arunachal Pradesh had said that he had made it clear to his new Chinese counterpart that "any elected government of India is not permitted to by the provisions of the Constitution to part any part of our land that sends representatives to the Parliament." He had said "The days of Hitler are over. After the second world war no country captures land of another country in the present global context. That is why there is a civilized mechanism of discussion and dialogue to sort out border disputes. We sit around the table and discuss such disputes to resolve them." Mr. Mukherjee was speaking to journalists on the sidelines of a seminar on "Look East Policy" organized by the Public Diplomacy Division of the Ministry of External Affairs in Shillong. He however said other bilateral issues such as trade and commerce with China could not be kept pending till the resolution of the border dispute with China. Earlier on June 3 Indian Defence Minister A.K. Antony had expressed satisfaction that "there is, by and large, peace and tranquillity along the India-China border, even though there is no well-defined Line of Actual Control (LAC)." He was replying to journalists questions on the sidelines of the Sixth Asia Security Conference in Singapore. The Conference had been organized by the International Institute for Strategic Studies, London. Discounting the "minor aberrations" that might take place "here and there" along the LAC, Mr. Antony hailed the latest bilateral accord on the army-to-army joint exercise as "a major breakthrough." While in Singapore the Minister briefly met Lieutenant General Zhang Qinsheng, Deputy Chief of the General Staff of the People's Liberation Army. He emphasised that Army Chief J.J. Singh, who recently visited China and firmed up the accord on joint exercise, was indeed given "a rousing reception at the highest level."

### **345. Report on the meeting of External Affairs Minister Pranab Mukherjee with the Chinese Foreign Minister Yang Jiechi.**

**Harbin, October 25, 2007,**

India and China have established a Working Group to prepare a framework for the settlement of the boundary issue. External Affairs Minister Pranab Mukherjee made the announcement at a press conference in Harbin on October 25. The 11th round of talks between the Special Representatives of India and China was successful and they decided to set up a Working Group to prepare the framework, Mr. Mukherjee said after a 50-minute meeting with his Chinese counterpart, Yang Jiechi.

“Let us wait for the recommendations of the Working Group,” said Mr. Mukherjee, who was in this northeast Chinese city to attend the third standalone trilateral meeting of Foreign Ministers of India, China and Russia. The progress on the boundary issue comes ahead of the visit of Prime Minister Manmohan Singh later this year<sup>1</sup>.

1. When the correspondent of the Press Trust of India called on Premier Wen Jiabao on August 18 to make his farewell call before leaving for India after a stint of eleven years in Beijing, the Chinese premier made a very warm reference to his contributions to India – China friendship which also underlined the relations between the two countries. He said “China and India are friendly nations and both countries enjoy more than 5,000 years of civilization. Our combined population account for more than 40 per cent of the world’s total. I believe it is fair to say that human progress could only be possible with the development and progress of China and India. The two countries not only have a long history but also enjoy a time-honoured history of friendly exchanges between the two sides. I believe that this is not something that is often seen in human history. During my visit to your country in 2005, the two countries established strategic and cooperative partnership for international peace and prosperity. In the past more than two years, significant progress was registered between the two sides in political, economic, cultural, scientific, technological areas and people-to-people exchanges. In 2006, the trade volume between the two countries reached 25 billion US dollars. This figure is expected to surpass 30 billion US dollars this year. It is the vision of the leaders of the two countries that this figure will reach 50 billion US dollars by 2010. China and India have also mutually hosted the Year of Culture in each others countries. The dynamic cultural exchanges between the two sides have increased the mutual understanding and friendship between the two peoples.... Both Prime Minister Singh and I repeated on many occasions that China’s development and India’s development are each others opportunity rather than a threat. Only with the development of both China and India can there be the possibility of ushering in a true century of Asia and can Asia enjoy comprehensive development in a real sense. I once made a remark, a remark that has become well-know among the Indian people, i.e. the two countries enjoy more than 2,000 years of friendly exchanges and for those times of unpleasant memories between the two countries only lasted two to three years. That is why I say friendship is the mainstream of China-India relations. Undeniably there are some outstanding issues between China and India but we have established guiding political principles to seek solutions to these issues. I believe that as

The talks on the boundary question were held in Beijing from September 24 to 26. The Special Representatives — M.K. Narayanan, National Security Adviser, and Dai Bingguo, Vice-Foreign Minister — held “useful and positive” discussions, the Indian side said last month.

The boundary issue has hampered the development of bilateral ties, with frequent reports of incursions. Unable to find a negotiated settlement through diplomatic channels, India and China appointed Special Representatives in June 2003 to address the issue.

The meeting between Mr. Mukherjee and Mr. Yang also touched upon Dr. Singh’s visit to China, External Affairs Ministry spokesman, Navtej Sarna said. The Ministers also looked at the possibilities of increasing bilateral trade, which has been galloping at over 30 per cent in recent times. However, China enjoyed a growing trade surplus, running into over \$4 billion in the first six months of this year, causing concern in New Delhi.

---

long as the two sides demonstrate sincerity and patience and uphold the principles of mutual respect, mutual benefit and mutual understanding, we are bound to find solutions to this issue. Both China and India value universal love and harmony. The visit to be paid to China by Prime Minister Singh within this year is an important diplomatic event in China-India relations. It is also a big event in the development of China-India relations. We are now making vigorous preparations for the visit to ensure that the visit will be a success. Prime Minister Singh and I have said before that when the two of us shake hands, the eyes of the entire world on us.” (The visit of Prime Minister Manmohan Singh took place in January 2008).

### **346. Briefing Points by Official Spokesperson on Prime Minister's meeting with Chinese Premier Wen Jiabao.**

**Singapore, November 21, 2007**

- Prime Minister had a bilateral meeting with Premier Wen Jiabao of the People's Republic of China today. This is their second meeting this year. They had earlier met at the Second EAS in Cebu in January. The meeting was marked by cordiality and friendship. The two Prime Ministers reiterated their readiness to take the India-China Strategic and Cooperative Partnership for Peace and Prosperity to a new level. Premier Wen conveyed that friendship with India is the strategic and long term objective of China. Prime Minister told Premier Wen that India attaches great importance to our partnership with China, and is resolved to ensuring the comprehensive development of bilateral relations for mutual benefit and on the basis of mutual sensitivity to each others' concerns. They reiterated their readiness to see a fair, reasonable and mutually acceptable solution to the Boundary Question and expressed satisfaction at the progress that is being made by the Special Representatives in this regard.
- The two Prime Ministers discussed opportunities that exist for furthering cooperation in regional and multilateral forums on global issues such as climate change and energy security. Premier Wen was forthcoming and supportive of international civil nuclear energy cooperation with India.
- Premier Wen conveyed that the Chinese Government and people were eagerly awaiting the visit of Prime Minister to China. Prime Minister said that he is looking forward to his visit early next year, and expressed his confidence that his visit will further strengthen the friendly relations between the peoples of the two countries<sup>1</sup>.

---

1. On November 21 the Chinese Foreign Ministry issued a press release on the meeting between the two leaders. It text reads:  
"On November 21, 2007, visiting Chinese Premier Wen Jiabao met with Indian Prime Minister Manmohan Singh in Singapore. Wen told Singh that since their meeting early this year, China-India strategic cooperative partnership has been further enriched and developed and the agreements reached by both sides are being implemented, with which the Chinese side expressed satisfaction. The two countries are important neighbors to each other, as well as large developing countries, said Wen, adding that long-term

---

friendship, mutually beneficial cooperation and common development between the two countries will have a profound impact on Asia and the world at large. Facts prove that the development of friendship and cooperation between China and India has brought pragmatic benefits to the two peoples and has promoted South-South cooperation as well as peace and development in the world, Wen said. The Chinese premier noted that his country is willing to join hands with India to advance the ten strategies on bilateral cooperation and push the bilateral strategic partnership to a new height.

"We are happy to see that both sides have the willingness and resolve to settle their order issue left over from history," Wen said. Up to now, the special representatives of both sides on the border issue have held 11 rounds of pragmatic and effective consultations, he said. So long as the two countries continue to make joint efforts and conduct friendly consultations in the principle of mutual understanding and accommodation, they will finally find a resolution acceptable to both sides, said Wen. Singh said the relations between India and China are more than bilateral ties, as they will influence peace, stability and prosperity of the whole world. India and China are not adversaries but friends and partners. India attaches great importance to developing the comprehensive cooperation ties with China from a strategic perspective and is ready to maintain high-level exchanges with China, he said. India is willing to further cooperation with China in the fields such as economy, trade and personnel exchanges, and strengthen bilateral contacts and cooperation in the international affairs, he added.

Singh said it is the Indian government's political will to settle the border issue and his country will make joint efforts with China to overcome difficulties and push forward the negotiation over it under the political principles reached by the two countries. The two prime ministers also agreed to strengthen coordination and cooperation on climate change and energy security and to join hands in coping with problems and challenges faced by both sides."

The next day at his press conference in Beijing the Chinese Foreign Ministry Spokesman when asked if the two countries planned military exercises said: "... according to the Memorandum of Understanding on the Exchanges and Cooperation between the Defence Ministries of China and India as well as the consensus between the leaders of the two militaries, there will be a joint training. Competent authorities will discuss the specifics. China hopes the training will enhance the mutual understanding, friendship and build trust between the two armies and enable them to contribute to regional peace, stability and prosperity. This joint training is not targeted at any third party." The daily *Hindu on November 22* in a report from its correspondent based in Singapore quoted Indian and Chinese officials to have reiterated their willingness to find "a fair, reasonable and mutually acceptable solution" to the "boundary question." (Dr. Singh drove to Mr. Wen's hotel, The Ritz Carlton Millenia, for a brief, half-hour interaction in the Chihuly Room.) According to the Indian officials accompanying Dr. Singh, the two leaders expressed satisfaction over the progress achieved so far by the designated Special Representatives for sorting out the dispute. While they expressed readiness to take "the India-China Strategic and Cooperative Partnership for Peace and Prosperity" to the next higher level, Mr. Wen told Dr. Singh that friendship with India was China's strategic and long-term objective. They also talked about enhancing cooperation between the two countries in regional and multilateral forums on issues such as climate change and energy security. According to the Indian officials, Mr. Wen was "supportive of international civil nuclear energy cooperation with India." (The Prime Minister visited China from 13th to 15th January 2008.

**347. Question in the Rajya Sabha: "Chinese intrusion in India".****New Delhi, November 22, 2007.****Will the Minister of External Affairs be pleased to state:**

- (a) whether it is a fact that China refuses to recognize the Mac Mohan Line as the border between India and China;
- (b) whether it is also a fact that a number of Chinese intrusions have been taking place particularly in the State of Arunachal Pradesh; and
- (c) if so, the details of such intrusions and the initiatives taken by Government to resolve the same?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

(a) Yes.

(b)-(c) There is no commonly delineated Line of Actual Control (LAC) between India and China. From time to time, on account of differences in the perception of the LAC, situations have arisen on the ground that could have been avoided if we had a common perception of the LAC. Government regularly take up such perceived violations along the LAC with the Chinese side through established mechanisms including the Joint Working Group, the Expert Group, border personnel meetings, flag meetings and normal diplomatic channels<sup>1</sup>.

Both sides have also agreed to an early clarification of the LAC. The Joint Declaration issued during the visit of Chinese President to India in November last year stated, "It was agreed to complete the process of exchanging maps indicating their respective perceptions of the entire alignment of the LAC on the basis of already agreed parameters as soon as possible."

1. Interestingly even before the question of Chinese intrusion came up for answer in Parliament, the Indian Air Force Chief Air Chief Marshall F. H. Major had on November 19 speaking in Shillong sought to allay any threat from China and said there was "misunderstanding of the location of the India-China boundary." Replying to queries from journalists on the reported Chinese intrusions, he said, "Intrusion is a wrong word to be used. Yes, there is difference of perception of the boundary between both the countries."

The similar question on "intrusions" too had come up in the Rajya Sabha on November

---

21 in the name of the Defence Ministry, and the Defence Minister replied: "The perceptions of Line of Actual Control (LAC) of both India and China overlaps at many places on India-China border. From time to time, on account of differences in the perception of the LAC, situations have arisen on the ground that could have been avoided if we had a common perception of the LAC. In order to address this issue, the matter has been taken up at appropriate levels in the Government. The two sides have signed the Agreement on the Maintenance of Peace and Tranquility along the line of Actual Control in 1993, Agreement on Confidence Building Measures (CBM) in the Military Field in 1996, Protocol on Modalities for the implementation of CBMs in Military Field along the LAC in the India-China Border Areas, in 2005 and memorandum of Understanding in 2006. As a follow up to this MoU, the Annual Defence Dialogue between the two sides was held at Beijing during 12-13 November 2007. Government regularly takes up such perceived violations along the LAC with the Chinese side through established mechanisms set up under these Agreements / Protocol including the Joint Working Group, the Expert Group border personnel meetings, flag meetings and normal diplomatic channels. Mechanism to address instances of intrusions along the LAC are well established. Peace and tranquility has been maintained on the border areas." The reports of 'intrusions' however, persisted. In fact there were reports that the Chinese had destroyed Indian bunkers in Sikkim and Arunachal Pradesh but Defence Minister A.K. Antony on December 1, personally refuted reports that China destroyed two forward posts and bunkers on the Sikkim border last month (November). Answering queries from journalists during his visit to Gangtok, Mr. Antony said, "There was no incursion by the Chinese troops in Indian territory, be it in Sikkim or Arunachal Pradesh." He however added that there might have been isolated incidents on the borders arising out of the difference of perception on territorial jurisdiction between the two countries and expressed confidence that all minor problems and differences of perception would be resolved through negotiations. Describing China as "our strategic partner," Mr. Antony said the armed forces of the two countries would participate in a joint military exercise in the second half of December in order to understand each other better.

These exercises between the army personnel of India and China took place in the third week of December. "A company-level strength of about 100 officers and men, drawn from the 15 Jammu & Kashmir Light Infantry took off from Guwahati to take part in 'Hand-in-hand 2007' joint operations by troops from both sides in anti-terrorist operations in an urban setting," Additional Director-General (Public Information) in the Army Headquarters, Brigadier S. K. Chatterjee, told journalists on December 19. He said the objective was to "build and promote positive military relations, inter-operability and to undertake joint operations in a counter-insurgency/counter-terrorist environment for peace in the international arena." The Indian soldiers participated in the exercises with their own light weapons and much of the heavy equipment like tanks, helicopters and unmanned aerial vehicles as well as some heavier arms were provided by the Chinese. At the end of the exercises Deputy Chief of Staff of the Indian Army Lt. Gen. Susheel Gupta, who also headed the observers' group offered at the joint meeting with his counterparts in Kunming to hold similar exercises in India next year. Describing the exercises as "a great event", Lt. Gen. Gupta said, "We look forward to more such engagements in future". Responding to the offer Lieutenant General Ma Xia Tian, Deputy Chief of General Staff of the PLA, said, "We will give a serious and careful study of your suggestion and give you the feedback." On December 27 the Spokesman of the Chinese Ministry of Foreign Affairs in his media briefing in Beijing termed the first-ever joint military training exercise as "helpful in building mutual trust and promoting cooperation," and favoured an increase in such activities to improve stability and security in the region. "China and India are important countries in Asia and two important neighbours. We hope such activities will be increased so that they can be helpful in improving the stability and security of this

---

region," Mr. Qin Gang said. He described the exercise as anti-terrorism drill held in Yunnan province, South-west China.

In New Delhi the External Affairs Minister Pranab Mukherjee (on November 27) described the joint military exercise with China and such exercises with other countries as part of a security strategy and said they would continue. Talking to reporters on the sidelines of the 80th annual conference of the Nikhil Bharat Banga Sahitya Sammelan, which he presided over, Mr. Mukherjee said the military exercises also showcased the prowess of the country's defence forces.

## INDONESIA

### **348. Report on the meeting of the first India - Indonesia Joint Defence Cooperation Committee.**

**Jakarta, June 14, 2007.**

India agreed to enhance its military-to-military engagement with Indonesia, as they concluded their first-ever Joint Defence Cooperation Committee (JDCC) meeting in Jakarta on June 14.

Service-to-service talks, involving the navies and air forces as also the armies of the two maritime neighbours, are now possible for the first time.

The two sides identified procurement and "co-production" of defence equipment as promising areas for cooperation on the basis of feasibility and the principle of "maximising comparative advantages."

Indicating this, the Indian delegation chief and Defence Secretary, Shekhar Dutt, said that the talks marked the beginning of a dialogue in "an atmosphere of hope, trust, and confidence."

Elaborating on Indonesian Defence Minister Juwono Sudarsono's comment, in an interview to The Hindu, about Jakarta's interest in accessing New Delhi's know-how in "network centric warfare," Mr. Dutt said the reason had to do with India's expertise in information technology. It was for the professionals on both sides to discuss the issue, while the JDCC now "provided a framework" for broad-spectrum cooperation in the defence domain. A checklist could now be drawn up for practical measures.

The current regime of coordinated patrolling by the navies of the two countries for anti-piracy and anti-terror operations could be "enhanced or upgraded" on the basis of professional assessments, Mr. Dutt said.

On India's possible role in the maintenance of security along the busy trade route of Malacca Straits, he expressed India's readiness to help, depending on "whatever is identified by Indonesia for its capacity-building."

Prof. Juwono had already indicated that external powers could extend "technical assistance" for ensuring security along this waterway.

The Indonesian delegation to the JDCC meeting was headed by Defence Department Secretary General, Lt. Gen. Sjafrie Sjamsoeddin. The Indian team included Ambassador Navrekha Sharma and the Deputy Chief of Mission, T.S. Tirumurti, besides a number of top military officials.

**349. Briefing by Official Spokesperson on External Affairs Minister Pranab Mukherjee's visit to Indonesia and Singapore.**

**New Delhi, June 15, 2007.**

**Official Spokesperson :** We talked about the Look-East policy briefly yesterday. So, I do not think I need to go into more details. But, essentially if you want I can actually brief you a little bit to set the context for External Affairs Minister's visit to Indonesia and Singapore which begins on the 17th and goes on till the 20th of this month.

As you know, developing our ties with the ten member-countries of ASEAN has been a principle objective of our Look-East policy which was conceived in the 90s and has been pursued consistently and actively for the last decade and a half. Multi-faceted relationships have been developed with the countries of the ASEAN region, both in the bilateral context as well as in the multilateral context. India is a full dialogue partner of ASEAN since 1996 and an annual summit partner since 2002. India has participated in the East-Asia Summits held in Kuala Lumpur and Cebu in December 2005 and January 2007.

Total volume of India's trade with the sixteen East-Asia Summit countries is now US\$ 80.1 billion as per the 2006 figures. Besides, of course, the ASEAN multilateral fora and their internal multilateral fora like the ARF, we also engage with the countries of the region as part of the Mekong-Ganga Cooperation and the BIMSTEC Forum. The Mekong-Ganga Cooperation comprises of six countries - that is India and five ASEAN countries Cambodia, Lao PDR, Myanmar, Thailand and Vietnam. BIMSTEC has India, Bangladesh, Bhutan, Nepal, Sri Lanka, Myanmar and Thailand. This is the broad context for the Look-East policy details of

which you have sufficiently already. Yesterday's briefing is up on the website.

The first leg of the visit will be Jakarta, Indonesia. The External Affairs Minister reaches there on the 17th evening and departs from there on the 18th evening. He will be co-chairing the third India-Indonesia Joint Commission meeting along with the Indonesian Foreign Minister Mr. Wirajuda.

The relationship between India and Indonesia is endowed with certain unique characteristics. There is considerable commonality in size, diversity, historicity, civilization, and also geographical contiguity in a sense because from Andaman and Nicobar, Indonesia is about 100 kilometres away. India and Indonesia also share the experience of being large pluralistic Asian democracies. Over the years Indonesia has been a key strategic partner of India in the ASEAN and particularly in the Look-East policy.

In April 2005, Prime Minister Dr. Manmohan Singh had visited Jakarta to participate in the Afro-Asian Summit and the Golden Jubilee commemoration at Bandung. President Yudhoyono of Indonesia visited India in November 2005. Vice-President of Indonesia, Mr. Jusuf Kalla visited India in January this year.

During the Prime Minister of India's visit, India and Indonesia had opened a new chapter in bilateral relations by establishing the new strategic partnership and identifying areas for enhancing cooperation for the mutual benefit of both countries. The Joint Commission meeting will help to review the progress across the range of objectives in the bilateral relations in the next two years. We will cover areas such as economic and trade relations, pharmaceuticals, health, banking, investment, industrial cooperation, agriculture, tourism, culture, science and technology, space technology, IT, defence and security matters, consular issues and so on.

Indonesia is today India's third largest trade partner in the ASEAN with the trade figures at US \$ 4.79 billion in 2006, which actually represented a 22 per cent increase over the previous year. The target is US\$ 10 billion for 2010. This was set by the second Joint Commission which was held in New Delhi in March 2005. There are several major Indian manufacturing companies involved in joint ventures in Indonesia. There are several Indian infrastructure companies who would be very keen to work in Indonesia along with Indonesian infrastructure companies working in India. There is a JWG on counter-terrorism with Indonesia. That has started functioning. It was established under a MoU in July 2004.

EAM will then go on to Singapore. On the 19th, he has a full day of

engagements. He will be meeting the Foreign Minister. He will also be calling on the President and senior Minister Goh Chok Tong. Next day he will be calling on the Deputy Prime Minister and the Prime Minister. He will also be launching the Indian Business Forum in Singapore. He would also be releasing a book - the 12th volume of Chalo Dilli - which is the 12th volume of Netaji's collected works.

In terms of some specifics about the India-Singapore relationship, Singapore is among our top five trade and investment partners currently. There is considerable convergence on security and defence cooperation issues. Singapore, if you will recall, has with India the first comprehensive economic cooperation agreement which provides a comprehensive framework to take forward this relationship in the economic and trade aspect. Singapore incidentally was one of the first countries to recognize the full implications of India's economic reforms and has been a strong partner in the economic area ever since. The Business Forum's launch will be particularly important from this aspect. There are about two and a half thousand Indian companies which are functioning in Singapore making them the fourth largest foreign presence in that country.

We will keep you briefed as the visit goes along. It is difficult to brief you on each of the things that will happen at the moment. I think it will have to be on a day-to-day basis. You can keep a look out for our press briefs.

I have several other things actually to move on to. So, if there is any question related to this visit, then we can move on from here.

**Question** : Indonesia is also looking for increased defence cooperation with India. Will that also be an issue?

**Official Spokesperson** : Yes, defence cooperation is an area. The Indonesian Parliament has ratified the defence cooperation agreement which was signed by the two countries in January 2001. Possible areas could include training, supply and repairs, spares, and so on.

**Question** : Is there any proposal for further patrolling of the Malacca Straits?

**Official Spokesperson** : You know that the maritime security of sea lanes of communication is of vital concern. It is a common concern both for India and countries of South East Asia, East Asia and the Pacific. Discussions on this have been held in the past. Naturally the proposals of what can actually be done will depend upon the littoral states.

**350. Briefing on External Affairs Minister Pranab Mukherjee's meeting with Indonesian President.****Jakarta, June 18, 2007.**

- External Affairs Minister Shri Pranab Mukherjee was received this evening by President of Indonesia Mr. Susilo B. Yodhoyono. The discussions lasted half an hour and were held in an extremely friendly and cordial atmosphere.
- EAM conveyed greetings of the Indian leadership to the President of Indonesia and briefed him on the fruitful discussion that he has had with his Indonesian counterpart. He also briefed him on the trends and opportunities of the Indian economy and the possibilities of greater economic cooperation between the two countries.
- President Yudhoyono recalled his visit to India in 2005 and reiterated his government's commitment to fully implement the new strategic partnership between the two countries. He noted tremendous strides made by the Indian economy and outlined several areas for further cooperation. These included the field of energy, infrastructure building, trade, IT, health and medicine, defence cooperation etc.
- EAM assured President of the fullest cooperation of the Indian side to move ahead in these areas.

### **351. Briefing points by Official Spokesperson on External Affairs Minister's visit to Indonesia.**

**New Delhi, June 18, 2007.**

- EAM Shri Pranab Mukherji had a packed programme in Jakarta today.
- He had an early morning meeting with Defence Minister Juwono Sudarsono. During this meeting, they discussed the close political and cultural commonalities between the two countries, the security situations of the two maritime neighbours, and possibilities of greater cooperation in the defence field.
- The third Joint Commission Meeting was preceded by a one-on-one meeting between EAM and Foreign Minister Dr. N. Hassan Wirajuda. The Joint Commission Meeting included a wide ranging review of bilateral relations, political high level contacts between Asia's two largest pluralistic democracies, trade and economic relations, investment possibilities, defence cooperation, space cooperation, IT, S & T etc. Reports of the senior officials were approved and minutes of Joint Commission were signed by two ministers. Detailed plan of action for the implementation of the new strategic partnership agreed during 2005 Indonesian President visit is annexed to the minutes of the JCM.
- The Joint Commission Meeting was held in the historic government building Pancshila in which the founding fathers of Indonesia had debated the draft Constitution during May- August 1945
- Joint Press Conference was held by the two Foreign Ministers. In response to one question regarding security of Malacca Straits, EAM said, "We do feel the necessity to ensure the security of the sea lanes of the Indian Ocean, through which 60% of the world's energy trade passes. There is a growing presence of terrorists and non-state actors requiring attention of littoral states and the international community so that mercantile trade and supply of energy can be ensured. We always keep in view sensitivities of the littoral states whatever role they expect us to play, we will be glad to do so."
- EAM also called on Vice President Jusuf Kalla. Discussions included economic cooperation possibilities, investment possibilities, importance of institutional arrangements between the two countries, greater possibilities of training etc.

- External Affairs Minister Shri Pranab Mukherjee was received this evening by President of Indonesia Mr. Susilo B. Yodhoyono. The discussions lasted half an hour and were held in an extremely friendly and cordial atmosphere.

***(In a separate briefing the same day the Spokesperson gave the additional information about EAM's programme in Jakarta).***

- EAM conveyed greetings of the Indian leadership to the President of Indonesia and briefed him on the fruitful discussion that he has had with his Indonesian counterpart. He also briefed him on the trends and opportunities of the Indian economy and the possibilities of greater economic cooperation between the two countries.
- President Yudhoyono recalled his visit to India in 2005 and reiterated his government's commitment to fully implement the new strategic partnership between the two countries. He noted tremendous strides made by the Indian economy and outlined several areas for further cooperation. These included the field of energy, infrastructure building, trade, IT, health and medicine, defence cooperation etc.
- EAM assured President of the fullest cooperation of the Indian side to move ahead in these areas.
- EAM delivered an address on India's growing engagement with East Asia at a function jointly organised by the Indian Embassy and Indonesian Council for World Affairs.

**352. Remarks by External Affairs Minister Pranab Mukherjee at the Joint Press Conference with Foreign Minister of Indonesia N. Hassan Wirajuda.**

**Jakarta, June 18, 2007.**

The Foreign Minister of Indonesia H.E. Mr. N. Hassan Wirajuda and I had very good discussions and reviewed the progress that we have made in our bilateral relations since the establishment of the New Strategic Partnership between India and Indonesia during the visit of the President of Indonesia H.E. Susilo Bambang Yudhoyono to India in November, 2005.

I expressed our deep appreciation for the very warm welcome that I and members of my delegation have received since our arrival in Jakarta.

We believe that the Joint Commission has produced a very considered and focused document which will serve as a reference point for expanding our bilateral relations in the future. The deliberations of the Joint Commission Meeting and the constructive and friendly atmosphere in which they were conducted give us great confidence in the further development of our bilateral relations.

It is a matter of satisfaction that we have also finalized a 'Plan of Action for the Implementation of the New Strategic Partnership' between India and Indonesia. We are confident that this document will provide the blue print for the realization of the strategic partnership between the two countries.

Relations between India and Indonesia are endowed with unique characteristics<sup>1</sup>. Perhaps, there is no other country with which India shares

---

1. Before EAM's departure for Indonesia the Official Spokesperson of the Ministry had briefed the journalists on the background of India-Indonesia relations and said: "The relationship between India and Indonesia is endowed with certain unique characteristics. There is considerable commonality in size, diversity, historicity, civilization, and also geographical contiguity in a sense because from Andaman and Nicobar, Indonesia is about 100 kilometres away. India and Indonesia also share the experience of being large pluralistic Asian democracies. Over the years Indonesia has been a key strategic partner of India in the ASEAN and particularly in the Look-East policy. In April 2005, Prime Minister Dr. Manmohan Singh had visited Jakarta to participate in the Afro-Asian Summit and the Golden Jubilee commemoration at Bandung. President Yudhoyono of Indonesia visited India in November 2005. Vice-President of Indonesia, Mr. Jusuf Kalla visited India in January this year. During the Prime Minister of India's visit, India and Indonesia had opened a new chapter in bilateral relations by establishing the new strategic partnership and identifying areas for enhancing cooperation for the mutual benefit of both countries. The Joint Commission meeting will help to review the progress across the range of objectives in the bilateral relations in the next two years. We will cover areas such as

so much in common in terms of geography, size, diversity, historical and civilization ties as Indonesia. Indonesia is a key strategic partner of India in the ASEAN and in the context of our 'Look East' policy. We would like our relations to move forward and evolve into a strong partnership taking advantage of the synergies that exist between the two countries.

---

economic and trade relations, pharmaceuticals, health, banking, investment, industrial cooperation, agriculture, tourism, culture, science and technology, space technology, IT, defence and security matters, consular issues and so on. Indonesia is today India's third largest trade partner in the ASEAN with the trade figures at US \$ 4.79 billion in 2006, which actually represented a 22 per cent increase over the previous year. The target is US\$ 10 billion for 2010. This was set by the second Joint Commission which was held in New Delhi in March 2005. There are several major Indian manufacturing companies involved in joint ventures in Indonesia. There are several Indian infrastructure companies who would be very keen to work in Indonesia along with Indonesian infrastructure companies working in India. There is a JWG on counter-terrorism with Indonesia. That has started functioning. It was established under an MoU in July 2004." When questioned whether "Indonesia is also looking for increased defence cooperation with India. Will that also be an issue? The Spokesperson said: "Yes, defence cooperation is an area. The Indonesian Parliament has ratified the defence cooperation agreement which was signed by the two countries in January 2001. Possible areas could include training, supply and repairs, spares, and so on." When questioned whether there was any proposal for "further patrolling of the Malacca Straits, the Spokesman said: "You know that the maritime security of sea lanes of communication is of vital concern. It is a common concern both for India and countries of South East Asia, East Asia and the Pacific. Discussions on this have been held in the past. Naturally the proposals of what can actually be done will depend upon the littoral states."

### **353. Joint Press Statement issued after the Third Meeting of India-Indonesia Joint Commission.**

**Jakarta, June 18, 2007.**

On this day, Monday, 18th of June 2007, the meeting of the Third Joint Commission between Indonesia and India was held in Jakarta and Co-Chaired by the Minister of Foreign Affairs of Indonesia HE Dr. N. Hassan Wirajuda and the Minister of External Affairs of India HE Mr. Pranab Mukherjee. The first two meetings were conducted in Yogyakarta in 2003 and in New Delhi in 2005 respectively. Today's meeting assumes great significance since it is the first meeting after the forging of a "New Strategic Partnership" by President Susilo Bambang Yudhoyono and Prime Minister Manmohan Singh during the State Visit of the former to India in November 2005.

The meeting of the Joint Commission was convened in a warm and friendly atmosphere. The Delegations from both countries discussed and exchanged views on the various sectors of cooperation to explore and expand cooperation in a range of fields, including political, defense and security, transportation, economy and investment, health, education and training, science and technology, tourism and culture, technical cooperation and legal cooperation. The Agreed Minutes were signed by both Heads of Delegation to signify their intention to strengthen and deepen bilateral cooperation bearing in mind the challenges facing Asia's two largest and pluralistic democracies.

With an intention to implement the New Strategic Partnership, both countries have agreed upon a Plan of Action to implement this partnership in a clear and measurable manner. Some of the highlights of bilateral relations discussed during the Joint Commission Meeting include the following:

- The appreciation of both countries on the convening of the First Joint Defense Cooperation Committee between Indonesia and India on 12-14 June 2007 in Jakarta, after the ratification of the Defense Cooperation Agreement between Indonesia and India in December 2006;
- The significant increase in the exchange of visits between members of parliament, government and military officials, trade missions, academicians, and "people to people" exchanges from both countries over the past few years;

- Enhancing economic, investment and trade relations through the diversification of the trade basket and addressing the impediments to the expansion of trade and investment, with the aim of reaching the two-way trade volume target of US\$ 10 billion by 2010, as mentioned in the Joint Declaration of 2005;
- The meeting identified new fields of cooperation, such as Special Economic Zone cooperation, development of alternative energy sources, the conclusion of a Mutual Legal Assistance Treaty (MLAT) in Criminal Matters and Extradition Treaty, cooperation in health and pharmaceuticals, oil and gas, and mining, biotechnology and women's empowerment.
- The Indian delegation expressed appreciation at the extension of Visa on Arrival facilities to Indian nationals by Indonesia and also take note to simplify of Indian visa grants for Indonesian nationals;
- The meeting discussed the strengthening of cooperation in information technology, nuclear technology, biotechnology, tele-education, tele-health, and strengthening cooperation in space technology, especially after the successful establishment of the Second Telemetry Tracking and Command Centre in Biak by ISRO and the recent piggy back launch of the LAPAN TUBSAT Micro Satellite by India in January 2007;
- The Indonesian side welcomed the Indian Prime Minister's offer to assist in the restoration work at the Prambanan Temple Complex through the Archaeological Survey of India; both sides agreed to cooperate closely in the hospitality and tourism sector as well.
- Both sides have also agreed to enhance technical cooperation and cooperation in education through the granting of scholarships to students of both countries.

As a symbol of India's contribution to the recovery of Aceh, a Memorandum of Understanding concerning the Setting Up of a Vocational Training Center for the Construction Sector in Aceh was signed by the Minister of Public Works of Indonesia Mr. Djoko Kirmanto and the Minister of External Affairs of India.

The Ministers emphasized the unique characteristics of the relations between India and Indonesia as Asia's two largest and pluralistic democracies and recalled that the two countries have had contacts in history

for more than of 2000 years. They expressed their confidence that the outcome of the Joint Commission Meeting would build a strong foundation for Indonesia and India to continue cooperation for the mutual benefit of their peoples.

**354. Address by the External Affairs Minister Pranab Mukherjee at a function jointly organised by the Embassy of India in Jakarta and the Indonesian Council of World Affairs on “India’s Growing Engagement with East Asia.”**  
**Jakarta, June 18, 2007.**

Please see Document No. 323.

## JAPAN

### **355. Address by Special Envoy of the Prime Minister Shyam Saran at the Japan Institute of International Affairs.**

**Tokyo, January 15, 2007.**

Mr. Chairman, Mr. Miyagawa, Director of the Japan Institute of International Affairs, very distinguished members of the audience, I am particularly delighted to be here with you this morning. I had the privilege of serving in this great country as Deputy Chief of Mission in the Embassy of India. I left Tokyo in 1989 and it has taken me about 15 years to come back. It is my great privilege to be back again in a country of which I have such pleasant memories. Since the time I was last here, our relations with Japan, which have always been very cordial, have added a few additional dimensions. Today, when I come to Japan, I see a dramatic transformation in our ties with this country. I think this is best encapsulated in what Prime Minister Abe said to our Prime Minister during the latter's recent visit to Japan. He said that for Japan, the relationship with India is the most important strategic relationship and I think that sentiment was very much reciprocated by our Prime Minister. I think if you look at the emerging situation here in Asia, there is no doubt that there are very important changes which are taking place, changes which will have not only an impact on Asia but also all over the world.

Firstly, there is no doubt that the centre of gravity of the global economy is shifting towards Asia. There is a very important strategic shift which is taking place. A part of that strategic shift is the emergence of very important dynamic economies of China and of India. I think Japan has shaken off some of the problems that it was facing in the last decade or so and is once again back on the path of growth. The relationship amongst these three Asian countries will be very important for the security, stability as well as the prosperity of our region.

The relationship between India and Japan is becoming closer, because we are democracies, because we have respect for the same human values and a history of a very benign and very positive relationship over the last many years. I think all this adds to a very comfortable relationship between India and Japan. Amongst the Asian countries, I would venture to say that the comfort level between India and Japan is perhaps much higher than Japan's relations with many other countries in Asia. We believe there is an

excellent foundation for developing our relationship further. So, when Prime Minister Abe says that India-Japan relations can be the most important strategic relationship for Japan, and India reciprocates that sentiment, I don't think it is mere diplomatic language. I think it is based on a very substantive perception on how the world is changing, how Asia is changing and what role India and Japan can play in that regard.

For India also, there is a very important perceptual change which is taking place. If you look at the 15th century, 16th century, even 17th century Asia, you will see that India was really at the crossroads of very dynamic trade relationships with South East Asia, with West Asia, with East Coast of Africa. Maritime connections were very very dense. Ambassador here has also served like me in Indonesia. If you go to Indonesia, you will find examples of Indian textiles from the 16th century and 17th century which used to serve like the currency of trade in South East Asia before the industrial revolution took place in Europe. So there were very intense relationships, maritime communications linking up many of the countries of Asia, and even as I said East Coast of Africa.

Those were interrupted by imperialism, by colonial rule. The main connections changed to the colonial countries, and all the connections which used to exist among the Asian countries themselves, were interrupted. What is happening today is really almost like resumption of history in Asia. Those ancient communication links, those ancient cultural linkages are once again coming to the fore. It is not only trade which is developing once again amongst the Asian countries but at the same time there is a very strong cultural resurgence also taking place and there is a sense that we are in the midst of a rediscovery by Asia of itself. In India, we feel we are really in the midst of a very exciting adventure taking place and certainly we would like India-Japan relations to be part and parcel of that great adventure.

I would like in this context to refer to the tremendous change that is taking place in terms of our economic profile. Since 1991, there has been a very dramatic change in India's economic policies: The Indian economy has opened up. It is an economy which now believes its destiny lies in greater linkages with the global economy rather than the self-reliant model of development. The strategy of self-reliant development did have a certain rationale and we did have certain logic at the time we applied it. Since 1990-91, the world has changed and India too has undergone a change. Now, we believe that on the basis of the kind of infrastructure that we

managed to establish in those years, the industrial infrastructure - Mr. Nehru's great stress on developing India's scientific and technical manpower, very high quality education, all that has now started in a sense delivering its fruits, its benefits. We are now able to leverage some of those investments which were made many years ago to really step on to the world stage with a far greater deal of confidence, far greater deal of assurance than perhaps was possible two decades ago or three decades ago.

The Indian economy is as you know on an accelerated growth path. It is growing at the rate of about 8% per annum. This year it might grow even faster. Our target is that it should be perhaps 10% or even more than 10% per annum. We cannot grow as fast as China has for the simple reason that we are a different society. Our political system is different. Therefore, you know the manner in which we develop has to be in consonance with our democratic values, it has to be in consonance with our respect for human values. I do not think that India should, in fact, aspire to 15% rate of growth and not look at the human consequences or the social consequences of that growth. There is a sense in India that let us grow as fast as we can while ensuring that our social fabric and our cultural fabric is not strained beyond the limits of tolerance. I think we have done very well in terms of being able to maintain our democratic framework, being able to contain a lot of the social and economic consequences of a higher growth rate. If we were not a democracy, perhaps we would not have been able to do so, given the fact that India is such a diverse country, given the fact that we are a billion people. We have a number of languages; perhaps in Japan which is a relatively homogenous country, it is difficult to realize how much of a challenge it is for a diverse country like India to deal with these kind of challenges. I think the great achievement of India has been that while it has been through this tremendous economic and social transformation, it has remained a true democracy and there is a sense in India today that being a democracy is not any kind of a constraint on our ability to achieve faster growth. When I was here, in the late 80s, there used to be a very strong feeling, even in this country, that India may not be able to get away from the bullock cart rate of growth as it did not correspond to the Asian model of authoritarianism along with economic liberalism.

I think in the world today there is a very big change in this perception. India has been part of the reason why there is a change of perception. If you look at a somewhat longer perspective, democracy, far from being a constraint on growth, can actually be a very important contributing factor to growth.

Why is there a sense of optimism in India about our future prospects? If you look at the world and the kind of global economy that is emerging, we believe that economic growth is inevitably going to be more and more technology driven. It is going to be more and more knowledge driven in the future. If that is the case, we believe India is well placed to take advantage of the very heavy investments we have made in developing human resources, because it has the trained human skills. Perhaps no other country has that kind of critical mass of skilled manpower which India has, and given its demographic profile I think there will be a constant replenishment of skilled manpower as the years go by.

The second important element is that culturally India, having been a crossroads culture throughout its history, has people who are very adaptable. We do not have much problem in adapting to the rest of the world. This is the reason why within about 15 years of economic liberalization and growth, you find that not only are we receiving foreign collaboration, foreign investment, but also there are Indian companies who are going out and investing. They are becoming true multinationals. They are acquiring assets abroad. They don't have much problem in adjusting themselves to different economic environments elsewhere in the world. So there is an advantage that we have in terms of our temperament, in terms of our cultural traditions. We have all the reasons for emerging as, I would not say as a super power, but we believe that we can certainly be among the first ranking nations of the world if we make the right decisions today.

Now this brings me to what are the kind of constraints that we would face if we are looking at such a future. Well if we want to continue to grow at the rate of 8 to 10% per annum for the next 20-25 years, one of the biggest challenges for us is going to be energy. Today more than 50% of our energy requirements are met by coal and in fact most of our energy comes from fossil fuels. We are facing a situation where there is a sharp rise in the prices of oil and gas. There are very serious environmental concerns about the continued use of coal based power. If you have an India which is growing at 8 to 10 per cent per annum, if you have a China which continues to grow at the rate at which it is growing today, then there is no doubt that there will be very soon, if that moment has not already arrived, a major pressure on global energy prices, availability of energy resources, and there would also be a very serious environmental challenges which we have to face. We looked at our energy requirements for the next 20-25 years, up to 2030 then up to 2050. Even if we were to utilize all the known sources of energy that are available, potential source of energy that we have, we would have

a major gap, in fact a growing energy gap that we would be facing as time goes by. In that context, in developing our economic strategy we came to the conclusion that if in the medium-term we really want to have a very significant increase in energy available to us, then there is no alternative to developing our nuclear energy sources.

Why nuclear energy? Despite the technology denial regime that India has had to face over the last three to four decades, we have managed to develop a fairly complete infrastructure in the nuclear field. We have a very strong base in terms of human resources. We have very capable scientists, we have very capable technologists whose worth is recognized internationally. We have managed to master the entire nuclear fuel cycle. So for us it made sense to look at nuclear energy as certainly one of the very important sources of energy that we could develop in the medium term and the long term. This would also have very important advantages in terms of the environment challenges that we are talking about because nuclear energy certainly, relatively speaking, is the cleaner source of energy. In terms of the kind of perspective planning that we have of a fast breeder reactor programme and later thorium based nuclear programme, this is something which would enable us to very successfully handle the issue of atomic waste that would emerge from a larger exploitation of nuclear energy. In terms of the energy strategy that we adopted a couple of years back, nuclear energy was certainly identified as one of the very important sources of energy that we would need to develop.

Now, I will give a background of the Indo-US Nuclear deal. Actually it was in 2004, around October, that we were discussing with the European Union, not with the United States, establishment of a strategic relationship between India and the European Union. In November, there was going to be a Indo-EU Summit, at which the strategic partnership was to be announced, we were looking in the preparations up to that Summit at what kind of global challenges and strategic issues India and EU need to work together on. While we have excellent bilateral relations with EU, if we really wish to go beyond those bilateral relations, what is it that India and the EU could do together in terms of their strategic partnership? We ran through the list, we talked about global health issues, what India and EU should do to deal with issues such as AIDS, Avian Flu, and pandemics. We talked about issue of environment. But one of the issues that we also talked about was energy and we gave similar arguments I gave you that if we are going to have a very large increase in energy demand from economies, very large growing economies, like India and China, this would have an impact not only on

India and China but it would also have an impact globally and the related issue of environment. Accordingly, we decided that one of the components of the India EU Strategic relationship would be energy. So when we actually announced our strategic partnership in November 2004, one of the decisions was to set up an India-EU Energy Panel and in that Energy Panel, apart from the other energy issues that we decided to look at, there was also nuclear energy.

In fact this was the first time after many years that India and its western partners decided to re-visit the issue of nuclear energy. This was also of course something related to one of ITER fusion project of which Japan is a very important member and as you are aware, thanks to the support which we also received from Government of Japan, India was able to join the ITER project as one of the founder members. This was the first breakthrough in the sense of the taboo on discussing nuclear energy. That taboo was broken. This was without prejudice to the very strong positions that European countries have on nuclear non-proliferation. It was not as if European countries had decided to abandon their attachment to the goal of nuclear non-proliferation or their concern that everything should be done in order to further the goals of nuclear non-proliferation. But it was also recognized that we look at a somewhat larger global perspective and we should put India's relationship with EU also in that larger global perspective.

With this advance that we were able to achieve with the European Union, a similar dialogue took place with the USA and this was in the run up to our Prime Minister's visit to Washington which was to take place in July 2005. When we started discussing with the United States as to what would be the content of the strategic relationship which we were going to establish with the United States, similar kind of issues came up. What are the kind of things that India and the United States should be doing if they were to really establish a substantive strategic partnership? Inevitably the issue of energy came up. A similar kind of argument in fact took place when we talked about global energy situation and by the way this actually corresponded to a very important review taking place internally at that time in the United States itself about the revival of nuclear energy.

Of course, you saw the result of that six months later when President Bush himself announced that we need once again to look at nuclear energy and revive nuclear energy as one of the most important source of energy for the United States, reduce the US's dependence on fossil fuels particular foreign oil. So we decided that one of the things that we need to do together

is to look at nuclear energy as a potential source of energy for both United States and India and of course look at it from the perspective of identifying this as one of the areas where we could work together. This was, of course, based on the logic that India will do whatever is necessary in order to develop nuclear energy as a major source of energy for itself but obviously if India were able to have international cooperation in this field, it would be able to develop it much faster.

In the discussions that we have been having with both US and EU, we have said that we would be ready to give two kinds of assurances to our partners. One, an assurance that whatever we receive under international cooperation from our partners would not be diverted to third countries. Secondly, whatever we receive in terms of material or equipment from our partners would never be diverted to our own strategic programme.

In the case of the first set of assurances, although India did not sign the Non Proliferation Treaty, please do not forget that India was one of the first advocates of Non Proliferation. In fact, India was one of the very strong supporters of the original resolution which was moved by Ireland. Why did we not sign the Non-Proliferation Treaty? Not because we were against non-proliferation, but because we believed that the treaty which was emerging from those negotiations was a discriminatory treaty. We believed that it did not really address the real motivation behind proliferation and that the best antidote for proliferation was really the eventual elimination of all nuclear weapons. While there were very specific commitments which were made by non-nuclear weapons states, there were good faith declarations made by the nuclear weapon states, that there had to be a certain balance in the commitments made by both sides. So it was not that India was against the concept of non-proliferation but it did not sign the NPT because it believed that the treaty itself was in a sense lacking in addressing the real issue of proliferation and it was not non-discriminatory in character. The other aspect to remember is that precisely because of our commitment to non-proliferation all these years, India has perhaps the best record in terms of non-proliferation despite the fact that we have indigenously developed a whole range of technologies both on the nuclear side as well as in terms of delivery capability on the missile side. India has been one country which has had the most conservative record in terms of sharing any of these technologies with any third countries.

When we decided with the USA that we would in fact engage in civil nuclear energy cooperation, what we agreed to do was that we will further strengthen

our commitment to non-proliferation by converting what has been so far a policy commitment on the part of the Government of India, successive governments of India, into legal commitments. Several times the question is asked - we can see why this is good for India but we can't see why this is good for the international community or for the non-proliferation regime. The reason why it is a plus for the international community, the reason why it is a plus for the international non-proliferation regime, is because India has been ready to convert what has essentially been a policy commitment on its part for all these years in terms of non-proliferation into legal commitments. How did we do this? In May 2005, India adopted a very comprehensive WMD legislation which covers tangibles as well as intangibles with very strict controls and very serious penalties for violations of this law covering virtually all aspects of technology and equipment relating to WMD. This Act was passed by the Indian Parliament and it was gazetted; that was one very important step forward taken. After that in July 2005, we also decided on our own to harmonize all our export control lists with those of the Nuclear Suppliers Group as well as with the Missile Technology Control Regime Group (MTCR). We have very exhaustive lists from the Directorate General of Foreign Trade in India as well as the Department of Atomic Energy in India which have been now notified. Our export control lists are now on par with the NSG and MTCR.

This was to give confidence to our partners that India not only committed to non-proliferation in terms of policy as it has been all these years, but it is now ready to give legal character to those commitments. I would submit that this is a very important plus point for the international community and for the non-proliferation regime because if India is a country which already has a whole range of sensitive technologies available inside our country, and if this range of technologies is only going to increase in the future, then does it not make sense to treat India as a partner in global non-proliferation efforts rather than to treat it as a target?

The second set of assurances that I mentioned to you was that whatever we receive from our international partners, we should not let it in any way be an advantage to our strategic programme. It should not help our strategic programme. This was a little more complicated. It was complicated because India did not start with a dedicated nuclear weapons programme. Our strategic programme in a sense grew out of our undifferentiated nuclear programme. The kind of distinction which was there in nuclear weapon countries between their strategic programme and their civil programme, that differentiation did not exist in India. Unless there was, therefore, a

clear-cut separation of our civil facilities, it would be impossible for us to give the assurance to our partners that whatever we receive from them in terms of material or equipment would never be diverted to military uses. Therefore, we worked out a separation plan where India identified what would be its civilian facilities leaving out those which are in the strategic category. Those civilian facilities are available for cooperation with our partners. This being a complicated exercise, and something which will take a little bit of time, there is a phased separation plan which will take us upto 2014.

Now obviously in order for international cooperation to happen there are various things which need to be done: one is, in USA itself, change in its legislation in order to enable cooperation to take place with India. Parallel to that there would have to be a change in the guidelines of the NSG similarly to make it possible for there to be cooperation between India and members of NSG. We would have to develop an India-specific safeguards agreement with the IAEA. Why is it specific? Because India does not fall in the category of Nuclear Weapon States as detailed in the Nuclear Non-Proliferation Treaty but neither is it a country which is a non-nuclear weapon state as it has a strategic programme. So we have to find some kind of formula or some kind of a model which can take into account this particularity of India. That is why we said that we have to negotiate an India specific safeguard agreement with the IAEA. Similarly, we have to negotiate an Additional Protocol to the India specific safeguards agreement.

Where are we at this point of time? At this point of time, the law in the USA has been changed, so with the adoption of the Hyde Act in December, we have actually a change in the legislation which has taken place. This has opened the way for the next step which is India and USA negotiating a bilateral civil nuclear energy cooperation agreement which is under Section 123 of the US Atomic Energy Act.

This would have to be in parallel with the change in the NSG guidelines which would be certainly complicated because there are 45 members of the NSG group and there would also have to be negotiations with the IAEA on safeguards. These are, in a sense, linked but the passage of the legislation in the USA was a key because without that change taking place, the other components could not really move forward. So at this stage we have one very important landmark which has been crossed with the passage of the US legislation.

Currently we are working on the three other components that I have

mentioned, the 123 Agreement, NSG guidelines and IAEA safeguards. All these are going to be rather complicated exercises, will take a lot of persuasion on our part, lot of diplomacy on our part to be able to accomplish these different components. We have come a long way since this process began and we have some confidence, given the reputation that we have established as a country which has as I said an impeccable record in terms of non-proliferation. Given that record, we believe that we have a good opportunity to bring about a change in the international regime as it relates to India and this would be an extremely important contribution to our ability to meet the kind of challenges that we are going to face in the next couple of decades, in particular the energy challenge.

It is important to remember that what we are doing here is not an arms control measure, it is a measure for civilian nuclear energy cooperation. I think this distinction needs to be kept in mind.

Let me conclude by saying that in taking this initiative forward, we are more than conscious of the sensitivities of our partner countries in terms of nuclear non-proliferation. We are of course aware of Japan's sensitivities, because it is the only country which has suffered from the use of nuclear weapons. I would like assure you that not only are we aware of the sensitivities but we are more than prepared to work together with you for the goal of nuclear disarmament because we continue to believe that really the answer to the kind of challenges that we are facing today, particularly in the field of proliferation, would be difficult to tackle unless we rededicate ourselves to the goal of nuclear disarmament. I think that the objective of the international community is to work for a credible plan to eventually eliminate nuclear weapons, but that particular commitment in a sense has been under shadow for some time.

I think it is very important to rededicate ourselves and to put that once again in at the top of the international agenda. We are quite prepared to work together with you in trying to bring that back on the global agenda and really work towards that end. While there may be some differences between us because we do have a strategic programme, we make no bones about that, but please rest assured that in terms of our commitment to the goals of non-proliferation and nuclear disarmament we remain as passionately committed as you are. We believe that there is actually a basis on which our countries can work together. We will do nothing in any sense to disturb our comfort level as far as this issue is concerned.

I think it is important specially since we have established a very important

relationship between our two countries that we explain to our friends what has led us to this initiative, explain to our friends what are the reasons why we have chosen to go in this direction. Of course, we believe that with this explanation, with the kind of feedback that we give you, you will take your own decisions in terms of your own interests but among friends it is important that we should have this dialogue and that is the reason why I am here.

Thank you very much.

**356. Briefing points by Official Spokesperson on External Affairs Minister's meetings during his official visit to Japan.**

**New Delhi, March 22, 2007.**

- On arrival in Tokyo on his official visit, External Affairs Minister Shri Pranab Mukherjee called on the Prime Minister Mr. Shinzo Abe. The call lasted for approximately 40 minutes.
- EAM conveyed Prime Minister Dr. Manmohan Singh's warm greetings and also reiterated PM's invitation to Prime Minister Abe to visit India this year. EAM reiterated importance attached by Government of India to strategic and global partnership with Japan and looked forward to operationalizing the strategic dialogue with Foreign Minister of Japan. He also underlined the importance attached to cooperation in the defence and security field. Prime Minister Abe underlined the need for countries with common values of freedom, democracy, rule of law and human rights like India and Japan to work together. He also reiterated the importance of India-Japan strategic dialogue. Prime Minister Abe welcomed India's presence in the East Asia Summit. EAM welcomed Japan's presence as observer at the forthcoming SAARC summit. Discussions also covered other regional and international issues of mutual interest.
- EAM held a meeting with Mr. Akira Amari, Minister of Economy, Trade and Industry. Strategic and global partnership issues were discussed particularly from the economic relations angle. EAM briefed Mr. Amari on economic developments in India including favourable growth trends. The dedicated freight corridor project was also discussed. It

was noted that first meeting of the Joint Task Force on EPA/CEPA negotiations has agreed on terms of reference and second meeting is to be held in Tokyo in April. The agreement on modalities and time frame for bilateral consultation mechanism on facilitation of high-technology trade was welcomed. The first round is to be held in May at the official level. It was also noted that India-Japan Energy Dialogue meeting is to be held in Tokyo in April and will be co-chaired by Deputy Chairman, Planning Commission from India. Discussions also covered the WTO issues.

- EAM also held a meeting with Chief Cabinet Secretary Mr. Yasuhisa Shiozaki. During this meeting it was reiterated that broadest possible exchanges between India and Japan at a high level should be continued. Mr. Shiozaki expressed his desire to continue his dialogue with National Security Adviser on key regional issues such as the six-party talks.
- EAM is to hold meetings with Foreign Minister Mr. Taro Aso, including the first ministerial level strategic level dialogue later today.

### **357. Joint Press Release on the visit of External Affairs Minister Pranab Mukherjee to Japan.**

**Tokyo, March 22, 2007.**

The Minister of External Affairs of India, H.E. Shri Pranab Mukherjee, is paying an official visit to Japan at the invitation of H.E. Mr. Taro Aso, the Minister for Foreign Affairs of Japan. The Minister of External Affairs of India held talks with the Minister for Foreign Affairs of Japan on 22nd March 2007. They also initiated the first Ministerial Level Strategic Dialogue between the two countries. The Minister of External Affairs called on H.E. Mr. Shinzo Abe, Prime Minister of Japan. He also had meetings with H.E. Mr. Akira Amari, Minister for Economy, Trade and Industry, H.E. Mr. Tetsuzo Fuyushiba, Minister for Land Infrastructure and Transport and H.E. Mr. Yasuhisa Shiozaki, Chief Cabinet Secretary. He will be meeting with H.E. Mr. Fumio Kyuma, Minister for Defense on 23rd March, 2007.

During these intensive interactions, it was noted with satisfaction that bilateral relations have gained new momentum to reach a higher level following the decision by the two Prime Ministers to establish the India-Japan Strategic and Global Partnership. The two sides expressed their determination to accelerate the process of strengthening bilateral relations based on the common values and shared interests through the implementation of understandings and agreements contained in the Joint Statement signed by the two Prime Ministers in Tokyo on December 15, 2006.

#### **1. Regional and International Issues :**

- (1) The Minister of External Affairs of India and the Minister for Foreign Affairs of Japan exchanged views on ways to enhance cooperation on regional, multilateral and global issues. They reached a common understanding that India and Japan have a responsibility for responding to regional and global challenges, and must play an active role in the promotion of peace and stability in Asia and the world at large.
- (2) Considering the present situation in Asia, the Ministers had extensive discussions on the direction of Japan-India cooperation towards building peace and prosperity in Asia. The Ministers reaffirmed that there exists common objectives and values between the idea of "Arc of Freedom and Prosperity" proposed by Japan and the idea of "Arc of Advantage and Prosperity" proposed by India, and that realisation of such common ideas would benefit not only Japan and India but

also the whole of Asia. Japan and India will intensify dialogue on Asia through various channels.

- (3) The Ministers shared the view that further development of South Asia, which has vast potential, would greatly contribute to peace and prosperity in Asia as well as in the world at large. The Ministers reaffirmed that South Asian Association for Regional Cooperation (SAARC) should play an important role for regional cooperation and integration of the South Asian region. India welcomed Japan as an Observer country at SAARC. They shared the view that the next SAARC Summit Meeting, which will be held in April in New Delhi and in which Japan will participate as an observer for the first time, would be an occasion to enhance global linkages between SAARC countries and the East Asian region.
- (4) The Ministers shared the view that it would be important to strengthen regional cooperation to tackle such issues in the region, including inter alia, energy security, environmental issue, natural disaster, terrorism and proliferation of weapons of mass destruction. They reiterated their readiness to cooperate in the process of community building in the Asian region and shared the view that it would be important to foster the East Asia Summit (EAS) as a pillar of East Asian community building in the future. For this purpose, they reaffirmed that the two countries would continue to cooperate on the basis of progress which was made during the 2nd EAS in January this year.
- (5) The Ministers stressed that it would be important for the two countries to deepen cooperation in the field of climate change and energy efficiency in accordance with their common but differentiated responsibilities so as to work in a concerted manner against climate change which is the urgent issue of international society. They will also cooperate within the framework of the Asia-Pacific Partnership on Clean Development and Climate.
- (6) The Ministers also reaffirmed that they will continue close cooperation towards early realisation of UNSC reform which is the common objective of the two countries. They confirmed that the initiative by the G-4 countries (India, Japan, Brazil and Germany) has played an important role in this endeavour and they will continue to utilise this framework as well as close dialogue with important partners.
- (7) The Ministers discussed recent events on the Korean Peninsula and shared grave concerns on the nuclear test conducted by DPRK, which

has greatly complicated the security situation in the region and highlighted the true extent of clandestine proliferation. They stressed the importance of fully implementing the UN Security Council resolution 1718 and confirmed that they would promote practical cooperation towards this end. They emphasised the importance of realising the denuclearisation of the Korean peninsula, through the Six-Party Talks and called for the implementation of the agreement of February 13, 2007. They urged that the abduction issue be resolved at the earliest as a humanitarian concern.

- (8) The two sides reaffirmed that both countries will continue to work together as responsible members, including through the G-6 to achieve an early conclusion of a well-balanced WTO Doha agreement.

## **2. Efforts to Further Strengthen Bilateral Relations :**

- (1) **High Level Visits and Bilateral Dialogues** : The External Affairs Minister of India reiterated the invitation from the Prime Minister of India to the Prime Minister of Japan to visit India at an early, mutually convenient date. The Prime Minister of Japan said that he was looking forward to visiting India. The Ministers reiterated the importance of regular bilateral dialogue through established mechanisms such as Foreign Secretary Level Talks, Annual Dialogue on Disarmament and Non-Proliferation, Joint Working Group on Counter Terrorism, etc. It was agreed that all these dialogue mechanisms will be convened within the year 2007.
- (2) **Defence and Security Cooperation** : The Ministers noted with appreciation the steady development of cooperation and exchanges in the field of defence and security. In this context, they welcomed the goodwill visit of the Indian Navy ships to Japan, Annual Defence Dialogue, and developments in service-to-service cooperation, including through an annual calendar of cooperation and exchanges. They directed that the next round of the Comprehensive Security Dialogue would take place on mutually convenient dates in 2007. The two sides endorsed the view that India and Japan must cooperate closely to ensure the safety and security of international maritime traffic vital for their economic well being as well as for the region, including through the regular exchange of visits by the Coast Guards of the two countries.
- (3) **Comprehensive Economic Partnership** : The two sides reviewed all aspects of the comprehensive economic engagement between India

and Japan under the Special Economic Partnership Initiative. They expressed their satisfaction at the initiation of the CEPA/EPA negotiations in January 2007 aiming at delivering a high-quality and mutually beneficial agreement. The 2nd round of negotiations will be held in Tokyo in April, 2007. The Minister for Foreign Affairs of Japan conveyed that India would remain the largest recipient of the Japanese ODA loan in the current fiscal year for the fourth consecutive year and the Minister of External Affairs of India expressed his appreciation for the Japanese assistance. The Minister of External Affairs of India informed the Japanese side of Government of India's decision to implement the Dedicated Freight Corridor Project. The Japanese side showed its understanding of the importance of the project and mentioned that it would consider the possibility of assistance for this project positively based on the on-going feasibility studies.

- (4) **India-Japan Energy Dialogue** : The Minister of External Affairs of India had a meeting with H.E. Mr. Akira Amari, the Minister of Economy, Trade and Industry and reached a common understanding on the modalities for the India-Japan Energy Dialogue at the Ministerial level to promote cooperation across the energy sector. Five Working Groups on 1) Electricity and Power Generation, 2) Energy Efficiency, 3) Coal, 4) Renewable Energy and 5) Petroleum and Natural Gas will be established to identify specific projects for cooperation. The Deputy Chairman of the Planning Commission of India will visit Japan in April to launch the dialogue.
- (5) **Bilateral Consultation Mechanism for High Technology Trade**: The Minister of External Affairs of India and the Minister of Economy, Trade and Industry of Japan reached a common understanding on the modalities for the bilateral consultation mechanism for high technology trade. This mechanism would facilitate bilateral high technology trade and address matters relating to respective export control systems of the two sides. The first meeting will be held in Tokyo in May 2007.<sup>1</sup>
- (6) **People-to People Exchange** : Recalling the directive given by the

---

1. In a telephonic interview on March 23 from Tokyo to Singapore based correspondent of *the Hindu*, P.S. Syryanarayan Mr. Mukherjee said India has sought the "support" of Japan for gaining access to high-tech know-how and equipment for the peaceful use of atomic energy and added that discussions on this issue "are [still] taking place." Noting that Japan was "an advanced country in nuclear energy" and also an "important member of the Nuclear Suppliers Group," Mr. Mukherjee said India would require Tokyo's support to secure the forum's nod for access to the resources and sophisticated technology in this domain. "Keeping in view the sensitivities of Japan," he told Japanese Prime Minister

two Prime Ministers, the Ministers instructed concerned authorities to continue their consultations on the waiver of visas for holders of Diplomatic Passports and simplification of visa procedures to facilitate two-way travel. The signing of Memorandum on the friendship exchange relationship between Fukuoka Prefecture and Delhi State was welcomed by the two sides. The Two Foreign Ministers welcomed the successful launch of the "Japan Year in India" as well as the ongoing reciprocal festivals being organized in both countries to mark the India-Japan Friendship Year 2007. They welcomed that the steady progress had been made in the "Aso Programme". They noted the progress towards the setting-up of the consortium, of prestigious universities and companies in Japan, to assist the development of the Indian Institute of Information Technology for Design and Manufacturing at Jabalpur and reiterated that both sides should make every effort to facilitate implementation of the project. The Minister of External Affairs of India has invited the Foreign Minister of Japan to pay a bilateral visit to India for the next round of the Strategic Dialogue at a mutually convenient time in 2008. The Japanese Foreign Minister has accepted the invitation.

---

Shinzo Abe and other leaders that "India's commitment to non-proliferation is total and not ambiguous." Mr. Mukherjee's political intervention over this issue acquires importance in the evolving context of India-U.S. engagement on civil nuclear cooperation. Responding to a question, he maintained there was no strategic design behind the prospective India-Japan-U.S. naval exercise, a first involving the three, and the planned U.S.-India bilateral exercise off the Japanese waters. The objective being pursued was "not a war game" at all. These exercises were being programmed to enhance cooperation to "combat piracy, ensure the security of sea lanes" and manage natural disasters and tackle marine pollution among other tasks with no military dimension. On the United Nations Security Council reform and New Delhi's bid to become a permanent member, Mr. Mukherjee said the Group of Four - India, Japan, Brazil, and Germany - was still "very much alive" to champion this cause. On energy security, a key aspect of his latest talks in Tokyo, Mr. Mukherjee said the two countries were now poised to begin a dialogue on this.

**358. Address by External Affairs Minister Pranab Mukherjee  
at the Japan Institute of International Affairs.**

**Tokyo, March 23, 2007.**

**Significance of India-Japan Relations**

Ambassador Saso,

Distinguished Guests,

Ladies and Gentlemen,

I consider it a great privilege to have this opportunity to interact with such a distinguished audience, comprising so many well-known experts in the fields of foreign and security policy, politics and economy. I have just concluded the first Ministerial-level Strategic Dialogue with my counterpart, His Excellency Foreign Minister Taro Aso. It was a fruitful discussion. I am delighted to share with you this morning some of my thoughts on the long-term significance of relations between India and Japan.

2. Since historical and civilisational contacts between India and Japan began some 1400 years ago, it is important to recognise that throughout our history, we have never been adversaries. Our enduring ties have never been marred by conflict. We share the common heritage of Buddhism and, more recently, the common values of democracy and pluralism. The affinities between our two peoples have been an unchanging factor and have benefited from the visionary contributions of our preceding generations. A recent survey in my country re-established once again that for Indians, Japan and the Japanese people continue to remain highly esteemed in our public perception.
3. However, it also remains a fact that the intensity of our interactions has remained rather modest despite our shared heritage and values. Happily, we are now consciously trying to remedy that shortcoming. Since former Prime Minister Yoshiro Mori's historic visit to India in August, 2000 when we first established a Partnership, there has been a dramatic transformation in our bilateral relations. It is, as if the dawn of this new century has awakened us to the great significance and promise of our relationship for mutual benefit and for the benefit of the region and the world.

4. There are many factors which are bringing us closer together. Our two societies are governed by democratic institutions. Shared value systems and interests provide a strong underpinning to our bilateral ties. I would venture to say that the comfort level between India and Japan is among the highest between Asian countries. So, when Prime Minister Shinzo Abe says that India-Japan relations have the greatest potential of all and must be nurtured to become the most important bilateral relationship in the world, and my Prime Minister Dr. Manmohan Singh fully reciprocates the sentiment, this is not simply an aspiration but a decision based on a very careful consideration of how Asia is changing and what role India and Japan must together play in this process.
5. There is no doubt that for the first time in three hundred and fifty years, the centre of gravity of the global economy is shifting towards Asia. India and China are re-emerging as economic engines of growth after more than two centuries. The regional connectivity and the shared commerce and culture, which had been impaired by centuries of colonial rule, is binding Asia together again. ASEAN has emerged as a strong economic force and Japan's own economy continues to underpin the region's rapid development. The vision of an Asian economic community in which India and Japan have a shared interest, now stands before us.
6. And yet, major challenges remain. Asia is only beginning to build regional structures that reflect and accommodate current day geo-economic realities. To realise the vision of prosperity and growth for all, it is essential to engage the wider Asian region within a cooperative framework so that all those who live in Asia can together meet the new challenges unleashed by the forces of globalisation. This will require inspired and visionary leadership and a readiness that embraces diversity and difference.
7. There are many reasons why India and Japan are natural partners in the quest to create an "arc of advantage and prosperity" across the Asian continent.
8. First, we share the common values of democracy, human rights and the rule of law. In this century these values will become the dominant trend and, as mature democracies, India and Japan must serve as examples of how economic growth can be pursued in consonance with democratic values. It is possible for both of us, if we work

together, to show that the impact of globalisation can be managed through democratic processes so that the social fabric and cultural identities of countries and civilizations are not strained, but enhanced.

9. Secondly, India and Japan are major engines of economic growth in Asia. The 21st century will be the Century of Technology and the Age of Innovation. The world needs no introduction to the creative genius of the Indians and the Japanese. If we can forge synergies that bind the creativeness of the Indian mind with the discipline of your work culture and the prowess of your technology, our collaboration can change billions of lives not merely in Asia but in other parts of the world where creative solutions are needed to address the basic needs of men and women.
10. Thirdly, India and Japan recognise that the key to ensuring long-term security and a stable equilibrium in Asia lies in the collective ability of Asian countries to build trust and confidence based on economic integration. It is with this conviction in mind that both of us espouse a vision of an Asian Economic Community of peace and shared prosperity in which people, goods, services, investments and ideas can travel with ease across national borders. A Pan-Asian Free Trade Area or Comprehensive Economic Partnership in Asia can and will open up new growth avenues for regional economies. This will not be easy, but India is ready to partner likeminded countries like Japan to make this happen. The recently concluded second East Asian Summit has laid the foundations for a cooperative regional architecture in Asia. We will work closely with Japan and with ASEAN to create the building blocks for the progressive realisation of this Asian Economic Community.
11. Fourthly, the key to continued Asian economic prosperity lies not only in regional interaction but equally in the shared security of the sea-lanes of communication. Unless we can guarantee the free transit of energy and trade between the Suez Canal and the Western Pacific, Asia's economic vision may remain incomplete. India and Japan are maritime countries. We have individually demonstrated our capacities to contribute to maritime security. When I had last visited Japan in May, 2006 as India's Defence Minister, we discussed the importance of our collaboration. I am particularly happy to note that the first Joint Goodwill Exercise between the Japan Maritime Self Defence Force and the Indian Navy will also take place very shortly. I also welcome

the expansion of our maritime cooperation through interactions between our two Coast Guards. Our cooperation in ensuring the safety and security of sea lanes of communication, combating piracy and terrorism, search and rescue, and disaster relief must define our shared desire to contribute to Asian economic growth and security.

12. Last but not least, India and Japan have made a significant contribution to multilateral institutions, in particular to the United Nations. We are committed to the comprehensive reform of the UN, including its Security Council, to ensure that the concerns and the aspirations of the majority of the UN membership are adequately reflected and multilateralism becomes an effective tool for addressing global challenges. India and Japan must continue to work together bilaterally and with our other G-4 partners, Brazil and Germany. I have no doubt that together we will convince the international community that they are better served by giving us the honour to bear a broader responsibility in multilateral and world affairs.
13. That brings me to perhaps the concluding part of my address, which is the great potential of India-Japan Economic partnership. Indeed, the logic for closer economic relations between us is more compelling today than ever before. A demographically youthful and economically vibrant India is on a robust growth path. We must take full advantage of the complementarities between our economies to bring about faster development and growth in India and continued prosperity in Japan. The financial and technological empowerment of India's vast and highly skilled work force, together with India's large and growing market, provide ample opportunities which are yet to be tapped. Unless we can bind our ties through economic cooperation, our ability to work together in the region and the world will be circumscribed.
14. Japan's assistance in building the Delhi Metro has won the hearts and minds of the citizens of our capital. We are now embarking together on an even greater challenge. The Dedicated Freight Corridors Project linking Delhi with Mumbai and Kolkata that our Government has just approved for implementation, will add a sub-continental dimension to our collaboration. It can become a national symbol of the new Partnership,
15. I, therefore, welcome the momentum which has been generated in

recent months to move ahead with the agenda of bilateral economic cooperation. I applaud the vision of your leadership to raise the status of economic engagement to a qualitatively new level. I am here in Japan to say that you can be certain of my government's commitment to ensuring that our economic engagement underpins our vision of a Strategic Global Partnership.

16. If India is to sustain its current high levels of growth over the next two to three decades, it must meet the challenges of energy and environmental sustainability. Today, more than 50% of India's energy requirements are met by coal and most of its energy supplies come from fossil fuels. If India is to significantly increase its energy output and address environmental concerns at the same time, we have to further develop our nuclear energy sources. With access to international cooperation in this field, we will be able to do so. Our agreement with the United States is motivated by this logic.
17. I am very conscious of the sentiments of the Japanese people on nuclear matters. However, I also trust in your wisdom to discern what lies at the heart of our efforts to secure stable energy supplies. India has an impeccable record on non-proliferation. We have also consistently been a leading advocate of the elimination of all nuclear weapons. I believe that Japanese are aware of India's adherence to the values of peace and non-violence. I am confident we will find common ground that balances our mutual interests and advances our cooperation and collaboration in this area too.
18. The goal of pursuing a Strategic and Global Partnership reflects our shared and long-term vision. Today, I am re-assured after my visit to Japan that our two countries are looking to expand their commonalities through increased interaction in bilateral, regional and multilateral issues. There is a growing convergence in our economic and security perspectives for the region. The success of our common endeavours to address geopolitical, strategic and economic challenges in a rapidly changing world will make a lasting contribution to advancing our shared goal of establishing peace, stability and prosperity across Asia. Let us work together in pursuing this common dream.

Thank you.

### **359. Media Briefing by Official Spokesperson on the visit of Japanese Vice Foreign Minister Shotaro Yachi.**

**New Delhi, May 14, 2007.**

**Official Spokesperson :** Good evening. Basically, we have called this meeting to give you the flavour of the discussion between the visiting Vice Foreign Minister of Japan Mr Shotaro Yachi and the Foreign Secretary of India Mr Shivshankar Menon. These discussions took place at the delegation level through the entire morning and over lunch which the Foreign Secretary hosted for Mr. Yachi and his delegation. And I think the extent and the nature of the discussion would give you an idea of the depth of the bilateral relationship between India and Japan now and the issues that are being covered in the wake of the global and strategic partnership which was launched at the time of the visit of Prime Minister to Japan last year. After that, of course, you know the External Affairs Minister Mr. Pranab Mukherjee also visited Japan in March and the Japanese Foreign Minister Mr. Taro Aso was in India as an Observer for the first time during the 14th SAARC Summit.

In general terms, Mr Yachi called the Prime Minister of India's visit to Japan as an epoch-making which addressed the strategic and global partnership. In his turn, the Foreign Secretary when making his remarks also said that this is a relationship whose time has come, not only because of strategic congruence but also because of lot of shared common values and wide interests both political and economic. So in specific terms they covered the whole range of bilateral issues. I will go through some of them for you.

The Comprehensive Economic Partnership Agreement (CEPA) which is being negotiated at the moment and in this regard the Foreign Secretary mentioned that we are encouraged with the progress of the discussion during the second round of talks which was held in Tokyo in April this year. There was a broad agreement on modalities and hopefully, the pace will pick up now on these negotiations. Then, of course, two very important projects which are under consideration and actually under active processing now, one is the Dedicated Freight Corridor Project and in this considerable progress has been made internally within our own Government and we should be soon be able to make a proposal in more concrete terms to the Japanese side. The other project is the Delhi-Mumbai industrial corridor and on this also we are working towards finalizing the concept paper. So hopefully once the concept paper is ready we will be in position to discuss

this in greater detail with the Japanese side. The third area which was touched upon was the India Japan High Level Energy dialogue. Again the first dialogue meeting of this energy group between Shri Montek Singh Ahluwalia, Deputy Chairman of Planning Commission and the Minister of Japan was held in April in Tokyo and now in July further substantive discussion will take place in five working groups. Similarly, the first meeting for the High technology trade between India and Japan is to be held in June this year and a strategic economic dialogue is to be launched in July this year which will sharpen the focus on specific economic collaboration projects.

This broadly is the economic landscape. The other important area is the promotion of people-to-people contacts, in terms of increasing student exchanges, in terms of easing visa regulations for business people and for tourists and also cooperation in science and technology, in particular, cutting edge technologies, bio-technology, nano-technology, bio-informatics, these are going to be very important aspect of S&T part of the strategic and global partnership. The Japanese side also made a proposal to start a Japan-India Strategic Dialogue group. Essentially this would be a group in their view which would be discussing broad policy issue and this was accepted in principle by Indian side and the idea is it should be first be started at the official level and then see where it goes from there. Another project of interest is the Nalanda<sup>1</sup> University Project and that also came up for discussion. If you remember the Prime Minister has mentioned the intention to make Nalanda once again an institution of excellence and this is a project in which the Japanese are greatly interested. A mentors group has now being setup to see how to take this project forward and there are likely to be international academic figures in the mentors group.

Besides the bilateral issues which I have outlined considerable amount of time was spent in discussing regional issues. Amongst the regional issues first, of course, the East Asia economic architecture which consists of the East Asia Summit and other organs was discussed. Japan was very favourable in engaging India to attend the first East Asia Summit and both countries believe that this is a Summit which can lead on to an East Asia Economic Community. So that was discussed in some detail and ideas were exchanged to prepare for the third East Asia Summit in Singapore in November this year. The other regional issues - Foreign Secretary briefed his Japanese counterparts on South Asia, particularly in view of the fact

---

1. Ancient seat of learning in Bihar

that Japan is now an Observer in SAARC and they have a lot of interest in what is happening here he briefed them on the situation in South Asia, on how India sees developments in various countries at the moment. Mr. Yachi in his turn also gave a detailed briefing upon on North Korea and how Japan sees developments there. Other regional and international issues that they discussed included Iran, G 4 and UN Security Council reforms. In G4, I can mention that both sides agreed to continue to work closely together and keep in close touch both in Delhi and in New York. Also WTO issues and the Doha Round as well as global issues on which India and Japan are actively interested, particularly climate change, we both come to the subject from different point of views but still there is a lot of similarity in the thought and in terms of end objective that have to be achieved. They also discussed relations with China and Foreign Secretary at their request also gave them a briefing on his recent visit to the United States and developments in our negotiations with United States. So I think I have given you a fairly extensive detailed survey for this meeting. High level exchanges will continue in coming few months between India and Japan and we will keep you informed as we go along.

**Question :** Was the case on India at the Nuclear Suppliers Group also discussed at any length?

**Official Spokesperson:** Japan is fully aware about our concerns regarding energy and the need for energy for our development. They are also fully aware of the negotiations underway between India and United States. So they do appreciate that when the time is ripe, Nuclear Suppliers Group would take its decision and, of course Japan, is an important member of the NSG.

**Question:** Can you throw more light on that?

**Official Spokesperson :** I cannot go into more detail but I can tell you that the Foreign Secretary at their request gave them a detailed briefing on where the discussions were what he saw the situation to be and how the negotiations have developed since July 18, 2005. He reiterated our rationale behind seeking energy sources and the need for that in the light of India's economic development. Naturally, of course, the Nuclear Suppliers Group and Japan's role was also discussed.

**Question :** *Was what is happening in Pakistan discussed during the discussions on South Asia?*

**Official Spokesperson :** *What is happening in all the countries was discussed but we are not no commenting on any country. Pakistan was also talked about as also Bangladesh, Bhutan, Sir Lanka, and China. Whatever the specific comments were made, I don't want to say anything, since it was a confidential talk.*

**Question :** Do you have the date for the next round of negotiations for CEPA - Comprehensive Economic Partnership Agreement?

**Official Spokesperson :** Yes, there is a date - 25th of June in New Delhi.

**Question :** How much FDI flows have taken place since Prime Minister visited Japan?

**Official Spokesperson :** I don't have that figure.

**Question :** In international issues, was the situation in Iraq discussed?

**Official Spokesperson :** No, Iraq did not come up for discussion. Iran did in the nuclear context.

\* \* \* \*

(Text in italics is translation from Hindi)

**360. Opening Statement by Deputy Chairman of the Planning Commission Montek Singh Ahluwalia at the India-Japan High Level Energy Dialogue.**

**New Delhi, July 2, 2007.**

Your Excellency, I extend a warm welcome to you and your delegation. This is the second meeting since we met in Tokyo two months ago to kick off the High Level Energy Dialogue. I am therefore particularly pleased that you were able to visit India to carry forward the process we began in Tokyo.

Our dialogue today is an essential part of the broader comprehensive economic engagement between India and Japan. I am informed that Your Excellency will also be discussing the Delhi-Mumbai Industrial Corridor Project with my colleague, Minister Kamal Nath. Our Government attaches a great deal of importance to this project. We see it as a visible symbol of our new strategic partnership. Successful implementation of the project will also require an increase in energy availability, since we would like to see the Corridor becoming a manufacturing base for Japanese industry in India.

I would also like to say that we are delighted that Prime Minister Shinzo Abe will be visiting India next month. He will receive a warm welcome from the people and the Government of India. I am confident that his visit will also strengthen our partnership.

At our last meeting we agreed that issues relating to energy and the global environment are important to both countries and that it is important for both of us to develop a common understanding on how we can engage on these issues. I am happy to report that the five Working Groups formed as part of the dialogue have become operational and there have been intense discussions in the five Working Groups over the past few days. They have made progress in advancing our mutual understanding, and have also identified several important areas in which collaboration may be possible.

One area to which we attach importance is Japanese investment in the power generation sector. In this context, I would like to mention the recent initiatives by my Government in developing ultra mega projects, i.e., power projects of 4000 MW using super critical technology. I hope that companies from Japan will bid for these projects which are open for international cooperation. At our last meeting you had mentioned that Japanese companies are still not fully aware of the new policies in the power sector.

I hope the Working Groups have helped to advance the understanding of our policies by the Japanese side and we would be happy to engage further on this issue.

Energy efficiency and conservation is a very important aspect of our collaborative relationship. Both our countries have joined in the Cebu Declaration on East Asian Energy Security, and we are ready to take concrete action towards improving efficiency and conservation both domestically and through international cooperation. We are already taking specific steps in this direction, which we can share with you. We recognize Japan's great strengths in energy conservation and would hope you can assist us in capacity building and expertise. Your offer to send an expert to our Bureau of Energy Efficiency is greatly appreciated by us.

We would also like to expand our cooperation so that best practices in Japan can be utilized for formulation and implementation of policies and projects in India. This cooperation could be realized through activities such as training-of-trainers in India, introduction of top-runner program, capacity building of Energy Service Companies (ESCOs), and information dissemination and demonstration of new energy-efficient technologies. These activities could be implemented through regional centres of excellence which we are planning to set up in five geographical regions of India. I would welcome your response on these points.

Cooperation in the area of clean coal technologies is also very important from the point of view of the environment. Here too, I welcome the understanding we have reached on commencing a feasibility study on a model project for coal preparation. I also appreciate your offer of training for Indian experts. Further cooperation in strengthening safety features in Indian coal mines would also be very helpful.

New and renewable sources of energy, including bio-fuels are already an important aspect of our national energy policy. I propose that our two countries undertake joint research, design and development in specific areas such as MW scale biomass integrated gasification, combined cycle power generation systems, and solar photovoltaics and solar thermal technologies, so that we can share mutual benefit while also addressing global environmental concerns. While sharing of experiences in standards setting and policy formulation is important, I am sure you will agree that actual collaboration in R&D will demonstrate bilateral commitment in this crucial area of energy. I hope you will consider these proposals, and that we can agree to discuss these at the next round of the Energy Dialogue.

Earlier this month, Prime Minister Dr. Manmohan Singh addressed the issue of climate change at the Heiligendamm Summit in Germany. He underscored India's commitment to engaging with the international community to preserve and protect our environment. He also pointed out that India's GHG emissions are among the lowest in per capita terms. He also spoke of fair burden sharing based on the principle of common and differentiated responsibility and, more importantly, appealed to the international community to develop mitigation and adaptation strategies that would be adequately financed without detracting funds meant for economic development. Preservation of the environment cannot be at the cost of development and economic growth in developing countries. I would also like to draw attention to another element in our Prime Minister's statement in Germany - it is important that critical and promising clean technologies are made affordable for developing countries, and that IPR regimes should benefit both the innovator and humankind as a whole. The Clean Development Mechanism has worked well. Enhanced levels of GHG abatement commitments by developed countries would significantly stimulate CDM projects.

I have read with great interest about Prime Minister Abe's important initiative "Coal Earth 50". We welcome efforts by Japan to reach out to the international community, and in particular, Prime Minister Abe's proposal to create a new financial mechanism that will assist developing countries to utilize new technologies and promote energy efficiency and reduce Green House Gases. I believe that it is here that Japan and India can bilaterally show the way in which we can cooperate through practical projects and through joint research and development, to jointly develop and promote projects and technologies to address the problems of global warming. Our two sides should work together towards this objective through the India-Japan High Level Energy Dialogue Forum, as well as through multilateral efforts such as the East Asian Summit.

I propose that we continue our efforts to develop common understanding and to identify practical and realistic ways of cooperation, through regular meetings of the five Working Groups. Our next High Level Dialogue could be held in Tokyo in 2008.

**361. Joint Statement between the Planning Commission of India and the Ministry of Economy, Trade and Industry of Japan on the Occasion of the Second Meeting of the India-Japan Energy Dialogue.**

**New Delhi, July 2, 2007.**

H.E. Montek Singh Ahluwalia, Deputy Chairman of the Planning Commission of India and H.E. Akira Amari, Minister of Economy, Trade and Industry of Japan held the second meeting of the "India-Japan Energy Dialogue," a periodic ministerial-level energy policy dialogue between India and Japan, in Delhi.

The issues of climate change, energy efficiency and energy security were discussed at the G-8 Heiligendamm Summit in June as one of the top priority issues, to which H.E. Dr. Manmohan Singh, Prime Minister of India was also invited. H.E. Mr. Shinzo Abe, Prime Minister of Japan shared the importance of 'Cool Earth 50' at this Summit.

This second meeting of the India-Japan Energy Dialogue had considerable significance in view of the importance that both sides attach to cooperation in the area of energy.

1. Both sides discussed and arrived at a common recognition on the following points during the meeting:
  - (1) Humanity faces a very important challenge of concurrently achieving response to climate changes and sustainable economic development, and implementation of measures in the energy sector, including improvement of energy efficiency, is essential for addressing this issue.
  - (2) The most efficient and effective means of creating a virtuous cycle of energy security, economic development and environmental protection is to promote energy efficiency and conservation measures, as well as further development of the energy infrastructure.
  - (3) Cooperation in the energy sector is important to the relationship between India and Japan, and further cooperation in this sector between the two countries at both the government and industry levels would be mutually beneficial. It is important for both

countries to develop specific cooperation projects in the energy sector, including cooperation in clean energy and in energy efficiency and conservation through exchange of experts and capacity building, as well as through the participation of Japanese companies in the power sector in India. Therefore, both sides will work to actively promote cooperation in these fields.

- (4) Partnership efforts will be strengthened in the East Asia Summit (EAS), the Asia-Pacific Partnership on Clean Development and Climate (APP), and the Five Energy Ministers Meeting, which is scheduled to be held in Japan in June 2008, in order to ensure energy security and improve energy efficiency through these multilateral frameworks. Based on the "Cebu Declaration on Energy Security in East Asia" adopted at the Second East Asia Summit, both sides agreed to set individual goals and formulate action plans voluntarily for improving energy efficiency.
  - (5) The Ministry of Economy, Trade and Industry of Japan (METI) will actively support enhanced cooperation between the International Energy Agency (IEA) and India in areas such as promotion of energy efficiency and conservation, oil stockpiling and so on.
  - (6) Both sides recognized that India is actively pursuing energy efficiency enhancement measures through a range of policy initiatives, including labelling of appliances, launching of an energy conservation building code and establishing a process of audit and reporting of energy use in energy intensive industries and establishments.
2. In the meeting, both sides reached a conclusion on the following cooperation in order to concretize the common recognition set forth in 1 above and to build cooperative relationship in environment and energy sectors between the two countries. Ahead of the meeting, the five Working Groups and the Steering Committee established under the Energy Dialogue held meetings on June 28 and 29. A Joint Report prepared by the two chairs of the Steering Committee on the outline of the results of these meetings is attached hereto as an Annex.

**(1) Cooperation in the energy efficiency and conservation sector**

- (i) Both sides will enhance cooperation on energy efficiency and conservation between India and Japan by effectively using the Energy Efficiency Working Group established under the Energy Dialogue.
- (ii) METI highly values that India has enacted the Energy Conservation Law in 2001, which obligates reports on energy consumption and audit by energy auditors for 15 designated energy-intensive sectors and, by stipulating an approach using energy consumption norms, obligates these designated sectors to reduce their specific energy consumption through the enhancement of these policies eg. appointment or designation of energy managers, energy audits conducted by accredited energy auditors, implementation of techno-economically viable recommendations and submission of the reports on steps taken. India will accelerate this policy implementation and METI will support promotion of such efforts through capacity building and other measures described in v) and vi).
- (iii) Both sides will accelerate the formulation of energy efficiency and conservation policy respectively and will prepare collaborative working plans to enhance the policy implementation, that will be reviewed from time to time.
- (iv) METI, the New Energy and Industrial Technology Development Organization (NEDO), the Energy Conservation Center, Japan (ECCJ) and other organizations will actively cooperate on energy efficiency and conservation issues with Ministry of Power / Bureau of Energy Efficiency and with other stake holders, as decided mutually to achieve the efficiency and conservation policies and activities on the basis of the above Working Group discussions.
- (v) METI will cooperate to support energy audit evaluations

in specific industrial sectors (iron & steel, cement, etc), which can also serve as APP projects and to facilitate the smooth implementation of model projects (e.g., the ongoing Coke Dry Quenching [CDQ] Model Project in the iron and steel sector), which will be carried out by NEDO. In addition, METI will provide training on energy efficiency and conservation policy and technology for 200 trainees over the next three years as well as dispatch experts and hold workshops on industrial energy efficiency and conservation technology through relevant organs and/or bodies including the ECCJ.

- (vi) METI will dispatch an expert on a long term basis to the Bureau of Energy Efficiency (BEE) of the Ministry of Power of India through the ECCJ, considering that the long-term dispatch of an energy efficiency and conservation expert to the BEE for half year since from October 2006 was highly valued by the Indian side.

**(2) Cooperation in the electricity and coal sectors**

- (i) Both sides highly value the India Coal Preparation Workshop held by the Japan Coal Energy Center (JCOAL) in December 2006, the Workshop of the India-Japan Electricity Task Force held in Delhi in March 2007 by the initiation of METI, and the seminar and the presentations on coal and electricity, including clean coal technology (CCT), ultra-supercritical coal-fired power generation technology and grid management technology, held in Delhi as Working Group meetings ahead of this Energy Dialogue.
- (ii) Both sides welcome with great expectations the commencement of a new feasibility study on coal preparation model project, with relevant parties confirming their intention, in this Energy Dialogue, to make efforts for the implementation of the model project, which would be conducted by NEDO and the Ministry of Coal of India as a significant project in the electricity and coal sectors.
- (iii) The Indian side highly values the fact that the CCT

training project implemented by NEDO has accepted 34 trainees from India to date (FY2001 to FY2006). METI and NEDO will expand the CCT training project with the launch of a small expert training exclusively for Indian trainees starting this fiscal year, based on requests from the Indian side. Information exchange for further cooperation in strengthening coal mining safety features in Indian coalmines with specific reference to underground wireless communication, instrumentation and monitoring systems for mine gases, fires, inundation and strata monitoring would be explored.

- (iv) Both sides welcome conclusion of the exchange agreement on fields including power generation and the environment between Japanese and Indian electricity companies in February 2007.
- (v) Both sides welcome establishment of companies that manufacture and/or sell high-efficiency coal-fired power generation facilities (supercritical coal-fired power generation facilities) by private companies of the two countries.

**(3) Cooperation in the renewable energy sector**

Both sides will explore ways and means to further cooperation in the field of new and renewable energy.

**(4) Cooperation in the petroleum and natural gas sectors**

- (i) Both sides welcome the smooth implementation of the Joint Statement by METI and the Indian Ministry of Petroleum and Natural Gas and the Six Memoranda of Understanding (concerning "Cooperation in Exploration & Production sector in third countries", "Collaborative Research on Methane Hydrates", "Energy Studies in Asian Market", "Cooperation and Information Exchange on Hydrogen", "Cooperation for Energy Efficiency and Conservation" and "Strategic Oil Reserves") concluded between the relevant implementing ministries of the two countries in accordance with the above Joint Statement.

- (ii) Both sides welcome the steady development of the cooperation between ONGC Videsh Limited and Japan Oil, Gas and Metals National Corporation (JOGMEC), through holding the second meeting based on the MOU between both institutions on June 28 in time with this Energy Dialogue.
- (iii) Both sides highly value the results of the "Study on Asian Oil Market: Scope for Improvement of Asian Markets for Crude Oil and Petro-products" jointly carried out by the Institute of Energy Economics, Japan (IEEJ) and the Petroleum Planning & Analysis Cell (PPAC) of the Ministry of Petroleum & Natural Gas of India, and confirm to further implement research and study on a new theme.
- (iv) Both sides welcome the conclusion of a Memorandum of Understanding on cooperation in the methane hydrate field between the implementing organs of the two countries in February 2007.
- (v) METI makes proposal for bilateral cooperation on oil stockpiling through dispatching related experts to India and accepting the delegation to the relevant facilities in Japan by JOGMEC.
- (vi) Both sides welcome the extension of a Memorandum of Understanding on Energy Efficiency & Conservation between Petroleum Conservation Research Association, India and Energy Conservation Centre, Japan.

(5) **Facilitation of the activities of the projects by Indian and Japanese companies in each sector**

In order to support activities of projects carried out between Indian and Japanese companies in the energy sector, both sides will exchange information promptly on relevant policies of central and local governments among relevant Working Groups if

- (i) the request for information has been made by both Indian & Japanese organizations/private companies

involved in the project, and

- (ii) both heads of the said Working Group recognize the project related to the request to be making major contributions to the enhancement of cooperation in the energy sector.

(6) **Cross-sectoral cooperation**

- (i) Both sides highly value the fact that the First India-Japan Energy Forum co-hosted by NEDO and The Energy and Resources Institute (TERI) of India and held in Delhi in December 2006, immediately before the visit of H.E. Dr. Manmohan Singh, Prime Minister of India, to Japan, has greatly contributed to the launch of this Energy Dialogue. Both sides also welcome the decision by the two organizations to hold the Second India-Japan Energy Forum in Delhi this coming winter and confirm that the related ministries and agencies of the two countries will make active contributions for the success of the Forum.
- (ii) Both sides welcome with great expectations the new agreement concluded in time with this Energy Dialogue between the IEEJ and TERI for implementing academic and comprehensive joint research and study on various energy situations and challenges currently facing the world and those specifically facing India and Japan, and confirm that the related ministries and agencies of the two countries will make active contributions to the carrying out of the said joint research and study and the dissemination of the results thereof.
- (iii) Both sides re-recognized the importance of the role of private and public business operators in the two countries for promoting the clean development mechanism (CDM) projects based on the Kyoto Protocol. Bilateral cooperation based on the India-Japan Energy Dialogue will not be limited to what has been described above, and adjustments in connection with the implementation of activities under this Dialogue will be made as necessary. ### **(ANNEX)**

#### **Joint Report of the First Steering Committee Meeting**

Ahead of the Second Meeting of the India-Japan Energy Dialogue, India and Japan held meetings of the Electricity & Power Generation Working Group, Energy Efficiency Working Group, Coal Working Group, Renewable Energy Working Group and Petroleum & Natural Gas Working Group on June 28 and 29, 2007, and held the First Steering Committee Meeting on June 29, 2007 based on the results of the Working Group meetings.

Vijay Gokhale, Joint Secretary (East Asia) of the Ministry of External Affairs of India and Tomofumi Hiraku, Director-General for Natural Resources and Energy Policy of the Agency for Natural Resources and Energy of Japan who are co-chairs of the Steering Committee prepared the Joint Report on the First Steering Committee Meeting as follows.

#### **1. Reports on meeting results from the Working Groups**

At the First Steering Committee Meeting, the committee first heard the reports on the meeting results from the Working Groups as follows.

- (1) Electricity & Power Generation Working Group (9:30 - 12:00, June 28 at Ministry of Power)
  - (i) After welcome and opening remarks, Indian side made presentations as follows;
    - (a) NTPC (On improving efficiency of power plants and introduction of new generation technologies),
    - (b) PGCIL (On expansion of the National Grid and adoption of latest technologies),

- (c) CEA (On improving efficiency of pumped storage projects) and
- (d) CII (On industry perspective)
- (ii) Then, Japanese side made presentations as follows;
  - (a) METI (On the results of the "Workshop of the India-Japan Electricity Task Force" held in Delhi on March 9, 2007),
  - (b) Mitsubishi Heavy Industries, Ltd. (on Ultra-supercritical coal-fired power generation technology, etc.),
  - (c) The Federation of Electric Power Companies of Japan (on Innovative Technologies for Power Grid),
  - (d) Japan Machinery Center for Trade and Investment (on Advantages of Japanese plant engineering in power sector) and
  - (e) Institute of Energy Economics, Japan (on the future outlook of supply and demand of electricity and energy in India and the whole of Asia)
- (iii) After the above presentations, both sides held discussions on way forward in line with the "Joint Statement between the Planning Commission of India and the Ministry of Economy, Trade and Industry of Japan on the Launch of the India-Japan Energy Dialogue"(hereafter referred to as the "First India-Japan Joint Statement on Energy"), on the 23rd April" and concluded the Working Group.

## **(2) Energy Efficiency Working Group**

- (i) At the Working Group, both sides discussed on the expectation toward and the scope of the Working Group in conformance to the matters set forth in the First India-Japan Joint Statement on Energy on the 23rd April.
- (ii) Then, both sides introduce its energy efficiency policy, and exchange views on effective energy efficiency policy.
- (iii) After that, related agencies in both sides made reports on the past and current cooperation between Japan and India in the area of

energy efficiency. From Japanese side, NEDO explained her projects in India such as CDQ project, ECCJ presented the results of training program and expert dispatch to the BEE and IEEJ talked on own research of energy efficiency potential in India. From the Indian side, BEE made three presentations on promoting end-use energy efficiency in India, ongoing cooperation between India and Japan and future areas for cooperation between both sides.

- (iv) Finally, both sides discussed the possible future cooperation in the area of energy efficiency.

### **(3) Coal Working Group**

- (i) The Japanese participants of the Working Group visited and inspected the Dadri Coal-fired Power Plant and Centre for Power Efficiency & Environmental Protection (CenPEEP) operated by the National Thermal Power Company Limited (NTPC) on June 27, and held an opinion exchange meeting with the persons concerned.
- (ii) At the Working Group meeting, discussions were held on the future direction of the India-Japan coal cooperation in the form of a one-day seminar, in conformance to the matters set forth in the First India-Japan Joint Statement on Energy.
- (iii) The Japan Coal Energy Center (on Cooperation progress relating to coal between India and Japan) (on Japanese underground communication technology) (on Adequacy and advantageous effect of Japanese coal preparation technology for Indian coal), NEDO (on NEDO's initiative to disseminate Japanese clean coal technology with Asia), AIST (on new developments of coal utilization technology), the JBIC (on the JBIC's operation for coal sector for India), and Mitsubishi Heavy Industries Ltd. (on Technology which makes use of coal fitting with environment) on Japan's side respectively made presentations.
- (iv) Central Mine Planning & Design Institute Ltd (on Possibility of clean coal technology- introduction & deployment), Coal India Ltd, (Beneficiation of non coking coal), and Central Electricity Authority (on Possibility of technical cooperation on CCT) on India's side respectively made presentations.
- (v) To conclude the seminar, both sides stated opinions on the future proceedings of the Working Group.

**(4) Renewable Energy Working Group**

- (i) At the Working Group, both sides stated opinions on the purpose and scope of the Working Group in conformance to the matters set forth in the First India-Japan Joint Statement on Energy on the 23rd April.
- (ii) Then, both sides provided systematic explanations on the current status and challenges of their respective renewable energy policies.
- (iii) After that, related agencies made reports on the past and current cooperation between Japan and India in the area of renewable energy. NEDO presented possible cooperation project in the area of biomass, AIST explained the cooperation project on standardization of bio-diesel fuel, and IEEJ presented the results of training program on renewable energy.
- (iv) Both sides will explore ways and means to further cooperation in the field of new and renewable energy.

**(5) Petroleum & Natural Gas Working Group**

- (i) At the Working Group meeting, discussions were held in conformance with the matters set forth in the First India-Japan Joint Statement on Energy.
- (ii) First, both sides stated opinions on how resources development cooperation should be promoted in India and third countries, based on the results of the meeting held with ONGC Videsh Limited and JOGMEC on June 28.
- (iii) Secondly, JOGMEC once again explained the proposal for cooperation on oil stockpiling, which it had announced in December 2006, and the Indian side stated opinions on the said proposal.
- (iv) Then, both sides stated opinions on evaluation of the study on Asian oil market jointly conducted by the IEEJ and the PPAC, and agreed that both sides will continuously carry out joint study on appropriate themes concerning the petroleum and gas sectors.
- (v) After that, DGH, India and JOGMEC explained each other the way to make mutual cooperation on Methane Hydrates Technology.

**2. Common projects concerning all five Working Groups Then,**

**discussions were held on common projects concerning all five Working Groups at the First Steering Committee Meeting.**

- (1) **Second Energy Forum** : Both sides highly valued the First Energy Forum that was held in December 2006, and welcomed the decision by NEDO and TERI to hold the Second Energy Forum in Delhi this coming winter as well as confirm that the related ministries and agencies of the two countries will make the necessary contributions. (For the purpose of explaining this matter, the representatives of TERI and NEDO participated in the Steering Committee meeting as observers.)
- (2) **Joint research and study by the IEEJ and TERI** : Both sides welcomed the agreement on joint research and study concluded between the IEEJ and TERI for implementing academic and comprehensive joint research and study on various energy situations and challenges currently facing the world and those specifically facing India and Japan, and for releasing the results thereof to the two countries as well as the rest of the world. Both sides also confirmed that the related ministries and agencies of the two countries will make active contributions to the carrying out of the said joint research and study and the dissemination of the results thereof. (For the purpose of explaining this matter, the representatives of TERI and IEEJ participated in the Steering Committee meeting as observers.)

**362. Press Release of the Ministry of Finance on the first meeting of the India-Japan Strategic Dialogue on Economic Issues.**

**New Delhi, July 18, 2007.**

The first meeting of "India-Japan Strategic Dialogue on Economic Issues" set up recently, was held here today under the co-chairmanship of Finance Secretary, Government of India and Deputy Minister of Foreign Affairs, Government of Japan.

During the dialogue the current status of agreed minutes as a follow up of Prime Minister's visit to Japan in December 2006 as reflected in the Joint Statement signed between Prime Ministers of India and Japan on 15th December 2007 and subsequent summit meetings were reviewed.

The discussions covered a wide range of topics including Official Development Assistance from Japan, Infrastructure, Trade and Investment, Finance, IT, Science and Technology, Human Resource Development, Energy and Environment etc. The discussions in infrastructure development sector included the Delhi-Mumbai Industrial Corridor and the Dedicated Freight Corridor projects. The status of current negotiations on Economic Partnership Agreement (EPA) between India and Japan was discussed.

Both sides agreed to firm up concrete deliverables before the forthcoming visit of the Japanese Prime Minister to India in August, 2007.

### **363. Media Briefing by Foreign Secretary Shivshankar Menon on Japanese Prime Minister's visit.**

**New Delhi, August 20, 2007.**

**Official Spokesperson:** Good afternoon everybody. Welcome to this briefing by the Foreign Secretary on the visit of the Prime Minister of Japan, which begins tomorrow. I request FS to make his opening remarks and then we will take questions.

**Foreign Secretary:** Good afternoon ladies and gentlemen. I thought I would give you a preview of the visit of His Excellency Mr. Shinzo Abe, Prime Minister of Japan. He will be arriving tomorrow afternoon on a state visit. He will be in India until 23rd afternoon when he returns. He will be in Delhi tomorrow and all of the 22nd. On 23rd he goes to Kolkata, spends a day there, and then returns home from there.

He is coming with a very large business delegation. He will also be accompanied, in what is unusual actually, by several Vice-Chancellors of Japanese Universities. The Business Delegation, I believe, is of over a hundred people, which is a measure I think of how our relationship has grown in the last few years.

Prime Minister Abe's visit comes after Prime Minister Manmohan Singh's visit last December to Japan, which itself was preceded by the visit of Prime Minister Koizumi in 2005. We have an agreement in fact that we will have annual high-level summits as our relationship moves into actualizing and realizing in practice the strategic and global partnership that we have now declared between our two countries. It is interesting that Prime Minister Abe's visit is 50 years after the first visit of the Japanese Prime Minister to India, Prime Minister Kiichi in 1957 who was Prime Minister Abe's grandfather. So, you have a historical connection there.

While he is here, he will call on the Rashtrapati. He will be having talks with the Prime Minister. The External Affairs Minister and the Leader of the Opposition will also call on Prime Minister Abe. In what is a special mark of respect, he will be addressing a Joint Session of Parliament day after tomorrow, on the 22nd morning.

In another departure from official protocol in a standard official visit, Prime Minister and Mrs. Gursharan Kaur will be hosting a private dinner for Prime Minister and Mrs. Abe tomorrow evening after their arrival.

The India-Japan relationship has over the last few years both broadened and deepened which is why we now call it a strategic and global partnership - strategic both in terms of its long-term significance, the importance that we attach to the relationship, the importance that it has for India, but also in terms of the broader canvas on which, and the range of issues on which, we now exchange views, work together, including Asian integration and other issues which we have now started. Ever since the visit of Raksha Mantri in 2005, we started now exchanges in other fields. So, we now have actually a relationship which covers all the major fields that States work together in. And we expect that the exchange of views during this visit will help us to add new dimensions to this strategic and global partnership that we enjoy with Japan. It is our expectation that we will naturally concentrate also on the economic relationship which has several hopeful features.

As you know, we are in the process of discussing a comprehensive economic partnership agreement with Japan. This was decided last year when Prime Minister Manmohan Singh went to Japan. We hope to complete that process in two years. We are making steady progress and the leaders will review what we have done.

We also have some other big economic items that we have discussed before, which we are trying to bring to fruition. Some, of course, have already worked, are working very well. The Delhi Metro is a good example of that, which many of us use everyday. More than that we are also discussing dedicated freight corridors - Delhi-Mumbai, Delhi-Kolkata; and we are discussing a Delhi-Mumbai industrial corridor which will involve several States. These are very big ideas and infrastructural projects which will naturally need considerable effort before we can actually realize them, but we are in the process of discussing them with Japan to see how they can help. We are also convinced that the growth of the Indian economy has created new opportunities for both trade and investment. This is why, as I mentioned, about a 180 senior business leaders are coming with Prime Minister Abe and there will be a very full programme for them.

I mentioned new dimensions to the relationship and I mentioned that there will be Vice-Chancellors accompanying Prime Minister Abe. One of the ideas that we have been talking about is to see how we can get our educational institutions to work together - not just exchange of students but also the institutions themselves. We are hoping that when the Vice-Chancellors come here, they will have a chance to talk with our Vice-Chancellors, with the Directors of our IITs. We can then find new ways of

promoting academic exchanges between the two nations. This is the first time that we would be doing something of this kind at such a high level.

We also hope to review our science and technology relations which, as you know, have been longstanding. Japan for us has been a very valued partner in scientific research.

For the rest, I do not want to try and prejudge what the leaders will be talking about and what they will come up with. We will tell you about it once that is done. I would expect them to cover the entire range of political issues. There are issues where we have worked together very closely, such as in the G-4 when we have worked for the UN Security Council reform. There were also Asian integration issues, formation of the East Asia Summit (EAS) and other work for an open economic architecture in our own region; and also some defence and security issues which affect both sides. We are both interested in open sea lines of communication. We both depend on these for much of our energy imports. Our goal is to try and increase our trade volumes considerably. If our negotiations on the Conference of Economic Partnership Agreement make headway, we hope to be able to set ourselves ambitious targets for this.

We now have with Japan several dialogues which we hope will result in more concrete actions. One is, of course, India-Japan Energy Dialogue which just began last year; and we have a science and technology initiative. We look forward to carry these through.

For the present, I think I will leave you with that. I will be happy to answer any questions that you might have about the programme and about the visit.

**Question:** Obviously, we wanted to also know about the talks with Japan on the nuclear deal. Did you seek some support in the NSG from Japan? Are you hopeful after this visit of some kind of statement from Japan supporting the nuclear deal?

**Foreign Secretary:** I do not think we had asked them for support to the nuclear deal. The deal is something between us and the US. I think we will naturally discuss the international framework for civil nuclear cooperation and how it should be changed. Certainly we will look forward to discussing that issue. I think you know what we will say. Let us see what they say, and I will tell you after the talk end.

**Question:** Mr. Menon, with regard to one of the points which you mentioned on the defence and strategy issues, did the issue of quadrilateral strategic forum come up? Is there a Summit lined up among the four powers? When is the initiative likely to be announced?

**Foreign Secretary:** I do not think the idea which has been floated sometime ago has come to that stage yet where one can give definitive answers like this as to when there is going to be a summit. No, I do not think anything like that has been discussed. The idea of a quadrilateral dialogue is really one of several dialogue forums which exist today in, as I said, the open regional architecture in Asia. If you look at it, we have ARF, we have bilateral security and defence dialogue with several countries in the region, and we do exercises with several countries - with China, with Japan, with other countries as well. This is an idea that Japan had suggested as one more forum. But I do not think the idea has quite got to the stage where one can say yes, there is going to be this kind of action, or somebody is going to do anything else yet. I think it is an idea which is still being discussed between various countries.

**Question:** China seems to be quite upset with this idea. Have they issued any demarche with regard to this issue?

**Foreign Secretary:** I think it is best you ask the Chinese themselves directly what they think. As far as we are concerned, this is one of the ideas which is on the table which so far has not reached the stage where one has to take a very clear view on what one thinks of it or not. It is just one of the many ideas.

**Question:** Mr. Menon, when do the talks with IAEA begin on the nuclear deal?

**Foreign Secretary:** I said I was happy to take any questions about the visit. On the rest of it, frankly on the nuclear - I am not sure other people are going to try this as well - Prime Minister has made a statement in Parliament. It is in parliament. They are going to have a discussion in Parliament. You cannot expect me, as a bureaucrat, now to start commenting on what is really at a whole other level. So, I think it is best that you do not try it.

**Question:** On the economic front, what was expected from business somehow that enthusiasm seems to have died down because of political developments both in Japan and what is happening now here. Is there any big agreement that we could expect during this visit? Only two months

ago both sides had agreed at least on the DMIC, the framework agreement would be ready by the time Abe reaches. Also ...(inaudible)...

**Foreign Secretary:** I am not sure that there has been any slippage on any of these. I think DMIC is a much more complicated project. It includes several infrastructure projects. DFC, I think in any case we were expecting a feasibility report, just the feasibility, by October. That is what we had anticipated even last year when we talked about it. The rest of them are all on course as far as I know. I do not see any diminution in business interest either. If there were, then you would not have a 180 people coming. In fact, the numbers have just kept increasing over the last two months. So, I would not draw that kind of connection.

If anything, what I see is tremendous interest. The economic fundamentals are sound in both places. Both people expect the business to increase. CIPA negotiations are on track. So, as far as I can see, it is going very well on the economic side. I do not see what you seem to see, which is some slowing down, no. But I think you have to recognize that these are not projects which are simple. These are multiple projects built into - look at the DMIC, look at the dedicated freight corridor - these are large sums of money, very complicated integration functions, if you look at it from the Government point of view. And business has to be involved in it at various levels. So, to say that it should be done in six months or seven months I think is really unreasonable. It is really a process. We started a process and the measure of our ambition is the fact that today we consider projects like this. Five years ago we would not have had the nerve to talk about a 90 million dollar project and putting it to the other and both of us seeing what we could do to realize this. So, when you look at it, I think you should look at it like that.

**Question:** India's relations with Japan were often described as being the missing link in India's ...(inaudible)...following the 1991 reforms. Some people see the coming together of India and Japan as the desire on the part of both countries to grapple with the rise of China. Is that how you see it?

**Foreign Secretary:** I do not think it is zero sum game. I do not think our relations with Japan are at the cost of our relations with China, or that our relations with China are at the cost of our relationship with Japan. I say this not only because that is what we would like, but because if you look around the world today, it seems to me that all the major powers are cooperating with each other, talking to each other while we work our way towards greater

prosperity, and it seems to be working. If you look at the world economy and how rapidly it has grown over the last few years and how well it is doing, whether it is not just Asia but the world as a whole, I think this seems to work. I think the risks come when we start seeing it as a zero sum game and it is not, fortunately. I think our recent experience proves that.

**Question:** There have been some reports that JAICA is now ... at the cost of the freight corridor and also has some concerns about some of the in the freight corridor. ... that this trip would resolve and make ...

**Foreign Secretary:** I think the actual cost, the details of the corridor, much of that has to await a feasibility report. That is what the report is supposed to do - to sort that out, to decide which bits are feasible and which are not, which costs are reasonable and which are not. We are still at the stage of actually designing this project. For the freight corridor, we expect the feasibility report in October. I am told by the people who are involved that they are on track and they expect it on time. I think then that would be the time when we start seeing how exactly we go about implementing it. But until we know the shape of that, it is a little bit early.

**Question:** As far as the industrial corridor is concerned, it is from Delhi to Mumbai. That is what is planned. There are supposed to be a series of industries all along that route. Do you expect this time a lot of Japanese investment because there are Indian firms which are already there. Of course, there are gaps in that corridor. Do you expect promises of investment by Japanese firms in that corridor? Secondly, do you see any differences between India and Japan on the climate change?

**Foreign Secretary:** On the Delhi-Mumbai industrial corridor, I think what we think is basically the freight corridor will give firms and others who use this infrastructure, this corridor, a tremendous advantage; will make it much more attractive for firms to undertake investments to commit to that corridor. In a sense, it is a synergy that you build up. The more you can get manufacturing and so on along that route, and the infrastructure develops itself, the infrastructure starts being justified by the manufacturing and vice-versa. It is a sort of virtuous cycle. This is something that will take sometime. It is not something that one visit, everybody comes here and invests. But what we think is very significant is that such large numbers of Japanese firms at very high levels - if you look at the levels of the CEOs who have come, it is impressive that they are coming - give us a chance to discuss this in full detail to show them what is planned, how we expect to do it, to hear their ideas also about what they would like. There might be some

investment decisions but we see this as really a long-term sort of strategy. Once that strategy is clear, I think the commitments will follow. So, we see this as a useful step, taking one step forward. But it is one step in a process.

On climate change, Prime Minister Abe has made known some of his ideas, he has a Cool Earth 50 Initiative and his ideas of how we need to address climate change. I think there is a general recognition that this is a major issue for all of us. For India especially, it is a very big issue because we, given the nature of our economy, the nature of our landmass, are among those who would most affected if there is extreme climate change. So, we have an interest actually in working together to finding solutions. Today, in the world there are several ideas on the table. Prime Minister Abe ideas, we would welcome this as a contribution to the dialogue that is going on. There are other ideas as well, as you know. We as India will participate in discussing these ideas and evolving a framework within which the world can deal with this issue.

In our view, the right place to do that is ultimately the UN because that is the multilateral framework where everybody is represented and where we can undertake international commitments; we know how to. Since Rio, we have the UNFCCC, we have a framework within which we do it. But that does not mean that you cannot have dialogues, talk about other ideas, bring them all on to the table, and then bring it together in some form which is multilaterally binding in the UN framework. I think the UN in December will have the COP - the parties to the UNFCCC will be meeting. But before December, there will be a whole series of meetings. Japan will chair the G-8, will be the Presidency of the G-8 next year. I assume that as we move towards a post-Kyoto situation that now all our dialogues on climate change will gather more and more momentum. So, we look forward very much to discussing this with Prime Minister Abe. Since he has ideas, he has positive ideas for the future, we look forward very much to discussing that with him when he is here.

**Question:** As you said, you are not very comfortable right now to answer questions on the deal, but since you have been ...

**Foreign Secretary:** I am comfortable, but I would not answer questions on that.

**Question:** But since you have been actively involved in the negotiations, just technically speaking, is there hope left, or luxury of fantasy ....

**Foreign Secretary:** Do not try. I said, do not try.

**Question:** What are the agreements that are going to be signed? Are there any?

**Foreign Secretary:** I think we are working on a declaration. We are also working something on climate change. For the rest, frankly if we are doing annual summits and so on, we are not trying to cluster agreements. We will sign them as and when they happen.

**Question:** There were other aspects (to India-Japan bilateral relations) signed in 2005 and 2006 in the applied joint research in space and joint research in high-end science, technical universities etc. - what has happened to that? What is the report card on that?

**Foreign Secretary:** When we finish the visit, we will tell you because we are trying to take many of them forward. We are in the process of discussing them with our Japanese colleagues. We will see, at the end of the talks I think we will do a sort of status on all those. All those are on the table and have actually moved forward considerably.

**Question:** Will we be talking to Japan about civil nuclear energy in general?

**Foreign Secretary:** Yes, we would.

Thank you.

**364. Address of Prime Minister Dr. Manmohan Singh to Japanese Business Delegation accompanying the Japanese Prime Minister on his visit.**

**New Delhi, August 21, 2007.**

Your Excellency Prime Minister Abe, My Cabinet colleagues Shri Chidambaram and Shri Kamal Nath, Leader of the Japanese Business Delegation, Mr. Mitarai, Ladies and Gentlemen,

It is a great pleasure and honor to welcome you all. I thank Prime Minister Abe for taking the initiative of bringing such a distinguished business delegation to India.

Excellency, I express my admiration for the ambitious vision that you have often set out in your speeches - of close economic engagement between India and Japan. I truly believe that such an engagement, between Asia's largest democracy and its most developed one, will create an "arc of advantage and prosperity" through out Asia.

In December 2006, during my visit to Japan, Prime Minister Abe and I decided that the time had come for our two countries to raise our ties to the level of a global and strategic partnership. In today's changed international system, the political, economic and strategic interests of India and Japan have never been so convergent.

The core element of our global and strategic partnership is a comprehensive economic engagement between the two countries. To accelerate this process, we decided to establish a Special Economic Partnership Initiative. This initiative will focus on key projects in areas ranging from the transport sector to industrial infrastructure, technology and education.

There are enormous complementarities and commercial potential that exist in a strategic alliance between a technologically advanced, mature industrial economy like Japan's and a rapidly growing developing one like India's. Japanese automobile industries like Toyota, Honda and Suzukj have located parts of their global production chains in India. We need more such models and examples of mutually beneficial collaboration in other sectors.

Today, the Indian economy is in a position to sustain GDP growth rates that are close to 9%. Foreign Exchange reserves stand at US\$ 200 billion. We expect to receive Foreign Direct Investment of about US\$ 30 billion this year. Our savings and investment rates are above 30%. Our foreign trade

constitutes 33% of our GDP, which is a testimony to India's growing integration into the global economy. We have a very favourable demographic profile and a strong educational system to support rapid industrialization.

It is our aspiration to reach and sustain double-digit rates of annual economic growth. The guiding principle will be to harness this growth towards employment generation, poverty reduction and human development. As businessmen, you will understand the implications of these policies in terms of their impact in the years ahead on our labour and consumer markets.

I do recognize that sometimes problems do arise in implementing some of the policies that we adopt. We must recognize the complexities of a large and diverse nation like India and the needs and aspirations of different sections of our people. But we have shown over the past many years that we can resolve and manage effectively these pressures and contradictions and build a durable and stable policy framework. I assure you that we will address your concerns in the same spirit of transparency.

We have seen and expect to further see a massive increase in investment, both public and private, domestic and foreign, in our infrastructure. The institutional architecture for sustaining high levels of investment in infrastructure has been put in place - public private partnerships, systematic bidding systems, viability gap funding and other financing mechanisms and standardized approval procedures. These are already giving results. The increased investment in infrastructure is driving growth as well as demand.

It is the intention of our Government to create and sustain an environment conducive to risk taking and long-term investment in India. Over the past few years, our FDI regulations have also been made more liberal, transparent and investor friendly. A comprehensive review of the FDI policy was undertaken last year. We are working to ease the supply constraints in the availability of skilled labour. Even so, we are open to your suggestions and promise a careful consideration.

Japanese companies are known for taking a long-term view of their businesses. I believe that India has much to learn from your corporate philosophy and practice. We are keen to learn from you about how to build an environmentally sensitive industry; corporate involvement in skill development; socially responsible advertising and so many other issues that today's managers must grapple with.

For far too long the economic engagement between India and Japan has

lagged behind our political ties. We now have the opportunity to make up for lost time. We are discussing some very big flagship bilateral projects such as the Delhi-Mumbai Industrial Corridor and the Rail Freight Corridors. These projects will open up huge opportunities for Japanese industry and I hope that you will actively partner the government in making a success of these initiatives.

It is against this backdrop that PM Abe and I have established the India-Japan Business Leaders Forum. At the end of the day it is business leaders like you who will give substance to our joint vision of a unique economic engagement between India and Japan.

On behalf of the Government of India, I once again welcome all of you to India. I do hope that your visit and interactions will be productive and fruitful, and that you will avail of this opportunity to see first hand the opportunities India offers today. I also hope that you will become part of our growth story, as we shape an economy that reflects the aspirations and confidence of a billion strong population.

Thank you.

**365. Speech of Prime Minister Dr. Manmohan Singh at the Banquet hosted in the honour of Japanese Prime Minister.**

**New Delhi, August 22, 2007.**

On behalf of the Government and people of India it gives me immense pleasure to welcome you, along with all the distinguished members of your delegation, to India.

Excellency,

Your visit marks a historic milestone in our bilateral relations. Fifty years ago your grandfather, the late Prime Minister Nobusuke Kishi, made his path-breaking visit to India.

That visit laid the foundation of our partnership in the modern era. Today, it is our privilege to welcome you not only as the inheritor of a great legacy, but also as an architect of strong Indo-Japan relations. We deeply appreciate your personal commitment to realizing our common vision of building a strong bilateral relationship of lasting value. We applaud your efforts to make Japan a 'beautiful' country.

Excellency,

Our two ancient cultures have had exchanges as far back as recorded history takes us. We admire the Japanese way, which emphasizes harmony, balance and moderation. We strive to emulate the individual and social attributes that have made Japan the shining light of modern Asia.

You have been a valuable partner in our economic progress and a friend in times of need. Our contemporary bilateral relationship is on the verge of full bloom. Our talks today give us the confidence that the strategic dimension of our relations will be further consolidated in the years ahead.

On the pillars of this strong bilateral relationship, we stand as two major powers ready to play a commensurate global role in dealing with challenges such as terrorism, climate change and energy security.

We believe that a strong and dynamic Japan is a factor of peace and stability in Asia. As two leading democracies of Asia, who share common values, our combined voice can contribute decisively towards the building of a new Asia and a new economic community that is open and inclusive.

We have turned a new page in our ties with the dawn of this century. We

have added vitality and depth to our ties through enhanced political understanding, economic partnership, cultural exchange and cooperation in emerging areas such as environment and energy security.

We have today laid out a Roadmap for our future partnership. Let us pledge to walk resolutely on this path and usher in a glorious era in our age-old ties. This is what we owe to our people, and to future generations. We must make up for lost time.

Excellency,

Your inspiring address to our Parliament this morning left a deep impact. A strong India and a strong Japan will work together in harmony and peace to build a perfect partnership.

Excellencies,

Ladies and Gentlemen,

May I now request you to join me in raising a toast to :

- The good health of His Excellency Prime Minister Shinzo Abe and Madame Akie Abe;
- The well-being and prosperity of the friendly peoples of Japan and India; and
- To everlasting friendship between India and Japan.

Thank you.

**366. Joint Statement issued during the visit of the Japanese Prime Minister Shinzo Abe on the Enhancement of Cooperation on Environmental Protection and Energy Security.**

**New Delhi, August 22, 2007.**

1. Prime Minister of India, H.E. Dr. Manmohan Singh and Prime Minister of Japan, H.E. Mr. Shinzo Abe reached common recognition today that the issues of energy security and the environment are important priorities that require sustained and effective action by the international community. They acknowledged the importance of ensuring stable and affordable energy supplies that are essential for the two economies. They also recognised the urgent need to address the issues of global warming and climate change. The two Prime Ministers decided to work together to address these issues in the context of the "India-Japan Strategic and Global Partnership".
2. The two leaders arrived at a common recognition that meaningful progress in the areas of energy security and the environment should be made through individual and collective efforts in a manner that does not foreclose the possibilities of accelerated economic and social development. The two leaders also shared the recognition that India and Japan can work together to find pragmatic and practical solutions which will contribute to regional and global efforts in these areas.
3. The two leaders confirmed their intention to work constructively with each other and with other countries in multilateral fora such as United Nations Framework Convention on Climate Change (UNFCCC), East Asia Summit (EAS), EAS Energy Ministers Meeting, the Asia-Pacific Partnership on Clean Development and Climate and the Five-Party Energy Ministers Meeting.
4. Based on the above recognition, the two leaders are determined to enhance and strengthen dialogue and cooperation in the following areas:
  - A. Climate Change**
5. Prime Minister Abe elaborated upon the "three proposals and three principles" that constitute the main pillars of his proposal "Cool Earth 50" presented in May 2007 to address climate change. Prime Minister

Singh appreciated his proposal as a contribution to the global debate to address climate change.

6. Prime Minister Abe particularly emphasised the need to set a long-term target to cut global emission by half from the current level by 2050 in order to stabilise atmospheric concentrations of greenhouse gases (GHG).
7. Prime Minister Singh underscored that the determination of any particular stabilisation goal and the time-frame in which it should be achieved needs to be made at the United Nations Framework Convention on Climate Change. This should be preceded by scientific consensus on impacts at different levels of GHG going beyond the current IPCC findings, which still document many uncertainties. Prime Minister Abe's proposal should also receive serious consideration in this context.
8. The two leaders recognised the importance of invigorating discussion on these issues at various fora. They expressed their determination for a flexible, fair and effective global framework and concerted international action beyond 2012 in which all countries participate to address climate change in line with the principles of the UNFCCC.
9. The two leaders recognised the importance of ensuring synergy between economic growth and environmental protection through mitigation and adaptation strategies including utilisation of energy conservation and other technology. They also shared the view that any stabilisation goals and the time-frames to achieve the same should be determined under the UNFCCC, and should be preceded by a scientific consensus.
10. Prime Minister Singh welcomed the efforts by Japan to meet greenhouse gas emission targets set under the Kyoto Protocol including launching of national campaigns. The two leaders decided to continue cooperation to promote the use of the Clean Development Mechanism (CDM).
11. The two Prime Ministers confirmed their intention to take pragmatic steps to address climate change in their respective countries in accordance with the principle of common but differentiated responsibilities and respective capabilities as also national circumstances.

12. Prime Minister Singh also appreciated Prime Minister Abe's willingness to create a new financial mechanism with substantial size of funds for relatively long-term, to assist developing countries with high aspirations instead of diverting the existing financial assistance, and to call on other industrialised countries and international organisations to respond and take part in international cooperation. Both Prime Ministers recognised the importance of providing adequate resources for adaptation strategies.

**B. Energy security**

13. The two leaders shared the view that cooperation between India and Japan in the area of energy at both the government and industry levels will be mutually beneficial to promote both countries' efforts for enhancement of energy security. They also noted with satisfaction the steps being taken by both countries to develop specific cooperation projects in the energy sector, including cooperation in energy efficiency and conservation and in clean energy, as well as through the participation of Japanese companies in the power sector in India.
14. The two leaders welcomed the outcomes of the Second India-Japan Ministerial-level Energy Dialogue held in New Delhi in July 2007 to promote comprehensive cooperation in the energy sector. They reached the conclusion that this Dialogue should be held annually and that its scope could be broadened through mutual consensus to cover other aspects of cooperation and collaboration in the energy sector.
15. The two leaders reaffirmed the importance of promoting energy efficiency and conservation as a means of ensuring energy security and addressing climate change by among others implementing voluntary goals and action plans based on the "Cebu Declaration on East Asian Energy Security" issued during the Second East Asian Summit held in January 2007. The two leaders also confirmed the importance of usage of clean technology as part of a global response. Prime Minister Abe acknowledged the importance of accessibility for clean technology in cost effective manner to developing countries. Prime Minister Singh acknowledged Japan's expertise in clean energy technologies and welcomed Prime Minister Abe's willingness to cooperate to share Japan's expertise and technology in this important field with India. Prime Minister Singh confirmed that India will accelerate the implementation of a range of energy efficiency policies and

measures for improving energy efficiency in all possible sectors and Prime Minister Abe welcomed India's efforts. The two Prime Ministers noted the importance of cooperation through such activities as training-of-trainers in India, introduction of top-runner programme, capacity building of professionals involved in energy efficiency and information dissemination and demonstration of new energy-efficient technologies and processes. Both leaders directed the India-Japan Energy Dialogue to explore possibilities of implementing such proposals through the regional energy efficiency centers that Government of India plans to establish in the five geographical regions of India. Both leaders also directed the India-Japan Energy Dialogue to explore the possibilities of cooperation to enhance energy efficiency of power generation in India in such a way that Japanese relevant organisations and NTPC cooperate by sharing the industries' knowledge and technology.

16. The two Prime Ministers recognised that new and renewable sources of energy, including bio-fuels, are already an important aspect of their respective national energy policies and instructed the India-Japan Energy Dialogue to explore ways and means to further cooperate in this field. They agreed to commence early discussions on a model project of bagasse ethanol production with the New Energy and Industrial Technology Development Organisation (NEDO) in this important field as a symbol of their shared intention to promote the use of new and renewable sources of energy.
17. The two leaders recognised the positive contribution of initiatives taken in various sectors for the development, deployment and transfer of cleaner and more efficient technologies under the Asia-Pacific Partnership on Clean Development and Climate (APP). They decided to promote public-private cooperation under this partnership between the two countries. They also welcomed the initiatives taken by the two countries for cooperation in the area of clean coal technologies during the Ministerial level energy Dialogue in New Delhi in July 2007. Prime Minister Abe welcomed India's offer to host the next APP Ministerial Meeting, and the two leaders confirmed their intention to strengthen their contribution toward further development of APP.
18. The two leaders recognised the importance of expanding the energy infrastructures in India, such as power plants and power transmission and distribution networks, so as to meet India's rapidly increasing electricity demands, and to improve energy access. Prime Minister Abe

expressed his willingness to continue to provide assistance to India, taking into account India's socio-economic situation and development needs. Both sides welcomed the possibilities of participation by Japanese companies in ultra mega power generation projects which are being developed by India through tariff based competitive bidding. Both sides in addition welcomed the possibilities of participation by Japanese companies in various areas of the power sector including generation, equipment manufacturing, transmission and distribution. Both leaders also welcomed the establishment of private sector joint ventures by Japanese and Indian companies for the manufacture of high efficiency power generating machinery and stressed the desire to promote similar cooperation to other energy intensive equipment used on both the supply and demand side.

19. Prime Minister Singh expressed his willingness to build India's strategic petroleum storage system in cooperation with the International Energy Agency (IEA). Prime Minister Abe affirmed his willingness to support this initiative.
20. The two leaders welcomed the decision by The Energy and Resources Institute (TERI) of India and the NEDO of Japan to hold the India-Japan Second Energy Forum in Delhi this coming November.

### **C. Environment**

21. The two leaders recognised the global scale of environmental issues and decided to continue and enhance dialogue between Japan and India under bilateral as well as multilateral frameworks, in order to tackle these issues in a comprehensive manner that supports sustainable development. The two leaders also confirmed their intention to facilitate bilateral cooperation in various fields including local and global environmental concerns.
22. The two leaders are of the common view that an effective system of environmental laws and regulations is essential to promote environmental protection. The two leaders reaffirmed the respective rights and obligations of the two countries under multilateral environmental agreements.
23. The two leaders recognised the importance of bio-diversity conservation in the context of sustainable socio-economic development, and decided to promote further cooperation in this area through mutual consultation.

24. The two leaders shared the view on the importance of improving access to safe potable water and adequate sanitary facilities for realising sustainable development, and have decided to enhance bilateral and multilateral cooperation in order to realise this objective.
25. The two leaders reached common recognition that promoting sustainable forest management is important from the viewpoint of addressing climate change and conserving biodiversity, and confirmed their intention to make efforts to facilitate forestation and reforestation, combat illegal logging and conserve biodiversity, through bilateral and multilateral cooperation such as those under the International Tropical Timber Organization (ITTO).
26. The two leaders shared the view that it is important to raise public awareness about environmental issues through education and other public relations activities. Prime Minister Singh appreciated Japan's efforts such as "Dialogue on Environmental Education" which Japan promotes under the Asia Cooperation Dialogue (ACD). Prime Minister Abe welcomed India's hosting of the Fourth International Conference on Environment Education in November 2007. The leaders confirmed their intention to continue the cooperation in this area.

**(Manmohan Singh)**  
Prime Minister of Republic of India

**(Shinzo Abe)**  
Prime Minister of Japan

**367. Joint Statement on the Roadmap for New Dimensions to the Strategic and Global Partnership between India and Japan.**

**New Delhi, August 22, 2007.**

1. The Prime Minister of Japan, H.E. Mr. Shinzo Abe, is currently paying an Official Visit to India from August 21 to 23, 2007 at the invitation of the Prime Minister of India, H.E. Dr. Manmohan Singh. He is accompanied by his spouse, Mrs. Akie Abe and a high-level official delegation, members of Business Leaders Forum as well as about 200 member Japanese Economic Mission.
2. Prime Minister Abe was accorded a ceremonial welcome on August 22. Prime Minister Abe paid a courtesy call to the President of India and addressed the Indian Parliament. He had extensive talks with Prime Minister Singh, who will also be hosting a Banquet in honour of the visiting dignitary. Prime Minister Abe attended the meeting for university collaboration which was held with the participation of vice chancellors/presidents of prominent universities of both countries. Indo-Japan friendship organisations hosted a reception, and Indian economic organisations hosted a luncheon for Prime Minister Abe. H.E. Mr. Pranab Mukherjee, Minister of External Affairs of India and H.E. Mr. L.K. Advani, Leader of the Opposition, Lok Sabha, called on the Prime Minister of Japan. Prime Minister Abe will visit Kolkata and will attend the Opening Ceremony of India-Japan Culture Centre.

**Roadmap for New Dimensions to the Strategic and Global Partnership**

3. The two leaders shared the view that the visit of Prime Minister Singh to Japan as well as the decision to establish the Strategic and Global Partnership last December elevated the partnership between the two countries to a new level. India and Japan share universal values of democracy, open society, human rights, rule of law and market economy and share common interest in promoting peace, stability and prosperity in Asia and the world. Based on this recognition, the two leaders reaffirmed that the India-Japan partnership is a bilateral relationship with the largest potential for growth. The two leaders reiterated that a strong, prosperous and dynamic India is in the interest of Japan and a strong, prosperous and dynamic Japan is in the interest of India and recognized that India and Japan share a congruence of interests.

4. A new dynamism for growth is being generated in Asia as a result of economic development in India and in other countries as well as heightened efforts towards regional integration. Asia is in the process of rapidly developing synergies/interaction among the different economies, societies, civilizations and cultures of the region while respecting existing diversity and enhancing openness. Recognising the current dynamism in Asia, the two Prime Ministers expressed their firm belief that the 21st century should be the century for peace, progress and democracy, and that the partnership between India and Japan, the two major democracies in Asia, is an essential pillar for the future architecture of the entire region. They resolved to work together to further promoting the new dynamism in Asia in a positive direction. Based on this recognition, they exchanged views on the future course of bilateral relations, and set-forth a Roadmap for New Dimensions to the Strategic and Global Partnership. They reaffirmed their willingness to build a strong and enduring partnership through the following Roadmap:

#### **Political, Security and Defence Cooperation**

5. **High Level Visits:** Prime Minister Singh has renewed his invitation to Their Majesties the Emperor and Empress of Japan to pay a State Visit to India. Prime Minister Abe extended an invitation to Prime Minister Singh to visit Japan in 2008. The Indian Prime Minister appreciated the invitation and expressed his willingness to visit Japan at a mutually convenient time in 2008. The two leaders welcomed more active high-level exchanges between the two countries. The two sides will enhance regular exchanges between members of their respective Cabinets.
6. **Further Cooperation in the Security Field:** The two leaders recognised that India and Japan share common interests in such fields as maintaining the safety and security of sea lanes in the Asia Pacific and the Indian Ocean regions, and fighting against transnational crimes, terrorism, piracy and proliferation of Weapons of Mass Destruction. The two leaders directed respective authorities to study future course of cooperation in the security field between the two countries and to report to them by the time of Indian Prime Minister's visit to Japan.
7. **Deepening and Broadening Strategic Dialogue at Various Levels:** The two sides recognised the importance of deepening and

broadening strategic dialogue through various channels. The two leaders welcomed the launching of the annual Strategic Dialogue at the Foreign Minister level in March 2007. The Foreign Minister of Japan will visit India for the second Dialogue in 2008 before the Indian Prime Minister's visit to Japan. The two sides will continue to hold regular dialogues between the National Security Advisor of India and the Japanese counterpart. The two sides will commence bi-annual Foreign Secretary/Vice Minister level dialogue. The two sides will also launch an exchange programme of young diplomats in order to promote mutual understanding between the two Foreign Offices.

8. **Strengthening Defence Exchange:** The two leaders recognised that common interests of the two countries in the defence and security fields require steady and qualitative up-gradation of cooperation between the two sides, including inter alia the expansion of the annual calendar of cooperation and exchanges relating to defence and security, Vice Minister/Defence Secretary level regular Defence Policy Dialogue, cooperation in sharing of experience in international peace cooperation activities under the aegis of the United Nations and counter-terrorism, information sharing in important areas of mutual interest, technical exchange, joint exercises and training and talks between the services. The two leaders welcomed the participation of the Japanese Maritime Self Defense Force in the multilateral maritime exercise "Malabar" to be held in September 2007 in the Bay of Bengal<sup>1</sup>. The two sides will enhance reciprocal visits of Defence Ministers and hold the second round of the Defence Policy

---

1. The proposal culminated in the five-nation (India, Japan, US, Australia and Singapore) holding naval exercises in the Bay of Bengal in September. The decision aroused China's concerns. Initial meeting for this purpose was held on May 24-25 in Manila participated by India, the U.S., Japan and Australia. Nevertheless the concern over "encirclement of China" was strong enough for Beijing to issue a demarche to all four nations, demanding the purpose behind the meeting. Both India and Australia however, assured China that security and defence issues did not form part of the meeting's agenda. The location for exercises was chosen to maintain distance from the arc of the Pacific Ocean skirting the borders of Russia and China where such moves could arouse Beijing's sensitivities. In the past there were bilateral exercises between the Indian and the US navies, besides air and military exercises. For Australia, war games of this magnitude would be the first ever with India although the two sides had held preliminary exercises earlier. An Indian warship made port calls at Perth and Sydney. Later, an Australian warship arrived in Goa but exercises were called off due to bad weather. Japan's first interaction with the Indian Navy took place off its coast in April 2007 along with the U.S. Navy. However, the Indian Navy tried to balance out these interactions by touching base with China, Russia and Vietnam. On July 13 *the Hindu* quoted a senior MEA official to say in June "We were

Dialogue at an earliest convenient time.

9. **Promotion of Cooperation between the Coast Guards:** The two sides reaffirmed their intention to enhance cooperation in maritime safety, maritime security and protection of marine environment through combined exercises, regular meetings of heads of the two Coast Guards, and cooperation based on the Memorandum on Cooperation signed between the two Coast Guards.

### **Comprehensive Economic Partnership**

#### **Expansion of Bilateral Trade:**

10. The two leaders expressed satisfaction in the recent trend of growth in trade between India and Japan. The total amount of trade between the two countries has been steadily rising, and could possibly reach approximately US\$ 10 billion in 2007. In order to further enhance bilateral comprehensive economic partnership, the two leaders agreed to work towards an annual trade volume of US\$ 20 billion by the year 2010.

#### **Negotiations on EPA/CEPA:**

11. The two leaders reaffirmed the importance of delivering a high-quality and mutually beneficial EPA/CEPA that reflects the strategic importance of bilateral relations and fully harnesses the potential of their economic relationship. In this context, the two leaders directed their respective negotiators to actively pursue and complete the negotiations as soon as possible.

#### **Economic Assistance:**

12. The two leaders noted with satisfaction the growing economic relations between the two countries. The Indian side appreciated

---

conscious of not trying to create the impression of a gang-up against them [China]. I think at this time, none of the others wants to either. "India too was concerned that China should feel threatened by this exercise and wished to assure Beijing that India had no intention of ganging up to contain China in any manner. When Prime Minister Manmohan Singh met the Chinese President Hu Jintao in Berlin on the sidelines of the G-8 summit he personally spoke to him to tell him that "there was no question of grouping up (against China)" and added "we (the quadripartite) met to exchange views on developments from our experiences as democracies....there was no security implication in the quadripartite group." Prime Minister felt that President Hu was satisfied with what he told him. This piece of information was confirmed by Prime Minister on June 25 after releasing a book in New Delhi.

the Japanese ODA for which India has remained the largest recipient for the fourth consecutive year. The Japanese assistance, including its continued support to the Delhi Metro Project which symbolises high quality economic assistance from Japan, has generated goodwill for Japan across all parts of India. The two leaders shared the view that Japanese ODA should continue to play an increasing role in areas including infrastructure development, cooperation on environment and energy, as well as Poverty reduction and social sector development.

**Promotion of Special Economic Partnership Initiative (SEPI):**

13. The two leaders noted with satisfaction the progress made in the implementation of the SEPI, which aims at promoting enhancement of investment from Japan to India and helping development of India's infrastructure and manufacturing capacity. This comprehensive economic partnership will give an impetus to the Indian economy that will in turn also create new frontiers and opportunities for Japan's economy and continued prosperity. The two leaders appreciated the steady increase in the number of Japanese companies present in India as well as estimated increase in Japanese FDI to India. The two leaders appreciated the following developments under SEPI:

- **Dedicated Multi-Modal High Axle Load Freight Corridors Project (Dedicated Freight Corridor (DFC) Project):**

The two leaders reviewed the progress, and welcomed the fact that the Final Report of the JICA Feasibility Study would be ready by October 2007. They looked forward to continued cooperation towards realisation of the Project.

- **Delhi-Mumbai Industrial Corridor (DMIC) Project:**

Both sides recognised the significance and mutual benefit of this Project, and welcomed the progress made since the Summit meeting last December, including preparation of a concept paper by the Task Force co-chaired by Secretary, DIPP of the Ministry of Commerce and Industry of India and Vice Minister for International Affairs of the Ministry of Economy, Trade and Industry of Japan. Both sides confirmed that they would work together closely for the establishment of the Project Development Fund for DMIC.

- **JETRO Related Activities:**

The two leaders expressed their appreciation for the efforts by JETRO and Indian counterparts to promote trade and investment, especially in the DMIC region, such as (i) setting up of the second Business Support Centre in India in Mumbai, (ii) investment promotion activities in the DMIC related six states and (iii) facilitation of business interaction, including the setting up of the website, based on the MOU signed with the Confederation of Indian Industry.

- **Visionary Leaders for Manufacturing Programme (VLFM):**

The two leaders noted with satisfaction that the first VLFM programme has been launched under Japanese Technical Cooperation Programme to facilitate establishing an advanced and innovative management education system in India.

- **Indian Institute of Information and Technology, Design & Manufacturing, Jabalpur (IIITDM-J):**

The two leaders welcomed the recent progress in Japanese collaboration for development of IIITDM-J, including the launching of a Japanese Consortium composed of government agencies, academics and industries, and directed relevant authorities to continue specific discussions to upgrade collaborative efforts.

**Business Leaders Forum:**

14. The two leaders welcomed the report prepared by the Business Leaders Forum. They instructed their respective authorities to examine the report and to implement the relevant recommendations.

**High Technology Trade:**

15. The two leaders took note of the commencement of dialogue in this important area, and expressed their readiness to continue bilateral talks through the Consultation Mechanism for High Technology Trade, in order to make further progress in facilitating two-way high technology trade and addressing matters relating to respective export control systems.

**Japan Depositary Receipt (JDR):**

16. Both sides resolved to explore JDR as a potential source of financing for private sector development in India, including DMIC.

**Currency Swap Arrangement:**

17. The two leaders welcomed the agreement-in-principle on the bilateral currency swap arrangement which aims at addressing short-term liquidity difficulties and supplementing the existing international financial arrangements. The two leaders hoped that the bilateral currency swap arrangement would promote the financial cooperation between India and Japan.

**Cooperation in the Field of Urban Development:**

18. The two leaders welcomed the useful exchange of views concerning the water environment, urban development and urban transport during the first India-Japan Joint Working Group on Urban Development held in Japan. They reaffirmed their intention to regularly hold Working Group meetings in order to identify potential areas of collaboration.

**ICT (Information and Communication Technology):**

19. The two leaders welcomed progress in the India-Japan ICT Forum, including the successful result of field trials on wide-band wireless technology. They also expressed expectations that cooperation in new areas such as Next Generation Network, and mobile communication systems, would be undertaken in the ICT Forum. The Japanese side will continue consultation on the proposal for assistance in setting up the National Gigabit Backbone Network by India to facilitate information flow and e-government support through data, voice and video conferencing facilities.

**Science and Technology**

20. The two leaders welcomed the commencement of the bilateral project based on the MOU between Japan Science and Technology Agency (JST) and the Department of Science and Technology of India (DST) in the area of ICT. The two leaders noted with satisfaction the adoption of new research subjects in Nano Technology and Life Science which are to be funded by the Ministry of Education, Culture, Sports, Science and Technology of Japan (MEXT). The two leaders confirmed that MEXT, the Japan Aerospace Exploration Agency (JAXA) and the Indian Space Research Organisation (ISRO) would co-host APRSAF-14 in November, 2007 in Bangalore. They

appreciated the recent signature of the Agreement between JAXA and ISRO concerning cooperation in space X-ray observations.

21. The two leaders welcomed the signing of the Letter of Intent on Scientific and Technological Cooperation between the Department of Science and Technology of India (DST) and the High Energy Accelerator Research Organisation of Japan (KEK) on 24 July 2007, recalling the discussion in the India-Japan Science Council co-hosted by DST and the Japan Society for the Promotion of Science.

#### **Strategic Dialogue on Economic Issues**

22. The two leaders appreciated the progress made in the first India-Japan Strategic Dialogue on Economic Issues, and directed this forum to follow up on the economic issues mentioned in this joint statement through the next dialogue and report to them by the time of the next Summit meeting.

#### **People-to-People Exchange, Academic Exchange, Cultural Exchange**

##### **University Exchange / Indian Institute of Technology (IIT):**

23. The two leaders welcomed the convening of the first-ever India-Japan Dialogue of Vice-chancellor / President on Academic Exchange among leading higher educational institutions of both countries, which was held during Prime Minister Abe's visit in New Delhi, as a forum for comprehensive exchange of views and relevant information for the furtherance of academic exchange. The two leaders shared the conviction that more active and enhanced academic exchange between higher educational institutions of both countries should be the key for consolidating a foundation for long-lasting friendship between India and Japan. With this belief in mind, both sides will initiate a working group to study and explore possible collaboration in setting up a new IIT. The working group will report the progress of their study to the two leaders by the time of the next Summit meeting.

##### **Youth Exchange:**

24. The two leaders shared the view that it is important to significantly enhance people-to-people contacts between the two countries. In this regard, the two leaders welcomed the progress in the Aso Programme, and Prime Minister Abe's decision to invite about 500 youths annually, including 100 outstanding Japanese language students and young Japanese language teachers from India in the

next 5 years under the framework of Japan-East Asia Network of Exchange for Students and Youths (JENESYS) Programme announced during the second East Asia Summit. Prime Minister Singh appreciated the proposal. Both sides will continue consultations on the possibility of utilising Japanese ODA loans to increase the number of Indian students to Japan.

#### **Japanese Language Education in India:**

25. Taking note of the fact that Japanese language learners in India have almost doubled in the last 3 years, the two leaders confirmed their will to cooperate towards realising the target of 30,000 Japanese language learners in India by the year 2010. Indian side proposed to establish a Training Centre for Japanese Language Teachers in India. The Japanese side welcomed the plan and expressed that it would consider supporting India's effort by dispatching young Japanese language teachers to India under the JENESYS Programme.

#### **India-Japan Friendship Year:**

26. The two leaders noted with satisfaction the success of on-going India-Japan Friendship Year Programmes both in India and Japan. The two sides will promote mutual exchange, attaching high priority to further enhancement of exchanges in such areas as youth, sports, films, popular culture and fashion. Each side will hold film festivals in the other country in the year 2008. They also decided to enhance the recent development of exchanges between the local governments of both countries.

#### **Tourism Promotion**

27. The two leaders expressed satisfaction in the success of the India-Japan Tourism Exchange Year both in Japan and in India, and reaffirmed their willingness to promote bilateral tourism initiatives, including the target of increasing the number of visitors between the two countries to 300,000 by the year 2010 and to 500,000 by the year 2015.

#### **Issues of Common Interests**

##### **East Asia Summit (EAS):**

28. The two leaders confirmed the importance of the EAS in the

enhancement and progressive realisation of an East Asian community and agreed to work jointly and with other countries of the region to promote this objective. They reiterated that the EAS can substantially contribute in the process of community building based on universally recognised values and in enhancing the role of the region at the global level. The two leaders expressed their will to promote cooperation in such areas as energy security, youth exchange, the study on Comprehensive Economic Partnership in East Asia (CEPEA), the establishment of the Economic Research Institute for ASEAN and East Asia (ERIA), and to work together to specify other areas of cooperation under the framework of the EAS.

**Dialogue among Cultures, Societies and Religions in East Asia:**

29. With a view to establishing an East Asian community in the future, the two leaders recognised the importance of promoting dialogue among various cultures, societies and religions in East Asia. Prime Minister Abe welcomed India's initiative to revive the Nalanda University, which once used to be the centre of academic research in Asia, as a centre of learning in Asia. The Japanese side will take part in the multilateral discussions to realise this initiative, after taking into consideration the deliberations of Mentors' Group.

**Cooperation towards Stable Development of South Asia:**

30. The two leaders recognised the importance to promote regional cooperation in South Asia. Prime Minister Abe highly commended the success of the 14th Summit Meeting of South Asian Association for Regional Cooperation (SAARC) under the chairmanship of the Government of India. Japan's continued cooperation with SAARC countries under the SAARC-Japan Special Fund as well as Japan's intention to further cooperate in such fields as improving connectivity were welcomed.

**Promotion of Multi-layered Frameworks for Regional Cooperation:**

31. The two leaders reaffirmed that Japan and India should actively cooperate to promote multi-layered frameworks and dialogues for regional cooperation in Asia, including the EAS, SAARC and the ASEAN Regional Forum (ARF). They also shared the view on the usefulness of continuation of Quadrilateral Dialogue, of which the first meeting was held at SOM level last May in Manila.

**UN Reform:**

32. The two leaders reaffirmed their commitment to a comprehensive reform of the United Nations, including the expansion of the UN Security Council in both the permanent and non-permanent categories, which is central to the reform process. Both sides will continue their close cooperation towards early realisation of the Security Council reform so that it reflects contemporary realities and can effectively cope with newly emerging threats and challenges. In this context, they appreciated the leading role played by the Group of Four (G-4): Brazil, Germany, India and Japan.

**WTO:**

33. The two leaders reaffirmed the importance of achieving a successful conclusion of the WTO Doha Round negotiations this year. They expressed their resolve to cooperate closely to achieve a balanced and comprehensive agreement.

**Energy, Environment and Climate Change:**

34. The two leaders decided to sign a separate joint statement on enhancement of energy security and environmental protection.

**Civil Nuclear Energy Cooperation:**

35. The two leaders shared the view that nuclear energy can play an important role as a safe, sustainable and non-polluting source of energy in meeting the rising global demand for energy. They looked forward to constructive deliberations at the relevant international fora with respect to the international civil nuclear cooperation framework under appropriate IAEA safeguards with India.

**Disarmament and Non-proliferation:**

36. The two leaders, reiterating their commitment to disarmament and greatly concerned over the proliferation of Weapons of Mass Destruction and their means of delivery, confirmed their will to continue to cooperate on disarmament and to work as partners against proliferation.

**DPRK:**

37. The two leaders welcomed the recent progress made in the Six Party Talks including the shutdown of the Yongbyon nuclear facility and commencement of IAEA's activities in the DPRK. They agreed that the

DPRK should continue to take steps to implement the decisions taken in the Six Party Talks in order to realise the denuclearisation of the Korean Peninsula. They also welcomed the measures taken by other concerned parties to facilitate this process. They emphasised the importance of implementing United Nations Security Council Resolution 1718. The Indian side expressed its willingness to work with the international community to resolve the abduction issue at the earliest as a humanitarian concern.

**Human Security:**

38. The two leaders stressed the need to cooperate in developing a common understanding of human security, with due respect to the evolving, multidimensional and comprehensive nature of the concept, with a view to tackling global challenges including the achievement of the Millennium Development Goals.

**Counter Terrorism:**

39. The two leaders reaffirmed that terrorism constitutes one of the most serious threats to international peace and security, and commended the efforts undertaken by both governments to fight against terrorism. They strongly condemned terrorism in all its forms and manifestations and stressed that there can be no justification, whatsoever, for any acts of terrorism. They decided to strengthen bilateral cooperation in combating it including the Joint Working Group on Counter-Terrorism. They underlined their commitment to the full implementation of the UN Global Counter Terrorism Strategy and called for expeditious conclusion of the ongoing negotiations of a comprehensive convention on international terrorism. They instructed the concerned authorities of both governments to hold consultations on counter terrorism at the earliest.

**(Manmohan Singh)**  
Prime Minister of Republic of India

**(Shinzo Abe)**  
Prime Minister of Japan

**368. Joint Press Conference by Prime Minister Dr. Manmohan Singh and Japanese Prime Minister Shinzo Abe.**

**New Delhi, August 22, 2007.**

**Dr. Manmohan Singh, Prime Minister of India:** I am delighted to be here today with His Excellency Prime Minister Shinzo Abe and his high-powered delegation. Prime Minister Abe's visit to India soon after my own visit to Japan in December 2006 reflects the vitality and intensity of Indo-Japan relations in recent years.

We have had very fruitful and intensive discussions. As two major countries in Asia, we share common values and have a common responsibility to ensure the peace and prosperity of our region. We deeply appreciate the words of friendship that Prime Minister Abe expressed during his Address to our Parliament earlier today. We have today agreed to lay down a roadmap to impart a new dimension to our strategic and global partnership. This is a comprehensive and forward looking vision of how our two countries can and ought to move far ahead in the coming years.

Economic partnership is at the core of our engagement. We have set a target for bilateral trade of US \$ 20 billion by 2010. The Working Group is to be set up to explore collaboration in setting up a new IIT. We have also agreed to cooperate in the implementation of two very important flagship projects - the Dedicated Rail Freight Corridor project, and the Delhi-Mumbai Industrial Corridor project. When implemented, these projects will be shining examples of our enhanced bilateral cooperation. We had very productive discussions on global and regional issues, and this reflects our growing mutual understanding and convergence of interests.

The signing of a Joint Statement on enhancement of cooperation in environment protection and energy reflects an important new area of cooperation. We appreciate Prime Minister Abe's initiative on climate change as a contribution to the global debate on the subject. Equally for us, it is important to ensure energy security so that we can sustain strong growth rates and eradicate poverty. We welcome Japanese participation in our energy sector.

Mr. Prime Minister, I would like to thank you warmly for the assistance which Japan has been providing to India's developmental efforts. Your strong personal commitment to the strengthening of our partnership is a

source of inspiration to us. Let me extend to you once again a very warm welcome and request you to say a few words.

I thank you.

**H.E. Mr. Shinzo Abe, Prime Minister of Japan:** Allow me to say a few words as well.

I wish to start with my gratitude to Prime Minister Manmohan Singh, the Government, and Parliament of India, and the Indian people for their very warm welcome and hospitality.

I had the pleasure today of speaking to the Parliament of India. My visit here this time is also being dovetailed by the visit to your country of a 200-strong business mission which is participated by captains of Japan's business community under the leadership of Mr. M. M. Mitterai, Chairman of Nippon Keidanren.

In addition, yesterday the first ever Presidents and Vice-Chancellors level dialogue of leading Universities of Japan and India took place with the participation of distinguished representatives of the Universities of our two countries. I trust that this visit of ours shall lead to further strengthening of exchanges not just between our Governments but also between the business communities and the academia of our countries at many different levels.

A while ago, I had a very intimate and positive meeting with Prime Minister Singh on a very broad range of subject matters and under the common understanding, thanks to our agreement last December to build a strategic and global partnership, the relations between our two countries now have advanced to a new level. We were able to agree on numerous common endeavours which would aim at drawing the roadmap for Japan-India relations at a new dimension.

With regard to our bilateral relations, we agreed the following. First with regard to political and security areas, I extended my invitation to Prime Minister Manmohan Singh to visit Japan once again next year, and he kindly accepted this invitation. We also saw eye-to-eye that our bilateral cooperation in the area of security has progressed in recent years. We also agreed to get down to considerations with regard to the future course of the cooperation between our two countries that would be appropriate for our two countries in order to further expand cooperation in this area.

In the economic area and economic cooperation with the participation of top leaders of the business communities of our two countries, the first Business Leaders' Forum was held this very day; and we, as you saw, received their recommendations just a while ago. All these recommendations are very insightful, and I have instructed those people concerned to act on these recommendations to translate them into reality.

Japan has actively supported India's infrastructure development over the years. India has been the largest recipient of Japanese Yen loans for four years consecutively. In our meeting today, I stated that we shall consider positively the provision of Yen loans utilizing Japanese technology vis-à-vis the Dedicated Freight Corridor initiative. Also, I stated that since the Delhi-Mumbai Industrial Corridor project also would be very beneficial for both Japan and India, we would like to be cooperating closely with the Indian side towards the launching of a fund which would be conducive to making this project a reality. In addition, we have also confirmed that the Agreement on Currency Swap was reached between the authorities of our two countries.

In order to cement our bilateral relations into the future, it is important to encourage contacts, exchanges of people, and exchanges in academia and cultural exchanges between our two countries, especially exchanges of youth who will carry our countries into the future. With this common understanding between myself and Prime Minister Singh, we agreed on numerous endeavours into the future including the plan for us to invite to Japan five hundred youths every year.

In the area of environment and energy, I once again explained the basic elements of my initiative, which is Cool Earth 50. Especially, I explained the long-term objective of halving greenhouse gas emissions globally by 2050 and the three principles that I have been proposing, and pointed out that it will be necessary for India to participate in a responsible manner in an effective post-2013 framework. Prime Minister Singh responded positively by stating that he will consider seriously the long-term targets, and also consider positively participation in a post-2013 framework. I agreed with Prime Minister Singh to further strengthen cooperation between our two countries in this area as well.

Furthermore, we confirmed that we shall cooperate for the denuclearization of North Korea and the early resolution of the abduction issue; and also agreed to cooperate in the fight against terrorism.

Through my meeting with Prime Minister Singh, the speech I delivered to the Parliament, and also through exchange of views with representatives of the business communities and Universities of our two countries, I was able to renew my understanding, my sense that Japan and India are two major democracies in Asia that share common basic values such as freedom, democracy and human rights, and that Japan-India relations are bilateral relations with the greatest potential of all bilateral relations.

In the run up to Prime Minister Singh's Japan visit next year, I shall see to it that the results of my visit this time shall be implemented steadily; and together with the Prime Minister I shall strive to further advance the bilateral relations between Japan and India.

**Question (Kyoto News Service):** I would like to put this question to both Prime Ministers. This relates to nuclear cooperation. First of all, in the area of nuclear cooperation Prime Minister Singh, what would you expect from the Government of Japan?

This is my question to Prime Minister Abe. To support India-US civilian nuclear cooperation, some suggest, contradicts with the Japan's non-nuclear policy since Japan is a country that advocates nuclear abolition. How would you respond to this matter?

**Dr. Manmohan Singh, Prime Minister of India:** India and the United States have reached agreement on cooperation relating to civil nuclear issues. There are several stages still to be undergone, if this agreement is to be operationalised. We have to go to the International Atomic Energy Agency to get an agreed India-Specific Safeguards Agreement. Then, we have to go to the Nuclear Suppliers Group to relax their present restrictive attitude to trade with India in nuclear materials and equipment, and technologies. My sincere hope is that when this matter comes before the Nuclear Suppliers Group we will have the support of the Japanese Government.

**H.E. Mr. Shinzo Abe, Prime Minister of Japan:** Let me respond to that question. Japan certainly is aware of the strategic importance of India. We also understand the necessity for India, a country with a population of one billion, to try and respond to the increasing energy demand of the country whilst addressing the global warming issue by utilizing nuclear energy. Having said that, Japan as the only country that had suffered atomic bombing, attaches particular importance to nuclear non-proliferation and nuclear disarmament. Therefore, we are of the view that we have to watch very closely the implications this matter may have on international nuclear disarmament and nonproliferation regime.

With regard to the question of nuclear cooperation with India, at the international stage India will be negotiating the safeguards measures agreement with IAEA, and then there will be discussions at the Nuclear Suppliers Group. I told Prime Minister Singh that it is indispensable, it is essential for India to address appropriately negotiations with IAEA in order to respond to the concerns of Japan and the international community. As far as Japan is concerned, we shall also intend to positively engage in international discussions in a thorough manner.

**Question (Sarita Brara, All India Radio):** This question is addressed to Dr. Manmohan Singh. You have talked about the two projects - industrial corridor between Delhi and Mumbai, and the Delhi, Mumbai, Kolkata freight corridor - as the shining examples of enhanced bilateral cooperation. But what has been the tangible progress in your discussions on the two projects?

**Dr. Manmohan Singh, Prime Minister of India:** A lot of work has been done but a lot more needs to be done to operationalise these projects. There are project reports to be prepared. Some of these reports will have to be examined by the Japanese aid-giving agencies. That process is underway. We have assurance at the level of the Japanese Government of their support for both these projects. But I think project details have to be prepared, examined, and evaluated. That will itself take quite some time.

**Question (Japanese Press):** I would like to ask a question related to global warming. This is addressed to both Prime Ministers. Prime Minister Abe, you mentioned earlier that Prime Minister Manmohan Singh spoke highly of your proposal Cool Earth 50. But I also gather that there was some difference of positions or views with regard to the target year of 2050. I wonder, Prime Minister Abe, if the result has been as you had expected. Also, towards effective reduction of greenhouse gas emissions in the future, how do you intend to seek out concrete measures with India? My question for Prime Minister Manmohan Singh is, what is your view with regard to this target of 2050?

**H.E. Shinzo Abe, Prime Minister of Japan:** If I may lead off, I explained about my proposal of Cool Earth 50 and the long-term target of reducing by half the greenhouse gas emissions by the year 2050 and also the three principles. Prime Minister Singh spoke highly of this proposal in response to my explanation. Prime Minister Singh also expressed his determination to participate in an effective framework for the period beyond 2013 with me, a framework in which all countries will be participating.

I would say that this indeed represents a certain measure of progress towards the resolution of this climate change issue. Indeed for Japan and India to cooperate on matters of common challenge for the international community, does represent a shining example of this global partnership between our two countries. We would like to engage in cooperation with India at bilateral as well as multilateral levels in the days ahead, and would also like to work on cooperation involving Japan's energy conservation technology as well.

**Dr. Manmohan Singh, Prime Minister of India:** Global warming is a global problem. The whole world shares a single common environment. So, all countries of the world have an obligation to contribute in accordance with their capacity to the solution of the global problem of global warming. Prime Minister Abe has made a very important contribution to the ongoing debate how to tackle this problem and I certainly applaud his initiative in this regard. As far as India is concerned, we are committed to work with other likeminded countries to find appropriate solutions to this problem consistent with the universally accepted principle of common but differentiated responsibilities. As I mentioned to Prime Minister Abe, the world has to find a balance between the twin imperatives of environment protection, control of global warming and promoting accelerated economic and social development of the poor countries like India. Therefore, I welcome this debate on these twin issues. In this context we greatly appreciate our working together with Japan and other like-minded countries.

**Question (Maya Mirchandani, NDTV):** In the wake of what you have said regarding seeking Japan's support at the NSG, how soon do you propose to push this along given your domestic constraints, and also the Left's demand that you hold all negotiations on this at the moment?

**Dr. Manmohan Singh, Prime Minister of India:** That is a naughty question but I will try to answer it. It is certainly true that we have I think some turbulence in the political air in Delhi, but I am confident we shall be able to overcome it. As someone said, if winter comes, can spring be far behind.

**369. Briefing Points by Official Spokesman on Prime Minister's meeting with Japanese Prime Minister Fukuda.**

**Singapore, November 21, 1007.**

- The Prime Minister had a bilateral meeting with Prime Minister Yasuo Fukuda of Japan today. This was Prime Minister's first meeting with Prime Minister Fukuda. The meeting was marked by warmth and friendship. The two Prime Ministers reiterated their commitment to Strategic and Global Partnership which has been established between India and Japan, and exchanged views on the way to deepen the partnership. They agreed on the importance of maintaining regular high level exchanges and the need to expedite progress on projects that are part of the Special Economic Partnership Initiative. They reviewed the progress in regard to the Dedicated Freight Corridor and the Delhi-Mumbai Industrial Corridor.
- Both Prime Ministers shared the view that the East Asia Summit is an important building block for the creation of an Asian Economic Community, and pledged to work closely to further this objective. They agreed to strengthen their cooperation in regional and multilateral fora on important issues such as UN Security Council Reforms and Climate Change.
- Prime Minister Fukuda invited Prime Minister to visit Japan next year. Prime Minister has accepted the invitation with pleasure.

**370. Press Release of the Ministry of External Affairs on the second meeting of the Nalanda Mentor Group held in Tokyo.**

**New Delhi, December 17, 2007.**

The Government of India has established a Nalanda Mentor Group headed by Nobel Laureate Professor Amartya Sen which is to make proposals that would facilitate the revival of Nalanda as a Centre for Cultural Exchange between East Asia and South Asia, examine the framework and structure of international cooperation and partnership to govern the establishment of the University and to suggest the governance structure, modalities of finance and the academic scheme of the proposed University.

2. The Nalanda Mentor Group held its first meeting in Singapore in July 2007. The second meeting of the Nalanda Mentor Group was held in Tokyo from December 14 -15, 2007. The meeting reviewed the developments since the first meeting of the Mentor Group held in Singapore. The Mentor Group referred, in particular, to the understanding reached at the East Asia Summit meeting in Singapore in November, 2007 welcoming the revival of Nalanda University, and the hosting of the Nalanda Exhibition in Singapore. Members noted that since the last meeting of the Nalanda Mentor Group in Singapore, the Nalanda project has been receiving international attention.
3. The importance of the project in the context of an Asian renaissance was emphasized. Drawing attention to the social, economic and intellectual aspects of Asia, the Mentor Group renewed its conviction that Nalanda University should focus on becoming a Centre of Excellence. Stressing that it should draw on an understanding of the past while remaining contemporary and emphasizing its relevance to the future, the Mentor Group resolved that the vision of the university would be based on a global philosophy while maintaining local relevance.
4. The Mentor Group agreed that Nalanda University should be an international university enjoying academic autonomy. It would be a secular academic institution. It would be established through an inter-governmental agreement between the participating countries.
5. The Mentor Group proposed that the University should have the

following schools upon its establishment:

- (i) Buddhist Studies, Philosophy and Comparative Religions;
  - (ii) Historical Studies;
  - (iii) International Relations & Peace Studies;
  - (iv) Business Management and Development Studies;
  - (v) Languages and Literature; and
  - (vi) Ecology and Environmental Studies.
6. The Mentor Group also deliberated on the issues pertaining to the governance and interim arrangements, the selection of key personnel and the financing plan for the Nalanda University.
  7. The Mentor Group will continue its discussions in China and India for finalizing its report for the establishment of the Nalanda University.
  8. As an objective for the coming year, a framework for the proposed international university in Nalanda, is to be worked out to be ready by the time of the next East Asia Summit in 2008.
  9. The Mentor Group conveyed its gratitude to the Government of Japan for hosting the second meeting of the Nalanda Mentor Group.
  10. The Mentor Group considered and endorsed a proposal to establish a research and teaching entity in Singapore to be called the Srivijaya Center which would work in cooperation with the Nalanda University.

## KOREA, REPUBLIC OF

### **371. Statement by Official Spokesperson on External Affairs Minister's visit to Thailand and Republic of Korea.**

**New Delhi, September 11, 2007.**

**Official Spokesperson:** Good afternoon. This is basically to announce the visit of the External Affairs Minister, Shri Pranab Mukherjee to Thailand and to the Republic of Korea. He leaves on 13th of September and would be returning after visiting both countries on the 18th of September. He will be there in Bangkok on 14th and 15th of September. He will be co-chairing the 5th Joint Commission Meeting between India and Thailand on September 14th. The next day he is supposed to meet the Indian Heads of Missions in the area.

After the Joint Commission Meeting, the External Affairs Minister is expected to have a bilateral meeting with the Foreign Minister Mr. Nitya Pibulsonggram to discuss bilateral and other issues and will also call on His Majesty the King of Thailand, and the Prime Minister of Thailand. Her Royal Highness the Princess Maha Chakri Sirindhorn will host a dinner in External Affairs Minister's honour. The Joint Commission, which is the main purpose of the visit, covers cooperation in areas as diverse as trade and investment, civil aviation, transportation linkages, agricultural cooperation, fisheries, tourism, defence, security, science and technology, energy, culture and so on. We expect that there will be a signing at the end of the meeting, of the agreed minutes of the Joint Commission. During this visit, he will also inaugurate an exhibition of Indian contemporary art and will make a keynote address on India's Look-East Policy "Implications for Thailand and South-East Asia at the Institute of Security and International Studies in the Chulalongkorn University.

From Thailand, the External Affairs Minister will go to ROK at the invitation of the Minister of Foreign Affairs and Trade Mr. Song Min-soon. During the visit to ROK, the External Affairs Minister will co-chair the 5th Meeting of the India-ROK Joint Commission. During his stay, he will also exchange views with the Korean leadership on several issues of mutual interest. This will be the first visit by the Indian Foreign Minister to ROK in the last three years, though there have been a number of other visits including at the Summit level - President of ROK had visited India in 2004, and in 2006 the then President Abdul Kalam had visited ROK. Besides the Joint Commission

meeting, the External Affairs Minister will also call on President of ROK and other leaders. He will deliver an address at the Institute of Foreign Affairs and National Security.

Trade between the two countries, which will naturally be one of the areas of interest, stands as per 2006 figures at US\$ 7.1 billion, and the target is US\$ 10 billion by 2008. ROK is the ninth largest foreign investor in India. Several Korean industrial majors are now household names in India. POSCO, one of the largest manufacturers of steel in the world, has announced an investment of US\$12 billion for an integrated steel plant to produce 12 million MT of steel at Paradip, Orissa. This is the largest single foreign investment to date in India. The framework for facilitation of further trade and investment is already in place. We have a bilateral Air Services Agreement; a bilateral Investment Protection Agreement; and an Agreement on Mutual Cooperation in Customs. Currently an updated Double Taxation Avoidance Agreement is under negotiation. We have also commenced negotiations for a Comprehensive Economic Partnership Agreement. External Affairs Minister's visit will naturally provide an opportunity of looking at the progress of these negotiations and giving them a boost.

Also, other areas on which so far there has been limited interaction between the two countries - areas of culture, education, tourism - will be focused upon, as well as the issue of simplification of visa rules for Indian business persons who would like to visit ROK for their work.

Multilateral issues are also likely to come up. India and ROK are partners in the ARF, in the East-Asia Summit and in ASEM processes. India, as you will recall, had invited ROK to be an observer at the SAARC meeting earlier this year and the delegation had been led by the Korean Foreign Minister. So, regional and multilateral issues are also going to be discussed. So, the visit takes place in the context of significant forward movement in several areas since the last visit of Indian Foreign Minister in December, 2004.

**372. Joint Press Release on the visit of Minister of External Affairs Pranab Mukherjee to the Republic of Korea.****Seoul, September 17, 2007.**

1. H.E. Mr. Pranab Mukherjee, Minister of External Affairs of India is paying an official visit to the Republic of Korea from September 16 to 18, 2007 at the invitation of H.E. Mr. Song Min-soon, Minister of Foreign Affairs and Trade of the Republic of Korea. The two Ministers held one-to-one meeting and co-chaired the 5th ROK-India Joint Commission in Seoul on 17 September 2007. The Minister of External Affairs of India also called on H.E. Mr. Roh Moo-hyun, President of the Republic of Korea and H.E. Mr. Im Chae-jung, Speaker of National Assembly, and met with H.E. Mr. Kim Jang-soo, Minister of National Defence.
2. The two Ministers noted with satisfaction that bilateral relations have gained a new momentum following the establishment of a "Long-term Cooperative Partnership for Peace and Prosperity" during the State visit of the President of the Republic of Korea to India in October 2004. They expressed their determination to accelerate the process of strengthening bilateral relations through the implementation of understandings and agreements reached during the visits of the President of the Republic of Korea to India in October 2004 and the President of India to the Republic of Korea in February 2006.
3. The two Ministers discussed ways to enhance bilateral relations and to further develop cooperation on regional and international issues of mutual interest. They reiterated their readiness to cooperate in regional and multilateral frameworks like the ASEAN Regional Forum (ARF). They shared the view that the East Asia Summit (EAS) could play a significant role in expanding regional cooperation and community building in the region. They welcomed the participation of the Republic of Korea as an Observer at the 14th SAARC Summit in New Delhi in April 2007, and agreed that this would enhance regional linkages between SAARC countries and the East Asian region.
4. The Minister of External Affairs of India welcomed the progress achieved at the Six-Party Talks on the resolution of the North Korean nuclear issue. He also welcomed the significant step taken by the leaders of the ROK and the DPRK to hold the 2nd Summit meeting

and expressed the hope that the Summit would promote inter-Korean relations and contribute to maintaining peace and security on the Korean Peninsula. The Minister of Foreign Affairs and Trade of the Republic of Korea expressed its appreciation on it and requested continued support of India.

5. The two Ministers highlighted the importance of high level exchanges of visits and agreed on the need for further intensifying them. The two Ministers noted with satisfaction the work of the bilateral dialogue mechanisms. They agreed on the importance of annual meetings of the India - ROK Joint Commission in order to ensure steady and all round development of bilateral relations. They also agreed that the third meeting of the Foreign Policy and Security Dialogue will be held in New Delhi on mutually convenient dates later this year.
6. They agreed that the momentum of high level exchanges created by the visit of the Minister of National Defence of the Republic of Korea to India in May 2007 should be maintained and further enhanced<sup>1</sup>.
7. The two Ministers reviewed all areas of economic cooperation between India and the Republic of Korea. They expressed satisfaction on the meaningful progress made in negotiations on the Comprehensive Economic Partnership Agreement (CEPA) and reiterated their desire to conclude the negotiations by the end of 2007. They also welcomed the steady growth in bilateral trade and investment, and expressed their confidence that the trade target of US\$ 10 billion could be achieved before 2008 through joint efforts of both countries. The two Ministers agreed that strong and diversified economic cooperation lies at the core of the partnership, and agreed

---

1. Though there was no reference to India-US Civil Nuclear Energy deal, media reports quoting Indian sources said on the 17th September that the Republic of Korea (ROK) "may take a positive view" as and when the U.S.-India civilian nuclear energy deal "is taken up in the Nuclear Suppliers Group (NSG)." External Affairs Ministry spokesman Navtej Sarna said: "They [South Korean leaders] are aware of our concerns for access to civilian nuclear energy." This positive "hope," expressed after External Affairs Minister Pranab Mukherjee's talks with top leaders of the ROK, punctuated his "very substantive visit." The discussions took place in the context of a possible move towards "a strategic dimension" in bilateral ties. Ambassador N. Parthasarathi said the two countries were now engaged in "a comprehensive dialogue" of cooperation. This was reflected in Mr. Mukherjee's talks with ROK President Roh Moo-hyun and Foreign Minister Song Min-soon, besides National Defence Minister Kim Jang-soo and National Assembly Speaker Lim Chae-jung. Incidentally Prime Minister Manmohan Singh's Special Envoy Shyam Saran had already "sensitised" Seoul to India's nuclear energy requirements and its non-proliferation credentials.

to work together to improve the environment for enlarged trade and investment. In particular, they attached great importance to POSCO's project in the state of Orissa and agreed to provide all possible assistance in expediting the implementation of the project.

8. The two Ministers also underscored the importance of expanding people-to-people contacts. They agreed to explore new areas of cooperation in culture, education, science & technology and tourism fields.
9. The Minister of External Affairs of India invited the Minister of Foreign Affairs and Trade of the Republic of Korea to pay a bilateral visit to India for the 6th Joint Commission Meeting at a mutually convenient time in 2008. The Minister of Foreign Affairs and Trade of the Republic of Korea accepted the invitation.

**373. Address of External Affairs Minister Pranab Mukherjee at the Korean Institute of Foreign Affairs and National Security on “India’s Look East Policy.”**

**Seoul, September 17, 2007.**

Please see Document No. 326...

### **374. Statement by Official Spokesperson on the Inter-Korean Summit meeting.**

**New Delhi, October 5, 2007.**

Government of India welcomes the historic Summit Meeting between President Roh Moo-hyun of the Republic of Korea and Chairman Kim Jong Il of the National Defence Commission of the Democratic People's Republic of Korea in Pyongyang from October 2-4, 2007. We welcome the positive outcomes and initiatives taken by the two leaders to promote peace and prosperity on the Korean Peninsula<sup>1</sup>. We also welcome the progress that has been made at the Second Session of the Sixth Round of the Six Party Talks held in Beijing<sup>2</sup> from 27-30 September, 2007.

- 
1. The Spokesman was referring to the two Korea accord reached on October 4 "to resolve the issue of unification on their own initiative" and in accordance with "the spirit of the Korean people themselves." After two-day of intensive talks in Pyongyang, President Roh Moo-hyun of the Republic of Korea and Chairman Kim Jong-il of DPRK pledged to set the tone and pace for the establishment of a new order of peace on the divided peninsula that the two countries share. Co-prosperity was emphasized as the objective. The "need to build a permanent peace regime" was portrayed as the centre-piece of "the reunification-oriented" agreement. Towards reunification itself, the two countries expressed readiness to "transcend the differences in ideology and systems". In an eight-point agreement announced after only the second inter-Korean summit in over 50 years, the two leaders agreed to "oppose [any future] war". It may be recalled that on August 8, the Spokesman of the MEA had welcomed the decision of the two leaders to meet later for the purpose. He had said: 'Government of India welcomes the decision. We support all efforts for peace and stability in the Korean Peninsula, and we hope that the Summit Meeting in Pyongyang will further contribute in a positive way to this objective.'
  2. The other major development the Spokesman was referring to the accord reached in Beijing among the six powers on DPRK agreeing to disable its nuclear weapons facilities by the end of the year 2007. The DPRK also signaled its willingness to allow the US to lead a group of experts to Pyongyang within two weeks "to prepare for disablement" its nuclear facilities. The latest agreement committed the North to make a "complete and correct declaration of all its nuclear programmes" \_ which the U.S. has said would include the uranium issue.

## MALAYSIA

### **375. Press Release issued by the Ministry of External Affairs on the 4th Session of the India-Malaysia Joint Commission.**

**New Delhi, February 15, 2007.**

The Fourth Session of the India-Malaysia Joint Commission will be held in New Delhi on February 16, 2007. The Malaysian delegation will be led by H.E. Dato' Seri Syed Hamid Albar, Minister of Foreign Affairs of Malaysia and the Indian delegation will be led by H.E. Shri Pranab Mukherjee, Minister of External Affairs of the Government of India.

2. The proceedings will begin by a call by the Foreign Minister of Malaysia on the Minister of External Affairs followed by a Plenary Session of the two delegations to the Joint Commission. The meeting will be held in Hyderabad House.
3. The two Ministers will review the progress of bilateral relations since the last meeting of the Joint Commission and discuss bilateral cooperation in diverse areas including trade, investment, banking, civil aviation, shipping, ports, railways, tourism, culture, agriculture, health, energy, science and technology, information technology, biotechnology, space, defence and security, labour issues, immigration and consular issues, information, youth and sports, education, technical cooperation and other areas.
4. At the conclusion of the Joint Commission Meeting, the two Ministers will sign the Agreed Minutes of the Fourth Session of the India-Malaysia Joint Commission Meeting.

**376. Briefing points by Official Spokesperson on Prime Minister's meeting with Malaysian Prime Minister in Singapore.**

**Singapore, November 21, 2007.**

- Prime Minister met the Prime Minister of Malaysia, Mr Datuk Seri Abdullah Ahmad Badawi, today at 16:00 hours. The meeting took place in an extremely warm and cordial atmosphere. The Malaysian Prime Minister invited PM to visit Malaysia.
- Both leaders reviewed the progress of negotiations on the India-ASEAN FTA and agreed to accelerate efforts to conclude them by March 2008.
- PM welcomed the participation of Malaysian companies in India particularly in infrastructure development. Both sides agreed to increase bilateral trade and economic cooperation as well as investment in each other's country.
- It was a useful and productive meeting. The leaders looked forward to meeting once again during the forthcoming CHOGM Summit in Kampala.

**377. Suo Motu Statement by External Affairs Minister Pranab Mukherjee in Lok Sabha regarding 'HINDRAF Demonstration in Malaysia'.**

**New Delhi, November 30, 2007.**

During the morning session, some Hon'ble Members expressed their concern regarding the alleged harassment of participants of the rally organized by the Hindu Rights Action Force (HINDRAF) in Kuala Lumpur on November 25, 2007 and subsequent related matters. The stated purpose of the rally was to handover a petition to the British High Commission in Kuala Lumpur seeking the support of Queen Elizabeth II for a class action suit filed in the UK for the exploitation of Indians who were brought to Malaysia as indentured labour.

Government remains deeply solicitous for the welfare of people of Indian origin living abroad. As Members are aware, there is a large community of people of Indian origin in Malaysia who are citizens of that country. We have friendly relations with Malaysia and we are in touch with the Malaysian authorities in the related matter<sup>1</sup>.

- 
1. A similar statement was made by the EAM in the Rajya Sabha also the same day. On the sidelines of the India-European Union Summit, Prime Minister Manmohan Singh too voiced concern over the issue. "This is a matter which concerns us. Whenever people of India run into difficulties, it is a source of concern," he told reporters when asked to comment on the matter.
- The issue was sparked off when on November 25 the HINDRAF, an umbrella group of non-governmental associations, had organised a protest rally in Kuala Lumpur to turn the international focus on the alleged "marginalisation" of nearly two million Malaysian Indians. In a letter addressed to British Prime Minister Gordon Brown, this umbrella group of non-governmental organisations sought his intervention in this regard. There is also an appeal to the UK to refer the matter to the International Court of Justice.
- The Malaysian Police used tear gas and water cannon to disperse the protesting crowds. The Chief Minister of Tamil Nadu had expressed his concern and requested New Delhi to intervene in favour of the Indian community.
- Meanwhile in Kuala Lumpur the Works Minister and President of the Malaysian Indian Congress Semi Vellu announced the appointment of a Panel to look into the grievances of the community. He said that Prime Minister Abdullah Ahmad Badawi had now asked the party to set up a "special committee" to submit a comprehensive report on the demands of the community. This report would be a sequel to the MIC's report, submitted to Mr. Badawi in June, under the title "New mechanism for the Indian community." The MIC is a constituent of the multi-racial coalition government headed by the United Malays National Organisation. The MIC will also set up a hotline to receive complaints ranging from those

---

concerning Tamil schools to issues relating to temples, according to Mr. Samy Vellu. In a related development, Mr. Badawi said he did not rule out the possibility of invoking the strict Internal Security Act (ISA) against HINDRAF. He said "the ISA is a preventive measure that can protect the country from serious disturbances of the peace. The ISA is still there and, when appropriate, will definitely be used. The Prime Minister accused the Hindraf of maligning the Malaysian Government through its actions and utterances. Referring to Prime Minister and other leaders' refusal to see the leaders of the HINDRAF while they visited New Delhi last week, the Malaysian Prime Minister Badawi was quoted by *the Star* Newspaper on December 10<sup>th</sup> to "appreciate" Indian stand and said "We have a good, firm relationship with India, a relationship based on mutual respect and understanding.... Any issue that crops up should be solved within the country itself, based on its own laws." Similarly Nazri Abdul Aziz, Minister in the Malaysian Prime Minister's Department, expressed appreciation for what Malaysia saw as New Delhi's stand of not extending support to the Hindraf campaign against the alleged "marginalisation" of ethnic Indians. (It may be recalled that the Malaysian Government had reacted strongly to initial comments by the Tamil Nadu Chief Minister Karunanidhi as well as concern by Prime Minister Manmohan Singh and External Affairs Minister Pranab Mukherjee, and accused India of trying to meddle in Malaysia's internal affairs. On being told by Kuala Lumpur of Hindraf's suspected terror links, Mukherjee subsequently said: "A terrorist is a terrorist... he has no religion, no nationality." However, Hindraf has denied having links with any terrorist organisation. Hindraf leaders are being described by the Kuala Lumpur media as extremists, and the government is reportedly probing their suspected links with terror groups, particularly the Liberation Tigers of Tamil Eelam. Meanwhile a Malaysian High Court on December 10 ordered trial of the Hindu Rights Action Force (Hindraf) leaders on sedition charges, amid an official crackdown on Opposition politicians and lawyers campaigning for human rights. Referring to the trial Malaysian Prime Minister Abdullah Ahmad Badawi said: "If the choice is between public safety and public freedom, I do not hesitate to say that public safety will always win." He accused that the Hindraf was seeking to destabilise Malaysia. Separately in a rebuke of Hindraf leadership, Deputy Prime Minister Najib Tun Razak said: "We don't have to dance to Hindraf's tune? ... Who are they? They don't represent the Indian Malaysian community. If they go against the law, we will definitely take action. In fact, we have already started taking action."

## MONGOLIA

### **378. Remarks by External Affairs Minister Pranab Mukherjee at the book release “Mongolia: The land of Blue Skies” at India International Centre.**

**New Delhi, December 11, 2007.**

My colleague, Sh Pallam Raju, Minister of State for Defence,

Shri Gauri Shankar Gupta,

Your Excellency Ambassador of Mongolia,

Secretary West, Shri Nalin Surie,

Distinguished Guests,

Ladies and Gentlemen,

As a child, perhaps like children all over the world, I was fascinated by the adventures and exploits of the great Mongol leader Chinggis Khan. His overland journey through Asia and into Europe in the 13th century was as historically significant as the sea journeys of Vasco Da Gama or Christopher Columbus in heralding the new age of globalization that was to change the world forever. His descendants founded the great Mughal Empire, whose invaluable contribution to our history is symbolized by the Taj Mahal and the other great monuments of that time.

Of course, India's contacts with Mongolia began far before this time. The message of the Buddha that was carried by Indians to Central, East and South East Asia, also made its way to the vast steppes of Mongolia where it has found a permanent home for over two millennia. Mongolian monks studied at Nalanda University during its heyday. And over the centuries, some of the great works of Indian spiritual and secular literature, including the *Ramayana* and Kalidas' *Megha Doota* were to find their way into the body of sacred literature – the *Tanjur* and the *Kanjur* – that the Mongolian people now consider their civilizational heritage. The Mongolian people describe India as a “spiritual neighbour”. This is a great tribute when you recall that such a great distance separates us geographically.

Prime Minister Jawaharlal Nehru and other leaders of modern India had a very special regard for the Mongolian people. It was at Prime Minister

Nehru's behest that a Mongolian delegation visited India for the 'Asian Relations Conference' in 1947. These ties have been steadily reinforced and nurtured in the sixty years after our independence through exchange of high level political visits and through cooperation in diverse areas, including in the field of education, training, agriculture and information technology. Since 1990, Mongolia's transition to market economy has also opened new opportunities for economic cooperation. In 2004, during the visit of the Prime Minister of Mongolia, we also established a Partnership to symbolize our shared commitment to see ever-expanding ties at all levels between our two peoples and two countries. We work together in regional and multilateral forums. We acknowledge with gratitude the unwavering support of Mongolia to our aspirations for permanent membership of the UN Security Council.

We will work to enhance these multi-faceted ties in the years ahead.

The publication and release of the book *Mongolia: The Land of Blue Skies* is therefore a timely and useful contribution to the promotion of wider understanding about Mongolia and its people in India. It gives a comprehensive introduction to its long and glorious history and contributions to civilization, as well the Mongolia of today. It also introduces Indians to modern Mongolia, with whom we share the values of democracy and rule of law. The beautiful photographs in the book complement the rich and informative text. I am particularly pleased that Shri Gauri Shankar Gupta, our former Ambassador to Mongolia, has authored this beautiful volume. In doing so, he has followed many of his illustrious predecessors in the Indian Foreign Service who have written with great knowledge and sensitivity about the countries they have served in. It is important that our representatives to foreign nations understand and empathize with the countries in which they serve. They not only represent us in foreign lands; they are also bridges that serve to promote two-way understanding and to share information with the people of India. I congratulate Shri Gupta for performing this important task, and also Roli Books for publishing this book. I believe that its publication is timely. It will create better awareness amongst Indians about Mongolia, including the common heritage that we share and our deep friendship and respect for each others' way of life that stretches back to the times of the Buddha. I commend all those associated with this fine effort.

Thank you.

## MYANMAR

### **379. Press Release of the Ministry of External Affairs on the visit of External Affairs Minister Pranab Mukherjee to Myanmar.**

**New Delhi, January 22, 2007.**

Shri Pranab Mukherjee, Minister for External Affairs visited Myanmar from 19-21 January, 2007. During his visit, he met with Vice Senior General Maung Aye, Vice Chairman of the ruling State Peace and Development Council (SPDC), General Soe Win, Prime Minister, U Nyan. Win, Minister for Foreign Affairs, Brig. Gen. Thura Myint Maung, Minister for Religious Affairs, U Soe Tha, Minister for National Planning & Economic Development.

EAM's visit is a part of a series of high-level contacts that we have had over the last one year. Our President paid a successful visit to Myanmar in March 2006 and the visits of General Thura Shwe Mann, Chief of General Staff as well as Home Minister General Maung Oo followed, both in December 2006. Myanmar is a close and friendly neighbour with whom India shares links of geography, culture and religion. There is a large population of persons of Indian Origin in Myanmar. We also share a long border of about 1600 Kms.

While welcoming Myanmar's commitment not to allow its territory to be used for activities inimical to India, EAM sought their continued and sustained cooperation in this regard. Discussions between the two sides also centred on ways and means to strengthen cooperation in the energy sector. Apart from ways to augment trade ties, infrastructure projects were also discussed. Both sides stressed the need for early conclusion of a Bilateral Investment Promotion and Protection Agreement and an Agreement on the Avoidance of Double Taxation.

EAM was received warmly by the Myanmar leadership and discussions were held in a very cordial and friendly atmosphere reflecting the excellent relations between the two countries<sup>1</sup>.

---

<sup>1</sup> Earlier at the start of his visit, External Affairs Minister told journalists in Yangon that India regarded the issue of democracy and human rights as "an internal matter" of that country. This was welcome to the Myanmar as only a few days earlier United States had unsuccessfully tried to censor Myanmar in the UN Security Council. Mr. Mukherjee said

---

that India had to deal with governments "as they exist... We are not interested in exporting our own ideology. We are a democracy and we would like democracy to flourish everywhere, but this is for every country to decide for itself." At the same time, he said that the Myanmar authorities had their own programme for "national reconciliation" and expressed the hope that this process would "lead to its logical conclusion." Explaining the importance of Myanmar to India, EAM said the two countries shared a border that was 1600 km long. "Myanmar is our only neighbour which is also a member of the ASEAN. So our relationship is very much in keeping with India's 'Look-East' policy." Two specific issues he highlighted were energy and cooperation and enhanced transportation links between the two countries. Myanmar is also an oil rich country and ONGC Videsh and GAIL already had a 30 percent stake in two off-shore blocks. "We would like to increase our participation and also construct a natural gas pipeline from here to India," said Mr. Mukherjee. He added that the earlier plan of a gas pipeline via Bangladesh had run aground because Dhaka "put extraneous conditions" and now India was looking for a bilateral project. "Of course, in order to invest in such a pipeline we need an assured supply of gas," he said. Meanwhile Vice Senior General Maung Aye, second in command of Myanmar's military regime said his government was not yet ready to guarantee assured supplies of gas for the proposed pipeline because the requisite survey of reserves was not yet complete. He said the survey would be completed by April or May. If the reserve prove to be large enough and India was able to offer a competitive price, his government would have no objection to earmarking it for an Indian pipeline. The External Affairs Minister said India was interested in developing border infrastructure and improving physical connectivity between Myanmar and India. In particular India was keen to work on a project to connect Sitwe, Myanmar's principal port on the Bay of Bengal with Mizoram via the Kaladan inland waterway and build a 65-km long road. On the political importance of Myanmar to India, the EAM recalled the assurances of the Myanmar leadership that elements hostile to India would not be allowed to use their country's territory. Media report suggested that India was prepared to offer a soft loan of \$ 10 million so that the facilities in Sitwe could be improved and a link road to the Mizoram border constructed. During his discussions EAM also showed Indian readiness to provide more locomotives and rolling stock for Myanmar's metre gauge network. Media reports on the meeting of EAM with Gen. Maung Aye suggested that India promised Myanmar's military rulers a "favourable response" to their request for military equipment. EAM conveyed the Indian decision to Gen. Aye during his 45-minute meeting. Speaking to reporters after the meeting Mr. Mukherjee said that he told his hosts that India was willing to expand the ambit of military cooperation between the two countries. A specific request for equipment had been made by Gen. Thura Shwe Mann, the regime's number three during his visit to New Delhi last December. "We have examined the request and decided to give a favourable response", Mr. Mukherjee said. Apart from equipment, Mr. Mukherjee said the Myanmar side wanted Indian help in servicing and upgrading their MiG fighter fleet. But since the intellectual property rights were Russian, this would require prior consent from Moscow.

Meanwhile Minister of State for Railways in reply to a question informed the Lok Sabha on April 26 that "the Ministry of External Affairs had, through Rail India Technical & Economic Services (RITES), carried out a feasibility study for India-Myanmar rail link. "The Report is currently under bilateral consultation. The likely expenditure as per the study on construction of new rail link between Jiribam - Moreh in India and Tamu-Kalay-Segyi in Myanmar is estimated to cost Rs. 4280 crore. The link will provide substantial benefit to bilateral trade between India and Myanmar. No specific timeframe has been set for these projects."

**380. Report on the Construction of the 100-km rail link on the Indian side of Myanmar in the Asian Highway Project.****New Delhi, March 22, 2007.**

A major initiative has been launched by the railways of India and Myanmar to work on a 315 km "missing rail link" to ensure cross-border travel and freight movement. On its part, India has already sanctioned funds for the construction of a 100-km patch on its side.

"There have been discussions going on between the railways of the two countries and things so far have been very smooth. Both sides have agreed to work towards forging this new relationship to complete the missing link of 315 km. We are taking up construction of 100 km of the link on the Indian side and the rest will also be completed in due course of time. It is likely to cost around Rs.1,100 crore," Railway Board Chairman J.P. Batra told presspersons.

The rail links with Pakistan and Bangladesh were running smoothly, Mr. Batra said. However, there was a break-up in the link between India and Myanmar to a length of 315 km. "Out of this missing link, 100 km on the India side has been sanctioned and discussions are on for the completion of the project. The Ministry of External Affairs is going into the issue of how the project could be funded. Myanmar has shown considerable interest and I am sure very shortly we will reach an agreement on the funding pattern." Progress had been made on the North-South link - Russia with India via Iran. Similarly, a corridor connecting China with India through Myanmar was also under consideration. The Governments of India, China and Myanmar were keen on putting in place a multi-modal transport system between their countries as part of a strategy to forge Asian links. Mr. Batra said India would sign a Trans-Asia Railway Agreement by the middle of the year in the United Nations, with the Union Cabinet passing it recently.

Policy planners from major railways across the globe are anxious to chalk out a plan for promoting early construction of "missing rail links" in the Trans-Asian network in order to tap the vast economic potential.

### **381. Statement by External Affairs Minister Pranab Mukherjee on the situation in Myanmar.**

**New York, September 26, 2007.**

We are concerned at the situation in Myanmar and are monitoring it closely. It is our hope that all sides will resolve their issues peacefully through dialogue<sup>1</sup>.

---

1. On the same day the Official Spokesman of the MEA in response to a question said in New Delhi: "The government of India is concerned at and is closely monitoring the situation in Myanmar. It is our hope that all sides will resolve their issues peacefully through dialogue. India has always believed that Myanmar's process of political reform and national reconciliation should be more inclusive and broad-based." The EAM and the Spokesman were responding to the situation created by the massive demonstrations by the Buddhist monks in Yangon near the residence of democracy leader and Nobel Laureate Aung San suu Kyi and joined in by a large crowd of people demanding democracy and protesting at the death of three monks in firing by the security forces. India's concerns were born out of security and economic concerns. The developments in Myanmar had the potential of upsetting India's security calculations in the northeast, besides interest in the hydrocarbon sector, other initiatives that added to the concern were breakthrough in getting an alternate terrestrial route to the northeast via Myanmar and bilateral and multilateral negotiations to promote greater economic cooperation. Only in the previous week India had signed for production sharing contacts in the three deep-water exploration blocks. In addition, India was part of a consortium looking for gas in two more blocks. India had also bettered its earlier offer to develop the Shitwe port after Myanmar objected to the original plan to New Delhi developing and operating the port facilities. Approved by External Affairs Minister Pranab Mukherjee, the new offer to build the port and hand it over immediately to Yangon was seen as more acceptable. "The major shift in paradigm of the project," would enable India to build a waterway and a road link to Mizoram. India is also engaged with Myanmar on stepping up of trade through more land routes as part of its Look-East policy. Mr. Mukherjee was keen that the northeast States are benefited in the process. India has invested heavily in the Myanmar's defence sector. It may be recalled that in May during the visit of Naval chief Admiral Suresh Mehta India had transferred to Myanmar an Islander aircraft. It was one of the three such aircraft which India had sold to Myanmar at "friendship price". In fact, plans were afoot to give Myanmar even more Islanders, bought from UK in the late-1970s, since the Indian Navy was phasing them. Moreover, apart from technical support and training, the transfer of 105mm light artillery guns, T-55 tanks, naval gun-boats, mortars, grenade-launchers, rifles and other small arms to Myanmar were also underway. India also planned to provide Myanmar with some armaments and electronic equipment, including radars manufactured by Bharat Electronics Ltd, for its warships like frigates and corvettes. In fact, Admiral Mehta's visit was just the latest in the series of high-level visits to Myanmar, with external affairs minister Pranab Mukherjee, Army chief General J J Singh and defence secretary Shekhar Dutt, among others, travelling to the country in recent times. In turn, India had managed to receive support from Myanmar in curbing anti-India militant activity on its territory. A clear enunciation of the policy in regard to violation of human rights in Myanmar was enunciated by India's Permanent Representative Ambassador Swashpawan Singh at the UN Human Rights Commission in Geneva on October 2. Please see Document No. 383.

As a close and friendly neighbour, India hopes to see a peaceful, stable and prosperous Myanmar, where all sections of the people will be included in a broad-based process of national reconciliation and political reform.

Myanmar's process of national reconciliation initiated by the authorities should be expedited.

**382. Press Release issued by the Permanent Mission of India on the meeting between External Affairs Minister Pranab Mukherjee and Foreign Minister of Myanmar in New York.**

**New York, October 1, 2007.**

External Affairs Minister Shri Pranab Mukherjee met the Foreign Minister of Myanmar, Mr. U Nyan Win, on the margins of the ongoing General Debate of the UN General Assembly today.

During the meeting, the External Affairs Minister expressed concern at the current situation in Myanmar, noting that as a close and friendly neighbour, India hoped to see peace, prosperity and stability in Myanmar. The Minister also expressed the hope that the process of national reconciliation and political reform, initiated by the Government of Myanmar, would be taken forward expeditiously. Further, he suggested that the Government could consider undertaking an inquiry into recent incidents and the use of force.

The situation in Myanmar also figured thereafter in the meeting between the External Affairs Minister and Mr. Ban Ki-moon, Secretary-General of the United Nations, on October 1, 2007

Earlier, Foreign Secretary Shivshanker Menon had met Mr. Ibrahim Gambari, Special Advisor of the UN Secretary General, on September 24. This meeting followed upon the visit of Mr. Gambari to New Delhi in July 2007, during which he held discussions with the Foreign Secretary regarding developments in Myanmar.

These meetings took place in context of India's continuing engagement on these issues.

**383. Statement by Permanent Representative Ambassador Swashpawan Singh at the 5<sup>th</sup> Special Session of the Human Rights Council on the Human Rights Situation in Myanmar.**

**Geneva, October 2, 2007.**

Mr. President,

My delegation would like to thank the High Commissioner for Human-Rights and the Special Rapporteur on Myanmar for their presentations. We also thank the delegation of Myanmar for their briefing on the current situation in the country.

2. Myanmar is a close and friendly neighbour with whom India shares links of geography, culture, history and religion. Our bilateral relations are reflective of these multifarious and traditional linkages. It is in this context that recent developments in Myanmar are a matter of concern for the Government of India and we are closely monitoring the situation there.
3. The External Affairs Minister of India met with the Foreign Minister of Myanmar in New York on 1 October 2007<sup>1</sup> on the margins of the ongoing General Debate of the UN General Assembly. During the meeting, the External Affairs Minister expressed concern at the current situation in Myanmar, noting that as a close and friendly neighbour, India hoped to see peace, prosperity and stability in Myanmar. The Minister also expressed the hope that the process of national reconciliation and political reform, initiated by the government of Myanmar, would be broad-based, inclusive and taken forward expeditiously. Further, he suggested that the Government of Myanmar consider undertaking an inquiry into recent incidents and the use of force.
4. Government of India believes that the release of Aung San Suu Kyi would be helpful in terms of the process of democratization and that she can contribute to the emergence of Myanmar as a democratic country.
5. India welcomes the visit of the Mr. Ibrahim Gambari, UNSG's Special

---

1. Please see Document No. 382.

Envoy to Myanmar and welcomes Government of Myanmar's engagements with the UN System which we see as indicative of their desire to continue to be fruitfully engaged with the international community. India's Foreign Secretary had met with Mr. Gambari in New York on September 24. This meeting followed upon the visit of Mr. Gambir to New Delhi in July 2007 during which he held discussions with the Foreign Secretary regarding developments in Myanmar. These meeting took place in the context of India's continuing engagement on these issues.

6. My delegation would work together with like-minded countries towards an outcome which is forward looking, non-condemnatory and seeks to engage the authorities in Myanmar in a constructive manner to facilitate a peaceful outcome<sup>2</sup>.

Thank you, Mr. President.

## **Human Right Council**

### **Fifth Special Session**

#### **Human Rights Situation in Myanmar**

##### **Explanation of Vote by INDIA**

Mr. Presidents,

India has always emphasized the importance of promotion and protection of human rights through dialogue and cooperation.

2. Media quoted official sources to suggest that while India was committed to a forward looking policy to meet the situation in Myanmar, India was opposed to any sanctions, because it felt regimes like this know how to deal with sanctions and pass on the whole weight to the people. India would like the regime to start the process of dialogue and let the people of Myanmar choose the direction they want. New Delhi believed that the military junta would initiate talks with the jailed pro-democracy leader Aung San Suu Kyi. New Delhi also believed that "India will soon get transit rights to the north-east through Myanmar," according to official Indian sources quoted in the media. "Ms. Suu Kyi seems ready to talk and find a solution. Our assessment is that Myanmar will start some sort of a broader dialogue process. The United Nations envoy to Myanmar, Ibrahim Gambari, is also hopeful, especially after the regime appointed a Vice-Minister to liaison with Ms. Suu Kyi. The Indian Ambassador in Myanmar has also met her as did Mr. Gambari," these sources said. "In our every conversation with the regime, we have conveyed our concern about Ms. Suu Kyi. We have also urged them to adopt an inclusive process and include the monks, an important social force, to help make the polity more broad-based. External Affairs Minister Pranab Mukherjee has suggested a probe into the bloodshed and fixing of responsibility and the regime appears to have taken some of the suggestions on board," they added.

2. It is in this context that we had expressed our willingness to work together with like-minded countries towards an outcome which is forward looking, non-condemnatory and seeks to engage the authorities in Myanmar in a constructive manner to facilitate a peaceful outcome.
3. We regret that the text of the resolution adopted is not fully in conformity with this approach. Further, its unhelpful tone does not contribute to effectively pursuing the objective of engaging constructively with the authorities in Myanmar which is essential to make a difference to the situation on the ground.
4. Despite these concerns my delegation has joined the consensus with the hope that the Council's further engagement on the issue will be undertaken in a more positive manner.

Thank you, Mr. President.

**384. Briefing Points by Official Spokesperson on the visit of Ibrahim Gambari, Special Envoy of UN Secretary General.**

**New Delhi, October 23, 2007.**

- H.E. Mr. Ibrahim Gambari, Special Envoy of UN Secretary General, visited New Delhi on 22-23 October 2007 as part of his consultations with countries in the region on the situation in Myanmar.
- During his visit, Mr. Gambari called on the Prime Minister and the External Affairs Minister. He also held discussions with the Foreign Secretary<sup>1</sup>. Recent developments in Myanmar and the ongoing efforts of the UN Secretary General's Good Offices were discussed.
- In his discussions, Mr. Gambari outlined the purpose of his mission which was to deliver a message from UN Secretary General, brief the Government of India on developments since his last visit to

---

1. According to media reports when Mr. Gambari met the Foreign Secretary on October 22, the latter emphasised that New Delhi favoured democracy in the country, but opposed coercion. He added that India had to keep in mind its interests in Myanmar while seeking reconciliation and democracy in the military-ruled country. They discussed ways in which the Myanmar leadership could see what the people of that country wanted. On October 24 speaking in Herbin(China) EAM opposed imposing sanctions on Myanmar and called

Myanmar and seek India's support for UN Secretary General's Good Offices and the Special Envoy's mission. He conveyed a message from UN Secretary General Mr. Ban Ki-Moon expressing encouragement over the initial steps taken by the Government of Myanmar at the suggestion of the UN Special Envoy and stressing the commitment of the UN Secretary General to facilitate a dialogue process in Myanmar. This message also conveyed his appreciation for the efforts by India, both bilaterally and in the context of the United Nations.

- In his meeting with Mr. Gambari, External Affairs Minister referred to his earlier meeting with H.E. Foreign Minister of Myanmar U Nyan Win in New York, during which he had stressed the need for expediting the implementation of the political reform and national reconciliation process so that the concerns of the international community are addressed. He emphasised that this process should be broad-based to include all sections of society. He also mentioned that the UN Good Offices should facilitate the political reform process in a constructive way, through an integrated and comprehensive approach.
- During Mr. Gambari's call, the Prime Minister expressed India's

---

for encouraging all stakeholders to advance political reforms and national reconciliation, a move jointly supported by China and Russia. "We believe that the initiative taken by the U.N. Secretary-General [Ban-Ki Moon] to open dialogue amongst the various stakeholders in Myanmar should be encouraged," External Affairs Minister Pranab Mukherjee said at a joint press conference after the end of the third standalone meeting of Foreign Ministers of India, China and Russia at Harbin. Mr. Mukherjee said India had also suggested that the process of political reform and national reconciliation should be expedited on a broad base and equally among all stakeholders. "We believe that Myanmar authorities should be encouraged to engage in the process of dialogue with the Special Envoy of the U.N. Secretary-General [Ibrahim Gambari], the initiative which he has taken should be encouraged to take it to the logical conclusion and there should not be any sanctions at this stage," the External Affairs Minister emphasised. Mr. Mukherjee acknowledged that the Myanmar issue had figured prominently during the trilateral meeting and they exchanged views on it. Ultimately, the issue of Myanmar should be resolved by the Myanmar government and the country's people, Chinese Foreign Minister Yang Jiechi said. He said China believed that the parties concerned would conduct dialogue to help Myanmar restore stability and improve the life of the people and promote democracy and development in Myanmar. External Affairs Minister again referred to developments in Myanmar . when he told journalists on the sidelines of the Conference on Asian Economic Integration in New Delhi in on November 12 and said: "We want political reforms and the process of reconciliation to start immediately and it has to be inclusive... As far as possible, important political prisoners should be released. There should be some sort of inquiry into the excesses which were resorted to as it is being alleged by the media and other sources."

support for the UN Secretary General's ongoing efforts to encourage a resumption of the dialogue process within Myanmar. The Prime Minister expressed satisfaction that Mr. Gambari would be returning to Myanmar very soon to carry his discussions forward.

- Earlier, on 20th October 2007, the Prime Minister had spoken to UN Secretary General, Mr. Ban Ki-Moon, on the situation in Myanmar. He reiterated India's conviction that the process of national reconciliation and political reform initiated by the Government of Myanmar should be taken forward expeditiously in an inclusive manner, including Daw Aung San Suu Kyi.
- As a close and friendly neighbour, India has multi-dimensional linkages with Myanmar. Consequently, initiatives should be mindful of the need for a peaceful and stable Myanmar. India will continue to play a constructive and positive role, along with like-minded countries, to this end.

### **385. Remarks of External Affairs Minister Pranab Mukherjee on the situation in Myanmar.**

**New Delhi, November 12, 2007.**

India again asked Myanmar to initiate inclusive political reforms. It also called upon Myanmar to release political prisoners "as far as is possible" and probe violence against unarmed civilians. "We want political reforms and the process of reconciliation to start immediately and it has to be inclusive," External Affairs Minister Pranab Mukherjee told newsmen on the sidelines of a conference on Asian economic integration in New Delhi on 12 November.

"As far as possible, important political prisoners should be released. There should be some sort of inquiry into the excesses which were resorted to, as it is being alleged by the media and other sources."

While other countries, notably from the West, have been urging India to take a strident line on the suppression of political freedom and human rights in Myanmar, Unlike many other countries, New Delhi however, refrained from being seen as frequently castigating the junta because of its own unique national interest including a 1,400-km boundary between Myanmar and four sensitive northeastern States.

Myanmar would be crucial for India a surface route to Thailand and other countries as part of India's efforts to integrate its Look East policy with the development of the northeastern States.

India has been allowed to prospect for energy along Myanmar's shoreline. If production was economical, energy can be transported across the Bay of Bengal or a pipeline laid along the proposed transit route through Myanmar.

**386. Statement by Member of Parliament and Member of the Indian Delegation to the UN Kunwar Sarvaraj Singh on draft Resolution A/C.3/62/L.41 [REV.I] Titled "Situation of Human Rights in Myanmar" at the Third Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 20, 2007.**

Mr. Chairman,

We would like to thank you for allowing my delegation to make an Explanation of Vote after the Vote on the draft resolution A/C.3/62/L.41 (Rev.1) titled "Situation of human rights in Myanmar"

India has always emphasized the importance of promotion and protection of human rights through dialogue, consultation and cooperation, as such an approach has a better chance of leading to genuine improvement in the enjoyment of human rights by the people of a country. We are once again faced in this Committee by a major challenge in determining the most effective approach for promotion and protection of human rights. We need a self-critical appraisal of whether the international community has managed to achieve a genuine improvement in human rights through giving of 'report cards' against countries or even by undertaking intrusive monitoring.

In connection with the recent developments in Myanmar, India has consistently maintained that all initiatives taken in this connection should be forward-looking, non-condemnatory and seek to engage the Government of Myanmar in a non-intrusive and constructive manner. We believe that such an approach will also support the UN Secretary General's Good Offices and his Special Advisor Mr. Ibrahim Gambari's ongoing dialogue with Myanmar. We have impressed upon Myanmar that the process of political

reform and national reconciliation should be taken forward expeditiously and should be broad based to include all sections of society. We, consequently, support the UN Secretary General's initiative for taking this process forward in an integrated and comprehensive manner.

Mr. Chairman,

It is, therefore, a matter of regret that the text of this draft resolution is not in conformity with this approach. By adopting a condemnatory, intrusive and unhelpful tone, this draft resolution will not contribute or strengthen the initiatives being taken by the UN and may, in fact, prove to be counterproductive.

It is also not reflective of recent positive steps being taken by the Government of Myanmar, including the visit of the Special Rapporteur on the situation of human rights in Myanmar, Dr. Paulo Sergio Pinheiro to Myanmar and the series of meetings between Daw Aung San Suu Kyi and the specially appointed Minister for Relations. Since the text of the Resolution is neither in conformity with the UN's own initiative on the Myanmar issue nor current thinking on this matter, we had no option but to vote against the resolution.

Thank you Mr. Chairman.

### **387. Briefing points by Official Spokesperson on Prime Minister's meeting with Prime Minister of Myanmar.**

**Singapore, November 21, 2007.**

- Myanmar is a close and friendly neighbour and developments in that country have a bearing on India. We attach importance to our relations with Myanmar.
- This was Prime Minister's first meeting with new Prime Minister of Myanmar. Discussions covered bilateral and regional issues. The Myanmar Prime Minister briefed PM on internal developments in Myanmar and the efforts of his government at political reform and national reconciliation.
- PM conveyed India's position that the reform process should be broad based, including Daw Aung San Suu Kyi and the various ethnic nationalities, and that it should be carried forward expeditiously towards a satisfactory conclusion.
- India supports the efforts of the UN Special Envoy to engage the Government of Myanmar on behalf of the international community to facilitate the process of reconciliation<sup>1</sup>.
- The two leaders also reviewed the status of various bilateral projects.

---

1. The meeting between the two Prime Ministers lasted about half an hour, and Gen. Sein briefed Dr. Singh on the current developments in Myanmar. Dr. Singh's meeting with his Myanmar counterpart was seen in the ASEAN circles as an important sign of India's relevance to the evolving political scenario in that country. India's renewed accent on the centrality of the U.N.'s good offices acquired new salience in the context of the ASEAN's latest move to steer clear of the current Myanmar crisis and let the junta "deal directly with the U.N." Prime Minister's meeting with Gen. Sein was also seen in Singapore the context of the ASEAN's insistence that China and India should seek to influence the thinking of the Myanmar junta. On the 4<sup>th</sup> November the New Delhi daily *Hindustan Times* quoting official sources reported that India had put all sale and transfer of arms to Myanmar on hold. The decision follows the suppression of pro-democracy protests in that country. India believes contact with the junta is in its strategic interest, but also wants to send out a message that it's not quite business as usual any longer. According to the report India gave Myanmar three British-made Islander aircraft last year. It may be recalled that in January, External Affairs Minister Pranab Mukherjee had said India was willing to expand military ties. "We have decided to give a favourable response (to the request for military equipment)."

**388. Press Release of the Ministry of External Affairs on the visit of the Deputy Minister of Myanmar Kyaw Thu for Foreign Office Consultations.**

**New Delhi, December 11, 2007.**

H.E. Mr Kyaw Thu, Deputy Minister in the Ministry of Foreign Affairs of the Government of the Union of Myanmar visited New Delhi at the invitation of the Foreign Secretary Shri Shivshankar Menon for Foreign Office Consultations between India and Myanmar.

Delegation level talks were held at Hyderabad House on 11 December 2007. During the visit Mr Kyaw Thu also called on External Affairs Minister Shri Pranab Mukherjee.

The discussions covered all areas of mutual interest including bilateral, regional and international issues and were marked by the friendship and cordiality that mark relations between India and Myanmar as close neighbours. An MoU for the establishment of the India-Myanmar Centre for Enhancement of Information Technology Skills (IMCEITS) at Yangon under Indian assistance will be signed by the two sides on 12 December 2007.

Myanmar is a close and friendly neighbour, with whom India shares a border of more than 1600 kms. Bilateral trade between the two sides is nearly USD 1 billion. Myanmar also serves as a gateway to South East Asia. India is committed to extend assistance to Myanmar on various developmental projects of mutual benefit including the Kaladan Multi-modal Transport Project. The Foreign Office Consultations is an annual feature and is one of the seven institutional mechanisms between the two countries for bilateral dialogue between India and Myanmar.

## PHILIPPINES

### **389. Speech of President Smt. Pratibha Devisingh Patil at the banquet in honour of Philippines President Mrs. Glolria Macapagal Arroyo.**

**New Delhi, October 5, 2007.**

Your Excellency, President Gloria Macapagal Arroyo,

Distinguished Guests,

Ladies and Gentlemen,

I am delighted to welcome you to India. I wish you a very pleasant stay and I hope we are able to reciprocate the warmth and hospitality that the people of the Philippines are so well known for.

Excellency, your father Diosdado Macapagal visited India in 1961 in his capacity as the Vice President of the Philippines. Today is thus a very special occasion when we warmly welcome his daughter to India as the President of the Philippines, a country which your national hero Dr. Jose Rizal described as the "Pearl of the Orient Sea". Your visit, Madame President not only has a special significance, but would also mark a defining moment in the development of our bilateral relations.

India and the Philippines enjoyed peaceful and mutually beneficial contacts long before the colonial era, when seafarers and traders from India visited the Philippines via Indonesia and the Malaya peninsula. The cultural and linguistic legacy of these early contacts is still visible today. Both our countries also shared a similar history of colonialism and the struggle for freedom and democracy.

Our great leaders, Mahatma Gandhi and Dr. Jose Rizal inspired the freedom movements in their respective countries. Although they were not exact contemporaries, their vision had remarkably much in common in the pursuit of internal social and economic reform as being equally important to the attainment of political independence. These values have endured in our years of independence. Our common commitment to democracy and an open society, pluralism and inclusiveness constitute a natural bond between the two countries.

Today, India and the Philippines stand at the threshold of a new era of progress. Both countries are witnessing historically unprecedented rates of economic growth. Under your stewardship Madame President, the Philippine economy has registered the highest growth rates in over two decades. The Indian economy is also now enjoying sustained high rates of growth. This is indeed an opportune moment to further intensify trade and investment links between our two countries.

Our economic links have been growing, but have perhaps still not attained their full potential. Our companies have invested in areas such as textiles and steel in the Philippines, but there is scope to facilitate greater investment flows. New opportunities for cooperation are arising in a variety of sectors including agriculture and animal husbandry, pharmaceuticals, mining and non-conventional energy. It is a matter of considerable satisfaction, that both our countries have emerged as global leaders in Information Technology and IT enabled services. This is a most promising area of future cooperation and collaboration, that will enable our IT companies to jointly pursue business opportunities in third countries. Madame President, your visit will undoubtedly give a fillip to the intensification of our bilateral economic relations.

Under our "Look East" policy, India is committed to an extensive and deep partnership with the ASEAN and the countries of East Asia, including the vision of creating an Asian Economic Community. The Philippines is a strong pillar of our multi-dimensional engagement with the region. We congratulate the Philippines for its recent successful and fruitful Chairmanship of ASEAN and the East Asia Summit which gave further momentum to the process of close engagement amongst the countries of Asia. We particularly value the consistent support given by the Philippines for India's participation in the East Asia Summit.

Madame President, for the first time in modern history, Asia is in the process of taking center-stage in world affairs. The 21st Century truly belongs to Asia. We fully endorse your vision to see your country join the ranks of the First World by 2020. We also believe that India has a crucial role to play in the emerging world order. Our shared commitment to the values of non-violence and tolerance should serve as an inspiration and a beacon of hope in a world plagued by narrow sectarianism and terrorism. India is committed in its resolve to foster friendly ties with all nations of the world and together with the Philippines work towards enhancing international peace and security.

May I now request Your Excellencies, Ladies and Gentlemen, to join me in a toast:-

- to the good health and happiness of President Gloria Macapagal Arroyo;
- to the continued progress and prosperity of the people of the Philippines; and
- to the friendship and cooperation between India and the Philippines.

**390. Declaration of a Framework of Bilateral Cooperation between the Government of the Republic of India and the Government of the Republic of the Philippines.**

**New Delhi, October 5, 2007.**

The President of the Republic of the Philippines H.E. Mrs. Gloria Macapagal Arroyo paid a State Visit to India from October 4-6, 2007 at the invitation of the President of the Republic of India H.E. Mrs. Pratibha Patil. During the visit, the President of the Philippines held bilateral discussions with the Prime Minister of India, Dr. Manmohan Singh on October 5, 2007.

During discussions held between the Prime Minister of India and the President of the Philippines, the two leaders observed that the Republic of India and the Republic of the Philippines have achieved significant progress in their relations since the establishment of diplomatic relations on 16 November 1949. Closer cooperation in the political, economic, cultural, educational, scientific and other fields have contributed to the development of the two countries and brought concrete benefits to their peoples.

The two leaders affirmed their determination to further strengthen their close friendship and multi-faceted cooperation in the years ahead through the establishment of a new Framework of Bilateral Cooperation between India and the Philippines.

The Prime Minister of India and the President of the Philippines noted that this new Framework of Bilateral Cooperation drew upon the strength of their longstanding friendship and their close working relationship in the Non-Aligned Movement, the ASEAN-India Dialogue, the ASEAN Regional

Forum and other fora, in order to build a dynamic and reliable partnership, to advance the fundamental interests of their two peoples and thereby contribute to peace, security, sustained growth, and development in Asia.

The two leaders agreed to establish this partnership on the basis of good neighborliness, cooperation and mutual trust and benefit. They reaffirmed that the purpose and principles of the United Nations Charter, the principles established in the Treaty of Amity and Cooperation in Southeast Asia and other universally recognized principles of international law were the basic norms governing the relations between the two countries.

With a view to elevating India-Philippine relations to greater heights, the Prime Minister of India and the President of the Philippines agreed that India and the Philippines would maintain close and frequent high-level contacts and exchanges of visits at all levels, including government officials, the business sector, nongovernment organizations, the academic community, and cultural groups, in order to contribute to a comprehensive, stable, and sustained development of bilateral relations.

The two leaders resolved that India and the Philippines would utilize newly established mechanisms like the Joint Commission to chart out the road map of bilateral cooperation and to monitor its implementation. They also resolved to continue the annual Policy Consultations / Security Dialogue and other bilateral mechanisms in order to facilitate the exchange of views on bilateral, regional and international issues of common interest, and promote deeper cooperation in various fields.

It was agreed that in order to enhance access to affordable medicines for their respective people and foster the overall development of their health and medical sectors, the two sides will explore ways to deepen cooperation in the field of health and medicine, particularly in the areas of drug and pharmaceutical products, medical education, medical equipment, medical supplies, public health, communicable disease control and surveillance, hospital management, traditional and alternative medicine and health/medical tourism.

The two sides expressed their willingness to cooperate in the field of information technology, including sharing of expertise and joint activities in research and development (R&D) in software development, business process outsourcing (BPO) related undertakings, information infrastructure-related projects, and E-government-related undertakings.

The two sides agreed to explore ways to pursue cooperation in the field of

mining, real estate, energy, particularly in renewable energy, natural gas and biofuel industries.

It was also agreed to promote further exchanges and cooperation in the defense and military fields, as mandated under the India-Philippine Memorandum of Agreement on Defense Cooperation signed in 2006, to include defense technology cooperation, and exchanges of military training and expertise, instructors/observers, and of visits of military aircraft and military naval vessels.

Recognizing that terrorism constituted one of the most serious threats to international peace and security the two leaders agreed to cooperate in the prevention, investigation and suppression of transnational crimes, including sharing of intelligence information, exchanges in law enforcement technology, equipment and personnel training, and other capacity-building measures, and to this end, resolved to work towards concluding an agreement to combat transnational crimes. They also agreed to cooperate in the prevention, investigation and suppression of terrorism.

Recognizing the importance of optimizing the use of existing frameworks for cooperation in the fields of trade, investment, science and technology, agriculture, education and culture, tourism, civil aviation, and taxation, the Prime Minister of India and the President of the Philippines agreed to promote increased bilateral trade and investment flows by exploring all possible measures to effect increases in trade volumes and product choices; agreeing to provide a conducive market environment through identification and removal of trade, investment and similar impediments; encouraging a pro-active role for their respective business sectors; and undertaking aggressive marketing of their products and services through active participation in Indian and Philippine trade fairs, and through exchanges of trade and investment missions.

The two leaders agreed to utilize existing institutional arrangements such as the "India-Philippines Memorandum of Agreement on Cooperation in Agriculture and Related Fields" signed in 2006, to promote the exchange of agricultural materials and information/technology, the exchange of agricultural scientists, experts and trainees, the organization of symposia, and the encouragement of their enterprises, scientific research institutes and concerned business groups to take an active part in agricultural cooperation to bring about the common growth of the two economies.

Recognizing the importance of enhancing people-to-people links between the two countries it was agreed to utilize the "India-Philippines Agreement

on Cooperation in the Field of Tourism” signed in 2006, to further promote tourism activities, exchange of information and expertise in the development of traditional tourism products, crafts and industries, and joint marketing and promotion programs.

The Prime Minister of India and the President of the Philippines recognized the universality of human rights taking into account the distinct culture, tradition, and practices of the two countries. They agreed to encourage exchanges and cooperation on human rights on the basis of equality and mutual respect, with a view to enhancing mutual understanding. They resolved to continue to work together for the progress and protection of the cause of human rights.

Stressing the importance that both countries attached to the Dialogue Partnership between India and the ASEAN, the two leaders agreed to work together to deepen cooperation between the Association of Southeast Asian Nations (ASEAN) and India, recognizing that dynamic Philippines-India relations contribute to a robust ASEAN-India relations which in turn will significantly contribute to the peace, stability and prosperity of the region.

The two sides resolved that India and the Philippines would continue their coordination and cooperation at the East Asia Summit, ASEAN Regional Forum, the Non-Aligned Movement, the World Trade Organization, United Nations, and other multilateral fora. They would actively promote and protect the common interests of developing countries in regional and international fora, particularly in the areas of trade and finance, human resources development, and the promotion of the interests and welfare of migrant workers and their families, women and children, among others.

### **391. India – Philippines Joint Declaration for Cooperation to Combat International Terrorism.**

**New Delhi, October 5, 2007.**

**The Governments of the Republic of India and the Republic of the Philippines**, hereinafter referred to collectively as “the participants”;

**REAFFIRMING** their commitment to counter, prevent and suppress all forms of terrorist acts in accordance with the Charter of the United Nations, international law and all the relevant United Nations resolutions, including the United Nations Global Counter Terrorism Strategy, and in particular United Nations Security Council Resolutions 1373, 1267 and 1390;

**VIEWING** acts of terrorism in all its forms and manifestations, committed wherever, whenever and by whomsoever, as a profound threat to international peace and security, which require concerted action to protect and defend all peoples and the peace and security of the world;

**REAFFIRMING** their commitment to protect human rights, ensure fair treatment, uphold the rule of law and due process while countering terrorism;

**REAFFIRMING** also that terrorism cannot and should not be associated with any religion, nationality, civilization or ethnic group;

**RECOGNISING** the principles of sovereign equality, territorial integrity and non-intervention in the domestic affairs of other States;

**RECOGNISING** the transnational nature of terrorist activities and the need to strengthen international cooperation at all levels in combating terrorism in a comprehensive manner;

**DESIRING** to enhance counter-terrorism cooperation between the relevant agencies of the participants’ governments;

**Solemnly** declare as follows:

**Objectives:**

1. The participants reaffirm the importance of having a framework for cooperation to prevent and combat international terrorism through the exchange and flow of information, intelligence and capacity-building.

2. The participants emphasize that the purpose of this cooperation is to enhance the efficacy of those efforts to combat terrorism.

**Scope and Areas of Cooperation:**

3. The participants stress their commitment to seek to implement the principles laid out in this Declaration, consistent with their national security policies, domestic laws and international law, in any or all of the following activities:
  - i. Continue and enhance information sharing between their relevant security and intelligence agencies, particularly on best practices in counter terrorism regimes that may include developments of more effective counter-terrorism mechanisms, policies and laws;
  - ii. Enhance information sharing and intelligence sharing and intelligence cooperation among their relevant intelligence and security organizations from operational level to strategic level geared towards combating international terrorism, particularly terrorist financing, and in the process, additional necessary measures shall be instituted to protect the shared classified information;
  - iii. Enhance liaison relationships amongst their law enforcement agencies to engender practical counter-terrorism regimes.
  - iv. Strengthen capacity-building efforts through training and education; consultations between officials, analysts and field operators; and seminars, conferences and joint operations as appropriate.
  - v. Provide, using best efforts, assistance on transportation, border and immigration control challenges, including document and identity fraud to stem effectively the flow of terrorist-related material, money and people.
  - vi. Prevent and suppress the financing of terrorist acts.
  - vii. Strengthen capability and readiness, including training and technical assistance, to deal with chemical, biological, radiological, nuclear terrorism (CBRN), cyber terrorism and any new form of terrorism.

- viii. Commit to continue working together in the fight against the cyber crime and terrorist misuse of cyber space, by enhancing confidence among the national Computer Security Incident Response Teams of the Philippines and India, including, when and where appropriate, providing hardware and software to prevent cyber attacks and terrorist misuse of cyber space.
- ix. Providing, where and when possible, technical assistance and capacity-building programs in developing laws, extending training (in forensics, law enforcement, legal and technical matters), and when and where appropriate, hardware and software to prevent cyber attacks and terrorist misuse of cyber space.
- x. Promote public awareness and participation in efforts to counter terrorism, as well as enhance inter-faith and intra-faith dialogue and dialogue among civilizations.
- xi. Assist in facilitating extradition and extending mutual legal assistance in cases involving terrorism related offences.
- xii. Cooperate in combating organized crimes which have linkages with terrorist acts.
- xiii Explore on a mutual basis additional areas of cooperation.

**Participation:**

- 4. Participants are called upon to become parties to all universal instruments on counter terrorism.
- 5. The participants are each called upon to designate an agency to coordinate with law enforcement agencies, authorities dealing with countering terrorism financing and other concerned government agencies, and to act as the central point of contact for the purposes of implementing this Declaration.

**Disclosure of Information:**

- 6. The participants expect that no participant would disclose or distribute any confidential information, documents or data received in connection with this Declaration to any third party, at any time, except

to the extent agreed in writing by the participant that provided the information.

**Implementation:**

7. All the participants are urged to promote and implement in good faith and effectively the provisions of the present Declaration in all its aspects.

**Signed** in New Delhi on the Fifth Day of October, 2007 in two versions, English and Hindi, both texts being equally authentic. In case of divergence in the interpretation, English text shall prevail.

**392. Agreement between the Government of the Republic of India and the Government of the Republic of Philippines on Exemption of Visa Requirement for Holders of Diplomatic and Official Passports.**

**New Delhi, October 5, 2007.**

**The Government of the Republic of India and the Government of the Republic of the Philippines**

**Hereafter** referred to singularly as the “Contracting Party” and collectively as the “Contracting Parties”

**CONSIDERING** the interest of both countries to strengthen their friendly relations, and

**DESIRING** to facilitate the entry of the citizens of the Republic of India and the citizens of the Republic of Philippines, who are holders of diplomatic or official passports into their respective countries,

**HAVE** agreed as follows:

**ARTICLE 1**

Citizens of the Republic of India and the Republic of the Philippines, as well as their spouses, children and dependent parents, holding valid diplomatic and official passports, shall enter into, transit through or stay in the territory of the other country without visas.

**ARTICLE 2**

Citizens of either Contracting Parties shall be allowed to stay within the territory of the other Contracting Party for a period not exceeding thirty (30) days. This period of stay may be extended at their request subject to the consent of the competent authorities of the receiving Contracting Party.

**ARTICLE 3**

The Contracting Parties shall exchange, through diplomatic channels, their respective valid passport specimens within thirty (30 ) days after the entry into force of this Agreement. The Contracting Parties shall inform each other about the introduction of new types and classification of passports, as well as change or modification to those currently in use and shall furnish each other relevant specimens at least thirty (30) days prior to their use.

**ARTICLE 4**

Notwithstanding the exemption from obtaining entry visa under this Agreement, it is the duty of persons benefiting there from to comply with the laws and regulations of the receiving Contracting Party regarding entry into, stay in and exit from the receiving Contracting Party.

**ARTICLE 5**

Each Contracting Party reserves the right to refuse entry to persons regarded as *persona non-grata* or considered as undesirable and to terminate the stay of such persons on its territory after they have been permitted entry.

**ARTICLE 6**

Either Contracting Party may, for reasons of public order, security or health, temporarily suspend in whole or in part, the implementation of this Agreement. Such suspension and the lifting of the suspension shall be notified through diplomatic channels to the other Contracting Party at least fifteen (15) days prior to their taking effect.

**ARTICLE 7**

Citizens of either Contracting Party holding valid diplomatic or official passports who are appointed to work in a diplomatic mission or consular post in the receiving Contracting Party, including their spouses, children and dependent parents holding valid diplomatic or official passports, shall not be required to secure diplomatic or official visas to enter the territory of the other Contracting Party. Within thirty(SO) days upon arrival, they shall be issued multiple-entry diplomatic or official visas for the period of their official stay upon request from the diplomatic mission or consular post concerned subject to the consent of the competent authorities of the receiving Contracting Party.

**ARTICLE 8**

Any dispute between the Contracting Parties arising out of or relating to the interpretation or implementation of this Agreement shall be settled by consultations or negotiations.

**ARTICLE 9**

Any amendment or revision to the text of this Agreement shall be done by

mutual consent of the Contracting Parties. The amendment or revision shall enter into force in accordance with Article 10 of this Agreement.

**ARTICLE 10**

This agreement shall enter into force on the date of the receipt of the later written notification by the Contracting Parties, through diplomatic channels, indicating that the domestic requirements for its entry into force have been complied with.

**IN WITNESS WHEREOF**, the undersigned being duly authorised by their respective Governments, have signed the present Agreement.

**DONE** at New Delhi on this 5th day of October 2007 in two (2) originals; in Hindi and English languages, all texts being equally authentic. In the event of any divergence of interpretation, the English text shall prevail.

**FOR THE GOVERNMENT OF THE REPUBLIC OF INDIA**      **FOR THE GOVERNMENT OF THE REPUBLIC OF THE PHILIPPINES**

**Minister of External Affairs**      **Secretary of Foreign Affairs**

**393. Agreement between the Government of the Republic of India and the Government of the Republic of the Philippines on the Establishment of a Joint Commission on Bilateral Cooperation.**

**New Delhi, October 5, 2007.**

**The Government of the Republic of India and Government of the Republic of the Philippines** hereinafter referred to as the "Contracting Parties",

**Wishing** to strengthen and develop cooperation in trade, economic, scientific, technological and other sectors on a long-term' basis and on the principles of equality and mutual benefit.

**Have** agreed as follows:

**Article 1**

The Contracting Parties hereby set up the India-Philippines Joint Commission on Bilateral Cooperation, hereinafter referred to as the "Commission".

**Article 2**

The tasks of the Commission are:

To consider questions arising in the course of the implementation of this Agreement between the Government of India and the Government of the Philippines , and all other agreements concluded between the two countries.

To study possibilities of the further development of trade, economic, scientific, technological and other fields of cooperation.

To prepare recommendations for the successful implementation of the above mentioned agreements and proposals on possible ways of enhancing cooperation in these spheres, for approval by the Contracting Parties as well as to settle other questions pertaining to trade, economic, scientific, technological and other fields of cooperation.

**Article 3**

The Commission shall comprise of an equal number of members nominated by each Contracting Party.

Minister of External Affairs from the Indian side and Secretary, Department of Foreign Affairs from the Philippines side would be Co-Chairmen of the Commission.

#### **Article 4**

Each Contracting Party shall appoint an Executive Secretary.

The Indian and the Philippines Executive Secretaries of the Commission shall be responsible for organizing the activity of the respective side, coordination of the work of its executive bodies, preparation of documents for the Commission meetings, as well as for other organizational questions with respect to the activities of the Commission. For these purposes the Executive Secretaries shall be constantly in contact with each other.

#### **Article 5**

The Commission shall convene meetings at least once every two years in mutually agreed dates.

Meetings of the Commission shall be conducted alternately in India and the Philippines and shall be chaired by the Chairman of the host country.

The Commission shall conduct its meetings as per the approved working schedule and on agreement between the Chairmen.

Meetings of the Commission may be attended by the necessary numbers of advisers and experts on each side.

#### **Article 6**

The schedule of regular meetings and the preliminary agenda shall be settled by the Chairmen through consultations at least thirty days before the meeting date.

The meeting shall consider predetermined agenda items as well as the items that, subject to the Chairmen's consent, may be included in the agenda at the beginning of the meeting.

#### **Article 7**

On request of one of the Chairmen, special meetings of the Commission may be convened.

At the initiative of a Contracting Party, additional meetings between the

Chairmen or their deputies may be arranged.

#### **Article 8**

At the Commission meetings decisions shall be made by consensus.

In urgent matters the Chairmen shall have the right, with mutual consent, to take decisions in the period between meetings of the Commission. The decisions of the Chairmen shall be included in the protocol of the next meeting of the Commission.

Decisions of the Commission shall come into force on the date of their signing, if not provided otherwise.

Those decisions that, according to the Statement of one of the Chairmen, have to be approved by the authorised bodies its respective country, shall come into force on the date of notification by the corresponding Chairman about their approval.

#### **Article 9**

Results and decisions of the Commission meetings shall be reflected in the protocol which shall be signed by the Chairmen.

Protocol of the Commission meetings shall be done in Hindi and English, both the texts being equally authentic.

#### **Article 10**

In order to fulfill its tasks, the Commission may set up permanent and provisional bodies *that is* Sub-Commission or Working Groups.

The Commission shall determine the tasks, scope of reference and composition of permanent and provisional bodies which shall carry out their work as per the plan and decisions approved by the Commission.

#### **Article 11**

Expenses for organizing the Commission meetings and work of its permanent and provisional bodies shall be borne by the country hosting a meeting.

Travel and living expenses, including hotel accommodation of the Commission meeting participants and members of its permanent and provisional bodies, shall be borne by the country deputing its representatives to these meetings.

**Article 12**

This agreement may be amended with the mutual consent in writing of the Contracting Parties.

**Article 13**

This Agreement shall enter into force on the date of the later notification by the Parties in writing, through diplomatic channels, indicating compliance with their domestic requirements for entry into force.

This Agreement shall be valid for a period of five (5) years and may be automatically extended for similar period(s), unless either Contracting Party gives a written notice to the Other Party six months in advance of the date of expiry of the respective period of validity of the Agreement stating its intention to terminate it.

**Done** at New Delhi on this Fifth day of October 2007, in two originals each in the Hindi and English languages, both texts being equally authentic. In case of divergence, the English text shall prevail.

## SINGAPORE

### **394. Briefing Points by Official Spokesperson on External Affairs Minister Pranab Mukherjee's visit to Singapore.**

**New Delhi, June 19, 2007.**

- Minister of External Affairs, Shri Pranab Mukherjee arrived in Singapore on a bilateral visit on the evening of June 18, 2007. The official programme of the visit commenced on June 19, 2007 with a visit to the site of the INA Memorial in Singapore.
- The Minister of External Affairs then released the 12th volume of Netaji's collected works at a function organized at the Raffles Hotel. The period covered by this volume is 1943-1945 when Netaji was in Singapore. The series has been edited by Professor Sugata Bose of Harvard University.
- The book release function was followed by a meeting with Mr. George Yeo, the Foreign Minister of Singapore. During the bilateral talks, a wide range of issues covering bilateral, regional and international issues of mutual interest were discussed. EAM emphasized the importance of institutional arrangements to strengthen the relationship. Expanding bilateral trade after CECA was also discussed. The two Ministers also discussed India-Singapore relations in the context of greater integration between India and the ASEAN. At the end of the talks, Foreign Minister George Yeo hosted a luncheon in honour of Minister of External Affairs, Shri Pranab Mukherjee at which regional issues covering South Asia as well as Southeast Asia were discussed.
- The two Foreign ministers signed an Agreement to establish a Joint Ministerial Committee which would be co-chaired by them. The Committee will chart out a roadmap of bilateral relations and provide a framework for monitoring and implementing commitments by the two sides. This mechanism will address the requirements of the new levels of cooperation, which the Ministers are confident the relationship will attain.
- The Ministers also agreed upon the establishment of the India-Singapore Strategic Dialogue - a Track II initiative which will provide an opportunity for senior figures with policy making experience to

discuss bilateral and international issues of common concern. The Dialogue would be co-chaired by Ambassadors S. K Lambah and Tommy Koh.

- The Minister of External Affairs, Shri Pranab Mukherjee also conveyed to Foreign Minister George Yeo the decision of the Government of India to establish a Nalanda Mentor Group which would examine the framework of international cooperation and the structure of partnership of the proposed International University at Nalanda. He expressed India's appreciation that Mr. Yeo had consented to join the Group. The Nalanda University will be developed as a Centre for Buddhist and Secular Learning with active participation of interested countries within the East Asia Summit. The University is to be established under an Inter-Governmental Agreement to be signed by interested member states of the East Asia Summit. The mentor group is expected to have four meetings before the East Asia Summit. The two Ministers also agreed to set up a group which would explore the heritage of Netaji Subhash Chandra Bose in the India-Singapore context.
- On the afternoon of June 19, 2007, the Minister of External Affairs, Shri Pranab Mukherjee called on President S. R. Nathan and Senior Minister Goh Chok Tong. The discussions covered bilateral relations including close political and cultural contacts as well as expanding economic relations. Defence and security relations were also discussed. EAM also briefed the Singapore leadership on regional issues of mutual interest. The day's programme concluded with a dinner hosted by the High Commissioner of India in Singapore in honour of Shri Pranab Mukherjee.

**395. Remarks by External Affairs Minister Pranab Mukherjee at press conference after talks with Foreign Minister of Singapore, George Yeo.**

**Singapore, June 19, 2007.**

Today morning Singapore Foreign Minister George Yeo and I had extensive discussions on our bilateral relations and regional and international issues of mutual interest.

India's relations with Singapore have evolved into a strong partnership. The intensity of the relationship is reflected by the frequency of high level visits and exchanges. Singapore was one of the earliest of our partners in the ASEAN to realize the implications of the economic reforms India began a decade and half ago. Our partnership has greatly encouraged India's stronger participation in Southeast Asian and East Asian structures since then. At the bilateral level, a Comprehensive Economic Cooperation Agreement was concluded in 2005 which has had a significant positive impact on our trade and investment relations. Today Singapore is our largest trading partner in the ASEAN with a bilateral trade volume of US\$13 billion in 2006.

Both our countries have similar views and perspectives on the threat from terrorism. Our defense cooperation has been proceeding well and all three services of the armed forces of the two countries are exercising together regularly.

We are also deeply appreciative of the efforts made by Foreign Minister George Yeo personally towards the conceptualization of the project for creating an International University at Nalanda. We envisage Nalanda as a Centre for Excellence for Research on Buddhist Religion and Culture. We are in the process of establishing the Nalanda Mentor Group which will make proposals for the revival of Nalanda, the governance structure of the University and the modalities for its funding. Foreign Minister George Yeo has kindly agreed to be a member of the Mentor Group and devote his precious time to guiding the project. Separately, we are working on a framework including a legislation for international cooperation on the project.

It is a matter of satisfaction that during my current visit to Singapore, new initiatives have been announced that will add a further impetus to the development of our bilateral ties. These include the establishment of a Joint Ministerial Committee led by the Foreign Ministers to monitor the

progress of our bilateral relations. The Joint Ministerial Committee will be Co-Chaired by the Foreign Ministers of the two countries. The establishment of the Joint Ministerial Committee is symbolic of the maturity, depth and range of our rapidly developing bilateral ties.

We have also agreed to establish a Track II Strategic Dialogue which will provide an opportunity for senior figures with policy making experience to discuss bilateral and international issues of mutual interest to both countries.

From the discussions held today, it is clear that the potential for bilateral cooperation between India and Singapore is immense. I am confident that our meeting will mark another significant step forward in realizing this potential for the mutual benefit of our two countries.<sup>1</sup>

1. Replying to questions from the floor, EAM said the "formative and informal" engagement among four democracies - India, the United States, Japan and Australia - "is not targeted against any country." Answering a question on China taking a dim view of this unnamed forum he said, "It is [also] premature" to talk about taking on board any other Asia-Pacific country to address such sensitivities or for any other reason. Without endorsing the label of "a concert of democracies" for the new grouping, he said, "It is yet to evolve. On the India-U.S. civil nuclear energy deal, he said, "We are trying to conclude the discussions as early as possible." About the residual stumbling blocks, he said, "When discussion takes place, you cannot just go on making comments on this clause, that clause." India's new strategic dialogue with Singapore would take place "not in the glare of publicity" but as a focussed Track-II exercise. The new Joint Ministerial Committee was a consultative mechanism headed by the Foreign Ministers, and would meet every year. The panel "is symbolic of the maturity, depth, and range of our rapidly developing bilateral ties," Mr. Mukherjee said at a joint press conference with Singapore Foreign Minister George Yeo. Answering a question whether this new diplomatic flurry signified a strategic partnership in the making, Mr. Yeo said: "We see India playing a growing role in the maintenance of peace [and] in creating conditions for development in all of Asia in this century. Singapore and India are bound by ties of history, of culture, of blood; and we see all these things becoming much more important again, as we look into the future. So, whether or not we call it a strategic partnership, it certainly is." Two historical issues figured prominently, with Mr. Mukherjee releasing the 12th volume of Netaji Subhas Chandra Bose's Collected Works and with Mr. Yeo announcing that Singapore would hold an exhibition on the Nalanda heritage in November to coincide with the prospective East Asia Summit. Mr. Yeo said he discussed with Mr. Mukherjee the formation of a group to study, in a contemporary context, the heritage of Bose and the Indian National Army in Singapore.

**396. Agreement between the Government of the Republic of India and the Government of the Republic of Singapore on the Establishment of the Joint Ministerial Committee for Bilateral Cooperation.**

**Singapore, June 19, 2007.**

**The Government of the Republic of India and the Government of the Republic of Singapore** (hereinafter referred to as the “**Contracting Parties**”)

**Wishing** to strengthen and develop their friendly and good-neighbourly relations on a long-term basis and on the principles of equality and mutual benefit

**Have** agreed as follows:

**Article 1**

The Contracting Parties hereby set up the India-Singapore Joint Ministerial Committee on Bilateral Cooperation (hereinafter referred to as the “Committee”).

**Article 2**

The tasks of the Committee are:

- (a) to consider questions arising in the course of implementation of this Agreement and future India-Singapore agreements and to set the broad framework and direction for the future development of India-Singapore cooperation; and
- (b) to prepare recommendations for successful implementation of the above mentioned agreements and proposals on possible ways of enhancing cooperation in these spheres, for approval by the Contracting Parties as well as to settle other questions pertaining to India-Singapore cooperation.

**Article 3**

- (1) The Committee shall comprise of members consisting of leaders and representatives of relevant ministries, agencies or other committees nominated by each Contracting Party.

- (2) The Committee shall be co-chaired by the Minister of External Affairs of the Republic of India and the Minister for Foreign Affairs of the Republic of Singapore. The members of the Committee shall be appointed by the corresponding Contracting Party.

#### **Article 4**

Members of the Committee shall be responsible for organising the activities of the respective side, coordination of the work of the Committee, preparation of documents for the meetings of the Committee, as well as for other organisational issues with respect to the activities of the Committee. For these purposes the relevant members of the Committee shall be constantly in contact with each other.

#### **Article 5**

- (1) The Committee shall convene meetings at least once a year.
- (2) Meetings of the Committee shall be conducted alternately in India and Singapore and shall be chaired by the Chairman of the host country.
- (3) The Committee shall conduct its meetings on agreement between the Chairmen.
- (4) Meetings of the Committee may be attended by advisers and experts from each side.

#### **Article 6**

- (1) The meetings and the preliminary agenda shall be settled by the Chairmen through consultations before the meeting date.
- (2) The meeting shall consider predetermined agenda items as well as the items that, subject to the Chairmen's consent, may be included in the agenda at the beginning of the meeting.

#### **Article 7**

- (1) On request of one of the Chairmen, special meetings of the Committee may be convened.
- (2) At the initiative of a Contracting Party, additional meetings between the Chairmen or their deputies may be arranged.

**Article 8**

- (1) At the meetings of the Committee, decisions shall be made by consensus.
- (2) In urgent matters the Chairmen shall have the right, with mutual consent, to take decisions in the period between meetings of the Committee. The decisions of the Chairmen shall be included in the Minutes of the next meeting of the Committee.
- (3) Decisions of the Committee shall come into force on the date of signing, if not provided otherwise.
- (4) Those decisions that, according to the Statement of one of the Chairmen, have to be approved by the authorised bodies of its respective country, shall come into force on the date of notification by the corresponding Chairman of their approval.

**Article 9**

- (1) Results and decisions of the meetings of the Committee shall be reflected in the Minutes which shall be signed by the Chairmen.
- (2) Minutes of the meetings of the Committee shall be done in Hindi and English, both the texts being equally authentic. In case of divergence, the English text shall prevail.

**Article 10**

- (1) In order to fulfil its tasks, the Committee may set up permanent and provisional bodies including a Sub-Committee or Working Groups.
- (2) The Committee shall determine the tasks, scope of reference and composition of permanent and provisional bodies which shall carry out their work in accordance with the plan and decisions approved by the Committee.

**Article 11**

- (1) Expenses for organising a meeting of the Committee and work of its permanent and provisional bodies shall be borne by the country hosting the meeting of the Committee.
- (2) Travel and living expenses, including hotel accommodation of the Committee meeting participants and members of its permanent and

provisional bodies, shall be borne by the country deputing its representatives to these meetings.

**Article 12**

This Agreement may be amended with the mutual consent in writing of the Contracting Parties.

**Article 13**

- (1) This Agreement shall come into force on the date of its signing and shall be valid for a period of five years.
- (2) The validity period of this Agreement shall be automatically extended for subsequent five year periods, unless either Contracting Party gives a written notice to the other Party six months in advance of the date of expiry of the respective period of validity of the Agreement stating its intention to terminate it.

**IN WITNESS WHEREOF** the undersigned have signed this Agreement.

**Done** at Singapore on this Nineteenth day of June, 2007 in two originals each in the Hindi and English languages, both texts being equally authentic. In case of divergence, the English text shall prevail.

**On behalf of the Government of  
The Republic of India**

**(Pranab Mukherjee)  
Minister of External Affairs**

**On behalf of the Government of the  
Republic of Singapore**

**George Yong-Boon Yeo)  
Minister of Foreign Affairs.**

**397. Briefing points by Official Spokesperson on External Affairs Minister Pranab Mukherjee's engagements in Singapore on the 20th June, 2007.**

**New Delhi, June 20, 2007.**

The Minister of External Affairs, Mr. Pranab Mukherjee, held a number of important meetings and participated in two public functions on the second day of his Singapore visit.

2. The Minister called on Prime Minister Lee Hsien Loong and Minister Mentor Lee Kuan Yew in Istana. Earlier, Mr. Mukherjee met Deputy Prime Minister Prof. S. Jayakumar and with Defence Minister Teo Chee Hean. Discussions covered bilateral relations, particularly increasing trade after the CECA, India's increasing engagement with ASEAN, cooperation in the fields of national security and defence etc, evolution of ASEAN and SAARC. Regional issues including developments in South Asia were also discussed.
3. The Singapore Trade & Industry Minister, Mr. Lim Hng Kiang, joined the External Affairs Minister at the launch of the India Business Forum, an association of leading Indian companies represented in Singapore. The launch was attended by senior Singaporean and Indian corporate figures and business representatives. The establishment of an India-Singapore CEO's Forum to advise the two Governments and identify priority areas for cooperation was also announced on this occasion.
4. The Minister was invited by the Rajaratnam School of International Studies and the Institute of South Asian Studies jointly to deliver a speech on "India's Foreign Policy Priorities" in their Distinguished Public Lecture series. Introduced by his counterpart, Foreign Minister George Yeo, Mr. Mukherjee spoke on this subject and responded to questions from the audience.

**398. Remarks by External Affairs Minister Pranab Mukherjee at the launch of the India Business Forum.**

**Singapore, June 20, 2007.**

I am delighted to join you all at the launch of the India Business Forum in Singapore today. Bringing together the leading Indian companies operating in Singapore, this is a laudable initiative that reflects the emergence of an entrepreneurial India. It is a matter of great satisfaction to find the broad diversity of India's major brand names included in the Forum membership. I am confident that once the Forum begins its activities, this will further expand in the years to come. I would like to specifically express my personal appreciation to H.E. Mr. Lim Hng Kiang, the Minister of Trade & Industry of Singapore, for having joined us on the occasion of this launch. This underlines the expectations that we, as Governments, have from industry.

The entrepreneurial India that I have referred to has been in the making since Independence. In the initial decades, our focus was on building capabilities and institutions that would allow us to engage the world on more equal terms. Even as we achieved a considerable measure of success in that regard, we found that the relatively limited nature of our external interactions diminished our competitiveness. In the last decade and a half, we have embarked on policies of reform and modernization that have unleashed latent energies in our society. Despite change of Governments, our national policies have remained essentially consistent during this period. This is because the benefits of reform have manifested themselves continuously in terms of higher growth rates, greater availability of goods and services, reduction of both urban and rural poverty levels and improvement in our quality of life. Where reform itself is concerned, that India will stay the course is no longer in doubt. The debate today largely centres around the optimal implementation of reform policies and the nature of challenges that continue to confront us.

Challenges we seek to address currently fall into four broad categories. First and foremost, we have to ensure a rapid expansion of employment opportunities. Reform has led to higher expectations and greater awareness, particularly among our youth. No Government can afford to disappoint them. Indeed, it will be our success in expanding employment that will determine whether our demographic structure is to India's advantage. To do that, growth in manufacturing will not only have to be sustained but spread more evenly throughout India. You would have noted that our Government has

unveiled initiatives that encourage this very objective, including the establishment of Special Economic Zones.

A second set of challenges is in the field of agriculture. For the benefit of our farmers, we must expand our food processing industry and encourage more widespread applications of technologies. Thirdly, both urban and rural India are equally constrained by the state of our infrastructure. Consequently, this has emerged as a focus area for greater domestic and foreign investment. We have evolved effective public-private partnership models and the results are beginning to show in modernization of road, rail, airport and ports, as well as power generation. The fourth set of challenges is in human development, where our indices would only improve with more commitment of resources and effective delivery. The growth stories of Southeast Asia and East Asia clearly bring out the centrality of human resource development. In the final analysis, reform in a democratic society like India will be judged by the quantum of population that perceives benefits flowing from it. It is, therefore, imperative that public policies are compassionate and growth inclusive.

Singapore occupies a special position in the thinking of an India undergoing change. It was among the earliest countries to recognize the significance of our reform efforts. Singapore has been a strong partner and an enthusiastic advocate of India. Its political and corporate leadership have engaged us across a very broad spectrum of issues. Singaporean companies have established themselves in various sectors in India, creating win-win situations in the process. Quite appropriately, it was the first country with which we concluded a Comprehensive Economic Cooperation Agreement. The CECA, as all of you are well aware, is a framework that deals with the totality of our cooperation - from tariff levels and investment protection to taxation, standards, qualifications, services and movement of people. The results of CECA are already beginning to make themselves felt. It has substantially expanded our trade and appears to encourage greater investment flows. Last year, Singapore was among our top five trade and investment partners.

The launch of the IBF provides an opportunity to reflect on the outward nature of our engagement with Singapore, one that does not always get the attention it deserves. I believe that there are today more than 2500 Indian companies in Singapore, making them the fourth largest foreign presence in this country. Many of them have set up regional or Asian headquarters here, while others have seen the advantages of establishing

a front office for their global business. They compete successfully with the most established global players in their particular field. Their presence spans a wide spectrum from services to manufacturing, and from hi-tech to the basics of business. Indian brands and goods are increasingly finding prime shelf-space in Singapore markets. Indian banks are expanding their operations and Indian educational institutions are establishing themselves. Our air traffic and tourism figures have shown very sharp growth in recent years. The number of Indian expatriates in Singapore has also registered a significant increase.

The India Business Forum is a commendable step in bringing together Indian companies in Singapore. As these companies compete in a challenging market, they inevitably face issues that need to be addressed collectively. Perhaps in time, these issues would extend beyond Singapore to other ASEAN countries as well. An effective Forum would be a very welcome and timely initiative, coming as it does when the two Governments are working actively to raise the bilateral relationship to new heights. It can make a critical contribution to the appreciation of 'Brand India' in Singapore.

It is also appropriate that we have today announced formally the establishment of the India-Singapore CEOs Forum. Its membership includes the most respected corporate personalities from the two countries. They can provide ideas and suggestions from the industry perspective to take our relationship forward in the post-CECA phase. We look forward to their recommendations.

May I conclude by thanking the Confederation of Indian Industry for their efforts in launching the India Business Forum, supporting along with the Singapore Business Federation the CEOs Forum, and for organizing this event which has brought us altogether.

**399. Press Release of the Ministry of Defence on the signing of an Agreement between India and Singapore for Joint Air Exercises and Training.**

**New Delhi, October 9, 2007.**

India and Singapore signed an agreement today on a long-term arrangement for conducting joint training and exercises between the Indian Air Force and the Republic of Singapore Air Force. The agreement was signed by the Defence Secretary Mr. Vijay Singh and Singapore's Permanent Secretary of Defence, Mr. Chiang Chie Foo as the two-day 4th India-Singapore Defence Policy Dialogue began here today.

During the dialogue, both sides gave an update on India-Singapore defence relations and expressed the need to further intensify cooperation. Sub-groups reported progress made in respective fields including research & development. The regional security aspects, both from Indian and Singaporean perspectives, were discussed<sup>1</sup>.

---

1. The daily *Hindu* on October 10 described it a unique pact "that will allow the island nation to use Indian military facilities on payment basis for five years." The agreement is a long-term arrangement for conducting joint training and exercises between the Indian Air Force (IAF) and the Republic of Singapore Air Force (RSAF) and was signed after the two-day India-Singapore defence policy dialogue. The *Hindu* report said "During the dialogue, both sides gave an update on defence relations and expressed the need to intensify cooperation. Sub-groups reported progress made in respective fields including research and development. The regional security aspects, both from Indian and Singaporean perspectives, were discussed. For the two air forces, the Kalaikunda base will be the hub of operations. This IAF base in West Bengal was developed recently to serve as the second staging post after Gwalior for conducting exercises with foreign air forces. Equipped with modern facilities, the base is located in a congestion-free air environment that allows exercises to be held at the convenience of the air forces. By inking the pact with Singapore, IAF will be able to take a close look at the ultra modern RSAF as well as its F-16 fighters that are also used by Pakistan." For Singapore, which is strapped for space, this is not a unique arrangement. It already has similar pacts with the United States, Australia, Taiwan and New Zealand. RSAF has practised in India twice earlier while IAF fighters have gone over to Singapore once. On October 10 after the end of the two-day talks it was officially announced by the Defence Ministry in New Delhi that "Indian and Singapore armies will hold joint artillery exercises at Deolali, near Nasik in Maharashtra, later this month. The Singapore Army will be represented by an over 100-member contingent."

## THAILAND

### **400. Joint Press Statement on the visit of Thai Prime Minister General Surayud Chulanont (Ret.).**

**New Delhi, June 26, 2007.**

1. His Excellency General Surayud Chulanont (Ret.), the Prime Minister of Thailand paid a State Visit to India from 25-27 June, 2007. The Prime Minister of Thailand was accompanied by the Minister of Foreign Affairs, the Minister of Commerce and the Minister of Energy during his visit to India.
2. During the visit, he held bilateral talks with Prime Minister Dr. Manmohan Singh, the Prime Minister of the Republic of India, on 26 June, 2007 who hosted a banquet in honour of the visiting dignitary on the same day. The Minister of External Affairs, the Minister of Commerce and Industry and the Minister of State for New and Renewable Energy called on the Prime Minister of Thailand on June 26, 2007. The Leader of the Opposition, Lok Sabha will call on the Prime Minister of Thailand on June 27, 2007. The Prime Minister of Thailand also addressed a Business Summit hosted by the CII, FICCI and the ASSOCHAM on 26 June, 2007.
3. On 26 June, 2007, the Prime Minister of the Kingdom of Thailand called on the President of the Republic of India.
4. On 27 June, 2007 the Prime Minister of Thailand will visit Varanasi and Sarnath.
5. During the visit of the Prime Minister of the Kingdom of Thailand two important Agreements were signed in the presence of the two Prime Ministers, namely the Memorandum of Understanding on Enhanced Cooperation in the Field of Renewable Energy and the Cultural Exchange Programme.
6. During their discussions, the two Prime Ministers, expressed satisfaction at the progress achieved in bilateral relations. They acknowledged that relations between the two countries which were based on age old historical, civilizational and cultural links had evolved beyond traditional areas of culture and commercial interaction to cooperation in all key areas, namely security, defence, civil aviation,

science and technology, greater people to people interaction and a movement towards free trade. They emphasized the importance of utilizing and expanding the existing bilateral institutional frameworks to diversify and deepen the relationship between the two countries.

7. The two Prime Ministers expressed satisfaction that the bilateral trade volume between the two countries had crossed the US \$ 3 billion mark with the implementation of the Early Harvest Scheme of the India-Thailand FTA. They expressed confidence that negotiations on the Free Trade Agreement would conclude at the earliest during the current year. They were also convinced that the target of USD 4 billion bilateral trade volume by the end of 2007 was achievable.
8. Both Prime Ministers expressed satisfaction with the growing cooperation between the two countries in the area of defence and security. In this context, they acknowledged with appreciation the good work that was being done by the Joint Working Group on Security Cooperation. They also encouraged the concerned authorities to expedite negotiations of pending defence and security related Agreements and Memorandums of Understanding with a view to achieving their early conclusion and implementation. Recognizing that terrorism constitutes one of the most serious threats to international peace and security, the two leaders condemned terrorism in all its forms and manifestations as criminal and unjustifiable, irrespective of the motives. They resolved to strengthen bilateral cooperation to combat terrorism and to coordinate measures in a comprehensive and sustained manner.
9. The two Prime Ministers also discussed other promising areas of enhanced cooperation. In this context, they agreed to intensify efforts to further strengthen civil aviation cooperation. They encouraged concerned authorities and the private sector to look into possible methods of fisheries cooperation in accordance with domestic rules and regulations.
10. The two Prime Ministers agreed that relations between the two countries are poised and ready for a new level enhanced partnership. Thailand's 'Look West' policy and India's 'Look East' policy had become a perfect complement to one another and the relations between the two countries had grown both bilaterally and in the context of enhanced interaction with and within regional frameworks such as the ASEAN, ARF, BIMSTEC, MGC, ACD and the East Asia Summit.

11. The Indian Prime Minister expressed appreciation for the efforts made by the Royal Thai Government in response to the invitation of the Government of India to seek to develop closer economic and societal ties with the Northeastern States of India. In this context, the visit of the Minister of Commerce of Thailand to New Delhi to participate in the 3rd Northeast Business Summit and his visit to the Northeastern states of India from June 21-24, 2007 was referred to in the discussions between the two Prime Ministers.
12. The Prime Minister of India announced a contribution of Baht 10 million towards the construction budget of the new building of the Sanskrit Studies Centre in the Silpakorn University in Bangkok. The Sanskrit Studies Centre of the University has made significant contributions to the study of Sanskrit, Indian culture and historical and cultural links between India and Thailand. In this regard, the Prime Minister of Thailand noted with appreciation the aforementioned contribution from the Government of India which is a testament to the significant and valuable historical and cultural ties between the two countries.
13. The State Visit of the Prime Minister of Thailand took place during the 60th anniversary of the establishment of diplomatic relations between India and Thailand and was symbolic of the importance that both countries attached to their close and cordial relations with each other. The two countries will be organizing a series of events as part of the celebrations to mark the 60th anniversary year.
14. The Prime Minister of Thailand expressed his appreciation to the Prime Minister of India for the warm welcome and gracious hospitality extended to him and members of his delegation and for all the excellent arrangements made for this State Visit.

#### **401. Briefing Points by Official Spokesperson on External Affairs Minister Pranab Mukherjee's visit to Thailand.**

**Bangkok, September 14, 2007.**

- External Affairs Minister Shri Pranab Mukherjee began his visit to Bangkok this morning with a keynote address at the Institute for Security and International Studies at Chulalongkorn University.
- EAM had a half hour restricted meeting with Foreign Minister Nitya Pibulsonggram. Discussions reviewed gamut of bilateral relations. Stressed satisfaction with trade increase to expected US \$ 4 billion this year and target of US \$ 7 billion by 2010. Also covered FTA negotiations and desire to expedite them for early conclusion. Security cooperation, cooperation in knowledge industries as well as cooperation in ASEAN and Bimstec was also discussed. They also discussed events related to 60th anniversary of diplomatic relations between two countries.
- Both Foreign Ministers co-chaired the 5th Joint Commission Meeting and signed the agreed minutes. JCM minutes cover cooperation in trade<sup>1</sup> and investment, civil aviation, transportation linkages,

1. It may be recalled that the Thai Deputy Prime Minister and Minister of Industry had visited India end of August and met the Commerce Minister. The Ministry of Commerce and Industry's press release (31 August) issued on the occasion gave details of the growing trade relations between the two countries. The text of the Press Release reads: "Shri Kamal Nath, Union Minister of Commerce and Industry, has expressed hope that the bilateral trade between India and Thailand would take a growth trajectory that would take trade relations between the two countries to a new height. He hoped that the FTA negotiations that are underway covering trade in goods, services and investments, including issues such as Rules of Origin, trade facilitation, Anti-dumping and safeguard measures, Dispute Settlement Mechanism would benefit the two countries. He stated this while welcoming Mr Kosit Panpiemras, Deputy Prime Minister and Minister of Industry of Thailand during the Indo-Thailand bilateral talks. Senior Officials from both the countries were also present during the talks. The Trade between India and Thailand has grown significantly during 1992 to 1997 from a level of US\$ 399.8 million in 1992 to US\$ 896.4 million in 1997. Bilateral trade crossed the US\$ 1 billion mark during the year 2000 (US\$ 1,122.6 million), a significant increase of 40.2% compared to 1999 (US\$ 800.2). The Bilateral trade has shown an impressive growth rate in the last few years. Bilateral trade volume increased by 29% over previous year, to touch US\$ 2,286 million in 2005-06 (exports US\$ 1,075 million; imports US\$ 1,211 million) and had touched US\$ 1,509 million by September 2006. India's exports to Thailand were US\$ 1075 million in 2005-06, an increase of 19% over the previous year. In 2006-07 (April-Sept), India's exports to Thailand were US\$ 697 million. India's imports from Thailand were US\$ 1,211 million in 2005-06, a growth of about 40% over the previous year. The figure for 2006-07 (April-Sept) was US\$ 812 million. India's major exports to Thailand are Gem stones, mainly diamonds and emeralds; other metal ores, metal waste scrap and products; chemicals;

agricultural coop, tourism, defence, security, S&T, energy, culture, education, legal and consular matters.

- Both Foreign Ministers addressed the press. FM hosted lunch in EAM's honour.
- EAM called on Prime Minister General Surayud Chulanont. PM expressed satisfaction with his visit to India earlier this year. EAM briefed the PM on the bilateral discussions - joint commission meeting, trade and investment, security and defence, road connectivity to north east through Myanmar, cooperation in BIMSTEC and ASEAN. Discussions also covered cooperation during disasters and other emergencies.
- EAM will also have an audience with HM King Bhumibol Adulyadej and also call on HRH Princess Maha Chakri Sirindhorn later today. The Princess will also host a dinner in his honour. He would also inaugurate the Indian Contemporary Art exhibition this evening.

---

iron, steel and products; vegetables and vegetable products; machinery and parts; medicinal and pharmaceutical products; yarn and fibres; vehicle parts and accessories; fresh aquatic animals, chilled, frozen and instant; fertilizer and pesticides; animal and animal products; plastic products; metal manufacturers. The Major imports of India from Thailand are Polymers of ethylene, propylene etc. in primary forms; radiobroadcast receivers, television receiver and parts thereof; iron and steel and their products; motor cars, parts and accessories; machinery and parts thereof; automatic data processing machines and parts thereof; chemical products; air-conditioning machine and parts thereof; aluminium products; plastic products."

**402. Remarks by External Affairs Minister Pranab Mukherjee on the occasion of inauguration of Art Exhibition "Images of India" in Bangkok.**

**Bangkok, September 14, 2007.**

Excellencies,

Ladies and Gentlemen,

It is indeed a pleasure for me to inaugurate this exhibition of Contemporary Indian Art.

It is fitting and appropriate that this exhibition, "Images of India", has been organised on the occasion of the 60th anniversary of the establishment of diplomatic relations between India and Thailand. Both our countries have organized a series of events to celebrate this important anniversary and, not long ago, in the month of August, 2007, we in India had the honour of receiving Her Royal Highness Princess Maha Chakri Sirindhorn to inaugurate a Thai Ramayana performance and an exhibition of photographs taken by Her Royal Highness during her previous visits to India.

Apart from being the anniversary year, 2007 holds a special significance for people in both countries. It is the 80th birth anniversary of His Majesty The King of Thailand. It is also the 60th anniversary of India's independence and the 150th anniversary of India's first war of independence which took place in 1857.

For over a thousand years, the people of India and Thailand have enjoyed a special cultural relationship, sharing common bonds of spirituality through Buddhism. Today, we wish to build upon these historical links in a contemporary context and this exhibition will provide a unique opportunity to the people of Thailand to see India through the eyes of Indian artists.

I myself see art as an expression of the mind. Art has the unique capacity to elevate human beings and raise their consciousness to noble heights. Without art, our life would be soulless and devoid of beauty. Art is not merely an aesthetic experience, nor just the product of skill and ingenuity. It has a deeper purpose. Through art we can explore and understand our own human nature.

The spirit of art is found everywhere in India. It can be seen in many objects of daily use, such as the earthenware used by common folk, on the walls of

huts in villages, and on floors and entrances of homes. It was this love for colour and decoration that led to paintings of allegorical stories from the epics on the walls of temples, monasteries and places of learning.

I was happy to learn that there is an old and active collaboration between the Vishwa Bharati University, Shantiniketan in India and the Arts Centre of the prestigious Silpakorn University of Thailand. I understand that this collaboration resulted in the "Thai India Art Exhibition", which was inaugurated in Bangkok on February 2, 2007 and in which many talented artists from both countries participated and shared their experiences. I am also happy to learn that, in Bangkok, two private galleries exclusively showcasing Indian art have opened recently. Such private initiatives, as well as specially curated exhibitions like the "Images of India", will go a long way to popularising Indian contemporary art in Thailand.

I would like to thank the Curator of the exhibition, Mrs. Vijayalakshmi Hashim, for her efforts in putting together this important exhibition. I wish her all success in her future projects. I would also like to extend my appreciation and good wishes to the Indian artists whose works are on display in the exhibition. I hope that endeavours like this exhibition will further strengthen the bonds of love and friendship between the people of India and Thailand in the most natural and time tested way.

Thank you.

**403. Press Statement by External Affairs Ministers at Joint Press Interaction after the conclusion of the India-Thailand Joint Commission meeting.**

**Bangkok, September 14, 2007.**

Distinguished Members of the Media, Ladies and Gentlemen,

Good Afternoon,

Let me begin by thanking the Government of Thailand and especially his Excellency Foreign Minister Nitya Pibulsonggram for the very warm welcome extended to me and members of my delegation since our arrival in Bangkok. I am truly delighted to be here in Bangkok, not least because, on four separate occasions during the course of the last nine months, I have transited through Bangkok, but have been unable to make it much further beyond the airport. The scheduling of the Joint Commission, therefore, could not have been done any sooner and I am deeply satisfied with what we have achieved this morning. India attaches great importance to her relations with Thailand. It is a matter of satisfaction that in recent years these relations have deepened and diversified and the potential for bilateral cooperation between our two countries is immense.

The current year also marks the 60th anniversary of the establishment of diplomatic relations between India and Thailand. The successful visits of HRH Princess Maha Chakri Sirindhom to New Delhi in August 2007 and of Prime Minister General Surayud Chulanont in June 2007 were the highlights of the celebrations of this important anniversary.

This morning, Foreign Minister Nitya Pibulsonggram and I had the opportunity to discuss our bilateral relations as well as regional and international issues of common interest. We agreed to work together to further strengthen and diversify the excellent relations that exist between our two countries. Subsequently, we met in Plenary for the Joint Commission Meeting, which has just concluded with the signing of the Agreed Minutes.

The Minutes are a considered and focused document which will serve as a reference point for expanding our bilateral relations in the future. They cover a wide range of areas in our bilateral relations, including trade and investment, civil aviation, transportation linkages, agricultural cooperation, tourism, defence, security, science and technology, energy, culture, education, legal and consular matters and regional and multilateral issues.

I am confident that my visit here and the deliberations of the Joint Commission Meeting will further strengthen our relations and mark another significant step in realizing the rich potential of our relationship for the mutual benefit of our peoples.

Thank you.

**404. Keynote Address by External Affairs Minister Pranab Mukherjee at the Institute for Security and International Studies (ISIS). Chulalongkorn University on “India’s Look East Policy: Implications for Thailand and South East Asia”.**

**Bangkok, September 14, 2007.**

Please see Document No. 325.

## VIETNAM

### **405. Press Release of the Ministry of External Affairs on the 13th Meeting of the India-Vietnam Joint Commission.**

**New Delhi, February 27, 2007.**

The Thirteenth Meeting of the India-Vietnam Joint Commission on Trade, Economic, Scientific and Technological Cooperation was held on the evening of Tuesday, February 27, 2007 at Hyderabad House. The Meeting was Co-Chaired by the Minister of External Affairs, Shri Pranab Mukherjee and the Deputy Prime Minister and Foreign Minister of Vietnam, Mr. Pham Gia Khiem. At the end of the Meeting, the two Foreign Ministers signed the Agreed Minutes of the Joint Commission Meeting.

2. In the Agreed Minutes, the two sides reviewed the bilateral political relations, bilateral assistance, credits, banking, science and technology, industry, transportation, agriculture, animal husbandry, fisheries, aquaculture, civil aviation, tourism, education, training, human resource development, culture and other areas.
3. The Meeting expressed confidence that multi-sectoral bilateral cooperation discussed during the meeting would contribute to a broad based development of bilateral ties.
4. The Meeting noted with satisfaction that the value of bilateral trade in 2006 exceeded US \$ 1 billion which was the target set by the Twelfth Joint Commission Meeting. The Meeting resolved to set a target of US \$ 2 billion for bilateral trade by 2010.
5. The Meeting was informed that India has emerged as one of the top ten investors in Vietnam after the signing of the joint venture agreement by Essar Steel to set up a US \$ 527 million Hot Strip Mill plant in Vietnam earlier this month.
6. Indian companies expressed interest in participating in the petroleum, transportation and power sectors in Vietnam.
7. India committed to continue assistance to Vietnam in IT, science and technology and human resource development projects.
8. The Deputy Prime Minister and Foreign Minister of Vietnam called

on Prime Minister, Minister of External Affairs and the Leader of the Opposition in Lok Sabha during his stay in New Delhi. He will visit Bodhgaya on February 28, 2007.

9. The Deputy Prime Minister and Foreign Minister of Vietnam addressed a business meeting in FICCI at noon on February 27, 2007.
10. 2007 is the 35th Anniversary of the Establishment of Full Diplomatic Relations between India and Vietnam. The External Affairs Minister, Shri Pranab Mukherjee hosted a reception to commemorate the event at which the Vietnamese Deputy Prime Minister and Foreign Minister was the Chief Guest, on the evening of February 27, 2007. The reception was held at the Hyderabad House.

#### **406. Joint Declaration on the Strategic Partnership between India and Vietnam.**

**New Delhi, July 6, 2007.**

The Prime Minister of the Socialist Republic of Vietnam H.E. Mr. Nguyen Tan Dung paid a State Visit to India from July 4 to 6, 2007 at the invitation of the Prime Minister of the Republic of India, H.E. Dr. Manmohan Singh.

2. Prime Minister H.E. Mr. Nguyen Tan Dung was accorded a ceremonial reception at the Rashtrapati Bhavan on July 6, 2007. His engagements included a call on the President of the Republic of India, H.E. Dr. A.P.J. Abdul Kalam. The Prime Minister of India, H.E. Dr. Manmohan Singh held detailed discussions with the Prime Minister of Vietnam, H.E. Mr. Nguyen Tan Dung and hosted a banquet in his honour. The Speaker of Lok Sabha, the Leader of the Opposition, Lok Sabha and the Minister of 'State of External Affairs paid courtesy calls on the Prime Minister of Vietnam.
3. Prime Minister H.E. Mr. Nguyen Tan Dung addressed a Business Summit jointly organized by the apex chambers of commerce and industry. The fifth Meeting of the India-Vietnam Joint Business Council was held in New Delhi during the visit.

4. The two Prime Ministers held extensive discussions on July 6, 2007 when they covered the entire gamut of bilateral relations as well as regional and international issues of mutual interest. The discussions were held in the traditionally warm and cordial atmosphere characteristic of the longstanding and close friendship between India and Vietnam. They focused in particular on enriching bilateral relations and on measures to further deepen the partnership between India and Vietnam, taking into account the development in bilateral relations, its potential and the far reaching changes in the international arena.
5. The two leaders recalled that India-Vietnam relations have been extremely friendly and cordial since their foundations were laid by Prime Minister Nehru and President Ho Chi Minh more than fifty years ago. They also recalled with satisfaction the discussion during their earlier meeting in Cebu, Philippines in January 2007 on the margins of the ASEAN Summit.
6. The two leaders observed that their meeting was taking place in the fifth year since the signing of the "Joint Declaration on the Comprehensive Cooperation Framework between India and Vietnam" in May, 2003. The two leaders observed that despite the changes in the regional and international situation over the years, the traditionally close, ties of friendship between the two countries had remained steadfast. Noting the achievements in bilateral relations in the political, security, economic, science and technology and cultural fields, the two leaders resolved to strengthen India-Vietnam relations through the establishment of a New Strategic Partnership. This Partnership would anchor and help diversify and deepen the relationship between India and Vietnam in a rapidly changing international environment in years to come. This New Strategic Partnership would encompass bilateral relations in the political, economic, security, defense, cultural, scientific and technological dimensions and steer their cooperation in regional and multilateral fora.

### **Political, Defense and Security Cooperation**

7. The two leaders highly valued the important contributions made to bilateral cooperation by various existing mechanisms such as the India-Vietnam Joint Commission and the India-Vietnam

Foreign Office Consultations and noted the important outcomes of recent high level bilateral visits from both sides. In order to further enhance cooperation and understanding in the context of the New Strategic Partnership established between the two countries, they agreed to establish a Strategic Dialogue at the level of Vice Ministers in the Foreign Office.

8. Recognizing the important role that India and Vietnam are called to play in the promotion of regional security, the two leaders welcomed the steady development of bilateral defense and security ties between their countries. They stressed the importance of existing institutional frameworks for defense and security cooperation between the two countries and pledged themselves to strengthen cooperation in defense supplies, joint projects, training cooperation and intelligence exchanges.
9. The two leaders agreed that contacts and exchanges of visits between the Defense and Security establishments of the two countries should be further enhanced.
10. Recognizing that both countries have extensive maritime interests, the two sides agreed to work closely to enhance cooperation in capacity building, technical assistance and information sharing between their respective relevant agencies for ensuring security of sea-lanes, including combating piracy, preventing pollution, and conducting search and rescue.
11. Recognizing that terrorism constitutes one of the most serious threats to international peace and security, the two leaders strongly condemned terrorism in all its forms and manifestations, committed by whomever, wherever and for whatever purposes and reiterated that no cause or motive can ever excuse or justify acts of terrorism. They resolved to strengthen bilateral cooperation in combating terrorism in a comprehensive and sustained manner and, to this end, they agreed to convene a meeting of concerned agencies to identify ways and means to further strengthen and expand the existing cooperation in counter-terrorism. Both sides also agreed to further promote cooperation in cyber-security.
12. The two leaders shared the view that in addition to opportunities for development, the on-going process of globalization has posed a wide range of non-traditional security issues such as drug

trafficking, natural calamities, climate change, energy security, HIV/AIDS, avian influenza and other epidemics that could be effectively tackled by international cooperation. Along these lines, they resolved to strengthen bilateral cooperation in dealing with these issues through a sharing of experience, expertise and information.

### **Closer Economic Cooperation and Commercial Engagement**

13. The Prime Minister of India reiterated India's commitment to assist Vietnam through soft loans and grants in vital areas of importance to Vietnam's economic development based on the needs projected from time to time by the Vietnamese side. The Prime Minister of Vietnam expressed his appreciation for the assistance extended by India to Vietnam.
14. Recognizing that closer economic integration between India and Vietnam could contribute to the transformation of the broader Asian region into an "Arc of Advantage and Prosperity" thereby promoting growth and stability, the two leaders welcomed efforts for the early conclusion of the India-ASEAN FTA. They directed their Trade Ministers to meet at an early date to put in place a strategy for significantly up-scaling bilateral trade and economic cooperation as well as to formulate plans for cooperation in various regional and multilateral fora. The Prime Minister of India agreed to the request of the Prime Minister of Vietnam for India's assistance in Vietnam's endeavors for fully integrating her economy with the global economy. Congratulating Vietnam on her entry into the WTO, the Prime Minister of India stated that this would provide yet another forum for cooperation between the two sides. The Vietnamese side proposed that India recognize Vietnam as a full market economy. The Indian side positively noted the Vietnamese proposal.
15. The two leaders noted with satisfaction that bilateral trade was growing steadily and resolved to take measures to increase bilateral trade turnover to US \$ 2 billion by 2010. The two sides were, however, aware of Vietnam's huge trade deficit with India and therefore agreed to take necessary measures to encourage Vietnam's exports to India so as to reduce the existing trade imbalances between the two sides. They noted that the current

year had seen a welcome trend of investment flows from India to Vietnam. There remained however, considerable untapped potential that could be realized through the diversification of the trade basket and further increases in investments taking advantage of existing complementarities. The two leaders welcomed the enhancement of cooperation between Chambers of Commerce and Industry of the two countries in order to support the private sector through the opening of contact points for business, organization of trade fairs and organizing seminars on exchange of information on trade opportunities, trade experiences, business environment and investment on an annual basis.

16. Recognizing the importance of global energy supplies to their respective national interests, the two leaders welcomed proposals for mutual investments and joint ventures in areas of complementarities such as the hydrocarbon and power sectors and directed oil and gas companies on both sides to further enhance their dialogue so as to conclude mutually beneficial agreements. The Vietnamese side noted the interest of some Indian companies for setting up refineries in Vietnam and welcomed the participation of Indian companies in bids for the import of crude oil from Vietnam.
17. The two leaders agreed to work together to improve connectivity and people-to-people contacts between their countries through enhanced tourism, aviation and shipping links. They also agreed to work both bilaterally and with other relevant countries in the ASEAN for improving land transportation linkages between the two countries.

### **Science and Technology Cooperation**

18. Both leaders agreed that a New Strategic Partnership between India and Vietnam necessitated closer cooperation in the field of science and technology. Both leaders agreed to intensify technological cooperation including in the fields of climate research, health sciences, nanotechnology, nano technology, biotechnology and other areas.
19. The two leaders expressed satisfaction at the growing bilateral cooperation between the two countries in the peaceful uses of nuclear energy and other areas of science and technology. They

noted that there was considerable potential for scientific collaboration between the two countries in biotechnology, health, pure sciences, agriculture, science management, new materials and climate research.

20. Both leaders noted with satisfaction their ongoing cooperation in the Information and Communication Technology sector and projects in human resource development and advanced computing to enable Vietnam to realize its goal of promoting its software industry in a self-sustaining manner.
21. The Prime Minister of Vietnam welcomed the willingness of the Indian Space Research Organization in cooperating with the Vietnam's space programme and indicated that the Vietnamese side would nominate an appropriate partner in this regard.
22. Both leaders agreed to promote greater linkages between their respective educational and research institutions and centers of excellence and directed their officials concerned to establish linkages between the various centers set up in Vietnam with Indian assistance, so as to benefit from their respective strengths and synergies. They agreed to encourage their citizens to engage in greater research activities, academic exchanges and scholarships.
23. The Vietnamese side agreed to cooperate with India in the areas of its established strength, such as processing of wood and leather products. The two sides agreed to promote cooperation and the exchange of experiences in the fields both sides have strength in, such as trade in and processing of marine products. The two sides also agreed to exchange experiences and collaborate in the global market for agriculture produce like coffee, pepper, cashew, rubber, etc.

### **Cultural and Technical Cooperation**

24. Both leaders noted with satisfaction the expansion of bilateral cooperation in the fields of culture, education and human resource development. The two sides also agreed to expedite a survey by a team of specialists from Archaeological Survey of India as well as its advice on the restoration of the Cham monuments in Vietnam. The Vietnamese side welcomed India's contribution to the restoration of Cham monuments in Vietnam.

25. The Prime Minister of Vietnam expressed appreciation for the training opportunities availed of by Vietnamese nationals under India's Technical and Economic Cooperation Programme (ITEC), the scholarships offered by the Indian Council of Cultural Relations for undergraduate/postgraduate study in India, training at the Entrepreneurship Development Centre in Vietnam and the proposed Centre for English Language training.
26. Both sides expressed satisfaction at the increase in people-to-people contacts both directly and through institutional mechanisms like friendship associations.

### **Multilateral and Regional Cooperation**

27. The two leaders express their commitment to strengthen the role of the United Nations, so that it can become a more effective multilateral system, based on the principles of international law and the purposes and principles enshrined in the UN charter. This would strengthen its role in international peace and security as well as development. They cited the need to advance the objectives of the global agenda in a balanced manner and adopt a comprehensive approach to the fulfillment of the Millennium declaration and the attainment of the Millennium Development Goals.
28. Both leaders reiterated strong support for the ongoing reform of the United Nations and its principal organs, including the Security Council, reflected in the Outcome of the High Level Plenary Meeting of the 60<sup>th</sup> Session of the United Nations General Assembly held in New York in September 2005.,
29. Both leaders emphasized the need to cooperate to ensure the successful outcome of the WTO Development Agenda because it would be important for the achievement of the Millennium Development Goals. Both leaders expressed their commitment to ensure that the Doha Development round means a balanced outcome which meets the concerns of the developing countries.
30. The Indian Prime Minister cited the important and constructive role that Vietnam had played in the ASEAN and Vietnam's contributions for regional stability. The Vietnamese Prime Minister expressed appreciation for India's "Look East" policy and the

growing partnership between ASEAN and India which had been further strengthened by the adoption of the "India-ASEAN Partnership for Peace, Progress and Shared Prosperity" and its detailed Plan of Action. Both leaders renewed the commitment and active participation of Vietnam and India in the Mekong-Ganga Cooperation. Both leaders stressed that the India-ASEAN partnership is based on a common interest in the peace and prosperity of the entire South and Southeast Asian region. They also underlined their shared commitment for deepening the integration process of the Indian economy with the economies of the ASEAN.

31. India expressed appreciation for Vietnam's support for India's participation in the East Asia Summit. While acknowledging the centrality of ASEAN in leading the process of creating this new regional architecture, both countries reaffirmed the need for all member countries of the East Asia Summit to fully participate and actively contribute to a East Asia community where regional cooperation and integration are facilitated, and agreed to closely work together towards that objective. They further agreed that the East Asia Summit would remain outward looking and inclusive, complementing other existing regional mechanisms.
32. The two sides further agreed to exchange views and coordinate positions on the matters of mutual concern on multilateral fora, such as ARF, ASEM, EAS and the UN.

### **Conclusion**

33. The two sides expressed their conviction that Prime Minister Nguyen Tan Dung's highly successful visit to India and the decision of the two Countries to establish a new strategic partnership have opened a new chapter in the friendship and cooperation between India and Vietnam.
34. Prime Minister Nguyen Tan Dung on behalf of the Vietnamese Government and the people expressed his appreciation to the Government and the people of India for the warm hospitality extended to him and his delegation. He invited Prime Minister Dr. Manmohan Singh to visit Vietnam at a mutually convenient time. The invitation was accepted with pleasure with dates to be decided through diplomatic channels.

**407. Memorandum of Understanding between the Department of Atomic Energy (DAE) of the Government of the Republic of India and Ministry of Science and Technology (MOST) of Government of Socialist Republic of Vietnam.**

**New Delhi, July 6, 2007.**

Under the framework of the Agreement between the **Government of Republic of India** and the **Government of the Socialist Republic of Vietnam** for cooperation for the utilization of atomic energy for peaceful purposes which was signed and entered into force on 25th March 1986, and reviewed from time to time, the last renewal being in May 2007 and presently valid up to May 2012, the DAE of India and the MOST of Viet Nam (referred hereafter as "the Parties") note that the bilateral Agreement has worked well so far, and all bilateral cooperation arrangements under this Agreement have been conducted successfully.

**I. Review of Cooperation Plan and Ongoing Activities**

It may be recalled that Vietnam-India Nuclear Science Centre (VINSC) was inaugurated on 10th January 2002. All equipment at VINSC has been maintained and kept operational by NRI staff with support of spares and expertise from BARC. Atomic Absorption Spectrometer (AAS) was upgraded with hydride generator kit and additional four hollow cathode lamps, enabling the analysis up to 17 different elements.

VINSC has been effectively utilized for training purpose and most of the equipment such as AAS has also been useful for research activities. The Centre could be augmented, if need be.

In the field of human resource development, Vietnamese scientists were deputed for training at different establishments under the DAE. One scientist completed training at BARC in 2002, one in 2004 and three in 2005. In addition, two delegations of Vietnamese officials and experts visited India in 2005. A four member Indian delegation headed by H.E. Dr. S. Banerjee, Director, BARC visited Dalat and Ho Chi Minh City from July 11-14, 2005 to review and assess the ongoing cooperation activities and discussed the possible formulation of a cooperation plan for 2005-2007, with Vietnam scientists led by Dr. Dien, Director, NRI, Dalat. At present, three other scientists of the ITRRE have already been accepted for training in India for 3-6 months.

India has supplied a 100 kCi Co-60 source for the Research and Development Center for Radiation Technology (VINAGAMMA) in Ho Chi Minh City. At present, the Vietnam Atomic Energy Commission (VAEC) is also completing the procedures for purchasing another Co-60 source from India.

## **II. Cooperation Plan for 2007-2010**

The parties mutually agreed to further strengthen and expand bilateral collaboration in the fields of peaceful uses of nuclear energy. Cooperation activities in 2007-2010, would comprise of the following:

**II.1** India would continue to train manpower from Vietnam in nuclear related fields. The fields of training, number of trainees and duration would be communicated by the VAEC in due course. The VAEC will, through a proper selection process, ensure that the scientists/engineers deputed for training are of high caliber and proficient in English. If necessary, the courses for Vietnamese scientists could be structured in a way that allows them more time for self-study.

**II.2** India would guide Vietnam in operating, utilizing and expanding the activities of VINSR to be able to conduct joint programmes, particularly of utilizing VINSR as a Regional Resource Centre to conduct training programmes under the aegis of IAEA and RCA.

**II.3** Senior experts from both sides may visit each other for short durations. The Vietnamese side expressed its keenness to invite Indian senior experts to visit and hold seminars or short training courses in Vietnam. Indian side agreed to the Vietnamese proposal. The details would be worked out on the basis of requirement and mutual agreement.

In addition, senior experts from Vietnam can visit DAE institutions for postdoctoral research in mutually agreed areas for a period of up to one year.

**II.4** Both the Parties agreed to continue cooperating in reactor calculation, safety analysis, familiarization with Monte Carlo methods as well as technology and safety of nuclear power plants.

**II.5** The two Parties agreed to promote the bilateral collaboration in the exploration, exploitation and processing of uranium ore at Nong Son basin in the province of Quang Nam. Cooperation activities in this matter would be discussed and mutually agreed upon at the working level.

**II.6** Viet Nam expresses its interest in regular supplies of Co-60 source for Viet Nam and VINAGAMMA will cooperate with Board of Radiation and Isotope Technology (BRIT) in the field of education and training, as well as in design and construction of industrial Co-60 sources and container for Co-60 sources for Vietnam and VINAGAMMA will cooperate with Board of Radiation and Isotope Technology (BRIT) in the field of education and training, as well as in design and construction of industrial Co-60 sources and container for Co-60 sources.

2. For all visits the sending side would bear the expenditure on the international airfare and the receiving side would provide local hospitality and internal transport, wherever necessary. In addition, the Indian side would continue to provide living allowance to visiting Vietnamese scientists for training under India-Vietnam Cooperation Plan. Details of each visit would be decided through mutual agreement.

**408. Memorandum of Understanding between the Government of the Republic of India and the Government of the Socialist Republic of Vietnam on the exchange of properties and land for their respective Diplomatic Missions.**

**New Delhi, July 6, 2007.**

**The Government of the Republic of India** (hereinafter referred to as the Government of India) and **the Government of the Socialist Republic of Vietnam** (hereinafter referred to as the Government of Vietnam);

**With** the desire to further consolidate and develop the traditional friendship and multifaceted cooperation between the two countries;

**With** an aim to create more conducive and favorable conditions for the functioning of their respective diplomatic missions in each other's capital;

**In order** to facilitate their diplomatic missions in construction, managing and maintaining their Chanceries and Residences in conformity with the new situation and on the basis of equality and reciprocity;

**Recalling** the Agreement on Reciprocal Exchange of Plots of Land for the Construction of Embassy Buildings, between the Socialist Republic of Vietnam and the Republic of India, signed on September 12, 2001 in New Delhi;

**Desirous** of initiating steps for implementation of this Agreement;

**Have** reached the following understanding:

**Article 1**

The Government of India and the Government of Vietnam agree to exchange equivalent areas of land without applying any charges or fees or rentals for the use and construction of necessary chancery and residences of the Diplomatic missions of each respective country.

**Article 2**

The Government of Vietnam agree to grant to the Government of India the right to use two plots of land with the total area of 3,752 sqm. and the structures constructed on them at 58-60 Tran Hung Dao Street (occupying an area of 2,057 sqm.) and 41 Ly Thuong Kiet Street

(occupying an area of 1,695 sqm.) in Hoan Kiem district of Hanoi, Vietnam for the use as Chancery and Residences of the Diplomatic Mission of the Republic of India.

### **Article 3**

The Government of India agree to grant to the Government of Vietnam the right to use a plot of land with the total area of 3452.156 sqm. at number EP-7A in the diplomatic quarter of Chanakyapuri in New Delhi (and another plot of land of 300 sq. metres in Delhi, which would be discussed later), for the use as Chancery and Residences of the Diplomatic Mission of the Socialist Republic of Vietnam.

### **Article 4**

The two sides agree to evaluate within six months the value of the infrastructures and constructions on the two plots of land as cited in Article 2 by an internationally recognized independent evaluating company. The cost of evaluation shall be equally shared by the two sides.

The Indian side shall, as soon as possible, transfer to the Vietnamese side the corresponding amount of money mutually agreed for the construction of its Chancery and Residences of Diplomatic Mission on the two plots of land cited in Article 3. Once this money transaction is completed, the Indian side shall obtain the full ownership of infrastructures and constructions on the two plots of land as cited in Article 2 and consequently, no more rentals shall be applied by the Government of Vietnam. At the same time, the Government of India will hand over possession of the plot mentioned in Article 3 to the Vietnamese side.

### **Article 5**

The Government of India shall permit and facilitate the Government of Vietnam to construct new structures on the plots of land cited in Article 3 for the latter's Chancery and necessary Residences of Diplomatic Missions as per the Vietnamese side's requirements and in conformity with Indian Laws and local planning.

### **Article 6**

The land as cited in Articles 2 and 3 and the ownership thereof would still belong to the Government of the host country. The plots will be

allotted on a lease of 99 years, without any lease rental, and with provision for automatic renewal. The rights to use land and the ownership of current and future infrastructures and constructions on the plots of land as cited in Article 2 and 3 shall belong to the Government of the sending country of each respective Diplomatic mission.

Each side shall cover all costs of repairs, maintenance, renovation and new construction in their respective Chanceries and Residences of Diplomatic Mission. However, new construction projects must get the approval of the host country.

#### **Article 7**

The Government of India and Vietnam agree that the two sides would only have the rights to use land, infrastructures and constructions on the plots of land mentioned in Articles 2 and 3 in conformity with international laws and national law of the host country as their respective Chanceries and Residences of Diplomatic Missions, and not for any other purposes. The properties would also not be transferred to a third party for use without the consent of the host country.

This Memorandum of Understanding comes into effect on the date of signing.

**409. Treaty between the Republic of India and the Socialist Republic of Vietnam on Mutual Legal Assistance in Criminal Matters.**

**Hanoi, October 8, 2007.**

**The Republic of India and the Socialist Republic of Vietnam** (hereinafter referred to as "the Contracting Parties"),

**GUIDED** by the traditional friendly relations between the two countries;

**DESIRING** to improve the effectiveness of cooperation between the two countries in the field of mutual legal assistance in criminal matters on the basis of mutual respect for sovereignty, equality and mutual benefit,

**HAVE AGREED** as follows:

**Article 1**  
**Scope of Application**

1. The Contracting Parties shall, in accordance with the provisions of this Treaty, grant each other the widest measure of mutual legal assistance in criminal matters.
2. Mutual legal assistance is any assistance given by the Requested Party in respect of investigations, prosecutions or other proceedings to the Requesting Party in criminal matters, irrespective of whether the assistance is sought or is to be provided by a court or some other authority.
3. Assistance shall be provided without regard to whether the conduct which is the subject of the investigation, prosecution or proceedings in the Requesting Party would constitute an offence under the laws of the Requested Party.
4. Assistance shall include:
  - (a) taking evidence or Statements from persons;
  - (b) providing information, documents, records and articles of evidence;
  - (c) locating or identifying persons or items;
  - (d) serving documents;

- (e) executing requests for search and seizure;
  - (f) authorizing the presence of persons from the Requesting Party at, the execution of requests;
  - (g) making arrangements for persons to give evidence or assist in criminal investigations, prosecutions or proceedings in the Requesting Party;
  - (h) making detained persons available to give evidence or assist investigations;
  - (i) tracing, restraining, forfeiting and confiscating the proceeds and instrumentalities of criminal activities including those related to terrorism
  - (j) any other assistance consistent with the object of this Treaty which is not inconsistent with the laws of the Requested Party.
5. Assistance granted under this Treaty does not include:
- (a) the extradition, or the arrest or detention for that purpose, of any person;
  - (b) the execution in the Requested Party of criminal judgments imposed in the Requesting Party except to the extent permitted by the law of the Requested Party and this Treaty;
  - (c) the transfer of persons in custody to serve sentences;
  - (d) the transfer of proceedings in criminal matters.

## **Article 2** **Definitions**

1. For the purpose of this Treaty, "criminal matters" mean investigations (including inquiries), prosecutions or proceedings relating to any offence, including offences against a law related to taxation, customs duties, foreign exchange control or other revenue matters, the punishment of which at the time of the request for assistance falls within the jurisdiction of the Requesting Party.
2. For the purpose of this Treaty, "Proceeds of Crime" means any property derived or obtained directly or indirectly, by any person as a result of criminal activity (including crime involving currency transfers) or the value of any such property.

**Article 3**  
**Central Authorities**

1. The Contracting Parties shall, at all times, have a person or an authority designated as the Central Authority, to transmit and receive requests for the purposes of this Treaty.
2. The following shall be the Central Authorities at the commencement of this Treaty:
  - (a) For the Republic of India, the Central Authority shall be the Ministry of Home Affairs
  - (b) For the Socialist Republic of Vietnam, the Central Authority shall be the People's Supreme Procuracy;
3. Each Party shall notify the other of any change of its Central Authority referred to in paragraph 2 of this Article.
4. The Central Authorities shall normally communicate directly with one another, but may, if they choose, communicate through diplomatic channels.

**Article 4**  
**Execution of Requests**

1. Requests for assistance shall be carried out promptly by the competent authorities of the Requested Party in accordance with the laws of that Party and, to the extent those laws permit, in the manner requested by the Requesting Party.
2. The Requested Party shall, upon request, inform the Requesting Party of the date and place of execution of the request for assistance.
3. The Requested Party may postpone the delivery of material requested if such material is required for proceedings in respect of criminal or civil matters in that Party. If this is the case, the Requested Party shall, upon request, provide certified copies of documents.
4. The Requested Party shall promptly inform the Requesting Party of circumstances, when they become known to the Requested Party, which are likely to cause a significant delay in carrying out the request.
5. The Requested Party shall not refuse to execute a request on the ground of bank secrecy.

**Article 5**  
**Contents of Requests**

1. Requests for assistance shall:
  - (a) indicate the name of the competent authority conducting the investigation, prosecution or other proceedings to which the request relates;
  - (b) specify the purpose of the request and the nature of the assistance sought;
  - (c) identify the person, agency or authority that initiated the request;
  - (d) include a description of the nature of the criminal matter, including a summary of the relevant facts and laws and applicable penalties;
  - (e) include a Statement indicating the current status of the investigation or proceeding;
  - (f) include a Statement specifying any time frame within which compliance with the request is desired.
2. Requests for assistance, where relevant and so far as possible, shall also include:
  - (a) the identity, nationality and location of the person or persons who are the subject of, or who may have information relevant to the criminal matter;
  - (b) where the request is for assistance under Article 11:-
    - (i) in the case of requests to take evidence from a person, an indication as to whether sworn or affirmed Statements are required and a description of the matter about which persons are to be examined including, where appropriate, any questions that the Requesting Party wishes to put to those persons;
    - (ii) a description of any documents, records or articles of evidence to be produced and, where relevant, a description of the appropriate person to be asked to produce them;

- (c) in the case of lending of exhibits, the current location of the exhibits in the Requested Party and an indication of the person or class of persons who will have custody of the exhibits in the Requesting Party, the place to which the exhibit is to be taken, any tests to be conducted and the date by which the exhibit will be returned;
- (d) in the case of making persons in custody available, an indication of the person or class of persons who will have custody during the transfer, the place to which the person in custody is to be transferred and the probable date of that person's return;
- (e) where the request is for assistance under Article 13 or 14, information about the allowances and expenses to which a person traveling to the Requesting Party would be entitled;
- (f) where the request is for assistance under Article 10 or Article 16 or Article 17 a description of the material sought and, where relevant, its likely location;
- (g) where the request is for assistance under Article 16 or Article 17;-
  - (i) a Statement outlining the basis of Requesting Party's belief that proceeds of crime may be located in its jurisdiction, and
  - (ii) the court order, if any, sought to be enforced and a Statement about the status of that order;
- (h) where the request is for assistance that may lead to or result in the discovery or recovery of proceeds of crime, a Statement as to whether a special arrangement under Article 16 (4) is sought.
- (i) a Statement outlining any particular requirement or procedure that the Requesting Party may have, or wish to be followed in giving effect to the request, including details of the manner or form in which any information, evidence, document or item is to be supplied;
- (j) Statement setting out the wishes, if any, of the Requesting

Party concerning the confidentiality of the request, and the reasons for those wishes;

- (k) where an official of the Requesting Party intends traveling to the Requested Party in connection with the request, information about the purpose of that person's visit, the proposed time frame and travel arrangements;
  - (l) any other supporting information, evidence or documents that is necessary to enable, or may assist, the Requested Party to give effect to the request.
3. If the Requested Party considers that the information contained in a request is not sufficient to enable the request to be dealt with in accordance with this Treaty, it may request additional information.
  4. A request shall be made in writing except that the Requested Party may accept a request in another form in urgent situations. In any such situation, the request shall be confirmed in writing within 45 days unless the Requested Party-agrees otherwise.

#### **Article 6** **Refusal or Postponement of Assistance**

1. Assistance shall be refused if, in the opinion of the Requested Party:
  - (a) the request relates to an offence that is regarded by the Requested Party as a purely military offence;
  - (b) the request relates to the prosecution of a person for an offence in respect of which the person has been convicted, acquitted or pardoned in the Requested Party; !
  - (c) the request, if granted, would impair the Requested Party's sovereignty, security, public order or essential interests.
2. Assistance may be refused if, in the opinion of the Requested Party,
  - (a) the execution of the request would be contrary to the domestic law of the Requested Party.
  - (b) the request seeking restraint, forfeiture or confiscation of proceeds of crime or seizure of property are in respect of conduct/ activity which cannot be made basis for such restraint, forfeiture, confiscation or seizure in the Requested Party.

3. Assistance may be postponed by the Requested Party if the request would interfere with an ongoing investigation or prosecution in the Requested Party.
4. Before denying or postponing assistance pursuant to this Article, the Requested Party, through its Central Authority, shall:
  - (a) promptly inform the Requesting Party of the reason for considering denial or postponement; and
  - (b) consult the Requesting Party to determine whether assistance may be given subject to such terms and conditions as the Requested Party deems necessary.
5. If the Requesting Party accepts assistance subject to the terms and conditions referred to in paragraph 4 (b), it shall comply with those terms and conditions.

**Article 7**  
**Service of Documents**

1. The Requested Party shall, to the extent its laws permit, carry out requests for the service of documents in respect of a criminal matter.
2. A request for service of a summons requiring the appearance of a person as a witness in the Requesting Party shall be made to the Requested Party within 45 days before the scheduled appearance. In urgent cases, the Requested Party may waive this requirement.
3. The Requested Party shall forward to the Requesting Party proof of service of the documents. If service cannot be effected, the Requesting Party shall be so informed and advised of the reasons.

**Article 8**  
**Provision of Information**

1. The Requested Party shall provide copies of publicly available documents, records or information that are open to public access.
2. The Requested Party may provide copies of any documents, records or information in the same manner and under the same conditions as they may be provided to its own law enforcement and judicial authorities. As and when requested by the Requesting Party, the documents shall be certified as per the requirement of Law of the Requesting Party.

3. The Requested Party may provide certified true copies of documents of records, unless the Requesting Party expressly requests originals.

**Article 9**  
**Return of Material to the Requested Party**

Where required by the Requested Party, the Requesting Party shall return material provided under this Treaty when it is no longer needed for the criminal matter to which the request relates.

**Article 10**  
**Search and Seizure**

1. The Requested Party shall, to the extent its laws permit, carry out requests made in respect of a criminal matter in the Requesting Party for the search, seizure and delivery of material to that Party as is got done for its own law enforcement and judicial authorities.
2. The Requested Party shall provide such information as may be required *by* the Requesting Party concerning the result of any search, the place and circumstances of seizure, and the subsequent custody of the material seized.
3. The Requesting Party shall observe any conditions imposed by the Requested Party in relation to any seized material which is delivered to the Requesting Party.

**Article 11**  
**Taking of Evidence**

1. The Requested Party shall, to the extent its laws permit and upon request, take testimony, or otherwise obtain Statements of persons or require them to produce items of evidence for transmission to the Requesting Party.
2. The Requested Party, to the extent permitted by its law, shall permit the presence of such persons as specified in the request during the execution of the request, and may allow such persons to question the person whose testimony or evidence is being taken. In the event that such direct questioning is not permitted, such persons shall be allowed to submit questions to be posed to the persons whose testimony or evidence is being taken. However, the persons present at the execution of a request may be permitted to make a verbatim transcript of the proceedings. The use of technical means to make

such a verbatim transcript may be permitted.

3. A person from whom evidence is to be taken in the Requested Party pursuant to a request under this Article may decline to give evidence where:
  - (a) the law of the Requested Party would permit or require that person to decline to give evidence in similar circumstances in criminal proceedings originating in the Requested Party; or
  - (b) the law of the Requesting Party would permit or require that person to decline to give evidence in such criminal proceedings in the Requesting Party.
4. If any person in the Requested Party claims that there is a right or obligation to decline to give evidence under the law of the Requesting Party, the Central Authority of the Requesting Party shall, upon request, provide a certificate to the Central Authority of the Requested Party as to the existence or otherwise of that right. In the absence of evidence to the contrary, the certificate shall be sufficient evidence of the matters stated in it.
5. For the purposes of this Article, the taking of evidence includes the production of documents or other articles.

#### **Article 12**

##### **Presence of Persons at the Execution of Requests**

To the extent not prohibited by the law of the Requested Party, persons specified in the request shall be permitted to be present at the execution of the request.

#### **Article 13**

##### **Transfer of Persons in Custody to Give Evidence or Assist Investigations**

1. A person in custody in the Requested Party may, at the request of the Requesting Party, be temporarily transferred to that Party to give evidence in criminal proceedings or assist investigations in that Party. For the purposes of this Article, a person in custody also includes a person not detained in prison but who is subject to a sentence imposed for an offence, not being a sentence of a monetary nature.

2. The Requested Party shall transfer a person in custody to the Requesting Party only if:
  - (a) the person freely consents to the transfer; and
  - (b) the Requesting Party agrees to comply with any conditions specified by the Requested Party relating to the custody or security of the person to be transferred.
3. Where the Requested Party advises the Requesting Party that the transferred person is no longer required to be held in custody, that person shall be released.
4. A person who is transferred pursuant to a request under this Article shall be returned to the Requested Party in accordance with arrangements agreed by the Requested Party as soon as practicable after the evidence has been given or at such earlier time as the person's presence is no longer required.

**Article 14**  
**Availability of Other Persons to Give**  
**Evidence or Assist Investigations**

1. The Requesting Party may request the assistance of the Requested Party in arranging for the transfer of a person (not being a person to whom Article 13 of this Treaty applies) to the Requesting Party to give or provide evidence or assistance in respect of a criminal matter in the Requesting Party.
2. The Requested Party shall, if satisfied that satisfactory arrangements for that person's safety will be made by the Requesting Party, invite the person to consent to give or provide evidence or assistance in the Requesting Party. The person shall be informed of any expenses or allowances payable. The Requested Party shall promptly inform the Requesting Party of the person's response and, if the person consents, take all steps necessary to facilitate the request.

**Article 15**  
**Safe Conduct**

1. Subject to paragraph 2 of this Article, a person present in the Requesting Party pursuant to a request made under Article 13 or Article 14 of this Treaty. shall not:

- (a) be detained, prosecuted or punished in the Requesting Party or any 1 offence, nor be subject to any civil proceedings, being civil proceedings to which the person could not be subjected if the person were not in the Requesting Party, in respect of any act or omission which preceded the person's departure from the Requested Party; and
  - (b) without his/ her consent, be required to give evidence in any criminal proceeding or to assist any criminal investigation other than the criminal matter to which the request relates.
2. Paragraph 1 of this Article ceases to apply if that person, being free to leave, has not left Requesting Party within a period of 30 days after that person has been officially notified that his or her presence is no longer required or, having left, has returned.
3. A person who does not consent to give evidence pursuant to Article 13 or Article 14 of this Treaty shall not by reason thereof be liable to any penalty or coercive measure by the courts of the Requesting Party or Requested Party.
4. A person who consents to give evidence pursuant to Articles 13 or Article 14 of this Treaty shall not be subject to prosecution based on his or her testimony, except for perjury or contempt of Court.

**Article 16**  
**Proceeds and Instruments of Crime**

1. The Requested Party shall, upon request; endeavour to ascertain whether any proceeds or instruments of crime are located within its jurisdiction and shall notify the Requesting Party of the results of its inquiries.
2. Where, pursuant to paragraph 1, suspected proceeds or instruments of crime are found, the Requested Party shall take such measures as are permitted by its law to restrain or confiscate such proceeds or instruments of crime.
3. In the application of this Article, the rights of bona fide third parties shall be respected under the law of the Requested Party.
4. The Requested Party shall retain any proceeds or instruments of crime that are confiscated unless otherwise agreed in a particular case.

**Article 17**  
**Funds meant for financing acts of terrorism**

Where either of the Contracting States have reasons to believe that any person or group of persons in their jurisdiction has collected or has been collecting or has contributed or has been contributing to any funds meant, directly or indirectly for the financing or furthering the acts of terrorism in the territory of the other State, it shall bring these facts to the notice of the other signatory State and shall take steps as permitted by its law for search, seizure and confiscation of such funds and the prosecution of the individual concerned.

**Article 18**  
**Confidentiality**

1. The Requested Party may require, after consultation with the Requesting Party, that information or evidence furnished or the source of such information or evidence be kept confidential, disclosed or used only subject to such terms and conditions as it may specify.
2. The Requesting Party may require that the request, its contents, supporting documents and any action taken pursuant to the request be kept confidential. If the request cannot be executed without breaching the confidentiality requirement, the Requested Party shall so inform the Requesting Party prior to executing the request and the latter shall then determine whether the request should nevertheless be executed.
3. The Requesting Party shall, if so requested, use its best efforts to ensure that the information or evidence is protected against loss and unauthorized access, use, modification, disclosure or other misuse.

**Article 19**  
**Limitation of Use**

The Requesting Party shall not use information or evidence obtained, nor anything derived from either, for purposes other than those stated in a request without the prior consent of the Requested Party.

**Article 20**  
**Certification and Authentication**

1. Subject to paragraph 2 of this Article, a request for assistance, the

documents in support thereof, and documents or materials furnished in response to a request, shall not require any form of certification or authentication.

2. Where, in a particular case, the Requested or Requesting Party requests that documents or materials be authenticated, the documents or materials shall be duly authenticated in the manner provided in paragraph 3.
3. Documents or materials are authenticated for the purposes of this Treaty if they purport to be signed or certified by an official or competent authority under the laws of the Party sending the document and to be sealed with an official seal of that authority.

#### **Article 21 Language**

A request, any supporting documentation and any communications made pursuant to this Treaty, shall be in the language of the Requesting Party and be accompanied by a translation into the language of the Requested Party or in the English language.

#### **Article 22**

##### **Subsidiary Arrangements**

The Central Authority of each Party may enter into subsidiary arrangements consistent with the purposes of this Treaty and with the laws of both Parties.

#### **Article 23 Representation and Expenses**

1. Unless otherwise provided in this Treaty, the Requested Party shall make all necessary arrangements for the representation of the Requesting Party in any criminal proceedings arising out of a request for assistance and shall otherwise represent the interests of the Requesting Party.
2. The Requested Party shall meet the cost of fulfilling the request tot-assistance except that the Requesting Party shall bear:
  - (a) the expenses associated with conveying any person to or from the territory of the Requested Party, and the accommodation expenses of the person and any fees, allowances or other

- expenses payable to that person while in the Requesting Party pursuant to a request under Articles 7, 13 or 14 of this Treaty;
- (b) the expenses associated with conveying custodial or escorting officers;
  - (c) fees and expenses of experts,
  - (d) expenses associated with interpretation and the translation of documents and taking of evidence from the Requested Party to the Requesting Party via video, satellite or other technological means;
  - (e) where required by the Requested Party, exceptional expenses incurred 1 in fulfilling the request.

**Article 24**  
**Compatibility with other Treaties**

This Treaty shall not prevent either Party from granting assistance to the other Party through the provisions of other applicable international conventions/ agreements, or through the provisions of its domestic law. The Contracting Parties may also provide assistance pursuant to any bilateral arrangement, agreement or practice which may be applicable.

**Article 25**  
**Consultations**

The Contracting Parties shall consult promptly, at the request of either concerning any issue relating to the interpretation, application or implementation of this Treaty, either generally or in relation to a particular case.

**Article 26**  
**Entry into Force and Termination**

1. This Treaty :
  - (a) is subject to ratification and the instruments of ratification shall be exchanged as soon as possible;
  - (b) shall enter into force from the date of exchange of instruments of ratification;
  - (c) applies to requests regardless of the fact whether the relevant

acts or omissions occurred before or after its entry into force;  
and

(d) may be amended by mutual consent.

2. Either Contracting Party may terminate this Treaty. The termination shall take effect six (6) months from the date on which it is notified to the other Contracting Party.

**IN WITNESS WHEREOF**, the undersigned, being duly authorized thereto by their respective Governments, have signed this Treaty.

**DONE** at Hanoi this the 8<sup>th</sup> day of October, 2007 (Two Thousand and Seven) in two originals, each in Hindi, Vietnamese and English, all texts being equally authentic. However, in case of divergence of interpretation, the English text shall prevail.

#### **410. Address by Minister of State E. Ahamed at the 19th Summit of the League of Arab States.**

**Riyadh, March 29, 2007.**

Your Majesty, King Abdullah bin Abdul Aziz Al Saud of Saudi Arabia and Custodian of the Two Holy Mosques, Your Majesties, Highness' and Excellencies, Your Excellency Dr. Amre Moussa, Secretary General of the Arab League, Ladies and Gentlemen,

It is with great pleasure and pride that I lead the Indian delegation to the 19th Summit of the League of Arab States in this majestic capital, Riyadh. This Summit acquires special significance as it is convened at a time when major events are engaging the Arab world and impacting the region. The Arab world itself has seen major changes between the holding the last Summit in Khartoum and the present Summit. The important role played by Your Majesty in consultation with fellow Arab leaders in recent weeks, towards the resolution of some major issues agitating the region deserves high praise. This is an auspicious beginning to the 19th Summit of League of Arab States.

Your Majesty,

2. India has been closely following developments in the Arab world, and with care and concern<sup>1</sup>. In underlining this interest, it is not incomprehensible that we have had several high-level visits from and to the Arab world in the last year beginning with the State Visit of Your Majesty in January. We were also privileged to receive His Majesty King Abdullah the Second of the Hashemite Kingdom of Jordan and His Highness Sheikh Sabah Al Jaber al Ahmed al Sabah,

---

1. A press release of the Ministry of External Affairs issued on March 23 said that "this is the third time India has been invited to the Arab Summit. The last two summits were held in Algiers and Khartoum in 2005 and 2006 respectively." The Release said "The people and Government of India attach great importance to the diversification and strengthening of traditional relations with the Arab people and Arab world. In keeping with this sentiment India has evolved close links with the Arab League, since the early years of our independence." India enjoys the Observer status in the Arab League. India's participation underlines the policy of enhancing the effectiveness of its relations with the Arab world. The participation in 2007 assumes significance in the light of the recent developments concerning Palestine, where a new Palestine National Unity Government had been formed. India's traditional support to the legitimate rights and aspirations of the Palestinian people is well-known. India's relations with the Arab countries have found reflection in individual Arab countries through extension of assistance for various developmental projects in a variety of sectors.

the Emir of Kuwait and very recently, His Highness Shaikh Salman bin Hamad Al Khalifa, Crown Prince, Kingdom of Bahrain and His Highness Shaikh Mohammed bin Rashid al Maktoum, Vice President and Prime Minister of the United Arab Emirates and Ruler of Dubai, besides hosting high-level visits from Egypt and Morocco. Earlier, we had the pleasure of hosting His Highness Sheikh Hamad Bin Khalifa Al-Thani, the Emir of Qatar, Mr. Driss Jetou, Prime Minister of Morocco and Mr. Mahmoud Abbas, President of Palestine. Delegations from my country have visited almost all Arab states. I myself have been privileged to travel to the Gulf and other Arab countries. Thus, the interaction at all levels between India and the Arab world is healthy, cordial, multifaceted and rapidly expanding.

Your Majesty,

3. I bring to you an affirmation of this relationship through a message of goodwill and friendship addressed to you and to the Summit by my Prime Minister Dr. Manmohan Singh whose government has implemented a policy decision from its outset to enhance our relations with the Arab world to new heights. I quote:

"India has always extended principled and consistent support to Arab causes. I wish to express warm appreciation for Your Majesty's wisdom in facilitating the Mecca Agreement. Issues of interest to the Arab world have always been high in India's foreign policy priorities.

I am happy to inform Your Majesty that we have had very productive and wide-ranging consultations within the framework of the Memorandum of Understanding of 2002 between India and the League of Arab States.

We look forward to Your Majesty's gracious support on this occasion in consolidating the excellent relations which we enjoy with the member States of the Arab League. May I also request Your Majesty's kindness in conveying the greetings of the Indian people to the Heads of States and Government of all delegations attending the Summit?"

4. The centuries-old ties that bind India to the Arab world are too numerous, strong and varied for me to enumerate. In modern times, our destinies have been linked during our respective freedom struggles and it was only appropriate that India was one of the first

countries where the League of Arab States opened an office in the early 1950s soon after our independence in 1947. The role and the stature of League of Arab States has increased in international fora representing an importance voice in mediation and dialogue for contentious issues agitating the region, in West Asia, Gulf or North Africa, that have an impact beyond the immediate neighbourhood. India believes in finding solutions through peaceful dialogue, discussion and reconciliation among the various groups involved rather than resort to force.

Your Majesty,

5. In this regard I wish to reiterate the strong support and commitment of the Government and the people of India to the just and legitimate rights of the Palestinian people, the cause of Palestine and to the establishment of the State of Palestine. We support the path of peaceful negotiations leading to the establishment of a sovereign, independent, viable and united State of Palestine, within well-defined and recognised borders, living in peaceful coexistence with its neighbours.
6. The Government of India in this regard specially commends and welcomes the personal initiative and efforts undertaken by Your Majesty, towards the realisation of a Palestinian Government of National Unity, under President Mr. Mahmoud Abbas through the ground-breaking Mecca Agreement of 8th February 2007. We welcome the cooperation of all Palestinian leaders in this regard.
7. We further welcome the formal setting up of the Palestinian Government of National Unity on 18th March, 2007 under President Mahmoud Abbas resulting from the Mecca Agreement, and signalling reconciliation and cooperation among the Palestinians and encourage all parties concerned to work towards resumption of dialogue in the peace process as a follow-up. India is willing to work further with the Palestinian Authority in their reconstruction of their nation.
8. India supports a comprehensive and just peace in West Asia which addresses all tracks of the peace process.
9. All these recent developments mentioned above, in West Asia would not be incompatible with the Beirut Peace Plan of 2002.

Your Majesties, Excellencies,

10. The Government of India attaches a high priority to its multi-faceted relations with the Arab nations. Over the years, the arts, culture, trade and the sciences have brought together our many cultures for mutual enrichment of our societies and people-to-people contact. India and the Arab nations form part of each others' strategic and commercial neighbourhood.
11. In the 21st century, even as India focuses with greater intensity on the Arab world, we witness growing and rapid engagement from Arab nations in the Indian economy and trade. There are great complementarities between our economies since Arab nations are important sources of our energy and a growing destination for our investments and an expanding market for our goods. Approximately 5 million Indians live in Arab nations and engage in their economies and societies. We on our part welcome Arab investors and chambers of commerce to take advantage of the booming Indian economy. We are happy to see that Arab Chambers of Commerce are already working on a track-II engagement and in the last year alone we have had delegation from several Arab countries in the Gulf, West Asia as well as North Africa, coming to India and vice versa.
12. Addressing the 79th Annual General Meeting of Federation of the Indian Chambers of Commerce and Industry, in January earlier this year, our Prime Minister said of the Indian economy and I quote:

"Apart from the higher rate of investment, which is now at an all-time peak of 31% of GDP, what has sustained the above 8% annual rate of growth of the economy is the altered state of expectations. New opportunities are being created to promote public-private partnerships for the expansion and modernization of infrastructure sectors. Not only do we have a goal of investing over US \$ 320 billion in our infrastructure sectors, we have also created the necessary institutional structures and tangible investment opportunities to enable this investment to actually happen."
13. Indian entrepreneurs have already invested in joint ventures, in energy, power, health, infrastructure, IT, shipping, air services, higher education, pharmaceuticals, automobiles, agriculture machinery, etc.

in Arab nations. India-Arab Trade Fairs have been highly successful in 2006 and have been held in Gulf, Sudan and Morocco.

Your Majesty,

14. India would wish to evolve a more structured framework with the League of Arab States with regular high-level interaction with the Secretary General Dr. Amre Moussa and other members and with greater focus on the economy, trade and health services with private and public partnership, and an active involvement of the Chambers of Commerce. May I point out that India will be more than happy to cooperate with the Arab countries as a partner in a mutually beneficial relationship?
15. In conclusion, I would like to convey my gratitude to Your Majesty and to the Government of the Kingdom of the Saudi Arabia for the excellent arrangements made for the Summit and for the gracious hospitality extended to the members of my delegation. On behalf of the people of India and the leadership, I convey our good wishes for the success of the Summit.

Thank you.

**411. Press Release issued by the Ministry of External Affairs on the visit of Arab League Delegation.**

**New Delhi, May 10, 2007.**

H.E. Ambassador Heshm Youssef, Chief of the Cabinet of the Secretary-General of the League of Arab States, led a 5-member delegation to New Delhi on 9-10 May 2007 for the third round of the India-Arab League bilateral dialogue. The Indian delegation was headed by Shri N. Ravi, Secretary(East), MEA. The dialogue took place within the framework of the MoU signed between the Ministry of External Affairs and the Secretariat of the League of Arab States on 6 March 2002.

During the talks, the leader of the two delegations exchanged their views and assessments of regional and multilateral issues. Secretary(East) emphasized the importance India attaches to its long-standing relations of friendship and cooperation with the Arab world. The recent high-level exchange of visits between India and the Arab countries and India's

expanding trade and economic relations with West Asia and North Africa and the Gulf were noted with satisfaction. Secretary (East) reaffirmed India's strong support for the legitimate aspirations of the Palestinian people. India's strong commitment to the just and legitimate rights of the Palestinian people, to the establishment of a sovereign, independent, viable and united state of Palestine, within well defined and recognized borders, living in peaceful co-existence with its neighbours, was reiterated.

Both sides agreed that possibilities of strengthening economic and commercial relations and cooperation in HRD, S&T and tourism within the India-Arab League framework should be studied and developed. In this context, a preliminary exchange of views took place on establishing an India-Arab Cooperation Forum. It was agreed to continue discussions on this subject.

During the visit, Ambassador Hesham Youssef also called on Minister of State for External Affairs, Shri E. Ahamed.

The Arab League delegation also had discussions with ASSOCHAM, CII and FICCI on enhancing trade and joint ventures in traditional and new sectors between the Arab nations and India.

**412. Address by Vice President M. Hamid Ansari at the International Conference on “Emerging Security Concerns in West Asia” organised by the Observer Research Foundation.**

**New Delhi, November 21, 2007.**

Ambassador Rasgotra

Prof. Michael Brie

Gen. V.P. Malik

Members of the ORF fraternity

Distinguished guests

Ladies and gentlemen

It is a pleasure to be back on a familiar platform. Familiarity in this case,

however, is a disadvantage since I may be in danger of repeating what I might have articulated on previous occasions!

Many years back the British philosopher Gilbert Ryle had drawn attention to the dangers of expressions that are 'couched in syntactical form improper to the facts recorded'. This observation is relevant to our subject today since the theme of the conference begs definition and delineation. Unanimity of perception, of course, would have been ideal; since that is lacking, the two operative terms – 'emerging' and 'security concerns' – need to be spelt out.

Centrality has been the curse of West Asia. It is hardly necessary to remind this audience that external security concerns pertaining to the region have been around for over a century. Writing in 1917, Marriott, a British Scholar, defined the Eastern Question as 'the problem of filling up the vacuum created by the gradual disappearance of the Turkish Empire from Europe'. In May 1917, Britain and France used the Sykes-Picot Agreement to acquire 'the right of priority in enterprises and local loans' in designated Arab areas of the Ottoman Empire and to deny any facilities to a third Power in the Arabian Peninsula and the Red Sea. In a parallel move, the secret Balfour Declaration of November 1917 carried the commitment for the 'establishment in Palestine of a national home for the Jewish people'. A decade earlier on August 31, 1907, the Anglo-Russian Entente was signed, dividing Iran into three zones only one of which was under Iranian control. 'The Iranians', in Professor Nikkie Keddie's words, 'were neither consulted on the agreement nor informed of the terms'. That exercise, of division and occupation, was repeated during World War II.

These experiences with external powers left indelible marks on national perceptions.

The short point that I wish to emphasise is that 'emerging security concerns' cannot be viewed in a vacuum and in a single dimension; they need to be seen both from the internal and the external perspectives and in terms of the historical experience of individual societies. Furthermore, security perceptions vary greatly within nations and between them. Security is no longer viewed in military and nation-state terms. National security and regime security are not necessarily synonymous. Today we live in the age of human security. Progress in comprehension would therefore be possible only through de-segregation; generalisations would be possible only if we succeed in identifying common threat perceptions.

These experiences with external powers left indelible marks on national perceptions.

The short point that I wish to emphasise is that 'emerging security concerns' cannot be viewed in a vacuum and in a single dimension; they need to be seen both from the internal and the external perspectives and in terms of the historical experience of individual societies. Furthermore, security perceptions vary greatly within nations and between them. Security is no longer viewed in military and nation-state terms. National security and regime security are not necessarily synonymous. Today we live in the age of human security. Progress in comprehension would therefore be possible only through de-segregation; generalisations would be possible only if we succeed in identifying common threat perceptions.

Any discussion of contemporary West Asia must begin with three questions:

What is happening in the region?

Why is it happening?

What is the way out?

The answer to the first question is obvious. It focuses on a set of well-known situations:

- A Middle East Peace Process that is lingering on promissory notes whose encashment has been deferred repeatedly;
- A quagmire in Iraq that has dented the prestige and power of the United States;
- A failure to abandon the doctrines of 'Pre-emptive Strikes' and of 'Regime Change' despite the experience of recent years and sharply declining public support for it in the United States;
- Israel's failure to destroy the Hezbollah in Lebanon and Hamas in Gaza;
- America's stand off with Iran, and the threat to regional and world peace emanating from it;
- Enhanced external pressure on Iran to terminate its nuclear programme;
- Demographic pressures and a developing gap between commitment and expectation in West Asian societies;

- Failure of the 'Middle East Initiative' and the 'Greater Middle East Initiative' and of the attempt to democratise West Asian societies. Also, the impact of this on indigenous reform movements; and
- The little mentioned problem of water.

There is no simple answer to the second question. West Asia has been and continues to be a pivotal factor in global geopolitics. These have been aggravated in recent years by a set of new considerations:

- Crisis of the Old Order and end of bipolarity;
- The attempt to impose a New Order.
- Failure to develop a security paradigm in the region and particularly in the Persian Gulf; and
- Ideological dimensions and their implications – defeat of Arabism and Arab nationalism, failure of the Left and the re-emergence of religious radicalism.

These factors do not function autonomously; instead, they interact on a continuous basis. Comprehensive analysis of these is not possible in the short time available to me this morning. One aspect, however, is worth highlighting; I refer to the interaction between the periphery and the core. In specific terms, this would refer to the role of Israel and Iran, and occasionally of Turkey, and the impact of their relationship on the core problems of contemporary West Asia.

An answer to the third question is contingent on variables of considerable size and diversity. One could begin by stating the factual situation as known publicly.

While the greater part of the region and its population are Arab, the principal factors in the strategic calculus are non-Arabs. Two are on the periphery – Israel and Iran, and one beyond it – the United States. The interaction of these with the region, and with each other, is having a decisive impact.

A beginning may be made with self-perceptions. The region, President Bush said in his State of the Union message earlier this year, is the venue of 'the decisive ideological struggle of our times'. As Undersecretary of State Nicholas Burns put it, it is the epicentre of American foreign policy.

On the other side is the view of Dr. Martin Kramer, an Israeli-American

scholar of considerable repute who also serves as senior Middle East advisor to Republican presidential hopeful Rudy Giuliani. He said in a lecture the other day that 'we must get ourselves back over the horizon and as much out of the Arab line of sight as possible' and, as was done by the British, French, Ottoman throughout history. 'Rule lightly, unless provoked. Delegate power and don't tamper with local customs. Using these rules, great empires dominated the Middle East for centuries. Our problem, though, is that we don't see ourselves as a great empire, and we don't want to rule anyone directly. We just want to transform them thoroughly'.

The operative expression in both sets of perceptions is a desire to dominate. The discussion is only about modalities.

Israel, a mid-twentieth century factor in the region, has not been able to translate its military superiority into a total, definitive, victory. Its invincibility was dented in the war with Hezbollah. This is not reflected in political perceptions where right wing political parties and a small but effective settler lobby has defied moves towards a meaningful peace process. The lack of a serious U.S. interest in the peace process has helped sustain it. The American West Asian policy is hampered by the "Israel test" to which it is subjected in terms of domestic politics. Israel's policy objective is to: (a) exhaust the Palestinians, riddle the West Bank with settlements, make impossible the emergence of a viable Palestinian state and (b) dominate the region militarily, technologically and economically.

Iran, driven by memories of the Revolution and the long war with Iraq, seeks to project a threefold desire: (a) acknowledgement of its regional weight, particularly in West Asia and the Persian Gulf (b) development of a technological capability to assist it (c) bring to an end, on equitable terms, to the regime of sanctions to facilitate access to badly needed technology and foreign investment for economic development. The stand off on Iran's alleged nuclear weapons programme is thus a political instrumentality resorted to maximise advantage in a complex negotiating process.

The state-centric security concerns in West Asia thus relate principally to the moves on the chess board of the United States, Israel and Iran in relation both to each other and to other actors in the region.

The United States today is not the Sole Super Power of the spring of 2003. The policies of unilateralism, 'creative destruction' and pre-emption have faltered. The U.S. has been mauled by non-state actors in Iraq; its policies have given an impetus to terrorism; it has lost domestic support for its Iraq

policy; its unpopularity levels are alarmingly high in Arab and Muslim countries and its intentions are suspected. The financial burden of the war and the drain on the dollar has added to public concerns. The dissent in the national security establishment of the United States has become public. Francis Fukuyama wrote last month that when he penned the End of History 'the one thing I did not anticipate was the degree to which American behaviour and misjudgements would make anti-Americanism one of the chief fault lines of global politics'.

The imperatives in the Iran policy of the United States have to be viewed in this context. Suggestions about military action have emanated from time to time; doubts about its efficacy and wider implications have also been raised. The absence of decisive evidence of Iranian culpability has been a restraining factor. Non-proliferation experts like Dr. David Albright have recently expressed the view that (a) Iran has not yet demonstrated competency at enriching uranium, (b) the programme 'still has a way to go', and (c) creative thinking should focus at direct negotiations without pre-conditions, but with some confidence building measures by Iran, between Iran, the EU and the United States. Dr. Henry Kissinger, who was in Delhi recently, was cautiously optimistic about such talks taking place in 2008.

Israeli perceptions of Iran are nuanced. Since 1979 the relationship has been conditioned by ideology on the one side and geo-political interests on the other. The channels of communications have never completely closed. Iran's support to the Palestinians and the Hezbollah has been a strategic irritant to Israel. An Iranian success in developing a nuclear weapon capability would deny Israel the regional monopoly it has in the matter. Israel has been extremely active in mobilising American opinion against Iran. On the other hand, Haaretz magazine cited on October 25, 2007 a remark by foreign minister Tzipi Livni that 'Iranian nuclear weapons do not pose an existential threat to Israel'.

Similarly nuanced are the Iranian positions on the U.S. and Israel. The Iranian proposal of May 2003 for negotiations on a package deal was rejected by the Bush Administration; it does, nevertheless, contain elements for serious consideration. Iran in 2002 had also signalled its willingness to accept a 'Malaysian profile' in return for an easing of Israeli and American efforts to isolate Iran.

So much for the periphery and the extra-regional actors. But what about the core? Why is it that all discussion on regional security in West Asia is

not primarily centred on the Arab core? Even as we live in an age of multiple identities, the peoples of the region have not yet resolved their overlapping identities and the implications of such non-resolution are visible at key historical and evolutionary junctions.

The end of European colonialism in West Asia had unleashed three sets of forces whose complex interplay sets the background for all subsequent developments in the polity and society of Arab states:

1. The first is Arab nationalism; the concept that all Arabs are one nation was very strong in the immediate aftermath of the end of European colonialism. Later, conflict on who should steer the destiny of the Arab nation has led to a conscious downplaying of Arab nationalism. Today, the concept remains a significant cultural matrix but its impact on the Arab polity has diminished.
2. The second is the creation of nation-states in the areas vacated by the erstwhile colonial powers. The systems of governance in these nation-states have varied between kingdoms, emirates, sultanates and republics. The ruling regimes of some states had access to unforeseen riches from hydrocarbon resources. The colonial masters left behind border problems and other disputes. Ruling regimes found it convenient to obtain allegiance by emphasising the interests of their nation-state over that of the Arab nation.
3. The third is Islam. In the initial stages, religious revival was sought to be fused with anti-imperialism and modern grass-roots political activism. The energies of this activism were later directed against the ruling regimes. In some cases, Islamist movements came to power, in others they were thwarted from taking power. What is undeniable is that Islamism retains significant political space in West Asia – co-opted in some regimes and hounded in others.

Political evolution, propelled by these three factors, was aided by vast changes taking place in Arab societies. Rapid urbanisation set the scene for mass indoctrination; Arab nationalism filled the lacunae until its demise in the wake of the 1967 War. Islamism readily provided a substitute. Its inherent anti-communism was looked upon with favour by the concerned Western powers. The point was proved at the time of the Soviet invasion of Afghanistan. The slogan of Jihad in terms of armed resistance was promoted by the states of the region (with some exceptions) and actively endorsed by the western powers.

To these various factors must be added the security threats, including terrorism, emanating from non-state actors in West Asia - a direct product of the political impasse mentioned above. A simplistic analysis of these is rarely rewarding. Domestic, regional, external and ideological factors combine to produce chemical reactions of varying intensity. In traditional societies sustained by a mix of religious and tribal norms, neo-patriarchy and non-participatory governance cause resentments that are subdued partially and for varying periods of time by largesse. Rapid inflow of wealth, on the other hand, brings in its wake social disruptions and awakened expectations.

Social systems also produce their anti-bodies. The youth who spent time in Afghanistan returned home Islamised and radicalised. They sought correctives from local rulers and their external friends. They found solace in traditional, religious, idiom. The rest of the story, in Algeria, Tunisia, Egypt, and eventually in Jordan and Saudi Arabia is too well known to bear repetition. Iraq added its share in ample measure.

Islamism is an ideology of protest, and of change. Apart from slogans, it has little by way of a programme of social reconstruction. Suppression without other correctives, however, gives it a lease of life.

It is time to wind up. Diagnosis and commentary on the first and the second questions inevitably propel us towards the third. The correctives are suggested by the diagnosis itself.

The question is of the will to undertake it. Simple logic, however, is not synonymous with state logic!

Thank you.

**413. Address by Special Envoy of the Prime Minister for West Asia and Middle East Peace Process C.R. Gharekhan at the concluding session of the International Conference on West Asia convened by the Observer Research Foundation.**

**New Delhi, November 22, 2007.**

India has a deep and abiding interest in West Asia. Our links with the region literally go back to millennia, and pre-date, by many centuries, the discovery of oil. It would not be out of place to point out that the interests and policies of the rest of the world in West Asia are motivated, if not solely, then certainly largely, by the existence of two-thirds of the hydrocarbon reserves of the world in the region. But for us in India, West Asia has been and continues to remain a part of our extended neighbourhood.

2. I am not suggesting for a moment that oil, or energy is not of importance to India. Indeed, we obtain 70% of our energy imports from the countries of West Asia. In the years to come, this proportion will only increase. We have other interests also in the region. About 4.5 million Indians are working there, in other countries bordering the Gulf. They are making significant contribution to the growth and development of those countries. They send remittances back home to their families amounting to nearly \$20 billion per annum, thereby generating employment and prosperity in different parts of India. We have increasing economic and commercial relations which are in genuine mutual interest of all the parties. Investment from the countries of the region in India has steadily increased, though there is undoubted scope for considerable expansion in this area. A comparatively new phenomenon, which is to be welcomed, is the increasing interest shown by Indian capital to invest in the region.
3. On the political side, the issue of primary concern to the people of India as well as to successive Governments has been the struggle of the Palestinian people to achieve their legitimate national aspirations. As a country which fought against colonial occupation for several decades, it was natural for India to empathize and support the desire of the Palestinian people for an independent State of their own. Mahatma Gandhi said to a delegation of Jewish leaders a quarter of a century ago : "Palestine is for the Palestinian people just

as France is for the French people and England is for the English people". Please note that Gandhiji did not say that Palestine is for the Muslims or even for the Arabs; he wisely used the words "Palestinian people", thereby clearly implying that Palestine should belong to those who lived on the Palestinian soil, without distinction based on race or religion.

4. Life, like rivers, does not stand still. The world has moved on since Mahatma Gandhi's meeting with Jewish leaders in London in 1931. The State of Israel has come into existence and is very much a fact of international life. Whatever the circumstances surrounding its birth, Israel is entitled to be accepted as a full member of the international community, with the right to live in peace and good neighbourly relations with its neighbours within secure and recognized borders. It goes without saying that this will happen once, and as soon as, it resolves all its problems with its neighbours in a just and equitable manner.
5. Concomitant to interests, India also has concerns in the region. Our foremost concern obviously is for the safety, well-being and welfare of our citizens who are working there. We are also concerned at the increased and increasing volatility and radicalization in the region. In recent years, West Asia has emerged as one of the two most important breeding grounds of terrorism. It is not only the markets and telecommunications which have been globalized; so has terrorism. Indeed, the globalization of telecommunications has facilitated the growth of global terrorism. India, being next door to West Asia, has every reason to feel worried and concerned.
6. Yet another area of major concern is the growing tension between the Sunni and Shia Muslims. The Shia-Sunni divide, which has been acute in neighbouring Pakistan for several decades, has been accentuated by the events following the American intervention in Iraq in 2003. Whether we call the situation in Iraq by its proper description as a civil war or not, the sectarian divide in that unfortunate country is here to stay for a long time. India, with the second largest Muslim population in the world, having a significant proportion of Shias, is understandably concerned. We have had a healthy tradition of Muslims of all denominations living peacefully and happily together. We must not and will not permit external influences to vitiate this harmonious atmosphere, but for that we shall have to remain vigilant.

7. It is, therefore, of the utmost importance to India that the problems of West Asia be resolved as early as possible. The irony, indeed the tragedy, is that West Asia is a problem waiting to be resolved. The elements needed to settle the various issues are well known to all concerned. What is required is political vision and statesmanship on the part of the leaders, the will and determination to offer and accept mutual concessions as well as the willingness of the international community to provide such political and material assistance as might be needed by the parties. This is true of the entire Arab-Israeli conflict. Iraq is in a different category, more complex and more difficult, but nevertheless deserving of the utmost attention of the international community. Recent weeks have witnessed welcome signs of USA and Iran engaging each other in a dialogue on the Iraqi situation. Secretary Rice has had conversations, however brief, with the Syrian Foreign Minister. This approach needs to be maintained.
8. Let me deal with the Arab-Israeli situation. The broad outlines for a settlement have been laid down in United Nations Security Council Resolutions 242 and 338. The core issue, of course, is the question of Palestine. Here again, the parameters are well known. Israel must end its occupation and withdraw from the territories it occupied in 1967. In practical terms, what this amounts to is that Israel should make available to the future Palestine State an area of the same size as the whole of the occupied West Bank. This principle, I believe, is broadly accepted by both sides. The Palestinian leadership is realistic enough to recognize that Israel simply will not give up the land on which some of its large settlement blocks have been built. At the same time, Israel will also have to accept that, in return for the West Bank territory that they wish to absorb in Israel, they will have to yield an equivalent area from somewhere else to the Palestinian State.
9. Similarly, there are formulae for tackling the refugee problem, perhaps the most emotional of the six issues between the Israeli and Palestinian sides. The Palestinian leadership will be loath to formally give up "the right of return", offered to the refugees in United Nations Resolution 194. At the same time, no Israeli leadership of any political persuasion will ever acknowledge or agree to the return of over 4 million Palestinian refugees to Israel proper. One has reason to expect that it is not beyond the bounds of human ingenuity to evolve a mutually acceptable formula on this issue.

10. Jerusalem is yet another emotional and complex issue. It has an added complicating factor, in that Jerusalem has enormous significance for followers of three major religions. The Palestinian leadership, in particular, has to take into account the feelings of the Muslim community throughout the world. Highly creative minds on both sides have worked for the last two decades to find a solution. Any solution to the question of Jerusalem will not satisfy all the peoples on both sides. It will need courage and statesmanship for the leaders on the two sides to try and reach an agreement on all these questions. So long as the eventual agreement is broadly acceptable to the public opinion, in Israel as also in Palestine, I am confident that such courage and determination will be forthcoming.
11. It might be appropriate at this stage to refer to the forthcoming conference in Annapolis, USA. The very fact that the conference is being convened would suggest that adequate common ground has been achieved between the two sides during their pre-negotiations, bilateral as well as with the active participation and involvement of the American Secretary of State Ms. Condoleezza Rice, for the American government to feel encouraged enough to issue the invitations. President Abbas as well as the Arab States were understandably reluctant to attend the meeting if it was going to turn out to be merely another photo opportunity occasion. The Palestinians would like the Annapolis meeting to be a genuine launching pad for intensive, meaningful and well-directed negotiations, covering all aspects, to be concluded within a definite timeframe. The Israeli Prime Minister, from several accounts, seems to want to engage in purposeful negotiations with President Abbas, in whom he says he has a credible negotiating partner. President Abbas told me a few weeks ago that he too finds Mr. Olmert a valid negotiating partner. I am personally convinced that President Abbas is committed to finding a reasonable settlement and will not shy away from reaching an agreement if he is genuinely satisfied about its reasonableness, even if it will not meet all the demands of the Palestinian people. It is of the utmost importance that the Annapolis meeting not fail or be perceived to fail by either side. Yet another failure would have negative consequences and would greatly strengthen the extremist and radical forces.

India has been invited to the Annapolis conference and looks forward to its participation in it.

12. Syria's dispute with Israel should, on paper, be even easier to be resolved. Israel clearly has to vacate the Golan Heights. Israel knows and acknowledges this fact. Indeed, Israel and Syria came tantalizingly close to a solution a few years ago. The technological advances during the past four decades have rendered less valid Israel's earlier security concerns. In any case, whatever concerns Israel might have can easily be taken care of through mutual negotiations, and with the help of technology.
13. There are influential voices in Israel in favour of starting negotiations with Syria. Reports in Israeli media, including respectable newspapers such as Haaretz, revealed secret contacts between the two sides some months ago. It was also reported that President Bush was not in favour of Israel reopening a dialogue with Syria. Whatever the truth behind all these reports, I remain convinced that the Syrian-Israeli question will have to be tackled sooner rather than later. As they say, no war in West Asia can take place without the involvement of Egypt and there can be no solution to the West Asia problem without Syria being a part of it. The Syrians have declared repeatedly that they are anxious to become a part of the solution; they should be tried out.
14. Of the three situations – Palestine, Syria and Lebanon – Lebanon at the moment is the most worrisome. That hapless country has been buffeted between opposing forces, many of them coming from outside the country. Lebanon emerged from the disastrous 14 year long civil war in 1988, bruised and battered. The late Prime Minister Rafiq Hariri performed a marvelous job in rebuilding Lebanon and restoring to it the unique privilege of being a genuine democracy and the freest country in the region. His tragic assassination on 14th February 2005 has unleashed forces which have once again led the country on the verge of another civil war. Left to themselves, the Lebanese people, I am convinced, would resolve the differences through their own genius. Today, the 22nd of November, is the National Day of Lebanon. Can there be a greater misfortune for a country not to be able to celebrate its independence anniversary?
15. Israel's second war on Lebanon in July-August 2006 caused immense damage to Lebanon in terms of lives lost and properties destroyed. But, perhaps more significantly, it caused a serious dent in the prestige of Israeli defence forces. The second Lebanon war has led

to lot of introspection within Israel and the report of the Winograd Enquiry Commission has been damaging for Prime Minister Olmert and for the senior most echelon of Israeli army. It is entirely possible that Hamas, the Islamist movement which took over Gaza Strip in June 2007, has felt emboldened by what has been widely perceived as the success of Hezbollah in Southern Lebanon last year. Israel's border with Lebanon has been largely settled. There remains a small area of about 25 sq. kms. known as Sheba Farms, which is still under contention and which Israel occupies. Since both Lebanon and Syria agree that the Sheba Farms belong to Lebanon, it should be easy to settle this issue at an early stage, thus removing the last remaining obstacle to the normalization of Israeli-Lebanon relations.

16. The two biggest beneficiaries of the recent developments in West Asia have been the forces of extremism, and Iran. I have already dealt with the former. As for Iran, it has now become a most significant player in the region. Its influence in Iraq is evident. Its capacity to contribute to an improvement in the security situation in Iraq has been amply demonstrated by the decision of Moqtada Sadr to order a ceasefire for six months. The present comparatively reduced level of violence in Iraq is a result of the restraint exercised by the Mahdi army and it would be premature to read too much into it.
17. Iran has become a factor to reckon with also in the Palestinian situation. Israel's concern at the firing of mortars into Israel from the Gaza Strip is understandable. However, according to Amos Harel, a well known Israeli journalist, the Israeli defence forces' tactical advantage over Hamas in Gaza is shrinking. According to him, the efforts by Iran and Hezbollah to improve Hamas' military capability are beginning to be felt. Let us also not forget that the senior leader of Hamas, Khaled Meshal, lives in Damascus. The Palestinians, including Hamas, have always been known for their secular approach. They have never subscribed to fundamentalist ideology. It is indeed sad and extremely disconcerting that fundamentalism in the form of Al Qaida has acquired a foothold in the Palestinian society. In the words of Danny Rubinstein, a highly respected Israeli columnist, it is not only the Palestinians who will pay the price for this, but also Israel, which did not want Hamas and is getting Al Qaida. Sometimes, one has to think of the unthinkable. The international community must deliberate about the role of Hamas. Assuming, in the best of circumstances, that the projected meeting in Annapolis leads to a

serious negotiating process and to an agreed package at the end of it, President Abbas is on record as saying that he will submit any such result to a public referendum. It would not be prudent to dismiss Hamas as an insignificant factor while assessing the likely outcome of such a referendum.

18. The Hon'ble Vice President, in his inaugural address yesterday, eloquently analyzed the situation concerning Iran and the triangular relationship between Iran, Israel and USA. As far as India is concerned, we firmly believe that the problem arising out of Iran's nuclear programme must be dealt with on the basis of Iran's rights, and obligations, under the Nuclear Non-Proliferation Treaty to which Iran is a party. We believe that the solution must be found only through peaceful, diplomatic means.
19. The international community has consistently advocated a comprehensive, just and lasting solution to the Arab-Israeli question. The logic behind this position was, and is, that a piecemeal effort to settle one dispute in isolation would not succeed, since no Arab government would like to appear to be arriving at a settlement with Israel on its own for political reasons. In actual practice, some Arab States have concluded separate peace treaties with Israel, as indeed they had every right to do. It is the primary duty of a State to protect and promote its own interests. For the remaining Arab-Israeli questions, the Arab side has come up with a constructive initiative which was originally advocated by the then Crown Prince and the present King of Saudi Arabia and which was re-launched by the Arab League in March this year. The Arab offer, in its essence, is: full normalization with Israel by all Arab countries in return for full withdrawal by Israel from all occupied territories. The principle behind this Arab initiative is unexceptionable. There are many in Israel including the Prime Minister and the Foreign Minister who find positive elements in the Arab initiative. India supports and welcomes the Arab initiative. Politics, however, is the art of the possible. While it would be ideal to settle all the remaining Arab-Israeli questions at one go, nobody would object, and most would be happy if one of the issues gets resolved first. In this sense, should the Annapolis meeting lay down a firm groundwork for serious negotiations on the Israeli-Palestinian track, it would constitute a most significant step towards calming the troubled waters in the West Asian region.

20. Ambassador Rasgotra, in his welcoming remarks yesterday, posed a question about India's role in West Asia. I am sure the participants have had occasion and opportunity to exchange views about this matter. We in India get easily flattered when a non-Indian pays us a compliment. During my visits to the capitals in West Asia, my interlocutors have invariably been generous in speaking highly of the role that India can play in the region. When pressed, they are understandably less specific than one would like. Nevertheless, I am convinced that India, with its close ties with all the parties and countries including Israel as well as Iran, is well placed to offer its good offices in the search for a peaceful solution to the various crises in the region. Additionally, India is perhaps a unique country with a fully functioning democracy, a multi-religious, multi-ethnic and multi-lingual pluralist society, with an enviable record of all sections of society living in harmony and prosperity with one another. India thus could provide a model to the societies in West Asia. Indeed, this possible role of a model has been emphasized to me by leaders in responsible positions in my conversations with them. It is in this spirit that India will participate in the Annapolis conference next week.

**414. Statement by Minister of Science and Technology and Earth Sciences Kapil Sibal at the Conference to promote Arab-Israeli peace.**

**Annapolis, November 27, 2007.**

India applauds the Joint Understanding reached by the President of Palestine Mr. Mahmoud Abbas and Prime Minister of Israel Mr. Ehud Olmert in Annapolis to launch vigorous, ongoing and continuing bilateral negotiations over the coming weeks and months to arrive at a negotiated solution of the core issues that will lead to the establishment of an independent, democratic and viable Palestinian State, living side by side in mutual peace and prosperity with the State of Israel. It proceeds on the assumption that violence and engagement are mutually incompatible. The President and Secretary of State of the United States have made a signal contribution to facilitate this historic agreement. We pay rich tribute to the courage, wisdom and statesmanship displayed by the Palestinian and Israeli leaderships to take risks in the cause of a just and lasting peace between two peoples who though divided by many complex and emotive issues are nevertheless joined by common geography and history.

It has been repeatedly emphasized in the Joint Understanding that the negotiations will be bilateral between the parties. This is as it should be. However, at the specific request by the parties, the United States has agreed to assist them in the monitoring and judging the fulfillment of the commitments undertaken by both sides of the road map. This should reassure the parties and help in creating an atmosphere of confidence. No one realizes better than the two parties themselves how difficult the road ahead will be. Even with the best of intentions, it will require unprecedented determination, goodwill and capacity to offer and accept compromises and concessions, on both sides, if the objective enshrined in this Joint Understanding is to be achieved. In this noble endeavour the parties have declared that they need continuing encouragement and support from the international community. India is ready to play its due role in this collective endeavour to strengthen the forces of peace and stability in the region.

We note with satisfaction that the Middle-East Peace Process will address the unfinished agenda on the Lebanon and Syria tracks. The Arab Peace Initiative, re-launched in Saudi Arabia in March this year, provides a constructive framework for achieving such a comprehensive peace.

India's support to the Palestinian cause can be traced to the days of our

freedom struggle. This support has not wavered. We recognized the PLO as the representative of the Palestinian people in 1975 and were one of the first countries to recognize the State of Palestine in 1988.

India recognized the State of Israel soon after its creation. With the establishment of full diplomatic relations in 1992, we have developed close and friendly relations with Israel.

Madam Chairperson, on behalf of the Government of India, I would like to convey our deep appreciation for the invitation to attend this conference. West Asia is part of India's extended neighbourhood with which we have had a close interaction over millennia. Consequently, we have deep interest in peace and stability in the region.

**415. Statement by Minister of State E. Ahamed on Agenda item: 17 & 18 “The Situation In The Middle East” & “Question of Palestine”. in the UNGA.**

**New York, November 30, 2007.**

Mr. President,

I thank you for scheduling this discussion on an important subject that requires our collective attention to an extent that almost nothing else does: the Question of Palestine, set in the larger context of the situation in the Middle East. This discussion is particularly appropriately timed, as it follows the International Day of Solidarity with the Palestinian people yesterday, and the international conference hosted at Annapolis earlier this week.

Mr. President,

India has traditionally followed with close concern the developments in this volatile region. Our delegation has perused with attention the reports of the Secretary-General on the Situation in the Middle East and on the Peaceful Settlement of the Question of Palestine. We have watched with concern as border restrictions, economic sanctions and a restrictive access regime had brought the Palestinian economy to the verge of collapse. We have viewed with alarm the continued vicious circle of attacks, reprisal and counter-attacks, the worsening humanitarian and security situation in Gaza following developments in June this year, as well as the continued violence

inflicted on innocent civilians. Moreover, the continued expansion of Israeli settlements in the Occupied Territories, and the relentless construction of the separation wall threaten to create new facts on the ground and fresh grievances in an old conflict. The unresolved issues of last year's summer war in Lebanon, and the long-pending question of the occupation of the Syrian Golan add to a sense of frustration and desperation. All these issues have the potential of exacting an immediate and a long-term impact on the lives of the people, potentially contributing more fuel to an already combustible situation.

It is for this reason that India has consistently urged all concerned to eschew violence and exercise restraint at each of the all-too-frequent instances when violence has broken out, exacerbating sufferings and misery in the region. It is in the interest of the entire international community that a comprehensive and peaceful solution is found at the earliest to the problems besetting the Middle East.

Mr. President,

For India, commitment to the Palestinian cause has been a bedrock of its foreign policy since even before our independence. India's solidarity with the Palestinian people and its attitude to the Palestinian question was inspired by its own freedom struggle led by Mahatma Gandhi. In the early years of independent India, this policy was consolidated under the leadership of our first Prime Minister Pandit Jawaharlal Nehru. In November 1947, India voted against the partition of Palestine at the UN General Assembly. As early as in 1975, India recognised the PLO as the sole representative of the Palestinian people. In 1988, it recognised Palestinian statehood and in 1996 India opened its Representative Office to the State of Palestine.

I had the singular honour of having had a most memorable meeting with late President Yasser Arafat in September 2004, at Ramallah, at which I had the opportunity to express India's solidarity with the Palestinian people and support for their cause. In fact, India's empathy with the Palestinian cause and its friendship with the people of Palestine constitutes an integral and time-tested part of our foreign policy. I salute the indomitable spirit of the Palestinian people and reaffirm India's consistent, principled and unwavering support to their cause and their just struggle for a sovereign and independent State of Palestine.

Mr. President,

It is widely recognized that the Middle East conflict is essentially political in

nature and therefore cannot be resolved by force. India has consistently called upon all parties in the region to fully cooperate with the efforts of the international community in this regard. We have supported the resumption of direct negotiations between the leaders of Palestine and Israel and the establishment through peaceful negotiations of a sovereign, independent and viable State of Palestine, living side by side and in the shadow of peace with the State of Israel. We have supported the Quartet Road-Map and the Arab Peace Initiative. We have also called for comprehensive peace and stability in the region and supported the early resumption of dialogue on the Israel-Lebanon and Israel-Syria tracks. These issues must equally be addressed in order to attain a comprehensive and durable peace in the region.

Mr. President,

It is against this backdrop that India welcomes the Joint Understanding reached by the President of Palestine and the Prime Minister of Israel earlier this week at Annapolis. In particular, India welcomes the direct dialogue between the leaders of Palestine and Israel and looks forward to an early and peaceful resolution of all issues between the two states and peoples. It is also satisfying that the Middle East Peace Process will address the remaining issues on the Israel-Lebanon and Israel-Syria tracks; we believe that the Arab Peace Initiative re-launched at the Arab Summit in Riyadh, Saudi Arabia, in March this year provides a constructive framework to achieve such a comprehensive peace. We hope that post-Annapolis developments will proceed down a path that will enable a negotiated solution of the core issues, leading to the establishment of a sovereign, independent and viable State of Palestine, living side by side and in peaceful co-existence with the State of Israel.

Mr. President,

Given the complexity of this task, unprecedented determination, goodwill and capacity to offer and accept compromises and concessions are needed on all sides. It is here that the members of the international community have a collective duty to help in creating a favourable environment within which the principals can take forward the negotiations. India is ready to play a supportive role in this collective endeavour to achieve a just and comprehensive peace in the Middle East.

Thank you, Mr. President.

## AZERBAIJAN

### **416. Press Release of the Ministry of Commerce on the visit of Minister of State for Commerce to Azerbaijan.**

**New Delhi: April 15, 2007**

India and Azerbaijan have agreed to cooperate in several areas including oil & gas sector and Indian companies are set to play a greater role in the development of Azerbaijan's rapidly expanding oil and gas industry. This was the result of a meeting last week between the President of Azerbaijan, Mr. Ilham Aliyev and the visiting Minister of State for Commerce, Shri Jairam Ramesh at Baku. At the end of a 45-minute discussion, Mr. Aliyev consented to ONGC Videsh and SOCAR, the state-owned oil and gas exploration company of Azerbaijan starting talks for cooperation for ONGC Videsh's investments in hydrocarbon-rich Azerbaijan.

ONGC Videsh has already invested close to \$ 5 billion in 15 countries around the world, half of which is in Russia alone and that ONGC Videsh has much to offer to Azerbaijan, particularly in fields where production is declining. Mr. Aliyev sought India's assistance in enhanced oil recovery and deep sea drilling. Shri Ramesh also offered GAIL's expertise in gas-based petrochemicals and city-gas distribution. To begin with, ONGC Videsh and GAIL will participate in the Caspian Sea Oil and Gas Exhibition being held in Baku, June 3-4, 2007. Shri Ramesh also briefed the President of India's interests in exploring for gold in Azerbaijan, particularly since India is now the world's largest importer of gold. MMTC and NMDC will work with their Azerbaijani counterparts to identify specific areas where prospecting and appraisal work can be undertaken.

Mr. Aliyev also expressed deep appreciation for India's offer to help establish a centre for education and training in IT in Baku. The President agreed with the observations made by Shri Ramesh that India's great strength lies in skills training and human resource development, particularly in management, law and science and technology. Of the 100 Azeri students who are to be sent abroad for higher education this year, it is expected that 20 will come to India.

Shri Ramesh also offered India's assistance in tapping the high wind energy potential in Azerbaijan. The Minister informed the Azerbaijan President that Indian companies like Vestas and Suzlon have become globally

prominent and already about 4500 MW of wind energy capacity has been established in India. Azerbaijan President and other leaders also expressed hope that Indian pharmaceutical companies would consider moving beyond distribution and set up manufacturing facilities in Azerbaijan.

During his visit, Shri Jairam Ramesh and Mr. Haiyder Babayev, the Minister for Economic Development of Azerbaijan also signed an agreement that sets up a Joint Intergovernmental Commission on Trade, Investment and Economic Cooperation. The Agreement, which has been on the anvil for almost five years, is expected to provide a fillip to both commercial and cultural exchanges between the two countries. India has also offered technical assistance to Azerbaijan to facilitate its entry into the WTO. Meanwhile, President Aliyev accepted the invitation from Shri Ramesh to visit India at the earliest.

## BAHRAIN

### **417. Briefing Points by Official Spokesperson on the visit of Crown Prince and Commander-in-Chief of the Bahrain Defence Force Shaikh Salaman Bin Hamad Al-Khalifa.**

**New Delhi, March 20, 2007.**

- U EAM Pranab Mukherjee called on Crown Prince. Meeting lasted about half an hour. They discussed matters of regional importance as well as bilateral issues, in particular, India-Bahrain economic cooperation and technological cooperation in high technology areas.
- U Minister of Overseas Indian Affairs, Shri Vayalar Ravi also called on Crown Prince. During the meeting Crown Prince briefed the Minister for Overseas Indian Affairs on the special reforms being undertaken by Bahrain in the labour sector to increase productivity and improved conditions for workers from other countries.
- U Crown Prince also called on the President and during the discussions, the two leaders shared their vision of India and Bahrain in the year 2020. Crown Prince would also hold a meeting with the Vice President and the Prime Minister later this evening. MOS(EA) also called on the Crown Prince and discussed bilateral, political and economic relations between the two countries.

**418. Joint Statement issued at the end of the visit of the Crown Prince and Commander-in-Chief of Bahrain Defence Force Shaikh Salman bin Hamad Al-Khalifa.**

**New Delhi, March 22, 2007.**

The Crown Prince of the Kingdom of Bahrain His Highness Shaikh Salman bin Hamad Al Khalifa, paid an official visit to India between 19 and 22 March 2007 at the invitation of the Vice-President of India, His Excellency, Shri Bhairon Singh Shekhawat.

During the visit, His Highness the Crown Prince called on the President of India His Excellency Dr. A.P.J. Abdul Kalam, the Vice President of India, His Excellency Shri Bhairon Singh Shekhawat and the Prime Minister of India, His Excellency Dr. Manmohan Singh. The External Affairs Minister, His Excellency Shri Pranab Mukherjee, the Minister of Overseas Indian Affairs, His Excellency Shri Vayalar Ravi and the Minister of State for External Affairs, His Excellency Shri E. Ahamed called on His Highness the Crown Prince.

In the discussions during the meetings, the leaders of the two countries recalled the historical ties between India and Bahrain and noted the mutually beneficial and traditionally warm friendship which has existed between the peoples of the two countries. They stressed the need for diversifying and consolidating this relationship and in that context, warmly welcomed the opening of the Embassy of Bahrain in New Delhi on 21st March 2007, which will help strengthen bilateral relations during the 21st century.

The two sides welcomed the conclusion of two agreements during the visit of His Highness the Crown Prince to India. These are:

1. Executive Programme for Cultural Cooperation (2007-2010)
2. Memorandum of Cooperation between Prasar Bharati and Bahrain Radio and TV Corporation

They noted with satisfaction the steady progress made in the bilateral economic and technical cooperation between the two countries and expressed with confidence that the considerable potential which exists would be fully utilized to mutual benefit. To achieve this it was agreed that high level exchanges between India and Bahrain would be intensified. The India-Bahrain Joint Committee for Economic and Technical Cooperation would

hold its next session in Bahrain in the second half of 2007 to follow-up on the mutually identified areas.

In New Delhi, His Highness the Crown Prince addressed the Indian Council of World Affairs as well as a luncheon meeting of Captains of Indian Industry drawn from the ASSOCHAM, CII and FICCI. Besides Agra, His Highness the Crown Prince also visited Mumbai where the accompanying business delegation met their counterparts.

The Bahraini side appreciated the role and contribution of the Indian community for the development and progress of the Kingdom of Bahrain. The Indian leaders expressed their appreciation for the care and favorable environment provided by the Kingdom of Bahrain for the Indian community. The Bahraini side briefed the Indian side on the proposed reform in labour laws, which would protect the interest of skilled and unskilled expatriate labour in Bahrain.

The two sides denounced terrorism in all its forms and manifestations and reaffirmed their intention to strengthen their cooperation in combating terrorism at the bilateral level and within the multilateral system of the United Nations. The two sides while discussing the regional situation emphasized the importance of dialogue and negotiations in a peaceful environment to solve all issues of concern.

The leaders of the two countries agreed that regular exchanges of high level visits between India and Bahrain would help sustain the momentum of bilateral relations. His Highness Shaikh Salman bin Hamad Al Khalifa, Crown Prince and Commander in Chief of the Bahrain Defence Force thanked the President, the Vice-President and the Prime Minister of India for their hospitality.

## EGYPT

### **419. Press Release issued by the Ministry of External Affairs on the 7th Round of Indo-Egypt Foreign Office Consultations.**

**New Delhi, June 26, 2007.**

India and Egypt held the 7th round of Foreign Office Consultations in New Delhi on 22nd June 2007. Shri N. Ravi, Secretary(East) led the Indian side and H.E. Mr. Shawky Ismail, Assistant Minister for Asian Affairs led the Egyptian side. The two sides expressed satisfaction at the progress in cooperation in various bilateral sectors, high level exchange of visits and impressive growth in the trade between the two countries. The two sides expressed satisfaction at the successful culmination of discussions on Consular Agreements between the two countries. The two sides also discussed various regional and international issues including the developments in the West Asia, North Africa and the Middle East. India reiterated its consistent support for the Palestinian cause and called for early resumption of negotiations of the Middle East Peace Process.

H.E. Mr. Shawky Ismail called on the External Affairs Minister and handed over a letter to him from the Egyptian Foreign Minister. He also held discussions with Shri E. Ahamed, MOS and Special Envoy for West Asia and the Middle East Shri C.R.Gharekhan.

## IRAN

### 420. Statement by External Affairs Minister Pranab Mukherjee on arrival in Tehran.

**Tehran, February 6, 2007.**

I am glad to be in Iran. I look forward to the opportunity of meeting the leaders of this great country and exchange views. I bring the greetings and good wishes of the people of India for the progress and happiness of the friendly people of Iran.

India and Iran share traditional bonds rooted in time and eloquently reflected in the historical records of both these countries. We are neighbours with deep civilizational, cultural and people-to-people talks. India attaches great importance to its relations with Iran. We remain committed to imparting this relationship greater substance and strategic content.

Our good relations are to the benefit of not only both these two countries but also to the entire region. I am confident that this visit and my interaction with the leadership of Iran will further strengthen our relationship<sup>1</sup>.

1. The visit of EAM took place amidst rising tensions in the Persian Gulf following the deployment of a second American aircraft carrier group in the region. Mr. Mukherjee speaking to reporters on arrival declared India's opposition to the use of force as a means of resolving the Iranian nuclear issue. He said the escalating tension over Iran's nuclear programme had to be defused "through dialogue and discussion." India, he said, "has all along stated that military means is not a solution. The solution has to be found only through dialogue, howsoever strenuous it may be." Mr. Mukherjee said it was important for the Iranian leadership to keep international opinion in view, [particularly that of] the International Atomic Energy Agency. "Our advice is that there should not be any further escalation of tension." "Like any other country, Iran too has the right to carry on a peaceful civilian nuclear energy programme," the Minister said. "They are also a signatory to the Nuclear Non-proliferation Treaty, so they have certain obligations under that treaty. Therefore, our position is that the issue should be resolved through dialogue. It cannot be resolved through coercive methods." On energy-related issues, apart from the Iran-Pakistan-India pipeline, Mr. Mukherjee said he was hoping to help bridge the differences that had emerged over the 5 million tonnes of LNG that Iran had agreed in 2005 to export annually to India. Since the contract was signed, the world price of oil has risen well beyond the ceiling envisaged by the gas pricing formula contained in the 2005 agreement. Though India insists that the agreed price is binding, Iran argues that the agreement was never ratified by the competent higher body as required by Iranian domestic law and that the sale price has to be revised upwards and submitted to majlis (Parliament) for approval. Asked about U.N. sanctions against Iran EAM said the U.N.SC resolution 1737 passed last December "does not cover any of our proposed areas of cooperation."

**421. Statement by External Affairs Minister Pranab Mukherjee at the Joint Press Interaction with Iranian Foreign Minister Mottaki.**

**Tehran, February 7, 2007.**

I am happy to be here in Iran. I am grateful to H.E. Mr. Mottaki for the warm welcome to me and my delegation. India and Iran are two neighboring civilizations whose ties have withstood the vagaries of time. The cultural bonds between our two countries find expression in the lives of our peoples and in the monuments and records that are our common inheritance.

His Excellency Mr. Mottaki was in India in November last year. Our discussion today on various aspects of our excellent bilateral relations were in continuation of the free and frank exchanges we had during his visit. We reviewed the progress on various agenda items of the Joint Commission and laid stress on implementation of decisions taken by the two sides. In this regard, we placed particular emphasis on early conclusion of negotiations for signing of Bilateral Investment Protection and Promotion Agreement and the Double Taxation Avoidance Agreement.

Our bilateral trade, valued at over six billion dollars, is growing and these agreements will generate greater confidence among the private sector of the two countries, which are increasingly driving the bilateral commercial relations. We also discussed issues related to energy and transit opportunities for our companies. Iran is a very important producer of hydrocarbons and we are a major consumer. There could be mutually beneficial long-term arrangements, including our agreement on supply of LNG or the proposed Iran-Pakistan-India gas pipeline project<sup>1</sup>. We also

---

1. Later on March 26, Mr. Mukherjee was more categorical on the supply of gas from Iran. In an interview to a TV channel, the External Affairs Minister said that India intended to go ahead with a multi-billion dollar gas pipeline from Iran via Pakistan despite objections from the United States (His reference was to the visit of US Energy Secretary Samuel Bodman who urged New Delhi to drop the plan for a gas pipeline). "Talks on this pipeline are going on. When I was in Iran, I had categorically mentioned that we are interested in having this pipeline," Mr. Mukherjee said. "Now negotiations are going on about the price," said EAM.

On June 18 the Petroleum Minister Murli Deora indicated that an agreement on construction of the \$7 billion India-Pakistan-Iran gas pipeline was likely by mid-July. He indicated the scheduled bilateral talks between India and Pakistan before the trilateral talks with Iran. He said discussions were on with Iran and Pakistan on prices and how the pipeline would be brought to India. Snags however developed as Iran insisted on

---

adding a clause in the agreement for revision of price periodically. At the June 28 tripartite meeting in New Delhi Iran sought a last minute change in the agreement on pricing of gas to be supplied through the \$ 7.4 billion pipeline. Tehran insisted on price revision every three years based on international fuel prices and energy mix, a stipulation that was opposed both by India and Pakistan. India and Pakistan had agreed on the price formula proposed by Iran, according to which gas would be priced at \$ 4.93 per million British thermal unit, and wanted it to remain the basis of pricing of natural gas for the entire 25-year duration of the supply contract. Meanwhile India and Pakistan reached an agreement on the principle of computing the transportation charges payable to Islamabad for wheeling the gas through the 1,050-km section of the pipeline in that country. But the issue of transit fee, payable to Islamabad for allowing passage of the pipeline to India, was not resolved as the officials decided the issue may be best left for the political leadership to discuss. While the transportation tariff was purely an economic issue related to the cost involved in transmission of gas, transit fee was more of a political goodwill issue and the charges, many times waived, depend on agreement between the nations.

In September India decided to skip the trilateral secretary level talks in Tehran on the pipeline project, because of Iranian insistence on price revision formula being accepted for sale of gas. "I think if the price of the gas is agreed upon, the pipeline will become a reality," Finance Minister P. Chidambaram said at an interactive session at the Peterson Institute for International Economics in Washington on the eve of the trilateral meeting in Tehran on September 27. Mr. Chidambaram said Salman Shah, adviser to the Pakistan Prime Minister, visited India three weeks ago and affirmed that Islamabad was committed to the pipeline. Mr. Chidambaram was critical of countries opposing the project. "We are disappointed that some country should advise us against the pipeline for other geopolitical reasons. We think that if Iran has gas, if India needs gas and Pakistan needs gas, there is nothing wrong in having an Iran-Pakistan-India gas pipeline."

On 30th August Government informed the Lok Sabha that there was no agreement yet on the transit fees payable to Pakistan for the passage of natural gas through that country. In a written reply to a question in the Lok Sabha, Petroleum and Natural Gas Minister Murli Deora said the issue was discussed during the fifth India-Pakistan Joint Working Group (JWG) meeting in June. Giving the background of the issue Mr. Deora said while it was agreed upon that the charge should be based on the cost of service to be achieved through international competitive bidding, there was no agreement. India had been pursuing the import of natural gas from Iran through the Iran-Pakistan-India gas pipeline. For this, two secretary-level joint working groups had been set up with Pakistan and Iran. Three meetings of the India-Iran Special JWG were held while the India-Pakistan JWG had met five times. The tripartite JWG of Iran, Pakistan and India was also functional and had met 6 times. At the fourth tripartite meeting held in Tehran on January 24 and 25, a formula regarding the pricing of gas on the Iran-Pakistan border was agreed upon between the Iran and Pakistan sides, subject to approval from their governments. The Indian side agreed to respond to the pricing formula and conveyed to Iran that the total price payable for the gas on the India-Pakistan border would also depend on transportation cost and transit fees payable to Pakistan. As there was no clarity on these, it was not possible for India to decide on the final price, the Minister said. Subsequently, Iran demanded introduction of a provision for price revision at the fifth tripartite Joint Working Group meeting at Tehran in May, to which both India and Pakistan disagreed. At the sixth tripartite meeting, the gas price review clause was inter alia discussed and it was decided to carry forward the discussions to the next round of meetings, Mr. Deora said. Pakistan in the meantime has been keen that transit fee issue was sorted out and India could be roped in the pipeline project. On October 18 Pakistan Petroleum Secretary Farrakh Qayyum had invited India for talks on the transit fees but the talks were yet to

stressed on further strengthening the cultural and people-to-people links that would continue to be the bedrock of our relations.

We also discussed the nuclear issue. We believe that the Iranian nuclear issue should be resolved peacefully and through dialogue and negotiation. The IAEA should play a central role in resolving the outstanding issues. A peaceful negotiated solution would be facilitated by enhanced cooperation

---

take place. Meanwhile on October 25 US Under Secretary of Treasury for International Affairs David McCormick said: "with regard to the Iran pipeline issue...we are hopeful that India won't move forward on this." Media quoting un-named official sources in New Delhi said that New Delhi and Islamabad had reached a broad understanding on the transportation tariff payable to Pakistan for wheeling natural gas through the 1,035 - Km pipeline segment in that country. What remains to be sorted out is the transit cost payable to Pakistan for allowing usage of its territory for the passage of the pipeline to India. Meanwhile Iran and Pakistan finalised their gas pipeline contract on November 10th. It now sets the stage for the signature of the multi-billion dollar deal India opting out of the last few rounds of the official-level dialogue. "We faced no obstacle during negotiations and all articles of the peace pipeline contract were smoothly restudied," Mr. Ahmed said. The Pakistani adviser said the two sides were now working on an annexure that would be added to the contract in one month. Iran's chief negotiator on the IPI gas pipeline Hojjatollah Ghanimifard said the annexure would include an "operational agreement." This would revolve around technical issues such as gas pressure at the point of delivery and identification of the border point for the transfer of gas. Both sides agreed that the price formula for gas exports would be reviewed in 2015. Mr. Ahmed was quoted as saying that Pakistan prioritised its contract with Iran ahead of other gas import options. He pointed out that the Pakistani government would study possible gas imports from Qatar and Turkmenistan after the peace pipeline project with Iran had been finalised. The Iranian official stressed that Pakistan welcomed the transfer of Iranian gas to India, China, and "any other point" through its territory. Iran is no less worried at the delay in India deciding to join the project. On November 14 it discounted reports that there was a deadline for India to join in the project. It said in a big project of this size there could not be a deadline. The door remains open for New Delhi to take a decision at its convenience to join in.

Meanwhile the other deal with Iran signed on June 13, 2005 for India to purchase five million tons of LNG too has run into difficulties since Iran is insisting on revising the price of LNG in accordance with the rising international prices of oil. Last year India had indicated its willingness to look at the new price provided it was a marginal increase and not a substantial one. Since then the deal is struck. The newly appointed Oil Minister of Iran Gholamhossein Nozari has said that the deal has run into problems due to a "misunderstanding." He said on the sidelines of the third OPEC Summit: "I think there was a misunderstanding of the procedure followed for approval of the deal." After the National Iranian Gas Export Company (NIGEC) signed the Sale-Purchase Agreement (SPA) with the Consortium of Gas Authority of India, Indian Oil Corporation and Bharat Petroleum Corporation Limited for export of five million tones a year of LNG on June 13, 2005 in Tehran, the contract was vetted by NIGEC's parent company the NIOC. It was mentioned in the SPA that the Contract would need approval of NIOC for the SPA to become effective," the Oil Minister Mr. Nozari said. (Mr. Nozari was earlier the Managing Director of the NOIC, though not at the time of signing of the contract.) The Iranian are now insisting that if India is interested in the deal of the LNG, it has to agree to the revision of the price.

between Iran and the IAEA and a demonstration of restraint and flexibility by all sides.

We also discussed the regional situation. I emphasized the importance of peace and stability in this region for our energy security and the safety of Indians working here. I noted the significance we attach to Iran as a factor of stability in the region. I expressed our appreciation of the cooperation extended by Iran to our assistance projects in Afghanistan. India would also like to see a stable, peaceful, prosperous, united and democratic Iraq.

Later today, I will be calling on His Excellency President Mahmoud Ahmadinejad and His Excellency Chairman of the State Expediency Council Akbar Hashemi Rafsanjani. I will also meet Secretary of the Supreme National Security Council Dr. Ali Larijani. Good relations between India and Iran not only benefit our two countries but also impact on the entire region. Based on my productive exchanges with His Excellency Mottaki, I am satisfied with the outcome of the visit.

Thank you,

**422. Statement by External Affairs Minister Pranab Mukherjee before his departure from Iran.**

**Tehran, February 7, 2007.**

I think I have spoken everything in the press meet. After that, of course, I had a meeting with His Excellency President and former President Rafsanjani. I also had a meeting with the National Security Advisor. All these meetings were very fruitful. I am satisfied that my visit has been successful.

The good relationship which we have between our two countries, which encompasses economic, political and cultural relationship, will be further strengthened. We had free and frank discussions on various issues in the most cordial atmosphere. I am pleased with the outcome of this visit.

Thank you.

**423. Notification issued by the Ministry of Commerce and Industry prohibiting export of nuclear related material to Iran in pursuance of the sanctions imposed by UNSC on Iran.**

**New Delhi, February 20, 2007.**

TO BE PUBLISHED IN THE GAZETTEE OF INDIA EXTRAORDINARY  
PART-II, SECTION-3, SUB SECTION (ii)

GOVERNMENT OF INDIA  
MINISTRY OF COMMERCE AND INDUSTRY  
DEPARTMENT OF COMMERCE

**NOTIFICATION No. 47 (RE-2006)/ 2004-2009  
NEW DELHI, DATED THE 20th FEBRUARY 2007**

S.O(E):-In exercise of powers conferred by Section 5 of the Foreign Trade (Development & Regulation) Act, 1992 (No.22 of 1992) read with paragraph 1.3 of the Foreign Trade Policy, 2004-2009, (as amended from time to time), the Central Government hereby makes the following amendment in Foreign Trade Policy, 2004-2009:

The following shall be added at the end of Paragraph 2.1 of Foreign Trade Policy 2004-2009 as amended :

"Direct or indirect export and import of all items, materials, equipment, goods and technology which could contribute to Iran's enrichment-related, reprocessing or heavy water related activities, or to the development of nuclear weapon delivery systems, as mentioned below whether or not originating in Iran, to/ from Iran is prohibited :

- i) i) items, listed in INFCIRC/254/Rev8/Part I in document S/2006/814, in Sections B.2 to B.7 as well as A.I and B.I except the supply, sale or transfer of equipment covered by B.I when such equipment is for light water reactors and low-enriched uranium covered by A.1.2 when it is incorporated in assembled nuclear fuel elements for such reactors;
- ii) ii) items listed in S/2006/815 except the supply sale or transfer of items covered by 19.A.3 of Category II"

The above mentioned UN Security Council documents are accessible from the Home page of DGFT web site.

This issues in Public interest.

(BHAWANI SINGH MEENA )

Director General of Foreign Trade and  
Ex Officio Additional Secretary to the Government of India

**424. Question<sup>1</sup> in the Lok Sabha on: "Export of nuke technology to Iran".**

**New Delhi, May 9, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether India has put a ban on the export of nuclear technology to Iran;
- (b) if so, the details thereof and the reasons therefor;
- (c) whether India has discussed the issue with Iran in this regard; and
- (d) if so, the details thereof?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a)-(b) The Director General of Foreign Trade issued a notification on 20 February 2007 (Notification No. 47 (RE-2006)/2004-2009) under the Foreign Trade (Development & Regulation) Act, 1992 to prohibit direct or indirect export and import of all items, materials, equipment, goods and technology which could contribute to Iran's enrichment related, reprocessing or heavy water related activities, or to the development of nuclear weapon delivery systems. This is in pursuance of India's obligations under UN Security Council Resolution 1737 of 23 December 2006 adopted unanimously by the UN Security Council under Article 41 Chapter VII of the UN Charter.
- (c)-(d) The issue of Iran's nuclear programme has been discussed during interactions with Iran at which Government has conveyed its consistent stand that all possible efforts should be made to resolve the issue through peaceful means, by dialogue and negotiations and the IAEA should play a central role in resolving outstanding issues. The UNSCR 1737 underscores the need for more active and transparent cooperation with IAEA for resolution of outstanding issues.

---

1. On the same day in an answer to another question, the Lok Sabha was informed that that the International Atomic Energy Agency (IAEA) had stated that "while it is able to verify the non-diversion of declared nuclear material in Iran, it is unable to verify the absence of undeclared nuclear material and activities in Iran unless Iran addresses outstanding verification issues."

**425. Press Release of the Ministry of External Affairs on the intervention by External Affairs Minister Pranab Mukherjee on Iran at the Asian-Europe Meeting (ASEM) in Hamburg.**

**New Delhi, May 28, 2007.**

Throughout history, Iran has radiated through Persian language and culture its influence over all its neighbouring countries. In Iran, therefore, we deal with not just a political entity but also a cultural force that takes great pride in its civilizational achievements. I think it is worth reiterating this to ourselves when we deal with that country on difficult issues such as security, non-proliferation, etc. In our view, Iran must be engaged purposefully and candidly - not by demonising its social and cultural mores but by recognizing their internal dynamic even while we may not accept them for ourselves. For those of us who inhabit the same region as Iran and are aware of the richness of its history and culture, and the pride they take in their civilization, it is axiomatic that threats against or denigration of the country will not work.

Iran has to be mindful of its international obligations, but progress on the issues that concern us will not be possible by the use or the threat of use of force or sanctions. It is only engagement which will enable us to see that Iran views following its international obligations as being in its pragmatic self interest. It is a country of tremendous natural and human resources and the development of these resources will make Iran a factor for regional security. The threat or the implied threat of use of military or economic force will not.

#### **426. Briefing by Official Spokesperson on the visit of Iranian Deputy Foreign Minister Dr. Mehdi Safari.**

**New Delhi, September 7, 2007.**

**Official Spokesperson:** Good evening .....the visit of His Excellency Dr. Mehdi Safari, the Deputy Foreign Minister of the Islamic Republic of Iran. As you know, he is in New Delhi as the Special Envoy of the President of Iran. The purpose of the visit was to brief the Government of India on developments related to Iran's nuclear issue and in particular the recent discussions it has had with the International Atomic Energy Agency (IAEA).

During his stay in New Delhi, that is today, the visiting dignitary called on External Affairs Minister as well as the National Security Advisor, and detailed talks were held with the Foreign Secretary. During the meetings, India's consistent stand was reiterated that Iran has the right to develop peaceful use of nuclear energy while fulfilling all its international commitments and obligations<sup>1</sup>.

The need for the nuclear issue to be dealt with in an active and transparent cooperation with the IAEA through dialogue and negotiation was also mentioned. India noted the recent steps agreed between Iran and the IAEA towards the common goal of removing all doubts and uncertainty. There is clearly further progress to be made in the future.

His Excellency Dr. Mehdi Safari's visit also provided a useful opportunity for discussions on bilateral relations and for an exchange of views on the situation in the region.

**Question:** The UN is planning additional sanctions on Iran. What is our stand? Already there have been some sanctions.

**Official Spokesperson:** Has there been an announcement of anything?

---

1. It may be recalled that when the former Iranian President Mohammad Khatami visited New Delhi in March, during his courtesy call on the Prime Minister, he assured the latter that Tehran was not interested in building nuclear weapons, but wanted to use civilian nuclear energy for peaceful purposes. At a 40-minute-long meeting Mr. Khatami said Iran's oil and gas resources were finite. Consequently, it wanted to use nuclear energy. Dr. Singh reportedly told him that India too was keen on developing nuclear energy to propel economic growth. Dr. Singh's response was in line with what New Delhi had been saying on Iran - it must adhere to international non-proliferation laws, while it had a right to produce nuclear energy for peaceful use.

**Question:** There is no announcement as yet.

**Official Spokesperson:** This is your speculation and I do not comment on speculative issues.

**Questions:** But the point is the last time when the sanctions were imposed we went along.

**Official Spokesperson:** As and when something happens, we will take a view. I cannot anticipate all sorts of scenarios.

**Questions:** Is Iranian Deputy Foreign Minister meeting Petroleum Minister for pipeline project?

**Official Spokesperson:** The three meetings that were scheduled today, I have told you. If we have any other meetings, we will tell you. I have told you everything that we can share about the meetings.

Thank you.

**427. Question in the Lok Sabha: “Indo-Iran gas pipeline project”.****New Delhi, November 28, 2007.****Will the Minister of External Affairs be pleased to state:**

- (a) whether USA has asked India not to move forward with the planned pipeline project that would bring natural gas from Iran to India;
- (b) the reaction of the Government in this regard; and
- (c) the present status of the pipeline project ?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a) No.
- (b) Does not arise.
- (c) The Ministry of Petroleum and Natural Gas has been negotiating the pipeline project with Iran and Pakistan. The sixth meeting of the tripartite Joint Working Group was held in Delhi on 28-29 June 2007. Three meetings of the India-Pakistan Joint Working Group and five meetings of the India-Iran Special Joint Working Group have been held so far. Several key issues including pricing formula, transit fee and transportation tariff are under discussion<sup>1</sup>.

---

1. Media reports said that the postponement of the visit of Petroleum and Natural Gas Minister Murlu Deora to Pakistan in November caused a setback to the talks on the putting in place of the strategic Iran-Pakistan-India and the Turkmenistan-Afghanistan-Pakistan-India pipelines. Mr. Deora was to lead a high level delegation to Islamabad on November 28 and 29 to sign the formal agreement of India joining the Asian Development Bank (ADB)-sponsored TAPI pipeline. Quoting highly placed sources the media reports said the “uncertainty” in Pakistan after the imposition of emergency and the holding of general elections there had forced the postponement of the visit. Mr. Deora had indicated that during his planned visit he had intended to take up the imposition of transit fee on the IPI pipeline and sort out the situation, paving the way for India to sign a trilateral agreement soon. (New Delhi and Islamabad had reached a broad understanding on the transportation tariff payable to Pakistan for wheeling natural gas through the 1,035-km pipeline segment in that country. But the two had yet to decide on a transit fee payable to Pakistan for allowing usage of its territory for passage of the pipeline to India. Islamabad had sought \$0.493 per mBtu while New Delhi offered \$0.20 per mBtu.

## ISRAEL

### **428. Statement by Official Spokesperson on Al Aqsa Mosque.**

**New Delhi, February 20, 2007.**

India noted with concern about the possible consequences of the repair activities in the "Al Maghriba" section of the wall of the Old City of Jerusalem, housing the Al Aqsa Mosque and other protected monuments. The Old City of Jerusalem including the excavation site are places of great spiritual significance to the followers of the three monotheistic religions. The peace, sanctity and spiritual heritage of this Holy City should be maintained. Any action that could be construed as affecting the sanctity of this World Heritage Site, which is the common heritage of all mankind should be avoided at all costs.

**429. Press Release of the Ministry of External Affairs on the 10th round of Foreign Ministries Consultations between India and Israel.**

**Jerusalem, May 16, 2007.**

The 10th round of the Foreign Affairs Consultations between Israel and India was held in the Ministry of Foreign Affairs, in Jerusalem on 15 May 2007. The Israeli Delegation was headed by Ambassador Amos Nadai, Deputy Director General, Ministry of Foreign Affairs. Ambassador N. Ravi, Secretary (East) Ministry of External Affairs, led the Indian Delegation. The discussions were opened by Senior Deputy Director General Yossi Gal.

The delegations called on Deputy Prime Minister and Minister of Foreign Affairs Tzipi Livni. The tenth round of talks coincided with the 15th anniversary of full diplomatic relations between India and Israel. It was held in a spirit of friendship and mutual understanding which characterizes the relations between the two countries. The two sides had a wide ranging and constructive exchange of views on bilateral, multilateral and regional issues. Ideas for further enhancing bilateral relations in fields such as economy and commerce, agriculture, culture, science, with particular emphasis on intensifying people to people contacts were discussed<sup>1</sup>.

---

1. In the field of Defence there are substantial purchases. According to information supplied to the Rajya Sabha in answer to a question, between 2000 and 2007 India made defence purchases worth US \$ 5 billion from Israel. Chief of Army Staff visited Israel in March 2007 on a goodwill visit. Israel was the lowest bidder for the supply of some radars for the Air Force. In August during the visit of Minister of State for Industries Ishwani Kumar the question of increased cooperation between India and Israel came up for discussion and it was decided for enhanced cooperation between the two countries in the field of solar energy, water technology, none-technology, agriculture including organic farming and medicine. The Israeli Deputy Prime Minister Mr. Ellie Yishai proposed a free trade agreement which Mr. Kumar said India would consider. Israel is also mulling opening a second trade office in India possibly in Bangalore.

## JORDAN

### **430. Extract from the Press Release issued by the Ministry of External Affairs on the visit of Minister of State E. Ahamed to Jordan.**

**New Delhi, September 28, 2007.**

Hon'ble Minister of State for External Affairs, who is currently on an official tour to Jordan and Palestine called on His Majesty King Abdullah-II Bin Al-Hussain, the ruler of Jordan in Amman on 27 September. He personally handed over a letter addressed by the Hon'ble President of India to the King. The two leaders discussed various issues of bilateral, regional and international importance. Shri Ahamed reiterated India's desire to strengthen the relations with Jordan in all areas, in particular in trade and economic exchanges. Investment in the area of joint production of fertilisers and cooperation in other commercial areas figured prominently among the discussions. The King referred to his visit to India in December last year as "exceptionally successful" and recalled the great warmth shown by the Indian side during the visit.

## **LEBANON**

### **431. Briefing Points by Official Spokesperson on India's assistance to Lebanon in its reconstruction efforts.**

**New Delhi, October 30, 2007.**

- In his reply to a letter from the President of Lebanon Mr. Fuad Siniora on the urgent need to undertake reconstruction and rehabilitation of Palestinian refugee camps in Northern Lebanon, Prime Minister Dr. Manmohan Singh has conveyed that India will contribute an amount of US \$ 600,000 to assist in the reconstruction of the telecommunication sector in Lebanon.
- Prime Minister has also conveyed India's support for the legitimate aspirations of the Palestinian people to live in a state of their own with well recognized and mutually agreed international borders.

## OMAN

### **432. Joint Press Statement on the official visit of Deputy Prime Minister of the Sultanate of Oman Sayyid Fahd Bin Mahmoud Al Said.**

**New Delhi, December 15, 2007.**

The Deputy Prime Minister for the Council of Ministers of the Sultanate of Oman His Highness Sayyid Fahd Bin Mahmoud Al Said, paid an official visit to India from December 12-15, 2007. He was accompanied by the Minister Responsible for Foreign Affairs, Minister of Commerce and Industry, Minister of Oil and Gas, Minister of Agriculture, Minister of Information and the Assistant Secretary General in the office of the Deputy Prime Minister as well as a team of 20 prominent business persons.

During the visit, His Highness Sayyid Fahd called on the President, the Vice President and held delegation level talks with the Prime Minister. The External Affairs Minister, the Minister for Overseas Indian Affairs and the National security Adviser called on him.

In their discussions during the meetings, the two sides recalled the historic ties between India and Oman and noted with satisfaction the strengthening of the mutually beneficial and traditionally warm friendship that existed between the peoples of the two countries. They stressed the need for further diversifying, consolidating and developing this relationship to a strategic partnership at all levels for the mutual benefit of the two countries and their peoples and noted that their discussions had revealed a complete meeting of minds.

The two sides welcomed the conclusion of four MoUs during the visit of His Highness Sayyid Fahd Bin Mahmoud Al Said, Deputy Prime Minister for the Council of Ministers of the Sultanate of Oman to India. These are:

- i) Memorandum of Understanding (MOU) between NSIC, India and DGD SME, Sultanate of Oman. ]
- ii) Memorandum of Understanding (MOU) between IIE, Guwahati and DGD SME, Sultanate of Oman.
- iii) Memorandum of Understanding (MOU) on Higher Education Cooperation.

- iv) Memorandum of Understanding (MOU) between Oman Oil Company S.A.O.C. and Krishak Bharati Cooperative Limited

They noted with satisfaction the steady progress being made in bilateral economic and technical cooperation between the two countries with a projected bilateral trade of US\$ 1.4 billion in 2007; the presence of a large number of Indian companies working in Oman and Omani companies working in India and expressed confidence that the considerable potential that exists would be fully realized to mutual benefit. In particular, they noted the successful operation of the fertilizer production joint venture OMIFCO, between Oman Oil Company, Kribhco and IFFCO which was set up with an investment of US\$ 969 million.

In order to elevate their relationship to a higher level of strategic partnership and to replicate similar success stories in other economic sectors, discussions were held on the Omani proposal to set up a Joint Holding Company between India and Oman with a corpus of US \$ 100 million in the initial stage, with contributions from major business houses and investment institutions on both sides. The corpus would form the seed money for joint investment in infrastructure and other projects in both countries. Indian side will send a delegation very shortly to finalize details.

This will be bolstered by the regular interaction through the bilateral institutional mechanisms including the Joint Commission, Joint Business Council and the Strategic Consultative Group. They directed the Joint Commission to meet more regularly and identify thrust areas and formulate a perspective plan for the next ten years.

Both sides agreed that other agreements and MOUs under discussions would be concluded shortly. They welcomed the proposals for enhancing cooperation in field of information technology and higher education, human resource development and for promoting joint ventures and investment especially in the infrastructure sector.

In New Delhi, the high level business delegation accompanying His Highness the Deputy Prime Minister for the Council of Ministers of Oman, interacted with the leading businesspersons and business houses of India in meetings organized by CII and FICCI and met their counterparts.

The Omani side appreciated the role and contribution of the Indian community in the development and progress of the Sultanate of Oman. The Indian leaders expressed their appreciation for the care and favorable

environment provided by the Sultanate of Oman for the Indian community in Oman.

The two sides held extensive discussions on subjects of mutual interest in the bilateral, regional and international context and agreed to continue such discussions, which will be for the mutual benefit of both countries.

Both sides agreed that regular exchanges of high level visits between India and Oman would help sustain the momentum of bilateral relations and the Deputy Prime Minister for the Council of Ministers of Oman extended an invitation to the Prime Minister of India to visit Oman.

## **PALESTINE**

### **433. Statement by Official Spokesperson on the Agreement in Mecca for the formation of the National Unity Government in Palestine.**

**New Delhi, February 20, 2007.**

India has always supported the establishment of a sovereign, independent, viable State of Palestine, within well-defined and recognized borders, living side by side at peace with the State of Israel, through a negotiated solution to the Israel-Palestine conflict and in keeping with relevant UN resolution. In this context, India has noted the efforts underway towards the formation of a Palestinian Government of National Unity, in the expectation of a resumption of dialogue on the Israel-Palestine track.

**434. Response of the Official Spokesperson to a question on the Mecca Agreement.****New Delhi, March 6, 2007.**

In response to a question, the Official Spokesperson said:

“India has always been strongly supportive of the Palestinian cause and the establishment of a sovereign State of Palestine through negotiations with the State of Israel. The Mecca Agreement<sup>1</sup> is an important step in this direction. In this context, India notes with appreciation the significant contribution of the Kingdom of Saudi Arabia and H. M. King Abdullah himself in facilitating the formation of a Palestine Government of National Unity, in the expectation of a resumption of dialogue on the Israel- Palestine track.”

---

1. Under the Palestinians' Mecca Accord of February 8, 2007, the mainstream Fatah movement and the militant group Hamas agreed to form a new coalition government that will respect the previous peace deals with Israel. The accord was in the form of a letter from Palestine Authority Chairman Mahmoud Abbas of Fatah, designating Prime Minister Ismail Haniyeh of Hamas to form the government. Under the agreement, Hamas agreed to hold nine ministries in the Cabinet including the prime minister's post. Fatah was allocated six ministries, other factions holding another four. On June 3 when the Saudi King and the Iranian President Ahmadinejad met in Riyadh Iran appeared to signal its support for the Makkah agreement, steered by Saudi Arabia, which raised the Saudi profile in Palestine considerably.

**435. Statement by Official Spokesperson on the formation of the Palestinian National Unity Government.****New Delhi, March 21, 2007.**

India welcomes the formation of the Palestinian National Unity Government<sup>1</sup> as a result of the efforts by all the parties directly involved. India supports the legitimate aspirations of the Palestinian people and their efforts to reconstruct their nation. We trust that the formation of the new Palestinian Government of National Unity will help alleviation of the suffering of the common man and in the resumption of peaceful dialogue under the Peace Process. India is ready to assist the Palestinian National Unity Government in its reconstruction and rebuilding efforts.

---

1. The Spokesperson was referring to the installation of a new, more moderate coalition government, in hopes of persuading the international community to end its isolation of the Palestinian Authority and lift a year of bruising sanctions. Israel promptly announced it would not deal with the coalition, because governing partners Hamas and Fatah stopped short of explicitly recognising the Jewish state or renouncing violence, as the international community has demanded. Norway immediately recognised the new coalition and announced it would lift sanctions. Britain and the U.N. signalled flexibility - suggesting money could start flowing again if the coalition keeps anti-Israel activities in check.

**436. Response of Official Spokesperson to a question on developments in Palestine and Israel.****New Delhi, May 26, 2007.**

We are concerned about the escalating violence in Palestine and Israel, especially that directed against innocent civilians. The arrest of elected representatives of the people by another country can only lead to further complications and violence. It is our hope that the peace process will be brought back on track and resumed as soon as possible. All sides must make efforts to exercise restraint and return to the path of dialogue and peace<sup>1</sup>.

---

1. The Spokesperson was referring to May 26 Israel firing of missiles at five Hamas targets minutes apart killing five persons and wounding five. In all, Israeli aircraft launched 11 missile strikes. They struck near the house of Prime Minister Ismail Haniyeh of Hamas in a Gaza refugee camp, while troops in the West Bank arrested a Hamas Cabinet Minister. Israel's offensive was aimed at halting Hamas rocket fire from Gaza at Israeli border towns. Since the previous week, dozens of targeted missile strikes killed nearly 50 Palestinians and damaged many Hamas installations. Israel said some 225 rockets landed in Israeli towns since May 15, killing one woman and sending thousands of frightened Israeli residents fleeing. Moderate Palestinian President Mahmoud Abbas tried to revive a truce with Israel. Under his plan, Gaza militants would halt rocket fire for a month to allow for negotiations on a more comprehensive cease-fire that would include the West Bank. Against the backdrop of the Palestinian infighting that threatened all-out civil war, Israeli airstrikes added an extra layer of violence and uncertainty. Meanwhile Israel Defence Minister Amir Peretz said in an interview he would want the moderates led by Fatah to emerge stronger after the clashes. While declaring that he did not wish to get involved in internal Palestinian affairs, Mr. Peretz told Israel Radio that "we certainly would like the moderate forces to emerge with the upper hand."

**437. Response of Official Spokesperson to a questions on the current situation in Palestine.****New Delhi, June 22, 2007.**

In response to questions on the current situation in Palestine<sup>1</sup>, the Official Spokesperson said that the situation in Palestine had become complex and expressed the hope that it would be resolved soon for a return to normalcy. While referring to the newly constituted government of the Palestine National Authority under the leadership of President Abu Mazen, hope was expressed that it would achieve the goal of helping a peaceful and negotiated resolution of all problems, including the Palestine-Israel conflict using the elements of the Roadmap, and the Arab Peace Initiative. The need of the hour was to work towards meeting the legitimate aspirations of all the people of Palestine, including their right to live in peace with their neighbours, within secure and recognized international borders.

---

1. Relations between Fatah and its rival Hamas deteriorated after Hamas overran the entire Gaza strip after engaging Fatah fighters in deadly gun battles for several days. Nearly 110 persons died in the factional violence. Mr. Abbas refused talks with the militant group. In a televised address to the members of the Palestine Liberation Organisation (PLO), Fatah leader Mr. Abbas asserted that there would be "no dialogue with putschists, murderers and terrorists." The Hamas dismissed the speech as a pack of lies. Mr. Abbas remarks triggered street demonstrations in Gaza, where effigies of the Palestinian President were burned on June 21. While Hamas has declared its intent to hold talks, it has nevertheless insisted that it would not engage with senior Fatah functionaries, including former Gaza strongman Mohammad Dahlan. To resolve the crisis Egypt invited Palestinian President Mahmoud Abbas and Israeli Prime Minister Ehud Olmert for a summit at the Red Sea resort of Sharm El-Sheikh. An invitation for participation was also extended to King Abdullah II of Jordan. Both Egypt and Jordan have diplomatic ties with Israel. The call followed Mr. Olmert visit to Washington.

**438. Extract from the Press Release issued by the Ministry of External Affairs on the visit of Minister of State E. Ahamed to Palestine.**

**New Delhi, September 28, 2007.**

\* \* \* \*

Shri Ahamed ... visited Palestine and met Dr. Rafique Al-Husseini, the Chief of Staff of President, Dr. Ahmed Soboh, Deputy Foreign Minister of Palestine and Dr. Nimmer Hamad, senior Political Advisor to the Palestinian President to discuss bilateral relations between India and Palestine and to exchange views on the progress in the Middle East Peace Process. The Palestinian side highly appreciated India's unwavering support to the Palestinian cause and its consistent stand on the Palestinian issue. MoS expressed hope that a negotiated settlement would soon be reached to achieve the aspirations of Palestinians to have their own viable independent Palestinian state within separate and recognized borders, living side by side in peace with all its neighbours including Israel. The International Conference on Palestine which is expected to be held in November this year also came up during the discussions.

**439. Statement by Minister of Science and Technology and Earth Sciences Kapil Sibal at the Conference to promote Arab Israel peace.**

**Annapolis, November 27, 2007.**

Please see Document No.-414

◆ ◆ ◆ ◆ ◆

**440. Press Release of the Embassy of India in Washington on the meeting of Minister of Science and Technology and Earth Sciences Kapil Sibal with President of Palestinian National Authority Mahmoud Abbas.**

**Annapolis, November 27, 2007.**

Mr. Kapil Sibal, Minister of Science and Technology and Earth Sciences, who is leading the Indian delegation to the International Conference to promote Arab-Israeli Peace held at Annapolis, USA had a most friendly meeting with Mr. Mahmoud Abbas, President of the Palestinian National Authority today, the 27th November 2007. The meeting took place after the Palestinian President and Israeli Prime Minister had reached agreement on the Joint Understanding, which has launched the one-year long negotiating process between the parties on the Final Status Issues.

President Abbas expressed great satisfaction about the Indian delegation's participation<sup>1</sup> at the conference. He shared with Mr. Sibal his assessment of the outcome of the conference and briefed him in detail about the procedures and working methods for conducting future negotiations.

President Abbas expressed his deep appreciation to India for all the assistance that has been extended by India to the Palestine National Authority so far. Minister Sibal assured him that India would be very happy to continue this cooperation in future in all areas desired by Palestinian authorities. In particular, he emphasized India's willingness to help in providing assistance in the field of police training and institution - building and human resource development. President Abbas said that he was looking forward to India's participation in the Donors Meeting which would be convened in Paris in December 2007. The Minister stated India's continued commitment and support for the Palestinian cause.

---

1. Please see Document No 414.

**441. Message by Prime Minister on the occasion of the International Day of Solidarity with the Palestinian people.**

**New Delhi, November 29, 2007.**

On the occasion of the International Day of Solidarity with the Palestinian people we once again salute the indomitable spirit of the Palestinian people and reaffirm our support for their just struggle, for a sovereign and independent State of Palestine.

India welcomes the renewed efforts and initiative by the international community to resolve Arab-Israeli issues. We have noted with concern the developments in Gaza and the continued violence inflicted on innocent civilians.

India welcomes the direct dialogue between the leaders of Palestine and Israel and looks forward to an early and peaceful resolution of all issues between the two nations and peoples.

I would like to take this opportunity to re-affirm India's consistent and unwavering support to the cause of the friendly people of Palestine. It is our firm belief that a just, comprehensive and lasting peace in the region can only be achieved through negotiations and dialogue leading to the establishment of an independent and viable State of Palestine, living in peaceful co-existence, within secure and well-defined borders, with the State of Israel.

On this International Day of Solidarity, I also take the opportunity to convey my greetings and best wishes to the friendly people of Palestine.

**442. Statement by Minister of State E. Ahamed on Agenda item: 17&18 “The Situation in the Middle East and “Question of Palestine,” in the UNGA.**

**New York, November 30, 2007.**

Please see Document No. 663.

**443. Statement by Minister of State E. Ahamed at the Donors' Conference on Palestine.**

**Paris, December 17, 2007.**

Hon'ble President, Mr. Nicolas Sarkozy,

Your Excellency, Foreign Minister of France, Mr. Bernard Kouchner,

Distinguished Delegates,

Excellencies, Ladies and Gentlemen,

At the outset, let me thank you and the French Government for taking the initiative of hosting the Donors' Conference on Palestine and inviting us. India reaffirmed its commitment at the Annapolis Conference to play its "due role" in this collective endeavour of the International Community to strengthen the forces of peace and stability in the region.

2. The International Community needs to come together to contribute to the capacity-building and development of human resources and infrastructure of the Palestinian people, to enable them to live in peace in a sovereign, independent and viable State of Palestine, side by side with the people and the State of Israel.
3. Excellency, our presence at this Donors' Conference underlines the importance that the Government of India attaches to the Palestinian cause and its solidarity with the Palestinian people. I am happy to see the three year Palestinian Reform and Development Plan prepared by Palestinian Prime Minister Fayyad.
4. In tune with our principled support to the Palestinian cause and the Palestinian people, India has so far extended assistance in the form of grants to the tune of US\$ 22 million to the Palestinian National Authority towards development of Palestinian institutions, besides humanitarian aid in times of crises.
5. In 2003, India donated vehicles and medicines worth USD 1 million to the PNA. I had the honor of personally delivering this aid to the late President Arafat at Al Quds. In 2005, a grant of USD 15.4 million was extended to the Palestinian Authority for executing projects in development of infrastructure and human resources. In 2006,

humanitarian aid worth USD 2 million was given for life-saving drugs to Ramallah.

6. Mr. Chairman, on this occasion, in consonance with our earlier donations for infrastructure development in Palestine, I have pleasure in announcing on behalf of the Government of India, a pledge of USD 5 million for further development of Palestinian institutions, the projects for which will be identified in consultation with the Palestinian National Authority as before. In addition to this, to assist in the capacity building of Palestine, India will provide training to 400 Palestinian officials nominated by the Palestinian National Authority under its International Technical and Economic Cooperation Programme over a period of two years.
7. I would like to take this opportunity to express my appreciation for the initiative taken by the Government of France for hosting this International Donors' Conference on Palestine and the warm hospitality extended to me and my delegation.

## SAUDI ARABIA

### **444. Press Release of the Ministry of External Affairs on the 7th session of the India-Saudi Arabia Joint Commission.**

**New Delhi, January 19, 2007.**

The 7th session of the India-Saudi Arabia Joint Commission was held on 18-19 January 2007 in New Delhi. The Hon'ble Finance Minister of India Shri P. Chidambaram and H. E. Dr. Hashim Abdullah Al-Yamani, Minister of Commerce and Industry of the Kingdom of Saudi Arabia co-chaired the meeting. H. E. Dr. Al-Yamani was accompanied on his visit from 16 to 19 January 2007 by H. E. Mr. Abdullah A. Al Hamoudi, Vice Minister for Foreign Trade and a 32-member Official Delegation, a 36-member Business Delegation and an 18-member ICT Delegation.

The 7th Session of the JCM was a follow up to the historic and landmark visit of the Custodian of the Two Holy Mosques King Abdullah bin Abdul Aziz to India in January 2006. The proceedings of the JCM underlined the determination of both sides to work together to realize and achieve the goals set out in the Delhi Declaration issued during the visit covering the wide spectrum of bilateral cooperation.

Discussions were held to implement the provisions of the Delhi Declaration towards strengthening bilateral relations, enhancing economic, investment and commercial relations, building a strategic partnership in the field of energy and engendering cooperation in science and technology, education, health and promoting the welfare of the Indian community in Saudi Arabia. Both sides made presentations on their respective economies and prospects and possibilities for investment. Both sides reiterated their commitment to follow up on various decisions taken during the JCM. Bilateral trade and investments has been growing satisfactorily in recent times and considerable possibilities exist for further growth. Notably, India is the fourth largest trading partner of Saudi Arabia.

The Saudi Business and ICT delegations interacted with their Indian counterparts at the Joint Business Council meetings at FICCI, and at CII and ASSOCHAM. The ICT Delegation is also scheduled to visit Bangalore and Hyderabad for further interaction with various Indian companies and representatives in the ICT field.

## SYRIA

### **445. Report on the cooperation between India and Syria in the Hydro-Carbon sector.**

**New Delhi, April, 21, 2007**

Taking further India's quest for energy security, the delegation led by a Petroleum and Natural Gas Minister, Murli Deora, has made a major breakthrough in cooperation between New Delhi and Damascus in a number of projects in the hydrocarbon sector. These include participation in exploration and production, refinery modernisation and development of gas infrastructure including city gas projects. This significant development took place during a meeting between Mr. Deora and his Syrian counterpart Sufian Al-Alao, in Damascus late on 20th April night. Mr. Deora, who was on a three-nation visit, elaborated on the recent developments in the Indian oil and gas sector at the delegation-level talks. He emphasised the need for greater cooperation between two countries. Mr. Al-Alao reciprocated his sentiments and at the end of the meeting both sides signed the minutes on the agreed agenda.

Petroleum Secretary M.S. Srinivasan signed the document for India and Dr. Hassan Zaienab, Deputy Minister, Petroleum and Mineral Resources, for Syria.

Syria agreed to work closely with Indian companies and consider the request for allocating blocks on a preferential basis in the spirit of mutually beneficial relationship.

It will also provide information to Indian companies about the 7 offshore blocks proposed for bidding later this year. The Oil and Natural Gas Corporation (ONGC) offered assistance to Syrian Petroleum Company (SPC) for increased and enhanced oil recovery from the country's heavy oil-fields through techniques such as in-situ combustion, gas and water injection, slim hole drilling, side tracking and production system optimisation.

In the refining sector, the India Oil Corporation and Engineers India Limited (EIL) conveyed their interest in participating in different opportunities in Syria.

Engineers India Limited said it was interested in participating in the upcoming Baniyas Refinery upgrading project. Syria agreed to provide details of the project.

On the offer of the Gas Authority of India Limited (GAIL) to develop CNG-based infrastructure, Syria said GAIL had qualified for CNG distribution and the country would float the bid document before the year-end. The two sides also agreed to form Joint Working Groups, for identified areas of mutual cooperation, comprising officials of both countries.

They would fine-tune and monitor the work programme under the aegis of the Hydrocarbon Committee to be co-chaired by Dr. Hassan and the Secretary, Petroleum and Natural Gas, India.

## TAJIKISTAN

### 446. Address by Minister of State E. Ahamed at the Release of the Book "India-Tajikistan Cooperation: Perspectives and Prospects".

**New Delhi, January 17, 2007.**

Amb Salohiddin Nasriddinov, Dr K. Santhanam, President India Central Asia Foundation Shri K. Raghunath, Vice President India Central-Asia Foundation Shri Yogesh Saxena, Shri Talmiz Ahmed, DG, ICWA Excellencies, Distinguished Academicians, Ladies and Gentlemen

It gives me great pleasure to be at this function to release the book **"India-Tajikistan Cooperation: Perspectives and Prospects"** which has been brought out by the India Central Asia Foundation. The book is a compilation of papers presented at the seminar on India-Tajikistan Relations organized by ICWA and ICAF during the visit of His Excellency Mr. Emomali Rahmonov, President of Tajikistan to India in August 2006. It is a matter of great satisfaction and honour that the President of Tajikistan made the inaugural address at the Seminar and has contributed to this book. This book will be an important addition to the literature on Tajikistan-India relations and a significant point of reference for all interested in India's relations with Tajikistan and seeking information on Tajikistan. I hope initiative will be taken to translate the book into Tajik language as well. I vividly remember the visit of President Rahmonov to India in August last year. I was impressed by his vision for India-Tajikistan relations and the personal guidance provided by him in strengthening our relations.

2. India and Tajikistan have deep roots in history. Ties between our two countries pre-date the Silk Road by three thousand years. Tajikistan and other Central Asian republics have civilisational, historical, geopolitical and economic significance for India. Awareness of and sensitivity to contemporary events in Tajikistan and other Central Asian republics are of importance in promoting common interests.
3. For India, developments in Tajikistan are important, as it is part of our near neighbourhood. Tajikistan is less than half hour flying time from our northern borders and it is in our mutual interest to deepen

our relations. Exciting new opportunities have emerged in the hydropower sector of Tajikistan which has the potential of transforming not only the Tajik economy but the region as well. We, in India, are hopeful that the initiative to export electricity from Central Asia to South Asia contributes towards transforming the lives of our peoples. Other areas of mutual cooperation include combating international terrorism and drug trafficking.

4. During my travel to Central Asian Republics, I have felt the warmth and closeness towards India and a desire for strengthening our bilateral interactions. In their perception, relations with India are welcome, as it is benign and free of tensions or disputes. I have also sensed their desire to learn from India's developmental experience.
5. An integrated approach is desirable to enhance the level of economic ties between India and Tajikistan. I must mention without any hesitation that economic and commercial ties between India and Tajikistan are low despite the immense potential that exists. It is heartening to note that steps are being taken by both India and Tajikistan to expand and strengthen economic cooperation. The Tajik President's visit to India in August last year has provided an impetus to our bilateral ties. Enhanced economic engagement of India with this region could play a positive role in economic reforms underway in Tajikistan.
6. India's interests in Central Asia deserve to be effectively advanced by diversifying from cooperation in the field of education and culture to investment and enhanced business transactions. There is a need for increased interaction and exchange of information between entrepreneurs from India and Central Asia on the new opportunities and markets in the region.
7. I am confident that this book will be a step forward in this regard. I am happy to note that the book provides a perspective on such important areas such as India - Tajik Relations, Regional Economic Cooperation with a focus on India - Tajikistan, Drug Trafficking and Terrorism & Religious Extremism in Central Asia

Distinguished Friends,

8. I am sure the book will contribute towards a better understanding of India-Tajik relations. Thank you very much.

## UNITED ARAB EMIRATES

### **447. List of Agreements signed between the Republic of India and the Government of United Arab Emirates during the State Visit of His Highness Shaikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the United Arab Emirates (UAE) and Ruler of Dubai to India, [March 25-26, 2007].**

**New Delhi, March 26, 2007**

1. Framework Agreement between Government of the Republic of India and the Government of the UAE for developing Industrial Relations signed by H.E. Shri Kamal Nath, Minister of Commerce & Industry of India and H.E. Dr. Mohammad Khalfan Bin Khirbash, Minister of State for Finance & Industry of UAE.
2. Protocol between Government of the Republic of India and the Government of the UAE amending the Agreement for Avoidance of Double Taxation and Prevention of Fiscal Evasion with respect of Taxes on Income signed on April 29, 1992 signed by H.E. Shri S.S. Palanimanickam, Minister of State for Finance[Revenue] of India and H.E. Dr. Mohammad Khalfan Bin Khirbash, Minister of State for Finance & Industry of UAE.
3. Memorandum of Understanding for Technical Cooperation between Bureau of Indian Standards[BIS] and Emirates Authority for Standardization and Metrology[ESMA] signed by Smt. Alka Sirohi, Director General, Bureau of Indian Standards and Mr. Waleed Ali Bin Falah Al-Mansouri, Director General of Emirates Authority for Standardization and Metrology of UAE.
4. Memorandum of Understanding for Technical Cooperation in Accreditation Activities between National Accreditation Board for Testing and Calibration Laboratories and Emirates Authority for Standardization and Metrology signed by Dr. Sulbha M. Gupta, Director, National Accreditation Board for Testing and Calibration Laboratories and Mr. Waleed Ali Bin Falah Al-Mansouri, Director General of Emirates Authority for Standardization and Metrology of UAE.

5. Memorandum of Understanding between Securities and Exchange Board of India and Emirates Securities and Commodities Authority for Assistance and Mutual Cooperation on the Exchange of Information signed by Shri M. Damodaran, Chairman, Securities and Exchange Board of India and Mr. Abdullah S. Al Turifi, Chief Executive Officer, Emirates Securities and Commodities Authority of UAE.

**448. Press Release issued by the Ministry of Home Affairs on the India - United Arab Emirates Institutional Mechanism to enhance Internal Security and Cooperation in Combating International Terrorism.**

**New Delhi, May 31, 2007.**

A seven member delegation of the United Arab Emirates, led by their Under Secretary (Interior), Major General Saif Abdulla Al-Sha'afar met the Indian delegation, headed by the Union Home Secretary, Shri Madhukar Gupta here on 28th and 29th of this month. The talks were held in a friendly and cordial atmosphere. Both sides noted with satisfaction the strong traditional and friendly ties between the two countries and underlined the need to enhance bilateral security cooperation. It was noted that discussions are underway on the agreements on transfer of sentenced persons, and on combating international terrorism, organized crime and illicit drug trafficking. It was decided that these agreements would be finalized, as far as possible, within three months.

Both sides underscored the need to firmly and effectively combat terrorism and other related crimes. In this connection, they noted the importance of exchange of operational information and intelligence in the areas of terrorism, organized crime, financing of terrorism, smuggling of small arms and explosives, and agreed to set up an institutional mechanism to coordinate and facilitate such exchange on a continuing basis. This mechanism will also discuss ways to facilitate greater cooperation and speedy action in criminal investigations including Red Corner Notices and extradition cases.

Both sides also discussed passport, visa and immigration related issues and agreed to find ways and means to reduce vulnerability of passports, prevent issuance of forged travel documents, take steps to control the

activities of unscrupulous middlemen and also address the problems faced by Indian expatriate workers in the UAE. It was decided that the institutional mechanism would address these issues also.

It was also agreed that both sides would avail of facilities in either country for enhancing capacity and skills of their respective police personnel. Both sides agreed that to ensure early operationalisation of the institutional mechanism, both sides will convey to each other within two weeks the names of respective competent authorities / nodal points.

**449. Press Release issued by the Ministry of External Affairs on the 9th India-United Arab Emirates Joint Commission meeting.**

**New Delhi, June 6, 2007.**

The 9th Session of the India-UAE Joint Commission for Economic, Technical and Scientific Cooperation was held in New Delhi on 6th June, 2007. The Indian side was led by H.E Pranab Mukherjee, Minister of External Affairs and the UAE side by H.E. Sheikh Abdullah bin Zayed Al-Nahyan, Minister of Foreign Affairs.

The Joint Commission noted the successful visit to India of His Highness Sheikh Mohammed bin Rashid Al Maktoum in March 2007. In the discussions, the entire range of subjects dealing with bilateral economic, commercial, technical and scientific cooperation was covered. Special emphasis was laid on enhancing investment cooperation between UAE and India, with particular reference to investment from UAE in the infrastructure sector. The discussions also covered bilateral cooperation in human resource development, capacity building, investment by India in the hydrocarbon sector in the UAE and on the operationalisation of the Joint Committee, as envisaged in the Memorandum of Understanding on Manpower signed between India and the UAE in December 2007. The discussions also covered an assessment of the regional situation by both sides. In this context, India expressed the hope that this would buttress all ongoing efforts for Israeli-Arab dialogue, and a peaceful, negotiated resolution of the conflict.

It was decided that frequent exchanges in the field of economic, commercial

and technical cooperation would be encouraged by both sides to enable full realization of the potential that exists in the bilateral relations. It was also noted that the Government of UAE had made an important gesture on declaring amnesty for three months to all workers in UAE who needed to regularize their stay or who wished to return to their country of origin.

## UZBEKISTAN

### **450. Press Release issued by the Ministry of Commerce on cooperation between India and Uzbekistan in the mining and gas sectors.**

**New Delhi, April 15, 2007.**

Uzbekistan has agreed to open technical talks with GAIL for enabling the Indian company to start exploration activity in natural gas in the gas-rich Central Asian country. This materialised after meetings between the Prime Minister of Uzbekistan, Mr. Savkit Mirziyayev and the visiting Minister of State for Commerce, Shri Jairam Ramesh on April 13, 2007 at Tashkent. India has also offered to help establish a training institute for gas technology in Tashkent, along the lines of the Jawaharlal Nehru IT Centre in the Uzbek capital that was inaugurated by the Prime Minister, Dr. Manmohan Singh last year. GAIL has identified 4 specific blocks for gas exploration. So far Russia, China and South Korea have invested in gas exploration in Uzbekistan.

Shri Jairam Ramesh was accompanied in his meetings with the Prime Minister of Uzbekistan and other senior ministers by Shri Mukund Chaudhury, Managing Director of CLC Textiles which has recently invested \$ 81 million in cotton spinning and yarn in Uzbekistan. A further investment of \$ 40 million is planned by CLC Textiles over the next two years. The Uzbek Prime Minister appreciated the operations of CLC Textiles and expressed Uzbekistan's keenness for similar investments by Indian companies in pharmaceuticals and leather. Shri Jairam Ramesh promised to talk to Indian companies in this regard soon.

Shri Jairam Ramesh also conveyed to the Uzbek Prime Minister, India's interest in exploring for gold in gold-rich Uzbekistan since India is now the world's largest importer of gold. The Uzbek government has agreed to consider a proposal from MMTC/ National Mineral Development Corporation (NMDC) for gold exploration but wants this proposal to include value-addition investments in Uzbekistan itself, like in gold jewellery. MMTC and NMDC will now formulate a proposal for submission to the Uzbek government in the next 30 days.

The Uzbek Prime Minister underscored the special cultural and political relationship that exists between India and Uzbekistan. He also mentioned

the great personal regard and respect that the President of Uzbekistan has for Dr. Manmohan Singh whom he has known personally for over a decade and a half. He felt that the time was now ripe for taking the bilateral economic relationship to a whole new level and that Shri Jairam Ramesh's visit will contribute significantly to this.

**INDIA'S FOREIGN RELATIONS - 2007**

**SECTION-V**

**AFRICA**

**451A. Briefing points by Official Spokesperson on the Conference of Heads of Indian Missions from sub-Saharan Africa.**

**Addis Ababa, July 4, 2007.**

- U External Affairs Minister Shri Pranab Mukherjee today chaired a Conference of Heads of Indian Missions from sub-Saharan Africa that was held at the Indian Embassy in Addis Ababa.
- U EAM spelt out in detail the policy of the Government on further development and intensification of our traditionally close, cooperative and mutually beneficial relations with countries of the region.
- U The Conference addressed major themes including: bilateral relations, India-Africa partnership, Africa and the World, and enhancing India's development partnership with Africa. Among the issues discussed was the need for Indian missions to continue to provide assistance in times of need to Indian communities resident in their territories of accreditation.
- U Many useful suggestions emerged from the discussions and these will help to further develop and fine tune India's overall policy of partnership towards Africa that covers political, cultural, trade and economic, S & T, defence, ICT, health, agriculture and other spheres.

**452. Inaugural address by External Affairs Minister Pranab Mukherjee at the 1st India-Africa Hydrocarbon Conference.**

**New Delhi, November 6, 2007.**

Minister for Petroleum & Natural Gas,

Shri Murli Deora,

Hon'ble Ministers from African countries,

Excellencies,

Distinguished Guests,

It is indeed an honour for us to receive all the dignitaries from various African Countries. I thank all of you for taking time out from your busy schedules and for reinforcing our commitment to further deepen the cooperation between India and Africa in the vital energy sector.

India, as we all know, is experiencing accelerated economic growth. Annual growth rates of between 8% & 9% are driving the nation's increasing demand for energy. Like many other countries, it is natural that India too should be concerned about existing and potential sources of supply for meeting its requirements on a sustained basis.

India faces formidable challenges in meeting its energy needs. According to the Integrated Energy Policy document of the Government of India, the country would need to expand its current primary energy supply levels by 3-4 times and electricity generation by 5-6 times in the next 25 years in order to sustain the high growth levels required to attain our developmental goals and to eradicate poverty. Owing to the limited availability of oil and gas within our own country, 70% of our energy requirements are dependent on hydrocarbon imports. What is of particular concern to us is that this import dependence is only going to accentuate further in the coming years.

This realization has pushed all of us to adopting proactive approaches for ensuring our energy security, particularly with reference to hydrocarbons, which account for nearly half of India's total energy needs. The task of investing in overseas energy assets for the country has, therefore, become an important aspect of our economic diplomacy. Indian oil companies have concluded arrangements, including investment agreements, with many

countries for the supply of oil and its derivatives to India and in most of the cases, delivery has begun. In addition, the possibility of bilateral cooperation in the downstream sectors, petrochemicals, non-conventional energy and joint ventures are also being constantly explored with various resource-rich countries.

Excellencies, Distinguished Guests,

The Ministry of External Affairs attaches high priority to energy security. The newly created Energy Security Unit in the Ministry bears testimony to the government's resolve to treat this as a matter of urgent national importance. As the nodal point in the Ministry, this Unit will maintain close coordination with the concerned Ministries, as well as our corporate entities in both public and private sectors, to support their international engagement through appropriate diplomatic intervention. Given this background, to secure a long term, cost effective and reliable mode of resource supply, we are keen to explore the prospects of sourcing energy from our neighborhood and beyond.

India is presently looking at an all-round effort wherein domestic exploration exercises are being intensified, coupled with greater emphasis on 'equity oil' from overseas. Efforts towards technology improvements have also paid off. Indian companies are collaborating with international companies for greater sharing of technology and know-how leading to higher efficiency in our operations. These measures, along with efforts towards adoption of advanced technology and professional management, as well as forays into tapping emerging areas like coal gasification, Coal Bed Methane (CBM), gas hydrates and other sources of energy, have shown encouraging results. Greater consideration is also being given to efficient utilization of energy resources. The Indian hydrocarbon industry has come a long way on all these fronts.

The New Exploration Licensing Policy (NELP) and the CBM are new frameworks for cooperation in the area of energy resources management. The six rounds of the New Exploration Licensing Policy have successfully attracted investments from Indian as well as global investors. Over the years, exploration activity has been intensified and positive results have been forthcoming with important discoveries by operators in the Krishna-Godavari Basin and the on-shore blocks in Rajasthan. Similar success has also been observed in the bidding for the CBM blocks.

India has re-doubled its efforts to attract investments to develop its energy

sector, including power generation and oil refining, which are now open to private and foreign investment. There is new and huge market potential in India for those who have competitive products and services to offer in the energy sector. Possibilities of cooperation on the non-conventional energy front are also being explored. An Agreement has been signed with Brazil for cooperation in bio-fuels and ethanol. We are exploring the possibilities of civil nuclear cooperation and, if we succeed, it would also open up immense possibilities for the growth of nuclear energy thereby strengthening energy security for the country.

Excellencies, Distinguished Guests,

India is increasingly looking at taking forward its partnership with Africa which would be mutually beneficial to both sides. We are a natural market for Africa's rich hydrocarbon resources. Prospects for cooperation with African nations in the hydrocarbon sector have also received a boost with a surge in investments made by Indian companies in countries such as Libya, Sudan, Nigeria, Egypt and Gabon over the past few years. We hope that from here on, we will together traverse the path to growth and development.

One of the crucial questions that confront all resource-rich countries is how natural endowments can be utilized to build a diversified economy and ensure economic and social development. Since the relentless quest for new energy sources is expected to continue all round the world, including in Africa, it must be ensured that such exploitation takes place in an equitable and humane manner. In this important sector of hydrocarbons, which has a direct correlation with economic growth, investment in human resources is also an important aspect. In this regard, India stands ready to share its experience with its African partners in the hydrocarbon sector, from exploration to distribution through refining, storage and transportation.

It is crucial that over a period of time, investment in this sector should directly assist in the building up of a trained and skilled work force capable of efficiently running the assets.

Excellencies, Distinguished Guests,

India's foreign policy remains vigilant to the new demands and compulsions imposed upon it by a rapidly transforming world around. We are confident of our capacity and capability as a nation to respond successfully to these newly emerging challenges and opportunities. We seek the cooperation

and support of our friends and partners in Africa to achieve this objective. On this occasion, I would like to congratulate the Ministry of Petroleum & Natural Gas, FICCI and UNCTAD for their timely effort in bringing together the key officials and business stakeholders in this sector in India and Africa to collectively identify the areas for cooperation. I am sure that this Conference will help evolve a vibrant and mutually beneficial business environment in the years to come.

To conclude, I would like to reiterate that India is more than willing to share its experience and its technologies in the hydrocarbons sector with African countries in order to forge meaningful partnerships which can respond to the challenges of development facing our people. We have maintained traditionally warm and productive relations with all African countries. Our engagement has been characterized by close convergence on global political and economic issues, particularly those affecting the developing world. Closer cooperation between India and the African countries in the hydrocarbon sector would further cement and consolidate those relations and contribute significantly to forging strategic partnerships for mutual development.

Thank you.

## **ALGERIA**

### **453. Statement by Official Spokesperson condemning the terrorist attacks in Algiers.**

**New Delhi, April 12, 2007.**

We strongly condemn the terrorist attacks in Algiers on Wednesday which resulted in the death of many innocent people and injured hundreds. Terrorism is a heinous crime and cannot be condoned in any form. The international community should cooperate closely to counter terrorism everywhere with renewed resolve and total firmness.

### **454. Statement by Official Spokesperson on the terrorist attack in Algiers.**

**New Delhi, December 12, 2007.**

We strongly condemn the abhorrent act of terrorism that took place in the Algerian capital on Tuesday, December 11. The terrorist attack, that targetted Algeria's Constitutional Court and the UN mission, killing dozens of people clearly reveal the serious threat that terrorism poses to the security of nations and to international organizations. The indiscriminate targetting of innocent people exposes terrorism's true face. No cause, no grievance, can ever justify acts of terrorism.

We stand by with friendly Algeria, in this hour of their grief and in their fight against new threats of extremism and terrorism. We reiterate our stand that the international community should cooperate closely to counter terrorism with firmness and determination.

## ANGOLA

### **455. Press Release of Ministry of External Affairs on the visit of Minister of State Anand Shrama to Angola, 8-9 June, 2007.**

**New Delhi, June 9, 2007.**

Shri Anand Sharma, Minister of State for External Affairs visited Angola on 8-9 June, 2007 at the invitation of Mr. Joao Bernardo de Miranda, Minister of External Relations, Government of Angola. This was of significant importance as this was the first Ministerial level visit from Indian side in the last seventeen years.

Minister Sharma was received at the highest level in the Angolan polity. Immediately upon arrival in Luanda, Minister Sharma called on the President of the Republic of Luanda, H.E. Mr. Jose Eduardo dos Santos. The meeting lasted over fifty minutes and covered wide range of issues of bilateral and multilateral interest.

During the course of the visit, Minister Sharma held discussions with Mr. Joao Bernardo de Miranda, Minister of External Relations, Mr. Desiderio Costa, Minister of Petroleum, Mr. Manuel Antonio Africano, Minister of Geology and Mines, and Dr. Manuel Arnaldo de Sousa Calado, President of ENDIAMA, the state-owned diamond company.

The successful visit of Minister of State has set the tone for enhanced multisectoral engagement between India and Angola in the fields of oil, mining, agriculture and infrastructure.

## COTE D'IVOIRE

### **456. Briefing by Official Spokesperson on humanitarian aid to Cote d'Ivoire.**

**New Delhi, January 5, 2007.**

In September 2006, Cote d'Ivoire was affected by a serious problem arising out of the discharge of toxic waste at different locations of the country by a foreign registered vessel. The fumes emanating from the toxic waste led to hospitalization of approximately 9,000 residents in and around Abidjan, in addition to unconfirmed deaths. India was amongst the countries approached for supply of medicines for treatment of the affected population.

2. As a humanitarian gesture, India is supplying medicines valued at approximately Rs. 2 crore to Cote d'Ivoire under its Aid to Africa budget. STC is expected to complete the delivery of the medicines at Abidjan during the month of January 2007.

## ETHIOPIA

### **457. Media interaction of Ethiopian Foreign Minister Seyoum Mesfin and External Affairs Minister Pranab Mukherjee at the Ethiopian Ministry of Foreign Affairs.**

**Addis Ababa, July 5, 2007.**

**Mr. Seyoum Mesfin** : His Excellency, the Minister for External Affairs of India, is currently visiting Ethiopia. So far his visit was crowned with exceptional success. We all know India is a close friend of Ethiopia. Our relations go back to history and they go beyond state-to-state relationship, they are people-to-people relations. India is playing a critical role in many ways in Africa, in the context of the South, and particularly in Ethiopia. The Minister's visit to Ethiopia has given us ample opportunities to touch base on issues of mutual interest - bilateral, regional and international. We have registered a common vision, common policies and direction on the issues we have touched base. We have also committed ourselves to continue building on the longstanding all-weather relationship. What we have just signed between the Minister and me cover a number of sectors and provides a legal framework for cooperation in those areas. The agreement that we have signed is for establishment of a Joint Ministerial Commission between India and Ethiopia. The other agreements that we have signed are for the promotion and protection of investments. This will facilitate the public and private sector, the vibrant Indian private sector, to invest in Ethiopia. The other agreement that we have signed is in the field of science and technology. I need not emphasise the miracles that India has achieved in this area. We are hoping to benefit, through this agreement, from the successes achieved by India. We have also signed an exchange programme in the field of education which is a lynchpin of the cooperation between our two states. An Ethiopian generation has gone to schools taught by Indian teachers. India is a centre of excellence in many ways and many Ethiopian youth and professionals are benefiting from it. We have also signed a Protocol of consultations between the two ministries.

This would enable the ministries as coordinators of sectors, to continuously and regularly consult with each other on issues of bilateral, regional and international importance. Ethiopia can, and must, benefit from India's democracy. India, as you know, is the largest democracy in the world. Not only the largest, but a vibrant, pluralist democracy. Not only that, but (India

is) the largest democratic federated state. Ethiopia can benefit and learn from the experience of India. This is not a visit that you see every day. This is a unique opportunity, Excellency, which would bring Ethiopia and India to further consolidate their friendly ties. We appreciate this message of encouragement, sympathy and support from you. Thank you Mr. Minister.

**EAM (Pranab Mukherjee)** : Thank you Excellency. My distinguished colleague, Minister of Foreign Affairs of Ethiopia, Ladies and Gentlemen, and the media, I entirely agree with my distinguished colleague the Minister of Foreign Affairs of Ethiopia on the significance of the protocols we have signed today, numbering five. These will provide us the institutional framework on which we will build up our already existing excellent relationship. Our objective is to expand it, to deepen it, share each other's experiences and expertise for the benefit of the people of these two great countries. Our links are not of contemporary period, our links go back to the days of history. It is a civilisational link. Over the years, our relationship has gone through different phases but never has there been an occasion that there is lack of enthusiasm, understanding each other and lack of spirit of cooperation with each other. Therefore, my visit to Ethiopia, to my mind, is a great achievement in the sense that we have been able to rediscover the areas of our cooperation.

I had a very fruitful and productive discussion with His Excellency, the Foreign Minister of Ethiopia, who has given me a very detailed brief on the regional developments, including the developments on Darfur, Somalia, and on how the process of integration among countries of the African continent in the form of the African Union is going to evolve. Apart from our bilateral relations, we have exchanged views on important regional and international events, including cross-border terrorism, which is going to be the biggest menace to peace and tranquility in the post-cold war era and which is the biggest violator of human rights. We discussed the reform of the United Nations. We do appreciate the legitimate demand and aspiration of the African continent to have a seat in the permanent category in the United Nations Security Council. We are grateful to the Government of Ethiopia which has steadfastly supported the claim of India to be a permanent member of the Security Council, the expanded form of it. We decided to cooperate with each other in various international fora and as far as possible to have a common approach on international issues including the current trade negotiations, economic cooperation, climate change and I am happy to inform you that on all these issues, we found that our perceptions are synchronizing with each other. We share common values,

common views on most of these issues. To me this is a rewarding visit. I thank you Excellency for the warm hospitality extended to me, to members of my delegation and when I go back to India after my visit I carry a part of this sweet memory and sentiment that you have expressed and which I have obtained from the leadership of Ethiopia. Thank you very much.

**Mr. Seyoum Mesfin** : I would like to bring to the attention of the media if you have missed my earlier remarks, on Ethiopia's strong support to a permanent seat in the United Nations Security Council for India. I told the Minister that what India is asking is not a favour for India but India deserves that permanent seat in the Security Council. Because India, as a member of the family of nations, is distinguished for its role in the negotiations for a fairer world, for its contribution to global peace and security... for this and many other reasons India has a legitimate position to demand a permanent seat in the Security Council and Ethiopia strongly supports this legitimate demand of India. Likewise, India is at the forefront of countries supporting the legitimate African demand that Africa should have a seat in the permanent category. Africa is the only continent not represented in that category.

**Question from the media** : Has there been any progress regarding visa on arrival for Indians?

**EAM (Pranab Mukherjee)** : Indeed yes. I have received a very positive response from His Excellency, the Minister, that Indians coming (to Ethiopia) on their arrival would be issued visas. I would also like to share another good news that we have extended a total credit of US\$ 640 million, and for the current financial year US\$122 million, for the rehabilitation, development and modernization of the sugar sector.

Thank you.

**458. Statement by External Affairs Minister Pranab Mukherjee on his departure from Ethiopia.**

**Addis Ababa, July 6, 2007.**

My delegation and I were extremely happy to be in Ethiopia. We spent three days on Ethiopian soil and have been touched by the warmth of the welcome and the generous hospitality extended to us by the government and people of Ethiopia. Our historical ties go back in history and we have civilisational links.

My visit was at the invitation of H.E. Mr. Seyoum Mesfin, Minister of Foreign Affairs of the Federal Democratic Republic of Ethiopia. The main purpose was to deepen and widen our traditionally warm relations. We look forward to regular exchange of such visits. I have invited His Excellency the Foreign Minister of Ethiopia to visit India in 2008.

An important result of my meeting with the Foreign Minister was to formalize regular bilateral dialogue focussing on bilateral, regional and global issues among the Foreign Offices and to establish a Joint Commission. I also had productive meetings with Their Excellencies the President, Prime Minister, and the Hon'ble Speaker of Ethiopia, apart from discussions with senior cabinet ministers.

In our bilateral discussions, we have drawn up a forward looking agenda of engagement in the political, trade, economic, science and technology, agriculture, culture, education and other sectors. We have agreed to expand the scope of our cooperation in capacity building, cooperation in education, health care etc. The Agreement on Science and Technology and the Education Exchange Programme which we signed will help accelerate the ongoing capacity building efforts including in agriculture and human resource development.

Our bilateral relationship is to be further diversified and expanded. It was decided to enhance economic and business linkages in both public and private sectors with a greater participation by Indian entities in the infrastructural development of Ethiopia. We signed the bilateral Investment Promotion and Protection Agreement and decided to speed up the finalisation of the Double Taxation Avoidance Agreement to provide the necessary incentives and institutional framework.

We have also discussed regional issues including those pertaining to African

integration, Darfur and Somalia and other international issues engaging the attention of the international community such as the fight against terrorism, climate change, trade issues and UN reforms.

Today, I inaugurated the pilot projects of tele-education and tele-medicine, which India will be implementing on an Africa wide basis. This is a positive example of South South cooperation which uses IT and space technology and generates a multiplier developmental effect.

This morning, I had the privilege of addressing the Foreign Affairs, Defence and Security Committee and the Ethiopia-India Parliamentary Friendship Group of the Ethiopian Parliament. I spoke about our commitment to work towards a substantive enhancement of the broad-based bilateral relationship between the two democracies which also share developmental goals.

In my meeting with the Hon'ble Speaker of the House of Representatives, we discussed ways and means of developing closer association between the Ethiopian and Indian Parliaments. I reiterated India's support for the development of democratic institutions in Ethiopia. We agreed to enhance parliamentary exchanges and agreed to have an Indian parliamentary delegation visit Ethiopia in the near future.

Some of the other highlights of our discussions include:

- U Invitation to Prime Minister and Foreign Minister of Ethiopia to visit India. PM Meles Zenawi has already accepted our Prime Minister's invitation to visit India in November this year for the Federalism Conference.
- U Participation by India in Ethiopian millennium celebrations to revive our ancient civilisational links.
- U Agreement to continue to
  - (a) cooperate against international terrorism including cross border terrorism
  - (b) sustain common positions on climate change, UN Reforms including the need for Africa to be represented as a permanent member on an expanded UNSC and
- U An understanding of how the process of integration is going to work in Africa including the move towards greater consolidation of regional economic groupings.

I took the opportunity of my presence in Addis Ababa, the diplomatic capital of Africa, to chair the Conference of Indian Heads of Missions in Sub-Sahara Africa. The purpose was to take stock of our overall relations and see how best we can move these forward to further mutual benefit.

I also met with the AU Chairperson H.E. Prof Alpha Oumar Konare to carry forward the dialogue we began when he visited India in December last year. We discussed ways and means of further strengthening the India-Africa partnership.

All in all, I have had an extremely satisfying visit. It will be our endeavour to build on the understandings reached during this visit.

**459. Agreement between the Government of the Republic of India and the Government of the Federal Democratic Republic of Ethiopia on the establishment of Joint Ministerial Commission.**

**Addis Ababa, July 5, 2007.**

**The Government of the Republic of India and the Government of the Federal Democratic Republic of Ethiopia** (hereinafter referred to as the "Parties");

**TAKING** into account the longstanding relations and cooperation that exists between the two countries;

**DESIRING** to strengthen and consolidate existing political, economic, technical, scientific, social, judicial and cultural cooperation between the two countries;

**Have** agreed as follows:

**Article – 1**  
**Establishment and Composition**

1. The Parties hereby agree to establish a Joint Ministerial Commission (hereinafter referred to as "**the Commission**")
2. The Commission shall be held at the level of Ministers or State/Ministers of Foreign Affairs of the parties and shall include ministers, officials and experts responsible for agreed fields of cooperation.

**Article - 2**  
**Objective of the Commission**

The Commission's objectives shall be:

- a) to consider issues arising in the course of implementation of this Agreement and other cooperation agreements that the Parties may conclude;
- b) to study and propose possibilities for further development of political, economic, technical, scientific, social and cultural cooperation; and
- c) to take decisions on any problem that might arise in the course of implementation of the Agreement based on proposals or recommendations by the relevant committees.

**Article - 3**  
**Areas of Cooperation**

1. The areas of co-operation shall be political, trade, economic, cultural, scientific, judicial and technical. However, these areas may be extended by a decision of the Commission.
2. The Commission may propose to the Parties the conclusion of the appropriate agreements necessary to give effect to the areas of cooperation.

**Article - 4**  
**Meetings**

1. The Commission shall convene, alternately in Ethiopia and India, once every two years on dates to be mutually agreed upon through diplomatic channels. The Commission may, however, hold extraordinary meetings upon specific request by either Party.
2. The heads of delegation of the host country shall chair the meeting of the Commission whereas the other Party shall co-chair.
3. Meetings of the Commission may be attended by the necessary number of counselors and experts of the Parties. The Commission shall comprise equal number of Ethiopian and Indian members.
4. Decisions and other conclusions of the Commission, which shall be made by consensus, shall take the form of agreed minutes and be

signed by both heads of delegation. The Commission may issue joint communique at the end of each session.

**Article - 5**  
**Agenda**

1. The Commission shall conduct its meetings as per the approved working schedule and on agreement between the Chairpersons. Schedules of regular meetings and the preliminary agenda shall be settled by the chairpersons through consultations at least two months before each meeting date.
2. Any amendments or additional issues to the proposed agenda to be discussed by the Commission shall be communicated to the other Party one month prior to the date of a meeting. The Commission shall adopt its draft agenda at the commencement of the meeting.

**Article - 6**  
**Decisions**

1. In urgent matters the chairpersons shall have the right, with mutual consent, to take decisions in the period between meetings of the Commission. The decisions of the chairpersons shall be included in the agreed minutes of the next meeting of the Commission.
2. Those decisions that, according to the statement of one of the chairpersons have to be approved by authorized bodies of its respective country shall come into force on the date of notification by that chairperson about their approval.

**Article - 7**  
**Committees**

1. In order to fulfill its tasks or deal with specific matters on agenda the Commission may set up permanent and provisional committees composed of heads of relevant government departments of the Parties. The heads of each committee shall report on their activities to the Commission.
2. The Commission shall determine the tasks, scope of reference and commission of permanent and provisional committees that shall carry out their work as per the plan and decisions approved by the Commission.

**Article - 8  
Expenses**

1. Each Party shall bear its own expenses, including hotel accommodation, incurred with regard to its participation in any meetings of the Commission, unless otherwise agreed by the Parties.
2. Expenses for organizing the Commissions meetings and the work of its permanent and provisional committees shall be borne by the country hosting a meeting.

**Article - 9  
Settlement of Dispute**

Any dispute arising out of the interpretation or implementation of this Agreement shall be settled amicably through consultations or negotiations between the Parties through diplomatic channels.

**Article - 10  
Amendment**

This agreement may be amended only by mutual agreement of the Parties through an exchange of notes through diplomatic channels. The amendment shall enter into force after the procedure laid down under Article 11(1) of this agreement is complied with.

**Article- 11  
Entry into Force and Duration**

1. This Agreement shall come into force after the exchange of instruments of ratification by the Parties according to their internal constitutional procedures and shall remain in force for a period of five years, unless terminated by either Party giving a six-month written notice in advance through diplomatic channels of its intention to terminate it.
2. The validity period of this agreement shall be automatically extended for subsequent five years, unless one of the Parties notifies the other in writing of its intention to terminate it six months prior to the expiry date.
3. Termination of this Agreement shall not affect programmes or projects

**Done** at Addis Ababa on this 5<sup>th</sup> day of July 2007 in the Hindi and English

languages, each in two original copies, all texts being equally authentic. In case of discrepancy, the English text shall prevail.

**460. Protocol for Consultations between the Ministry of External Affairs of the Republic of India and the Ministry of Foreign Affairs of the Federal Democratic Republic of Ethiopia.**

**Addis Ababa, July 5, 2007.**

**The Ministry of External affairs of the Republic of India and Ministry of Foreign Affairs of the Federal Democratic Republic of Ethiopia hereinafter referred to as “the Ministries”;**

**IN THE SPIRIT** of the friendly ties and cooperation between the two countries;

**AIMING** at promoting bilateral relations in various fields;

**ACKNOWLEDGING** the usefulness of exchanges of opinions and consultations between the two countries at different levels;

**Have AGREED** as follows: -

**Article 1**

The Ministries agree to hold regular meetings at the level of Ministers, as appropriate at the level of State Ministers or Director-Generals of the Ministry of Foreign Affairs alternately in the capitals of the two countries for consultation on their bilateral relations as well as on regional and international issues.

### **Article 2**

The Ministries agree to facilitate consultation between high-ranking officials of the two countries participating at international conferences with a view to exchanging information, coordination and cooperation on issues of common interest and concern.

### **Article 3**

The Ministries shall also promote coordination, consultation and exchange of information between their respective diplomatic missions accredited to third countries and to international organizations on issues of common interest.

### **Article 4**

The Ministries shall hold consultations to promote exchange of experiences and mutual assistance in training of diplomatic personnel. They shall explore the possibilities of co-operation between their diplomatic training institutions and the exchange of lectures in such institutions.

### **Article 5**

1. The provisions of this Protocol shall be without prejudice to any other treaty or agreement to which any of the Ministries has obligations.
2. The present Protocol may be modified or amended by agreement of the Ministries.

### **Article 6**

The protocol shall enter into force on the date of signature and remain in force for a period of five years. Thereafter, it may be automatically renewable for successive periods of one year at a time, unless either Party notifies the other in writing, of its intention to terminate this Protocol six months before the date of its expiration.

**IN WITNESS WHERE OF**, the undersigned being duly authorized thereto by their respective Ministries have signed this Protocol.

**Done** at Addis Ababa on this 5<sup>th</sup> day of July 2007 in the English and

Hindi languages, each in two original copies, both texts being equally authentic. In case of discrepancy, the English text shall prevail.

## GABON

### **461. Press Release of the Ministry of Defence re: Providing Expertise to Gabonese Defence Personnel in disaster management, training and healthcare.**

**New Delhi, November 6, 2007.**

India will provide expertise to the small defence forces of the Central African Republic of Gabon in disaster management, training and healthcare. This was agreed during talks between the visiting Senior Minister for National Defence of Gabon, Mr. Ali Bongo Ondimba and the Defence Minister Shri AK Antony in New Delhi last night. Shri Sanjeeva Kumar, Joint Secretary in the Defence Ministry, later gave a presentation on the potential for cooperation during the delegation level talks.

Ties between the two countries have been expanding since the visit of a high-level Ministerial delegation led by the Gabonese President Mr. El Hadj Omar Bongo Ondimba to India in May last year. India offered a \$14.5 million Line of Credit to Gabon for a housing project during the visit of Gabonese Deputy Minister of Housing Development in July, this year. However, there have been no high-level visits to Gabon from the Indian side.

Gabon, which is slightly bigger than Uttar Pradesh in size, has a very small military of about 10,000 personnel, divided into army, navy, air force and national police. Besides, France, who ruled Gabon for 75 years till 1960, maintain a battalion of 750 marines in the African nation located on the Atlantic Coast. Gabon, whose oil sector accounts for nearly half its GDP, quit the Organisation of Petroleum Exporting Countries (OPEC) in 1995.

**462. Memorandum of Understanding on Consultations between the Ministry of External Affairs of the Republic of India and the Ministry of Foreign Affairs of the Socialist People's libyan Arab Jamahiriya.**

**New Delhi, March 23, 2007.**

**The Ministry of External Affairs of the Republic of India and the Ministry of Foreign Affairs of the Socialist People's Libyan Arab Jamahiriya, hereinafter referred to as "the Parties".**

**Mindful** of traditional friendly relations between their countries and peoples;

**Desirous** of further developing and strengthening their friendly relations, cooperation and mutual understanding;

**Considering** that their cooperation and mutual understanding would contribute further to promoting international peace and security;

**Conscious** of the usefulness of regular consultations and exchanges between the two countries at different levels on bilateral relations and international matters of common interest;

**Reaffirming** their adherence to the Purposes and Principles of the United Nations Charter,

**Have agreed** as follows:

**ARTICLE 1**

The Parties shall hold regular consultations to review all aspects of their bilateral relations and to undertake exchange of views on international issues of mutual interests and interaction in the international arena.

**ARTICLE 2**

Consultations on bilateral relations shall include all areas, especially political, as well as economic, commercial, scientific, technical and cultural cooperation.

It shall include consultations by representatives of the two countries in international organizations, conferences and meetings,

**ARTICLE 3**

Consultations within the framework of this Memorandum of Understanding

will be held once every year, alternately in Tripoli and New Delhi at the level of Secretary or equivalent.

Dates, place and agenda for the consultations shall be determined mutually through diplomatic channels.

#### **ARTICLE 4**

The provisions of this Memorandum of Understanding shall be without prejudice to any other treaties or agreements to which both countries are parties.

#### **ARTICLE 5**

Any differences or disputes that may arise for the implementation of this Memorandum of Understanding shall be settled by mutual consultations between the Parties.

#### **ARTICLE 6**

The present Memorandum of Understanding shall enter into force on the date of its signing and shall remain in force for a period of five years. It may be further extended for subsequent periods of five years at a time, unless either of the Parties gives to the other a written notice six months in advance of its intention to terminate it before the date of its expiry.

**Done** at New Delhi on this 23rd March, 2007 in two originals each in the Hindi, Arabic and English languages, all texts being equally authentic. In case of any divergence of interpretation, the English text shall prevail.

Secretary for Asian Affairs**

**463. Briefing Points by Official Spokesperson on External Affairs Minister Pranab Mukherjee's visit to Libya.****New Delhi, May 27, 2007.**

- U External Affairs Minister Shri Pranab Mukherjee was received for a one-hour discussion by Libyan leader H.E. Col. Muammer Al Gaddafi at his desert camp near the coastal town of Sirte.
- U The wide ranging discussions were held in a very warm and cordial atmosphere. Traditional friendship between the two countries, India's support for Libya's position and principled opposition to sanctions were recalled.
- U Bilateral cooperation, particularly cooperation in the oil and petroleum sectors, as well as human resource development were discussed. Col. Gaddafi said that the sky is the limit for cooperation between the two countries.
- U While discussing regional issues, EAM briefed the Libyan leader on developments in SAARC, India-Pakistan composite dialogue, India-China relations as well as Trilateral India-Russia-China dialogue. India's relations with Africa and greater cooperation in this regard were also discussed. Col. Gaddafi said that he would himself work towards further strengthening India-Africa partnership.
- U On international issues, discussions focused on the need for reform in the UN, including the UN Security Council structure. Col. Gaddafi reiterated that India has a right to have a permanent seat on the UN Security Council.
- U EAM handed over a letter from Prime Minister Dr. Manmohan Singh inviting Col. Gaddafi to visit India. The Libyan leader said that he looked forward to visiting India.

## MAURITIUS

### **464. Briefing Points by Official Spokesperson on the visit of External Affairs Minister Pranab Mukherjee to Mauritius (17-19 December, 2007).**

**New Delhi, December 18, 2007.**

- External Affairs Minister Shri Pranab Mukherjee is in Mauritius to co-chair the 10th India-Mauritius Joint Commission Meeting. In this context, today EAM called on the Mauritian Deputy Prime Minister and Minister of Finance and Economic Development, H.E. Ramakrishna Sithanen. External Affairs Minister then proceeded to the opening ceremony of the 10th JCM.
- EAM called on the Mauritian Minister of Foreign Affairs, International Trade and Cooperation, H.E. Madan Murlidhar Dooloo. During the course of this meeting, a Memorandum of Understanding for the Establishment and Development of the Institute of Diplomacy and Foreign Trade in Mauritius was signed between India and Mauritius.
- After this engagement, EAM proceeded for the signing of the Agreed Minutes of 10th India-Mauritius Joint Commission Meeting, with Minister Ramakrishna Sithanen. EAM also subsequently addressed a Joint Press Conference along with Minister Ramakrishna Sithanen and Minister Madan Murlidhar Dooloo.
- EAM will also call on the President and the Prime Minister of the Republic of Mauritius later.

**465. Briefing Points by Official Spokesperson on the 10<sup>th</sup> India-Mauritius Joint Commission Meeting held in Port Louis on December 18, 2007.**

**New Delhi, December 19, 2007.**

- In the period approaching the fortieth anniversary of independence of Mauritius, the two sides recalled the historic collaboration, including active assistance from India that led to this event.
- Relations have gone from strength to strength and the two sides agreed to work together to deepen this relationship.
- India thanked Mauritius for its steadfast support to India's candidature for the permanent membership of the UN Security Council as also for the crucial role Mauritius has played in forging India's relations with regional economic communities such as COMESA and SADC as well as the African Union.
- The two sides noted the importance of reinforcing cooperation in combating international terrorism and related matters. The next meeting of the Joint Working Group is scheduled for 21-22 January 2008 in Mauritius.
- The two sides agreed to continue with the ongoing schedule of hydrographic surveys.
- Both sides agreed to carry forward the ongoing cooperation in the exploration and exploitation of hydrocarbon in the Mauritian EEZ.
- Alliance to develop Mauritius as a services centre and seize the opportunities that the globalised world offers to both countries- the Mauritian side was requested to make concrete proposals for the consideration of Indian authorities.
- Developing Mauritius into a Knowledge hub- the Mauritian side expressed interest to attract Indian Universities to set up offshore campuses in Mauritius and use Indian expertise to design and deliver courses in areas supportive of regional integration.
- Both parties agreed to deepen bilateral economic cooperation by encouraging their private sectors to explore, develop and implement joint projects or activities relating to trade and investment, in areas

of mutual interest for example bio-fuel, agro industry and Biotechnology, Pharmaceuticals, Fisheries, Textile and Fashion, Banking and Finance, Mining and Mineral, and Infrastructure.

- Pan African e-network- The Indian side informed of the plan to operationalise the project in March 2008.
- The request of the Mauritian side for co-terminal rights for Air Mauritius to operate on the Mauritius- Bangalore- Chennai sectors on a provisional basis has been granted.
- The Joint Working Group on shipping will meet in January 2008.
- The two sides agreed to renew the Memorandum of Understanding on Agriculture at an early date. They also agreed to conclude the Agreement on Plant Health Protection at the earliest.
- The Mauritian side submitted the list of projects under the US\$ 100 million Line of Credit offered during the visit of the Prime Minister of Mauritius to India in October 2005. These will be very expeditiously processed.
- Both sides agreed to make optimum use of the training and scholarship programmes under the ITEC/SCAAP programmes and under the various Scholarship Schemes.
- The two sides agreed to the renewal of the Programme for Cultural Cooperation for the period 2008 to 2010.
- Aapravasi Ghat- The Mauritian side said that it would forward specific project proposal regarding equipment for the Interpretation centre, and expertise for renovation of the site. Indian side would address these in a positive spirit.
- Both sides agreed to examine the setting up of a Virtual Agri-Business Incubator operating within an international network to provide supporting services for business development to potential agricultural entrepreneurs.
- Rajiv Gandhi Science Centre- The Mauritian side requested the Indian side to renew exhibits and provide technical assistance to the Centre. It also plans to set up a hybrid planetarium. The Indian side expressed its willingness to provide equipment, fresh exhibits and expertise.

- Cooperation in the field of non-conventional energy sources- The two sides agreed to expedite the initiatives and activities identified within the context of the MOU namely – o project for wind resource assessment in Mauritius;o setting up of a specialised renewable energy centre in Mauritius;N o Solar Energy Assessment.
- The delegations noted the importance of supporting the development of SMEs both as avenues for employment creation, poverty alleviation and economic democratisation.

## **NIGERIA**

### **466. Media Briefing by Secretary (West) in Ministry of External Affairs Nalin Surie on Prime Minister's visit to Nigeria.**

**New Delhi, October 9, 2007.**

Prime Minister will be paying an official visit to Nigeria from 14 - 16 October, 2007 at the invitation of the President of the Federal Republic of Nigeria, H.E. Mr. Alhaji Umaru Musa Yar'Adua.

Relations between India and Nigeria have traditionally been friendly and warm. Both countries are members of the Commonwealth, the United Nations, G-77 and NAM. India had established its diplomatic representation in Nigeria in 1958 even before Nigeria attained independence in 1960.

Both India and Nigeria are multi-religious, multi-ethnic, multi-lingual and plural societies. Both are democracies. Nigeria is India's largest trading partner in Africa. In 2006-07, trade between our two countries was USD 7.9 billion. Nigeria is one of India's largest supplier of crude oil. A number of Indian companies (both public and private) have operations in Nigeria. This includes Indian oil companies. India has had a long-standing defence relationship with Nigeria and we have been involved in training of Nigerian defence personnel and setting up of military training institutions in that country.

Nigeria is a leading member of the African Union and exercises great influence not only in the entire continent but also in West Africa. Cooperation between our two countries at the United Nations has always been close, including on issues such as the fight against international terrorism. Our two countries have very similar views on reform of the UN Security Council and other critical issues on the global agenda such as climate change, the Doha Development Round and issues pertaining to development.

During his visit, Prime Minister will hold extensive discussions with President Yar'Adua on issues of bilateral, regional and multilateral interest. He will also address a joint session of the Nigerian Parliament. The Economic Management team of the Nigerian President will meet with him and the President of ECOWAS will call on him. At the end of the visit, we will issue a substantive joint statement. Some Agreements/MOUs are also under preparation for signature.

It is our expectation that during Prime Minister's visit, the commonalities and complementarities that exist between our two countries would be further

strengthened and a roadmap for the further development and diversification of our bilateral relations will be laid out. The visit will strengthen our traditionally close partnership with Nigeria.

**Question:** When was the last Prime Ministerial visit from India to Nigeria, or for that matter to an African country on a bilateral visit?

**Secretary (West):** The last bilateral visit to Nigeria was in September 1962 by Pandit Jawaharlal Nehru.

**Question:** How is India's trade with Nigeria compared with China's trade with Nigeria?

**Secretary (West):** India's trade is less than Chinese. I cannot offhand remember China's trade with Nigeria. But I am sure it is much larger than ours. You must remember that India is, in comparison with China, a relatively smaller trade player globally.

**Question:** Are we signing any agreements?

**Secretary (West):** Yes, several MoUs will be signed.

**Question:** Are we taking up some new fields or some new exploration blocks? What are we doing in the oil sector?

**Secretary (West):** As you know, Nigeria is already one of our largest suppliers of oil. Last year it provided eleven per cent of our crude requirement. Indian public and private companies are already active in Nigeria in the oil sector. This is an area of cooperation which already exists between our two countries.

**Question:** But no new projects?

**Secretary (West):** New projects will come with time. We are interested and we have to wait for their gas and oil fields for exploration purposes. There are various contracts under way. NTPC for instance is negotiating with them.

**Question:** What is the size of Indian community in Nigeria?

**Secretary (West):** It is 20 to 25 thousand plus. It is difficult to give an exact number. There are old settled Indians, there are a lot of entrepreneurs, there are a lot of professionals. The Chellarams for instance are famous in Nigeria. They have been there forever.

Thank you.

**467. Remarks by Prime Minister Dr. Manmohan Singh at the Reception hosted by the High Commissioner of India.**

**Abuja, October 14, 2007.**

High Commissioner and Mrs. Viswanathan,

Distinguished Guests, Fellow Indians,

Let me wish you all "Eid Mubarak" and in advance, "Happy Diwali". I Hope the festive season brings each one of you and your families joy, success and happiness.

My wife and I are delighted to be in Nigeria. Ever since our arrival we have been made to feel at home. The warmth of the reception and the graciousness of the hospitality have overwhelmed us.

India and Nigeria share many commonalities. Our historical experience and common developmental challenges have brought us close together. We share common hopes and aspirations. India is the largest democracy in the world and Nigeria is the largest democracy in Africa. We are multi-ethnic, multi-religious and multi-lingual countries governed by system of plural democracy.

India's partnership with Nigeria and with Africa is important for us. We now seek to build on the goodwill that exists between us to shape a strong contemporary partnership that is multi-faceted and mutually beneficial.

During my Visit, I Look forward to holding extensive discussions with President Yar'adua and his Colleagues have been given the honour of addressing the Nigeria parliament and am Looking forward to this opportunity. It will be our intention to place India and Nigeria on a higher and qualitatively new footing.

Nigeria is India's largest trade partner in Africa. It also plays an important role in meeting India 's quest for energy security. Indian companies, both public and private, have found willing homes in Nigeria.

To our Nigerian friends present here today I wish to convey the warm greetings of the people of India. We greatly value your unstinting contribution to strengthening our traditional friendship and to diversifying our relationship in a Meaningful manner.

To members of our India community let me say that India is proud of you. You are our bridge that unites India and Nigeria. You have acquainted

yourself most creditably. You have contributed to the development of friendship and goodwill between our countries. You have also contributed to the development of Nigeria by your initiative, enterprise and hard work.

India teachers and doctors who came in the 1970s and 80s are still remembered fondly in Nigeria. I am told that Indian Industry and business is the second largest employer in Nigeria. Your contribution in the area of social work, especially in the health sector is widely appreciated.

As a people we value the virtues of tolerance and co-existence among cultures, language, religions, political and social views and different way of life. I believe that this background has something to do with the remarkable adaptability and resilience of India communities all over the world.

While commending the success of India here, I would also like to pay tribute to the openness of the Nigeria society, which has created an enabling climate for our people to do well and to flourish.

The government attaches the highest importance to the safety and security of our citizens living abroad. We have been assured at the highest level of the host government that this is a matter that is being given high priority. Our mission will offer all necessary assistance to our citizens in distress.

We are engaged in efforts for the social and Economic transformation in the framework of an open society and an open economy, committed to the rule of law and to fundamental human freedoms. Our success in combining will have a profound impact o the world.

We are a rapidly growing economy and we are earning acclaim for the the quality of our human resources. We are confident that in the coming years we can continued to sustain a growth rate of between 9-10 percent. We need this rapid growth to meet our socio-economic objectives and to rid our country of chronic poverty. India offers limitless opportunities and is looking to its overseas communities to contribute their might.

India has entered an exciting new phase. It is a vibrant and self-confident nation. I invite you all to contribute your spirit, endeavour and enterprise in the service of your homeland.

Thank you.

**468. Speech by Prime Minister Dr. Manmohan Singh at the  
Joint Session of the Nigerian National Assembly.**

**Abuja, October 15, 2007.**

"India, Nigeria and our 'Partnership with Africa' in the 21st Century"

Hon'ble President of the Senate Mr. David Mark,

Hon'ble Speaker of the House of Representatives Ms. Patricia Etteh,

Distinguished Members of the National Assembly,

I am deeply honoured by this opportunity to address you here today in this new temple of your democracy. I am also delighted to be in this beautiful city of Abuja, which symbolizes a dynamic Nigeria and a new dawn in the life of an ancient people.

I stand before you to convey to the people of Nigeria the greetings and good wishes of over a billion Indians. We have been your brothers and friends of long standing.

This is the fiftieth year of our diplomatic relations. In these fifty years, we have associated closely with your efforts for the liberation of Africa and for wiping out the indignities of apartheid from the continent. We have worked together in the Nonaligned Movement to promote South-South linkages for development. More recently we carried this partnership into the G-20 framework.

Today, our two countries have launched a Strategic Partnership that would augment these traditional links with exciting new opportunities for our collaboration. I would highlight some major aspects of this Partnership.

Ladies and Gentlemen,

There is a natural logic in ties between the largest democracy in the world and the largest democracy in Africa. We are multi-religious, multi-ethnic and multi-lingual societies. Our societies embrace modernity while preserving their traditions, and prove, in their practice of pluralism, that diversity can strengthen societies. The success of diverse democracies like Nigeria and India is important to prove that democracy and development go hand in hand.

The principal challenge before us remains the socio-economic development

of our people. Economic growth has to be accompanied by a better distribution of its benefits. The information revolution and higher levels of literacy have raised popular expectations. Disparities are leading to social tensions. Our bilateral cooperation must make a real difference to these problems.

Ours is a partnership for peace, stability and security. Without peace, there cannot be sustained economic progress. Both India and Nigeria seek peace and stability in their neighbourhood. Nigeria's contributions to conflict resolution in Africa are well known. India has also been active in peacekeeping efforts in this continent over the past six decades. We are united in our condemnation of terrorism as a grave threat to humankind. We seek to upgrade our cooperation on security matters to meet these emerging threats and challenges to our social fabrics.

It is a partnership for economic growth. There are many complementarities in our rapidly growing economies. Nigeria is already India's largest trading partner in Africa, but we can vastly expand and diversify our trade. The promotion of small and medium industries is a priority area of cooperation.

There has recently been a surge in Indian investment abroad in infrastructure, energy, pharmaceuticals and automobiles. We would like to see this investment thrust extending into Nigeria. Our two countries can promote human resource development and transfer of technologies in key areas of the knowledge economy like information technology and biotechnology. India is well placed to offer cost effective transportation systems particularly in the railways sector.

Our partnership is for development. We need to share experiences on effective strategies for sustainable development, poverty alleviation, effective healthcare facilities and universal education. In this context, being largely agrarian societies, we need to emphasize on cooperation in agricultural research, soil and water management, and food processing.

It is a partnership for energy security. Energy security is a vital prerequisite for sustained growth and sustainable development. Nigeria's rich natural resources provide the firm base for our mutually beneficial cooperation for energy security. India and Nigeria should also promote research and development in efficiency of energy production, clean technologies and renewable sources of energy.

Finally, it is a partnership to steer the global political and economic agenda towards addressing the legitimate concerns of developing countries.

We need to jointly seek changes in the international financial and trading system to make it development-friendly. The crushing burden of debt on the poorest of the poor, and barriers to trade in the form of restricted market access and distortions in subsidies need to be removed.

We have a vital interest in preserving and promoting the effective role of the United Nations. For this, the structure and functioning of the organization has to reflect contemporary global realities and it has to become a truly representative world body.

India is grateful for Nigeria's support for its permanent membership of an expanded Security Council. We also believe that no reform of the Security Council would be complete without adequate representation from Africa. We support Nigeria's view that the General Assembly should resume its role as the pre-eminent organ of the United Nations, as originally envisaged in the United Nations Charter.

I believe that these elements define for us a coherent plan of action which would set the trajectory of our bilateral and multilateral cooperation in the next few decades. Leaders in government, parliament, industry and civil society in both our countries have to commit themselves to this concept to translate it into action. Greater exchanges between our parliamentarians will be an important step in this direction.

### **Partnership with Africa**

Honourable Members,

India also has a vision for a Partnership with Africa for the 21st century. I believe it is very appropriate that I discuss it with you in Nigeria, because your support and commitment are critical to realizing this vision. Our first Prime Minister, Pandit Jawaharlal Nehru, while addressing this Assembly in 1962, said - and I quote:

"Of one thing there can be no doubt, and that is the vitality of the people of Africa. Therefore, with the vitality of her people and the great resources available in this great continent, there can be no doubt that the future holds a great promise for the people of Africa."

It is on this promise that we envision an Africa that is self-reliant, economically vibrant and at peace with itself and the world. Through the Partnership with Africa, India will offer its fullest cooperation in utilizing the vitality of the African

people and the resources of the continent to fulfill the promise of a resurgent continent.

Our partnership will be based on the fundamental principles of equality, mutual respect and mutual benefit, which would strengthen the trust and understanding between our peoples.

Our rich cultural and historical legacies are a common heritage of all humankind. We will incorporate in our partnership with Africa the importance of protecting civilizational identities and preserving cultural diversities.

We will promote the multi-faceted expansion of our economic relationship. The objective would be not just a quantitative increase in trade and investment, but also a qualitative enhancement of economic competitiveness and technological capabilities.

Indian companies are fast becoming major investors in Africa. We will encourage such investments in a manner that contributes to Africa's economic growth and socioeconomic development.

India has extended concessional lines of credit to promote economic activity and for developmental projects in a number of African countries. We have contributed to the New Partnership for Africa's Development (NEPAD) and ECOWAS. India launched the TEAM-9 initiative - a project-based technical assistance programme for the West and Central Africa. We propose to have a focussed dialogue with African leaders to evaluate the effectiveness of these efforts and to enhance their relevance to national economic targets.

We shall aim to develop and enrich our intellectual capital and human resources, including through the use of modern science and technology.

The India-Africa technical cooperation programme today involves an outlay of over one billion US dollars. Annually over 15000 African students study in India. Many Indian engineers, doctors, accountants live and work in Africa.

The Pan African E-network project, that seeks to bridge the 'digital divide' between Africa and the rest of the world is one of the most far-reaching initiatives undertaken by India. This Project envisages connecting 53 nations of the African Union through a satellite and fibre optic network that will provide effective communication and connectivity among themselves. The project also envisages connecting regional centres in Africa to institutions in India to provide tele-education and tele-medicine facilities.

We will work steadfastly for the preservation of our ecology and environment

and collaborate on local solutions to problems such as climate change and conservation of scarce resources. We wish to learn from the work of African environmentalists who have pushed the frontiers of discourse on sustainable development to embrace democracy, human rights and women's rights.

We will establish a sustained dialogue to identify joint approaches on issues such as combating terrorism, nuclear disarmament, proliferation of weapons of mass destruction, trafficking of small arms and narcotics.

We will aim for much greater convergence with Africa on key developmental issues. We will work closely with the African Union in promoting the achievement of the Millennium Developmental Goals. We will share our experiences with African countries on holistic approaches to the problems of poverty, food security, healthcare deficit and denial of education.

Ladies and Gentlemen,

As we confront the opportunities and challenges of globalization, we need to upgrade and adjust the content of our traditional relations to respond to contemporary realities. This is the transformation that we propose in our Strategic Partnership with Nigeria and in our Partnership with Africa in the 21st century.

To continue the dialogue on our 'Partnership with Africa' and to fine tune its constituent elements, India will host the first India-Africa Forum Summit in 2008. We would deeply appreciate Nigeria's support for this important initiative.

Honourable Members, I have shared some of my thoughts with you with candour, and the confidence that comes from speaking to close friends. I thank you for your attention.

**469. Abuja Declaration on Strategic Partnership between India and Nigeria signed during the visit of Prime Minister Dr. Manmohan Singh to Nigeria.**

**Abuja, October 15, 2007.**

His Excellency Dr. Manmohan Singh, Prime Minister of the Republic of India paid an official visit to Nigeria from 14-16 October 2007 at the invitation of His Excellency Umaru Musa Yar'Adua, President of the Federal Republic of Nigeria. During his visit, he held intensive and fruitful discussions with President Yar'Adua and addressed a joint session of the two houses of the Nigerian National Assembly.

India and Nigeria are linked by common historical experiences and in the contemporary context are united in the desire to work towards democratic pluralism, tolerance, economic development and social justice. Both are multi-religious, multi-lingual and multi-ethnic societies with a vibrant media and civic society. They are both members of the United Nations, the Commonwealth, the G-77 and NAM and have a history and tradition of working closely together in regional and international organizations.

The leaders of both sides reiterated the importance of ensuring socially inclusive economic growth in their countries. They agreed that exchange of experiences and programmes between the two countries with respect to poverty alleviation would be of great benefit to each other and to other countries in Africa.

Nigeria is India's largest trading partner in Africa and the potential and opportunities for substantially enhancing trade and investment between the two countries are largely untapped. Both sides agreed to significantly enhance mutually beneficial trade and investment exchanges with each other's countries in sectors such as infrastructure (including railways), agriculture, food processing, small and medium enterprises, power generation, fertilizers, ICT, pharmaceuticals, automobiles, auto-components and other sectors. In this context, the two leaders desired that the fifth meeting of the Joint Commission be held within the next few months and should draw up a detailed roadmap for this purpose.

The Indian side expressed its thanks to the Nigerian side for the rapidly growing partnership between the two countries in the energy sector. They confirmed the understanding that both governments would continue to encourage further cooperation between their companies in the oil and gas sectors of both countries.

India and Nigeria have had longstanding cooperation in defence matters. Both sides agreed to further strengthen such cooperation and expand its ambit. In this context, India agreed to establish two IT laboratories in the defence academies of Nigeria. Both sides also agreed to enhance cooperation in respect of UN peacekeeping operations in which their countries have traditionally played and continue to play an important role.

Both sides stressed the need to enhance air and maritime connectivity between the two countries. They instructed that a new Civil Aviation Agreement should be entered into within six months and further efforts should be made to improve maritime connectivity.

Nigeria and India have a good tradition of cooperating in the fight against international terrorism and drug trafficking. It was agreed that such cooperation shall be enhanced and for this purpose appropriate agreements would be signed. Both sides also reiterated their unequivocal condemnation of terrorism in all its forms and manifestations. They stressed that there was no justification whatsoever for any act of terrorism.

Both sides agreed to strengthen cooperation in culture, education, health, S&T & ICT sectors. Exchanges among Parliamentarians, youth and civil society would also be further encouraged and developed.

The Indian side conveyed to the Nigerian side its intention to further strengthen its cooperative partnership with Africa; a partnership that dates back to Africa's struggle against colonialism and apartheid. It is India's intention to renew its partnership and upgrade its content with a view to meeting contemporary African requirements. The Nigerian side expressed its appreciation for India's consistent and longstanding support to Africa and to African causes and conveyed its happiness at India's intention to host an India-Africa Forum Summit in India in April 2008. Nigeria would be happy to participate in that Summit which is intended to focus on finding ways and means by which India could further enhance its support to the countries of Africa to meet their socio-economic developmental objectives.

Both sides reiterated the importance they attach to matters pertaining to climate change and agreed that the solution to the problem of climate change, which is essentially the outcome of the unsustainable production and consumption patterns in the developed world, cannot lie in the perpetuation of poverty in developing countries. Developing countries cannot accept approaches that impede growth and retard poverty alleviation obligations. They agreed that both sides would cooperate closely, along

with other developing countries, at the UNFCCC and also within the framework of the Kyoto Protocol.

Prime Minister Manmohan Singh and President Yar'Adua recalled that both India and Nigeria are members of the G-20 and G-33 and stressed the importance of continuing close coordination between the two governments to effectively realize the development dimension in every aspect of the outcome of the negotiations on the Doha Developmental Agenda. They reiterated the urgent need to successfully complete the Doha Round in order to promote the interests of the developing countries in keeping with the Doha mandate.

Nigeria is a leading member of the African Union and of ECOWAS. Prime Minister Manmohan Singh conveyed to President Yar'Adua that India attaches particular importance to exchanging views with the government of Nigeria not only on matters pertaining to Africa and West Africa but also on critical matters on the global agenda.

India and Nigeria cooperate closely at the United Nations. In this context, both sides stressed the need to promote democratization of the structures of global governance by increasing the participation of developing countries in their decision making bodies. They recalled that both India and Nigeria had co-sponsored the recent draft resolution pertaining to the UN Security Council reform process which the two countries had tabled along with other African, Asian, Caribbean and Pacific Island States at the recently concluded 61st Session of the UN General Assembly.

India and Nigeria reaffirmed their understanding that no reform of the United Nations would be complete without reform of the UN Security Council. Nigeria reaffirmed its support for India's permanent membership on an expanded UN Security Council. India will respect Africa's consensus with respect to new permanent membership from Africa.

The two leaders also had a detailed exchange of views on regional issues of mutual interest in Africa, the Asia Pacific and on international issues.

During the visit the following agreements were signed:

- U MoU between Foreign Service Institute and the Nigerian Foreign Service Academy
- U MoU between Indian Council for World Affairs (ICWA) and Nigerian Institute of International Affairs

- U Protocol for Foreign Office Consultations
- U MoU on Defence Cooperation

It was agreed that to enhance and broad base cooperation, the following agreements would be finalized and signed within the next six months:

- U Double Taxation Avoidance Agreement
- U Bilateral Investment Promotion & Protection Agreement
- U Bilateral Inter Governmental Science & Technology Agreement
- U Bilateral Air Services Agreement (renewal of 1976 agreement)
- U Mutual Legal Assistance Treaty- Extradition Treaty
- U Trade Agreement
- U Agreement on Cooperation against trafficking of Drugs etc.
- U Cultural Exchange Programme 2008-2010

The Nigerian side described Prime Minister Manmohan Singh's visit as a landmark in bilateral relations. Taking into account the commonalities and complementarities between the two countries it was agreed to establish a Strategic Partnership between India and Nigeria that would cover bilateral political, economic, trade, security, cultural, education, S&T and international dimensions.

Prime Minister Manmohan Singh expressed his gratitude to the Government and people of Nigeria for the hospitality and warm welcome received by him and his delegation. He invited President Yar'Adua to pay a State visit to India at a mutually convenient date. The invitation was accepted with pleasure. PM Manmohan Singh also expressed his happiness that President Yar'Adua had designated a high-level delegation led by the Vice President, Dr Goodluck Jonathan, to represent him at the 4th International Conference on Federalism" in New Delhi in November 2007. That occasion would provide another opportunity for the leadership of the two countries to exchange views on issues of topical interest.

**470. Memorandum of Understanding (MOU) between the Ministry of Defence of the Government of the Republic of India and the Ministry of Defence of the Government of the Federal Republic of Nigeria concerning Defence Cooperation.**

**Abuja (Nigeria), October 15, 2007.**

**PREAMBLE**

**The Government of the Republic of India and the Government of the Federal Republic of Nigeria**, hereinafter referred to as "Parties", and separately as a 'Party';

**ACKNOWLEDGING** the mutual benefits inherent in defence cooperation between the parties;
